CORTEX™-M3

Reshaping the microcontroller marketplace, the STM32 MCU family is the first to combine 32-bit performance and features with the integration and end-user cost of today's 16-bit MCUs. The STM32 brings new degrees of freedom to MCU users with its high performance Cortex™-M3 core, low power consumption of only 36mA at 72MHz, standby modes down to 2uA, first class peripherals, maximum integration, simple architecture, and easy-to-use tools.

The STM32 family is available in two pin and software compatible product lines. The Performance Line runs up to 72MHz and the Access Line provides an entry point for 32-bit MCU performance at 16-bit MCU cost. Both product lines are available with embedded Flash options from 32KB to 128KB and packages ranging from 48 to 100 pins. This broad family combines high performance with outstanding power efficiency to address multiple applications including point-of-sale products, USB devices, industrial automation, medical, building security, high-end appliances, and more.

Experience Mouser's time-to-market advantage! Our vast selection of the NEWEST products, NEWEST technologies, **new catalog every 90 days**, no minimums, and same-day shipping on most orders, gets you to market faster. We make it easy to do business with Mouser! For more information or to purchase STMicroelectronics products online, visit *www.mouser.com/st* today!

ST

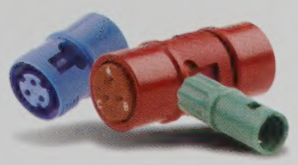
STM32 ARM® Cortex™-M3 MCU

The STM32 is the first family of MCUs to combine 32-bit performance and features with the integration and end-user cost of today's 16-bit MCU.
Page: **192**

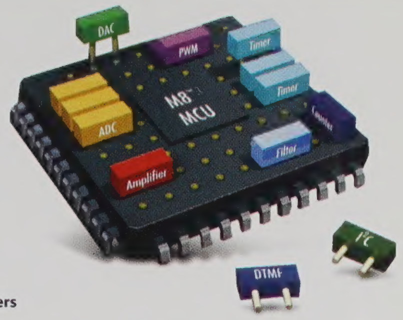


Amphenol®

Environmentally Sealed In-Line Junctions

Compact, cylindrical plug with receptacle housings that lock firmly together in a simple "twist and pull" or "squeeze and pull" motion.

Page: **1136**



CYPRESS
PERFORM

PSoC® Mixed Signal Controllers

Programmable System-On-Chip™ (PSoC®) mixed-signal array that is a complete system-level solution with configurable digital and analog peripherals, an 8-bit microcontroller, and three types of embedded memory. PSoC combines maximum design flexibility with ease of use and minimizes design time, chip count, board size, and cost for products targeting the consumer, computation, communications, automotive, and industrial equipment markets.

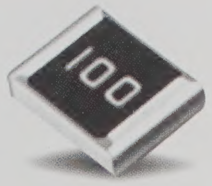
New Products highlight

PRODUCT NEW

The products on this page represent a small portion of the NEW PRODUCTS added to our catalog. For the complete list of all NEW PRODUCTS, visit ***www.mouser.com/newproducts*** today!

NEW PRODUCTS are easily identified by the New Product logo next to the part or a blue banner on the outside of the catalog page.

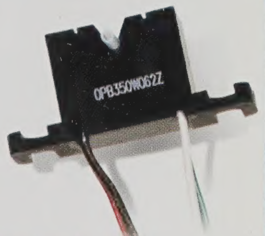


BOURNS®
Reliable Electronic Solutions

Power Resistors: CRA2010/CRA2512

High-power current-sense chip resistors with power rating at 70ºC.

Page: **552**



TT electronics
OPTEK Technology

Fluid Sensors

Liquid sensors designed to work with 1/16", 1/8", 3/16", and ¼" outside diameter clear tubes.

Page: **152**

LEMO

Redel® P Series Connectors

Redel self-latching plastic connectors with alignment key for medical applications.

Page: **1150**

OMRON
ELECTRONIC COMPONENTS

MOSFET Relays: G3VM-22CO/FO

MOSFET relays feature unique contact construction with one input channel driving two output channels.

Page: **1551**

C&D TECHNOLOGIES

Power Inductors: 4500 and 4600 Series

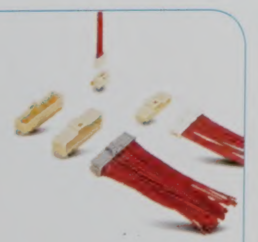
Bobbin-wound, shielded, surface mount power inductors.

Page: **830**

MICROCHIP

Development Tools – DM300027 Starter Board

Low-cost, 16-bit, 28-pin board supports 28-pin PIC24 microcontrollers or digital signal controller (DSC) devices.
Page: **184**

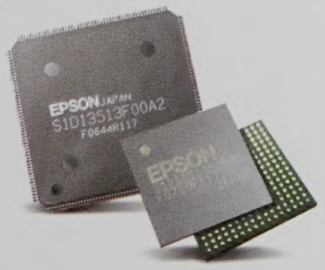


molex
one company › a world of innovation

Pico-Clasp™ Pitch Connectors

Smallest pitch for positive lock wire-to-board crimp system.

Page: **1276**



EPSON

LCD Controllers

Offers operating system independent display solutions for the embedded market.

Page: **61**

PHOENIX CONTACT
INSPIRING INNOVATIONS

SPEEDCON Connectors

Connectors for PCB-mount, wall feed-through, and field installation.

Page: **1152**

LANTRONIX

Embedded Wireless Device Server

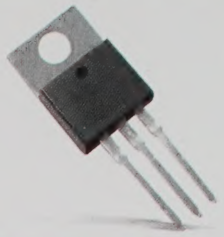
Device server for building wireless networking into any electronic device with a serial interface.
Page: **41**

TEXAS INSTRUMENTS

CC2510 Radio Transceiver

Powerful 2.4GHz system-on-chip designed for low-power and low-voltage wireless communication applications.

Page: **11**



DIODES INCORPORATED

SBR® Super Barrier Rectifiers

Rectifiers with the benefits of traditional pn-junction and Schottky barrier diodes in a single device.

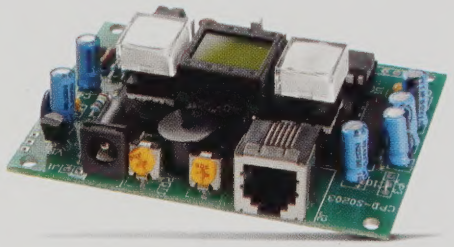
Page: **378**

New Technologies highlight

NEW! TECHNOLOGY

The products on this page represent a small portion of the NEW TECHNOLOGIES added to our catalog. For the complete list of all NEW TECHNOLOGIES, visit ***www.mouser.com/newtechnologies*** today!

NEW TECHNOLOGIES are easily identified by the New Technology logo next to the part or a red banner on the outside of the catalog page.

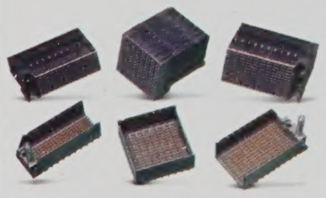


NKK® SWITCHES

SmartSwitch™ Development Kits

Development kits for experimenting with SmartSwitch™ technology to develop text, graphics, and moving images.

Page: **1415**



molex
one company › a world of innovation

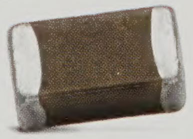
I-Trac™ Backplane Connectors

Connector system with broadside-coupled, skew equalized design capable of 12 Gbps data rates.
Page: **1182**

The Capacitance Company
KEMET
CHARGED

FT-CAP Flexible Termination MLCC

Surface mount, multi-layer ceramic capacitor with conductive epoxy utilized between the conductive metallization and nickel barrier finish.
Page: **652**

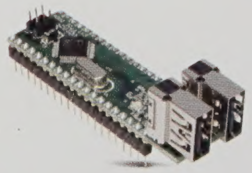


VISHAY

VJ HVArc Guard® C0G (NP0)/ X7R Capacitors

Surface mount, multi-layer ceramic capacitors protect against surface arc-over.

Page: **684**



FTDI Chip

VDIP2 USB Host Controller Module

MCU-to-USB host controller development module supplied on a PCB; designed to fit a 40-pin DIP socket.

Page: **40**

ITW Switches

Touch Sensitive Switches

Switches with ActiveMetal technology provide the advantage of touch-sensitive technology without sacrificing durability.

Page: **1384**

Environmental Commitment

RoHS Compliant* Sample Kits

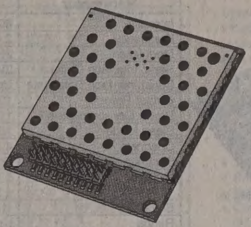
900 MHZ AC4490 SERIES - SERVER/CLIENT PROTOCOL

Compact AC4490 900MHz transceivers can replace miles of cable in harsh industrial environments. Using field-proven FHSS technology that needs no additional site licensing*, AC4490s reject interference, enable co-located system operation, increase output power and maintain data integrity.

AC4490s feature drop-in installation and a number of on-the-fly control commands, providing OEMs with a versatile interface for any application. They can be used as direct wire replacements, requiring no special host software for communication. All frequency hopping, synchronization and RF system data transmission/reception is performed by the transceiver.



Features:

- High 900MHz data rate: 115.2 Kbps
- Small form factor: 1.65 x 1.9 inches
- Operates in –40°C to +80°C temperatures
- Variable output power: 5mW to 1000mW
- One full watt enables 20-mile possible range
- Lowest cost one-watt module available

Parameter	AC4490-200	AC4490-1000
Interface	20-pin mini connector	20-pin mini connector
Frequency*	902-928 MHz (U.S)**	902-928 MHz (U.S)**
Modulation	FHSS FSK	FHSS FSK
Serial Interface Options	3V or 5V TTL	3V TTL
Serial Interface Data Rate	Up to 115.2 Kbps	Up to 115.2 Kbps
Output Power (w/ 3dBi antenna)	5mW-200mW variable	5mW-1000mW variable
Power Consumption†	68 mA typical @ 200mW	765 mA typical @ 1000mW
Channels	Up to 48 (U.S.)**	Up to 32 (U.S.)**
Security	One-byte system ID, DES	One-byte system ID, DES
Voltage	3.3V-5.5V	pin 10: 3.3V-5.5V pin 11: 3.3V +/-3%
Sensitivity	-99 dB @ full RF data rate	-99 dB @ full RF data rate
Range	Up to 4 miles (6.5 km)	Up to 20 miles (32 km)
Temperature	-40° to +80°C	-40° to +80°C
Humidity (non-condensing)	10% to 90%	10% to 90%
Dimensions	1.90 x 1.65 x 0.20 inches (49 x 42 x 5 mm)	1.90 x 1.65 x 0.20 inches (49 x 42 x 5 mm)
Weight	< 0.75 oz (< 21 g)	< 0.75 oz (< 21 g)
Antenna	Integrated and external dipole	External dipole

* The 900MHz frequency band is approved in the Americas and Australia an an unlicensed spectrum subject to approval by device.
** For products and specifications suited to non-U.S. countries, please contact AeroComm directly.
† Power consumption assumes 50% transmitter on-time.

For quantities of 100 and up, call for quote.

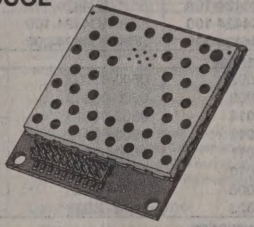
900 MHZ AC4790 SERIES - PEER/PEER PROTOCOL

High-performance AC4790 transceivers utilize AeroComm's "masterless" protocol, allowing each transceiver to communicate with any other in-range transceiver for true peer-to-peer operation.

AC4790's protocol features a dynamic addressing scheme, which simplifies the most efficient transmission path, so OEMs can design routing sequences that optimize the RF network. This makes AC4790 ideal for a wide variety of RF network. This makes AC4790 ideal for a wide variety of industrial applications that must rely on smooth, constant data flow.



Features:

- True peer-to-peer protocol
- Small form factor: 1.65 x 1.9 inches
- API commands to control packet routing
- Software-controlled sensitivity
- Remote radio discover
- Variable output power: 5mW to 1000mW

Parameter	AC4790-200	AC4790-1000
Interface	20-pin mini connector	20-pin mini connector

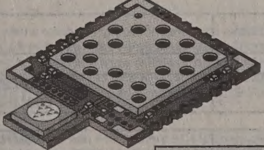
ZIGBEE™ RF TRANSCEIVERS

AeroComm's new ZB2430 module, based on Texas Instruments' leading edge 802.15.4 SoC & Z-Stack™ technology, is one of the most powerful ZigBee compliant solutions on the market today. The ZB2430 provides OEMs with industry leading 2.4GHz module performance in low power consumption, integration, long range, features and functionality.



NEW FROM SUPPLIER

RoHS Compliant

Features:

- Market's first SoC ZigBee compliant module
- 2.4 GHz ISM brand for global applications
- 128 kB Flash memory
- Best-in-class power-draw performance
- Long range performance
- Battery monitor, temperature sensor, timer
- Reliable ZigBee mesh architecture
- 128 bit AES
- GPIO, ADC, DAC

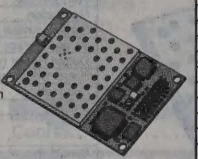
2.4 GHZ AC4424 SERIES - WIRELESS TRANSCEIVER MODULES, FLEXIBLE PROTOCOL



AC4424 is a 2.4GHz FHSS digital transceiver that represents a breakthrough in industrial RF communication. Comprised of a complete, agency-certified radio and sophisticated RF232® protocol, AC4424 simplifies the OEM's design effort and assures successful field operation.

RF232 makes AC4424 a drop-in module for seamless integration, easy operation and fast time-to-market. As each transceiver receives raw data, it manages protocol over-the-air to assure successful transmissions. Headers, data packet length and CRCs are not needed. The process is transparent to the OEM.

AC4424 modules are socket-compatible with AeroComm's 900MHz AC4490 transceivers, enabling OEMs to design once and subsequently interchange radios to accommodate new markets, regulations and environments.* Developer tools and support back every transceiver line.

*Although AC4424s will not talk to AC4490s, socket-compatibility allows for seamlessly interchanging the modules network-wide.
**Power consumption assumes 50% transmitter on-time.
† 32 channels in U.S.; 16 channels in Spain, 16 channels in France.

2.4 GHZ WIRELESS TRANSCEIVER MODULE DEVELOPMENT KITS, ANTENNAS, AND ACCESSORIES

AeroComm provides a complete development environment to help you integrate and test RF communication in a matter of minutes.

Development Kits Include:
- 2 Transceivers
- 2 Adapter Boards
- Software Utilities
- 2 AC Power Adapters
- 2 DB9 serial cables
- 2 USB cables
- 2 Dipole Antennas
- Documentation

System Requirements:
- Win® 95, 98, ME, NT, XP, or 2K
- Two PCs each with one serial port, or one PC with two serial ports

For quantities of 10 and up, call for quote.

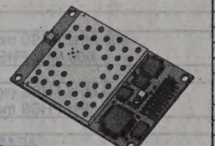
868 MHZ AC4486/4868 SERIES - WIRELESS TRANSCEIVER MODULES

Compact 868MHz* transceivers can replace miles of cable in harsh environments. Using field-proven RF technology which needs no additional ETSI (Europe) licensing, OEMs with little or no previous RF experience can easily and quickly make existing systems wireless.

Modules features drop-in installation and a number of on-the-fly control commands, providing OEMs with a versatile interface. They can be used as direct wire replacements, requiring no special host software for communication. All synchronization, and RF system data transmission/reception is performed by the transceiver. The modules are socket-compatible** with AeroComm's 900MHz AC4490 modules and 2.4GHz AC4424 models to allow for interchanging the network's frequency. This preserves OEMs' hardware/software investments while providing solutions that meet different markets and regulations.



*The 868MHz frequency band is approved in Europe as an unlicensed spectrum subject to approval by device.
**Although AC4486/4868 radios will not talk to AC4490 radios, socket-compatibility allows for interchanging the modules network-wide.

RoHS Compliant

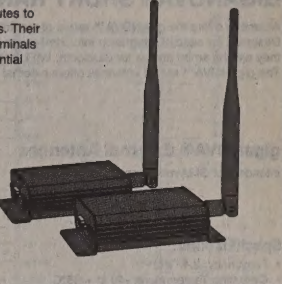
ConnexLink stand-alone transceivers can be set up in minutes to virtually cut the cables between RS232 or RS485✻ devices. Their flexibility and price allow users to quickly upgrade wired terminals to cordless operation in industrial, commercial, even residential applications.

✻ RS485 versions available upon request.

ConnexLink Highlights:

- Durable industrial-grade enclosure
- Transmits around corners, through walls
- Reliable communication up to 288 Kbps
- Point-to-point & point-to-multipoint setups
- Quickly replace serial cable in both old and new equipment
- Move links from machine to machine without costly rewiring
- CL4790-1000 can be used for True Peer to Peer Protocol



For quantities greater than listed, call for quote.

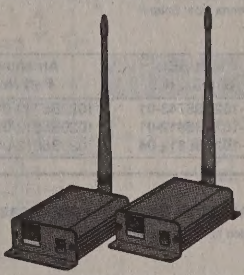
ConnexNet provides a complete hardware and software solution for adding wireless network connectivity to serial-based applications. The transceiver serves as a conduit between the user and multiple destination devices via a local network or Internet connection. It integrates a fully developed TCP/IP network stack and OS using a variety of network protocols to make distant networking both easy and reliable.

Each unit is small and easily portable for use in mobile and temporary settings as well as for fixed installations. ConnexNet software enables custom configurations based on unique application requirements, and simplifies installation and setup. The network settings can be configured remotely over a network (password protected).



ConnexNet Highlights:

- Wireless LAN service supporting Ethernet interface
- Comprehensive networking protocols
- Equipped with a CPU, real-time OS , TCP/IP stack
- Provides control from virtually anywhere via the Internet
- Wireless serial (RS232) to Ethernet bridge

Ethernet Protocols

Function	Protocols
Network Communication	ARP, UDP, TCP, ICMP, TelNet, TFTP AutoIP, DHCP, HTTP, SNMP
Connections to Serial Port	TCP, UDP, PPP, TelNet
Firmware Update	TFTP
Addressing, Routing, Data Block	IP

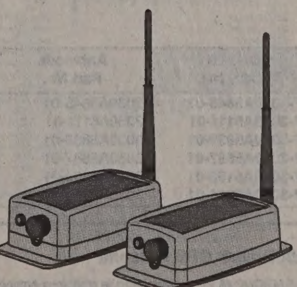
AeroComm's ACE RF data modems combine high performance and reliability with heavy-duty packaging designed to withstand harsh environmental conditions-splashing water, corrosive agents, dirt, ice and snow ACEs suit rugged industrial applications where outdoor communications and NEMA-4x ratings are essential. ACEs provide high output power to deliver line-of sight ranges up to 20 miles with high-gain antennas.

ACE modems are completely compatible with AeroComm's AC4490 transceivers and CL4490 commercial modems. This allows OEMs to construct systems which utilize ruggedized devices only where necessary, saving system costs.

ACE Product Highlights:

- NEMA-4x rated packaging
- One full watt of RF output power
- Industrial temp range -40° to +80°C
- Standard interface, RS232



For quantities of 10 and up, call for quote.

ANTENOVA Short Range Wireless Antennas

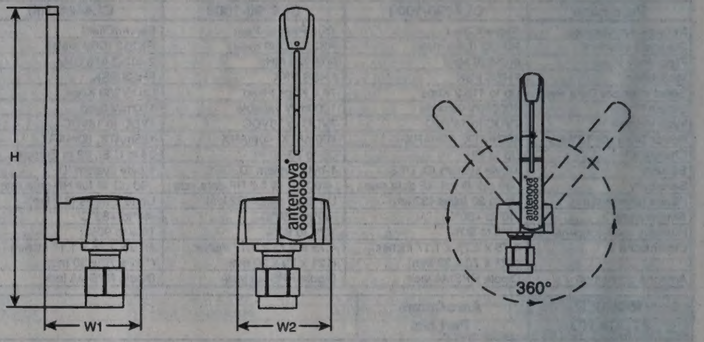
antenova®

GIGANOVA® SHORT RANGE WIRELESS ANTENNAS

Antenova offers the gigaNOVA™ range of market leading antenna solutions for the 2.4 and 5 GHz bands. Designed for ease of integration into short-range wireless devices, they are the smart choice for Bluetooth, WiFi, Wibree and Zigbee applications. The gigaNOVA™ line of antennas offers external swivel antennas and internal SMD and snap-in antennas.

gigaNOVA® External Antennas

Intended for SMA mounting



Specifications:
- Frequency: 2.4 GHz
- Operating Temperature: -40 to + 85°C
- Impedence: 50 Ohm
- Antenna type: Swivel

For quantities of 100 and up, call for quote.

CHIPCON Single-Chip RF Transceivers

CC1000/CC1050 ULTRA-LOW POWER UHF TRANSCEIVER/TRANSMITTER CHIPS

The CC1000 is a true ultra-low-power single-chip RF transceiver for the 315, 433, 868, 915 MHz bands. It has been specifically designed to comply with the most stringent demands of the low power radio market. Based on a pure CMOS technology, this is the first product in the market that offers a unique combination of low cost and high integration, performance and flexibility, thus setting a new standard for short-range, wireless communication.

Features:
- Single-chip RF transceiver
- Programmable frequency: 300-1000MHz
- Very low current consumption: Rx: 7.4mA
- Very few external components required
- FSK modulation spectrum shaping (optional)
- Low supply voltage: 2.1-3.6V
- High receiver sensitivity: -110dBm
- RSSI output
- FSK data rate up to 76.8kBaud
- Programmable output power: -20 to 10dBm
- Crystal temperature drift compensation possible without use of external TCXO
- Programmable frequency in 250Hz steps
- Suitable for frequency hopping protocols
- No external RF switch /IF filter required
- Integrated bit synchronizer
- Single-port antenna connection
- Small 28-pin TSSOP package
- Complies with EN 300220 and FCC CFR 47, part 15

Applications:
- Home automation
- Remote keyless entry
- Automatic meter reading
- Wireless alarm and security systems
- Toys and PDAs
- Audio/voice
- 315/433/868/915 MHz SRD band systems

CC1020/CC1021/CC1070 NARROWBAND UHF RF TRANSCEIVER/TRANSMITTER CHIPS

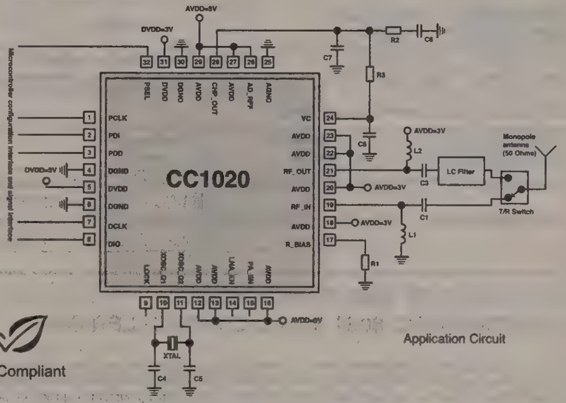
CC1020 Transceiver:
The industry's first single-chip FSK/ASK CMOS RF transceiver for narrowband applications in the 402-470 & 804-940 MHz range.

CC1021 Transceiver:
A multichannel FSK/ASK CMOS RF transceiver for narrowband applications, with channel spacings of 50kHz or higher, in the 402-470 & 804-940 MHz range.

CC1020/CC1021 Key Features:
- Frequency range: 402-470 MHz & 804-940 MHz
- Low current consumption: RX: 17.3mA
- Low supply voltage: 2.3-3.6V
- Very few external components required
- Small size: QFN 32 package
- Single port antenna connection
- Data rate up to 153.6kBaud
- ASK, FSK, and GSFK data modulation
- Complies with EN 300 220, FCC CFR47 part 15, and ARIB STD T-67

CC1070 Transmitter Only:
A true single-chip, low-power, low-cost CMOS FSK/GFSK/ASK/00K RF Transmitter for narrowband and multi-channel applications.

CC1070 Key Features:
- Frequency ranges: 402-470MHz & 804-940MHz
- Low supply voltage: 2.1-3.6V
- Very low current consumption
- Requires very few external components
- Data rate up to 153.6 kbps FSK/GFSK/ASK/OOK modulation formats
- Fully on-chip VCO
- Programmable frequency in steps less than 300Hz makes crystal temperature drift compensation possible without TCXO
- Single port antenna connection
- Complies with EN 300 220, FCC CFR 47 part 15, and ARIB STD-T67



Application Circuit

CC1010 UHF RF TRANSCEIVER WITH ONBOARD 8051 MICROCONTROLLER CHIP

The industry's first truly complete RF System-on-Chip solution! On a single die, the award winning 300-1000MHz CMOS CC1000 RF Transceiver has been integrated with an industry standard 8051 microcontroller core. The CC1010 integrates a very low-power 300-1000MHz RF Transceiver and a 8051-Compatible Microcontroller that has 32 kB in-system programmable Flash, hardware DES encryption/decryption and a three channel 10-bit ADC. This means only a few external passive components are necessary to make a powerful embedded system with wireless communication capabilities, sensor interfacing possibilities, and a lot of processing power.

CC1010 Key Features:
- Programmable frequency range: 300-1000MHz
- High sensitivity: typically -107dBm @ 1.2. kbit/s
- Programmable output power: -20 to 10dBm
- Very low current consumption: RX: 9.1mA
- No external RF switch or IF filter required
- Fast PLL settling allows frequency hopping protocols
- FSK modulation with a data rate of up to 76.8kbit/s
- RSSI output which can be sampled by on-chip ADC
- Complies with EN 300 220 and FCC CFR47 part 15

8051-Compatible Microcontroller:
- High performance, 24MHz, low power
- Optimized 8051-core typically gives 2.5x the performance of a standard 8051
- Dual data pointers
- Idle and sleep modes
- In-circuit interactive debugging is supported for the Keil™ ïVision IDE through a simple serial interface

Data & Non-volatile program memory:
- 32kB of non-volatile Flash memory in-system programmable through a simple SPI interface or by the 8051 core
- Typical Flash endurance: 20,000 write/erase cycles
- Programmable read & write lock of portions of Flash memory for software security
- 2048 + 128 Byte of internal SRAM

CHIPCON Single-Chip RF Transceivers

Chipcon Products from Texas Instruments

CC1100/CC1150 LOW-COST UHF RF TRANSCEIVER/TRANSMITTER CHIPS

The CC1100 multi-channel RF transceiver is the world's lowest total system cost radio intended for use in the 315, 433, 868, and 915 MHz frequency bands. With its very low power consumption and excellent radio performance, the CC1100 is a perfect solution for applications in for instance home and building automation, wireless alarm and security systems, and consumer electronics, to mention a few. The CC1100 transceiver is based on Chipcon's latest product platform, the SmartRF®04 Technology, which is built upon an advanced 0.18μm CMOS technology facilitating superior RF performance in combination with high-density and low-power integration of digital modules.

Features:
- Market's lowest system cost.
- Very few external components required.
- Very small footprint. The CC1100 comes in a 4x4mm, 20-pin QLP package.
- Reference design with two-layer PCB and all components mounted on the same side.
- CC1100's many powerful digital features make it easy to build a high-performance RF system using an inexpensive microcontroller.

Excellent Radio Performance:
- High sensitivity: -110dBm @ 1.2kbps
- Programmable data rate from 1.2-500kbps.
- Robust solution with excellent selectivity and blocking performance.
- Programmable output power up to +10dBm for all supported frequency bands.
- Ideal for multichannel operation: 50-500kHz channels

Very low power consumption:
- RX: 15.6mA, TX: 28.8mA @ +10dBm output power, Powerdown: 400mA.
- Burst mode data transmission with high over-the-air data rate reduces current consumption.
- Automatic RX polling using Wake-on-Radio: 1.8μA.

Applications:
- Home and building automation
- Automatic meter reading (AMR)
- Wireless alarm and security systems
- Industrial monitoring and control
- Wireless sensor networks
- Consumer electronics
- Ultra low-power wireless applications.
- Operating in the 315, 433, 868, 915 MHz ISM/SRD bands

CC1110 UHF RF SOC TRANSCEIVER WITH ONBOARD 8051 MICROCONTROLLER CHIP

The CC1110 is a powerful 315/433/868/915 MHz System-on-Chip designed for low-power and low-voltage wireless communication applications. With a multi-channel 315/433/868/915 MHz radio transceiver, a single-cycle 8051 microcontroller and 32 kB Flash memory, this unique all-in-one device makes it easier than ever to finish your design while offering numerous application possibilities.

Features:
- High-performance and low-power RF transceiver core – the industry leading CC1100
- High performance and low power 8051microcontroller core, typically with 8 times the performance per MHz of a standard 8051
- 32 kB in-system programmable flash
- 4 kB SRAM (with data retention in all power modes)
- Four flexible power modes for reduced power consumption
- System clock source can be 16 MHz on-chip RC oscillator or 26 MHz crystal oscillator. The 26 MHz oscillator is used when radio is active
- Real time clock with low-power 32.768 kHz crystal oscillator or internal low-power 34 kHz RC-oscillator
- Very fast transition times from sleep modes to active enables ultra low average power consumption in low duty-cycle systems
- In deep sleep modes the system can wake up on external interrupts or real time counter events
- Excellent receiver selectivity and blocking performance and high sensitivity
- Programmable data rate up to 500 kbps
- 2-FSK, GFSK and MSK supported
- Low current consumption (Total: RX: 22 mA, TX: 23 mA, w/ microcontroller running at 26 MHz)
- Ideal for frequency hopping systems and multichannel operation
- Very few external components: Complete on-chip frequency synthesizer, no external filters or RF switch needed
- 8-14 bits ADC with up to eight inputs
- Wide supply voltage range (2.0V – 3.6V)
- Programmable Watchdog timer
- Power On Reset
- On-chip temperature sensor
- 16-bit timer + three 8-bit timers
- True random number generator
- Hardware debug support
- 21 general I/O pins, two with 20 mA sink/source capacity
- In-circuit interactive debugging

Applications:
- AMR
- Active RF-ID systems
- Alarm & security systems
- Home automation
- Telemetry
- Wireless payment systems

CC2510FX/CC2511FX 2.4 GHZ SOC TRANSCEIVER WITH 8051 MCU

The CC2510Fx/CC2511Fx is a low-cost true system-on-chip (SoC) device designed for low power and low-voltage wireless communication applications. The CC2510Fx/CC2511Fx combines the excellent performance of the state-of-the-art RF transceiver CC2500 with an industry-standard enhanced 8051 MCU, 8/16/32 kB of in-system programmable flash memory, 1/2/4 kB of RAM and many other powerful features. The CC2510Fx/CC2511Fx is available in six different versions: CC2510F8 and CC2511F8 with 8 kB of Flash and 1 kB of AM, the CC2510F16 and CC2511F16 with 16 kB of Flash and 2 kB of RAM, and CC2510F32 and CC2511F32 with 32 kB of Flash and 4 kB of RAM. The CC2510Fx/CC2511Fx is highly suited for systems where very low power consumption is required. This is ensured by several advanced low-power operating modes. The CC2511Fx adds a full-speed USB interface to the feature set of the CC2510Fx. Interfacing to a PC using the USB interface is quick and easy, and the high data rate (12 Mbps) of the USB interface avoids the bottlenecks of RS-232 or low-speed USB interfaces.

Key Features:

- High performance and low power 8051 microcontroller core.
- High-performance CC2500 RF transceiver based on the market-leading CC2500
- Frequency band: 2.4 GHz
- 8/16/32 kB in-system programmable flash
- 1/2/4 kB RAM + 1 kB USB FIFO (CC2511Fx)
- Full-Speed USB Controller (CC2511Fx)
- I2S interface
- 8-14 bits ADC with up to eight inputs
- 128-bit AES security coprocessor
- Powerful DMA functionality
- Two USARTs
- 16-bit timer with configurable mode
- Three 8-bit timers
- Hardware debug support
- 21 (CC2510Fx), 19 (CC2511Fx) GPIO pins
- Wide supply voltage range (2.0V – 3.6V)
- High sensitivity (–100 dBm at 10 kbps)
- Programmable data rate up to 500 kbps
- Low current consumption (RX: 22 mA, TX: 23 mA, with MCU running at 26 MHz)
- MCU current consumption 270iA/MHz
- Programmable output power up to 1 dBm for all supported frequencies
- Digital RSSI / LQI support
- Excellent receiver selectivity and blocking performance
- 0.3 A consumption in lowest power mode
- RoHS compliant 6x6mm QLP36 package

Applications:

- Wireless keyboard and mouse
- Wireless voice-quality audio
- CC2511Fx: USB dongles
- Remote controls
- Wireless sports and leisure equipment
- Point-of-sale systems
- Active RFID and asset tracking systems
- Home and building automation
- Low power telemetry
- 2.4 GHz ISM/SRD band systems

Specifications:

- CC2510Fx Operating Ambient Temperature, TA: -40 Min to 85 Max °C
- CC2510Fx Operating Supply Voltage : 2.0 Min to 3.6 Max V
- CC2511Fx Operating Ambient Temperature, TA: 0 Min to 80 Max °C
- CC2511Fx Operating Supply Voltage : 3.0 Min to 3.6 Max V

Overview of external components (excluding supply decoupling capacitors)

Component	Component
C301	Decoupling capacitor for on-chip voltage regulator to digital part
C203/C214	Crystal loading capacitors (fundamental crystal)
C202/C212/C213	Crystal loading capacitors (3rd overtone crystal)
C201/C211	Crystal loading capacitors, see section 14 on page 190 for details
C231/C241	RF balun DC blocking capacitors
C232/C241	RF balun/matching capacitors
C233/C234	RF LC filter/matching capacitors
C181/C171	Crystal loading capacitors if X2 is used.
L231/L241	RF balun/matching inductors (inexpensive multi-layer type)
L232	RF LC filter inductor (inexpensive multi-layer type)
L281	Crystal inductor
R271	56 kΩ resistor for internal bias current reference, 1% tolerance
R264	D+ Pullup resistor
R262/R263	D+ / D- series resistors for impedance matching
X1	26 MHz -27 MHz crystal, see section 14 on page 190 for details
X2	32.768 kHz crystal, optional
X3	48 MHz crystal (fundamental)
X4	48 MHz crystal (3rd overtone)

CHIPCON Single-Chip RF Transceivers

CC2500/CC2550 2.4 GHZ LOW COST RF TRANSCEIVER/TRANSMITTER CHIPS

The CC2500 is a highly integrated multichannel RF transceiver designed for low-power wireless applications in the 2.4GHz Industrial Scientific Medical (ISM) band. The CC2500 is part of Chipcon's SmartRF04 Technology platform based on an advanced 0.18μm CMOS technology facilitating superior RF performance in combination with high-density and low-power integration of digital modules. The CC2500 can be used in a wide range of applications, such as wireless game controllers, wireless keyboard/mouse, consumer electronics, wireless audio, and sports, and leisure equipment.

Antenna (50 Ohm)
Folded dipole PCB antenna

Key Features:

- Market's lowest system cost.
- Very low unit price per chip.
- Very few external components required; all are low cost type.
- Reference design with two layer PCB with all components mounted on the same side.
- Very small footprint. The CC2500 comes in a 4x4mm, 20-pin QFP package.
- CC2500's many powerful digital features allow building a high-performance. RF system using an inexpensive microcontroller.

Very Low Power Consumption:

- RX: 15.6mA, TX: 21.6mA @ 0dBm output power
- Burst mode data transmission with high over-the-air data rate reduces current consumption.

Excellent Radio Performance:

- High sensitivity (PER: -98dBm @ 10kbps, PER: -88dBm @ 250kbps)
- Programmable data rate from 1.2-500kbps.
- Robust solution with excellent selectivity and blocking performance.
- Programmable output power up to 0dBm.
- Ideal for multichannel operation (50-500kHz channels).
- Full packet handling including preamble generation, sync word insertion/detection, address check, flexible packet length, and automatic CRC.
- Programmable carrier sense indicator and digital RSSI output enables adaptive channel selection with increased robustness of the communication link.

Applications:

- Wireless game controllers
- Wireless keyboard/consumer electronics
- Wireless audio
- Sports and leisure equipment

RoHS Compliant

Features:

- High-performance and low-power RF transceiver core – same as the industry leading CC2500
- High performance and low power 8051 microcontroller core, typically with 8 times the performance per MHz of a standard 8051
- 32 kB in-system programmable flash
- 4 kB SRAM (with data retention in all power modes)
- Powerful DMA functionality
- Four flexible power modes for reduced power consumption
- System clock source can be 13 MHz on-chip RC oscillator or 26 MHz crystal oscillator. The 26 MHz oscillator is used when radio is active
- Real time clock with low-power 32.768 kHz crystal oscillator or internal low-power 34 kHz RC-oscillator
- Very fast transition times from sleep modes to active enables ultra low average power consumption in low duty-cycle systems
- In deep sleep modes the system can wake up on external interrupts or real time counter events
- High sensitivity
- Excellent receiver selectivity and blocking performance
- Programmable data rate up to 500 kbps
- 2-FSK, GFSK and MSK supported
- Low current consumption (Total: RX: 23 mA, TX: 24 mA, w/ microcontroller running at 26 MHz)
- Digital RSSI / LQI support
- Digital battery monitor
- Ideal for frequency hopping and multichannel operations
- Burst mode data transmission possible
- Very few external component
- 8-14 bits ADC with up to eight inputs
- Wide supply voltage range (2.0V – 3.6V)
- 21 general I/O pins, two with 20 mA sink/source capacity
- Dual data pointers
- In-circuit interactive debugging
- Two USART / SPI interfaces
- Programmable Watchdog timer
- Power On Reset
- On-chip temperature sensor
- 16-bit timer + three 8-bit timers
- True random number generator
- Hardware debug support
- Powerful and flexible development tools and reference designs available
- RoHS compliant 6x6 mm QLP36 package (36 Pin)

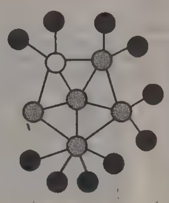
CHIPCON Single-Chip RF Transceivers

CC2420 2.4 GHZ RF TRANSCEIVER CHIP FOR IEEE 802.15.4 AND ZIGBEE™

The CC2420 is a low-cost transceiver designed specifically for low-power, low-voltage RF transceiver applications in the 2.4GHz unlicensed ISM band. It is the first commercially available RF compliant with the IEEE 802.15.4 standard and the first RF-IC that can be qualified for use in 2.4GHz ZigBee™ products. For the CC2420 RF transceiver, Chipcon provides IEEE/802.15.4 MAC software free of charge.

WHAT IS ZIGBEE?

The ZigBee standard has been developed by the ZigBee Alliance, an association of companies working together, to enable reliable, cost-effective, low-power, wirelessly networked monitoring and control products based on an open global standard. The goal of the ZigBee Alliance is to provide the consumer with ultimate flexibility, mobility, and ease of use by building wireless intelligence and capabilities into every day devices. ZigBee technology will be embedded in a wide range of products and applications across consumer, commercial, industrial, and government markets worldwide. For the first time, companies will have a standards-based wireless platform optimized for the unique needs of remote monitoring and control applications, including simplicity, reliability, low-cost, and low-power. The ZigBee communication standard is essential for the growth of wireless home and building automation applications where various end products need to communicate with each other.



ZIGBEE MESH NETWORKING

The PHY and MAC layers are defined by IEEE 802.15.4, ZigBee enables reliable and secure mesh, star and cluster-tree network topologies with interoperable application profiles.

Mesh networks allow for high levels of reliability and scalability by providing routes through the network.

- ○ PAN COORDINATOR (Full Function Device)
- ◍ COORDINATOR (Full Function Device)
- ● DEVICE (Reduced or Full Function Device)

WHY ZIGBEE?

Other short-range standards, such as Bluetooth and Wi-Fi, are not designed for low power monitoring and control applications. With ZigBee, however, the case is different. ZigBee is the only standard that specifically addresses the typical requirements for wireless control and monitoring applications, such as:

- Large number of nodes/sensors
- Very low system/node costs
- Operation for years on inexpensive batteries
- Reliable and secure links between network nodes
- Easy deployment and configuration
- Global solutions

Applications:

- Home and building automation
- Industrial monitoring and control
- Sensor networks
- Automotive networks
- Intelligent toys
- Consumer electronics

RoHS Compliant

CC2420 Key Features:

- True single-chip 2.4 GHz IEEE 802.15.4/ZigBee(tm) RF transceiver w/MAC support
- Suitable for FFDs (Full Function Devices) & RFDs (Reduced Function Devices) defined by IEEE 802.15.4 & ZigBee(tm)
- DSSS modem w/ 2 Mchips/s & 250kbps effective data rate
- Low current consumption: RX: 19.7mA, TX: 17.4mA
- Low supply voltage with internal voltage regulator: 2.1V -3.6V
- No external RF switch/filter needed
- Programmable output power
- I/Q low-IF receiver
- I/Q direct up-conversion transmitter
- Few external components
- Packet handling with 128 byte (RX) +128 byte (TX) data buffering
- Digital RSSI/LQI support
- Hardware MAC encryption and authentication (AES-128)
- Battery monitor
- QLP-48 package (7x7 mm)
- Complies with EN 300 440, FCC CFR 47 part 15, and ARIB STD-T66
- Powerful, flexible development tools available
- Easy-to-use software for performance evaluation

MOUSER STOCK NO.	Chipcon/TI Part No.	Description	Price Each
839-2420DK	CC2420DK	Full Development Kit - two CC2420 evaluation boards, two CC2420 evaluation modules, antennas	615.00
839-2420DBK	CC2420DBK	Demonstration Board Kit - complement to the development kit and includes two CC2420DB demonstration boards, one CC2420SK sample kit and 2 RS-232 cables	540.00
839-2420EMK	CC2420EMK	Evaluation Module Kit - two CC2420EM evaluation modules and two antennas	140.00
839-2420-ZIGBEE-DK	CC2420 ZIGBEE DK	Full Development Kit - five CC2420 DB and a CC2420 EB that together, with a CC2420EM, can utilize the capability of running Chipcon's packet sniffer with the new ZigBee packet parser addition. Z-Stack object code, tools, and documentation will be provided as an End Customer distribution package, available for download from the Chipcon ZigBee developer site	5000.00
839-2420-ZDK-PRO	CC2420 ZDK PRO	CC-2420ZDK Pro kit-Figure e 8 wireless Zigbee software Development suite, a seat in their 2 day Zigbee training, six months support and a 25% discount on any Zigbee training purchased during these six months. Hardware Included: two SmartRF04EB evaluation boards, two CC2420EM evacuation modules, 5 CC2420DB Demonstration boards, antennas	9995.00

CC2400 2.4 GHZ RF TRANSCEIVER CHIP

The CC2400 is a true low-cost, low-power single-chip 2.4 GHz ISM band transceiver with extensive hardware features. When cost, size, and world-wide compliance are major design criteria, the CC2400 provides the optimum solution for an effective and reliable two-way wireless digital communication link.

Key Features:

- True single-chip 2400 - 2483.5 MHz RF Transceiver
- GFSK and FSK modulation
- Very low current consumption (RX: 24 mA)
- High sensitivity: -85dBm @ 1Mbps, BER = 10-3
- Programmable over-the-air data rate: 10kbps, 250kbps, or 1Mbps
- Low chip core supply voltage: 1.6-2.0V
- Flexible I/O supply voltage: 1.6-3.6V
- Requires very few external components
- Programmable output power
- Programmable baseband modem
- Digital RSSI carrier sense output
- Agile frequency synthesizer
- Packet handling hardware support
  - Preamble generator with programmable length
  - Programmable synchronization word insertion/detection
  - CRC-16 computation over the data field
  - 8B/10B line coding option
- Data buffering: 32 byte FIFO
- Easy-to-use software for generating the CC2400 configuration data
- Small size (QFN-48 package) 7x7mm
- Complies with EN 300 440, FCC CFR47 part 15, & ARIB STD-T66

Applications :

- Game controllers
- Wireless headsets
- Sports and leisure equipment
- Wireless mouse and keyboards
- Remote controls
- Audio/voice applications
- Joysticks

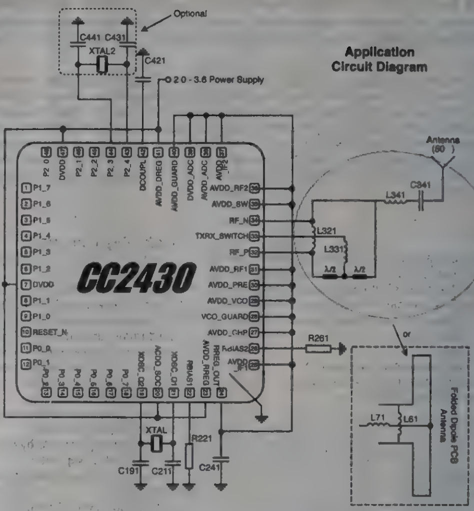
CHIPCON RF Transceivers for 802.15.4/ZigBee™

CC2430 2.4 GHZ RF TRANSCEIVER CHIP WITH ONBOARD 8051 MCU FOR IEEE 802.15.4 AND ZIGBEE™



Application
Circuit Diagram

The CC2430 is a true System-on-Chip (SoC) solution for ZigBee™. With the CC2430, ZigBee™ nodes can be built with very low total bill-of-material costs. The CC2430 combines the excellent performance of the leading CC2420 RF-transceiver with an industry-standard enhanced 8051 MCU, 8 kByte of RAM and many other powerful features. The CC2430 comes in 3 different versions: CC2430-F32, CC2430-F64 and CC2430-F128, i.e. 32, 64 or 128 kByte flash. Combined with Chipcon's industry leading ZigBee™ protocol stack (Z-Stack™), the CC2430 is the market's most competitive ZigBee™ solution.

Key Features:
- Power on reset
- Digital RSSI/LQI support
- Digital battery monitor
- On-chip temperature sensor
- Hardware debug support
- Programmable watchdog timer
- 32 MHz single-cycle low power 8051 MCU
- RoHS compliant 7 x 7 mm QLP48 package
- 2.4 GHz IEEE 802.15.4 compliant RF transceiver
- 32, 64, and 128 kByte in-system programmable flash
- Ultra low power: Ideal for battery operated systems
- Four flexible power modes for reduced power consumption
- Industry leading ZigBee(TM) protocol stack (Z-Stack) available
- 8 kByte SRAM, 4 kByte with data retention in all power modes
- One IEEE 802.15.4 MAC timer, one general 16-bit timer and two 8-bit timers
- Reference design with external PA providing +10 dBm output power easily obtainable based on CC2420 with external PA

Applications:
- Home and building automation
- Industrial monitoring and control
- Sensor networks
- Automotive networks
- Intelligent toys
- Consumer electronics

RoHS Compliant

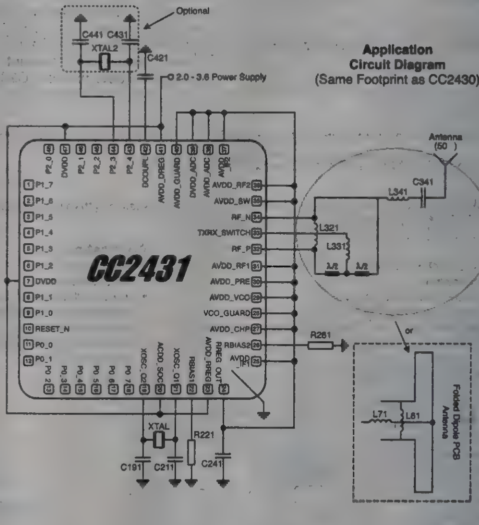
CC2431 2.4 GHZ RF TRANSCEIVER CHIP WITH ONBOARD 8051 MCU FOR IEEE 802.15.4 AND ZIGBEE™



Application
Circuit Diagram
(Same Footprint as CC2430)

The CC2431 with Location Engine is a true System-on-Chip (SoC) solution for ZigBee™/IEEE 802.15.4 wireless sensor networking. The CC2431 combines the excellent performance of the industry leading CC2420 RF transceiver with an enhanced 8051 MCU, 8 kB of RAM, 128 kB Flash memory and many other powerful features.

Key Features:
- RSSI based Location Engine
- Digital battery monitor
- On-chip temperature sensor
- Hardware debug support
- CSMA/CA coprocessor
- Digital RSSI / LQI support
- Fully pin compatible to CC2430
- Powerful DMA functionality
- AES security coprocessor
- Programmable watchdog timer
- 8-14 bits ADC with up to eight inputs
- Power-On-Reset/Brown-Out Detectionr
- 128 kB in-system programmable Flash
- RoHS compliant 7mm x 7mm QLP48 package
- Enhanced version of the industry standard 8051
- 2.4 GHz IEEE 802.15.4 compliant RF transceive
- 8 kB RAM, 4 kB with data retention in all power modes
- Four flexible power modes for reduced power consumption
- 21 general I/O pins, two with 20 mA sink/source capability
- Two programmable USARTs for master/slave SPI or UART operation
- System clock source can be 16 MHz RC oscillator or 32 MHz crystal oscillator. The 32 MHz oscillator is used when the radio is active
- Optional clock source for ultra-low power operation can be either the low-ower 32 kHz RC oscillator or an optional 32.768 kHz crystal oscillator
- One IEEE 802.15.4 MAC timer, one general 16-bit timer and two 8-bit timers

Applications:
- Asset tracking
- Inventory control
- Container/pallet tracking
- Equipment and personnel tracking
- Security
- Vehicle (load) tracking
- Access and control systems
- Commissioning Networks

RoHS Compliant

The hardware includes the content of the CC2430ZDK and the CC2431DK. The dedicated CC2431 hardware can easily be used for testing the location engine in ZigBee networks. Totally the kit includes 7 x CC2430 boards that can be used for reference nodes in a network and 10 CC2431 boards	10700.00

CIRRONET INC. ZigBee, FHSS and Mesh Networking

Cirronet offers a complete line of spread spectrum wireless products for industrial and factory applications. Using both patented frequency hopping technology and open-standard direct sequence technologies, these products fall in two categories: ready-to-use devices for systems integration, and design-in OEM modules for custom applications.

ZIGBEE™ OEM RF MODULES AND DEVELOPMENT KITS

Cirronet has built each 2.4 GHz ZigBee module to allow FCC certification as a module. This means FCC type acceptance testing is not required for the device into which the module is integrated, saving you money and getting your product to market faster.

Features:
- 2.4 GHz Direct Sequence Spread Spectrum technology
- Ad hoc mesh network
- Low power consumption
- Small size, light weight
- FCC certified for unlicensed operation
- Upgradeable to the latest ZigBee version
- Fast acquisition time
- Redundant, self healing network
- Supports large number of nodes
- Ideal for battery operation
- Easy to integrate
- Shortens time to market

ZigBee™ Development Kit:
- 2 ea. evaluation boards
- 2 ea. AC power adapters and cords
- 2 ea. patch antennas
- 2 ea. USB cables
- 2 ea. serial cables
- 2 ea. RF cables
- 2 ea. omni antennas

IEEE 802.15.4 PRODUCTS

The IEEE 802.15.4 specification is the basis of ZigBee radios. They provide for low-cost, low-power multi-point and peer to peer networking. For applications that need cost and power savings but do not require mesh networking and its attendant overhead, Cirronet's LPR2400 (1 mW RF power) and LPR2400ER (extended range with 65 mW RF power) provide excellent peer-to-peer and star topology wireless networking at 2.4 GHz in industrial and factory settings.

Features:
- 2.4 GHz Direct Sequence Spread Spectrum technology
- Multiple Network Technologies
- Low power consumption
- Small size, light weight
- High Power (+18dBm)
- FCC certified for unlicensed operation
- Redundant, self healing network
- Supports large number of nodes
- Ideal for battery operation
- Easy to integrate

FREQUENCY HOPPING SPREAD SPECTRUM PRODUCTS

Cirronet's wireless FHHS products are especially well-suited to industrial and factory settings, where they ensure data throughput despite electrical noise and multipath fading. FHSS's greater transmission range than is afforded by such protocols as 802.11 makes these products appropriate for outdoor applications, where nodes may be separated by several miles. And their fast, error-free delivery of data makes them popular in mission-critical applications.

Development Kit Contents:
- (2) OEM Modules
- (2) Standalone modems
- (2) 4-in. reverse polarity SMA coax cables
- (4) 2.4 GHz rubber flex antennas
- (2) Power and data cables
- (2) Wall mount power supply/chargers
- Configuration Software
- Integration guide

PROPRIETARY MESH SPREAD SPECTRUM PRODUCTS

Cirronet's miniMESH ™ protocol provides a self-forming mesh network through the deployment of base station, router and field nodes. miniMESH is included with the DM18xx family of products. VersaMESH™ provides a virtually unlimited number of nodes while providing excellent control over network formation. The VersaMESH protocol is included with the DM2200 family of products.

DM1810-916-DK:
Development kit for the DM1810-916M module with 1 Base Station and 5 Field Node modules, 5 Router modules, and 3 IM1810 interface boards, cables, demonstration software, 5 battery packs and 5 power supplies

DLP DESIGN RFID and ZigBee™ Modules

Products may be RoHS compliant.
Check mouser.com for RoHS status.

DLP-RFID1 RFID READER AND WRITER

The DLP-RFID1 is a low-cost, USB-powered module for reading from and writing to ISO 15693, ISO 18000-3, and Tag-it™ intelligent RFID transponder tags. It has the ability to both read and write up to 256 bytes of data in addition to reading the unique identifier (UID/SID). All of the DLP-RFID1's electronics and antenna reside within the compact unit, and all operational power is taken from the host PC via the USB interface. The range of the internal antenna is up to 4 inches depending upon the size of the tag being read.

Features:
- ISO 15693, 18000-3, Tag-it™ HF-I Compatible
- Read UID/SID of Up to 15 Tags Simultaneously
- 13.56MHz Reader/Writer
- Built-in Antenna: Up to 4-Inch Read Range
- FCC/IC/CE Modular Approval in Place
- Permanent Unique Serial Number Accessible Via USB
- Integrated Pass/Fail Beeper
- USB Port Powered from Host PC (USB 1.1/2.0 Compatible)
- USB Drivers Provided for Windows XP, XPx64, Server2003, 2000, 98, ME
- Software Development Library Support for Visual C++/Visual Basic

Specifications:
- Reader Frequency: 13.56MHz
- Output Power: 200mW MAX
- Range (Integral Antenna): 4 Inches MAX
- Tags/Protocols Supported: Tag-It*, ISO18000-3, ISO15693
- Communications Interface: USB 1.1/2.0 Compatible, Mini-B 5-Pin Connector
- Operational Power – Active: 120mA
- Operational Power – Idle: 15mA
- Antenna: On-Board Antenna, SMA Position Available**
- USB Driver Support: Windows XP, XPx64, Server2003, 2000, 98, ME
- Physical Dimensions – OEM PCB: .20x2.17x3.12" typ. (5.1x55.1x79.3mm)
- Physical Dimensions – Retail Enclosure: .83x2.3x3.25" typ. (21.1x58.4x82.6mm)
- Operating Temperature: 0-70°C

Applications:
- Real-Time Security
- Personal Identification
- Pharmaceutical Tracking
- Inventory/Asset Management & Tracking
- Library/Book Management & Tracking
- Baggage Tagging
- Sports Event Timing

For quantities of 500 and up, call for quote.

DLP 802.15.4/ZIGBEE™ READY MODULES

The DLP-RF1 and DLP-RF2 OEM Modules are short-range, low-power, 2.4-GHz, unlicensed worldwide ISM band transceivers designed around the IEEE 802.15.4 Wireless Standard. Both support point-to-point and star network configuration using preprogrammed firmware.

The RF1 and RF2 are ready for either direct design into finished product or as a quick wire replacement within a home or office application. The units come preprogrammed with DLP Design's Serial Interface Packet Processor (SIPP™) firmware based upon Freescale's SMAC RF IC control firmware. If the SIPP™ firmware does not meet the requirements of the project at hand, then the BDM interface is available for reprogramming the microcontroller with user firmware.

Application Areas:
- Remote control and wire replacement in industrial systems
- Wireless sensor networks
- Home automation and control
- Factory automation
- Heating and cooling systems
- Inventory management and RFID tagging
- Human interface devices
- Remote entertainment control
- Wireless toys

Features:
- IEEE 802.15.4 Compliant & ZigBee ready
- Freescale MC13192 RF Transceiver IC
- Freescale MC9S08GT60 Microcontroller
- Carrier-sense, multiple-access technology
- Range: >700 feet, outdoor line of sight
- Royalty-free USB drivers
- USB interface programming as easy as RS232C
- Agency approvals in place for immediate deployment in the US, Canada, and Europe
- 16 Channels (2.405GHz to 2.480GHz)
- Microcontroller pre-programmed with SIPP firmware
- <35 microamp low-power mode
- Antenna Integral to PCB Design–No External Antenna to Purchase and Mount SIPP™ firmware

DLP-RF2 - 2.4 GHZ OEM RF Transceiver Module

The DLP-RF2 combines a Freescale™ MC13192 2.4GHz Direct-Sequence, Spread-Spectrum RF Transceiver IC and Freescale MC9S08GT60 microcontroller to form an IEEE 802.15.4 compliant, ZigBee™ ready, short-range transceiver module. The DLP-RF2 connects to user electronics via a standard, 20-pin male header.

The MC9S08GT60 microcontroller is preprogrammed with DLP Design's Serial Interface Packet Processor (SIPP™ firmware) for accessing the transceiver functions via simple serial calls. Interface to an external serial host microcontroller/DSP/FPGA, etc. is accomplished via a simple 2-wire (RX, TX, and ground) interface.

The SIPP firmware in the DLP-RF2 resides at the application layer and is based on Freescale's SMAC. The SIPP firmware provides basic access to DLP-RF2 functionality: Packet receive and transmit, transceiver settings, EEPROM access, etc. The DLP-RF2 can also operate without a serial host controller. Basic digital I/O, A/D conversions, temperature measurement, and latching/non-latching relay control are available via the SIPP firmware. The MC9S08GT60 can be reprogrammed (if desired) with user-supplied firmware via a 6-pin BDM header that is compatible with the P&E USB-ML-12 and device programmers (purchased separately).

DLP-RF2 (TTL Serial Interface)

DLP-RF1 - 2.4 GHZ OEM RF USB Transceiver Module With USB Interface

The DLP-RF1 combines a USB interface, Freescale™ MC13192 2.4GHz Direct-Sequence Spread Spectrum RF Transceiver IC and Freescale MC9S08GT60 microcontroller to form an IEEE 802.15.4 compliant, ZigBee™ ready, short-range transceiver module.

The MC9S08GT60 microcontroller is preprogrammed with DLP Design's Serial Interface Packet Processor (SIPP™ firmware) for accessing the transceiver functions via simple serial calls. The application programming required for accessing the module via USB is functionally identical to that used to access the RS232C ports on a standard Windows/Linux/Mac PC via the use of royalty-free Virtual COM Port (VCP) drivers. (No USB driver development is required for most applications.) The SIPP firmware in the DLP-RF1 resides at the application layer and is based on Freescale's SMAC. The SIPP firmware provides basic access to DLP-RF1 functionality: packet receive and transmit, transceiver settings, EEPROM access, etc.

DLP-RF2 Development Tools

A 20-pin interface header is provided for each of these development tools to allow quick connection to the DLP-RF2 transceiver.

The **DLP-RF2-SENS** provides example designs for a temperature/humidity sensor, door switch input, and a system for measuring battery power. This developer's tool demonstrates the low-power mode of operation in which the module remains in Sleep Mode drawing less than 40 microamps of current from two AAA batteries until either the door switch input detects a change or the timer wakes up the transceiver to check in with the system controller.

The **DLP-RF2-RELAY** also demonstrates the low-power mode of operation while providing a battery power measurement system and door switch input together with two latching relays. While in Sleep Mode, the total system current drawn from two AA batteries is less than 40 microamps regardless of the state of the relays.

The **DLP-RF2-PROTO** is intended to enable the designer to quickly progress in the development of hardware and software associated with wireless networking projects. This board offers a number of flexible tools to accommodate numerous modes of operation:

DLP-RF2 Proto Board Features:
- BDM Programming Interface
- Easy-to-Use USB Interface for Modeling Serial Host Firmware on a PC
- RS232C (DB9) Interface for Connection to a Legacy Peripheral
- Buffered LED Indication of 8 Selected Digital I/O Lines
- Low-Power Mode Jumper
- Prototyping Breadboard
- Three Power Sources: USB Port, DC Jack (4-15VDC), or 9-Volt Battery Clips
- A/D and Voltage Reference Setups

FLEXIPANEL Zigbee and Bluetooth Modules

RoHS Compliant **This page of product is compliant.**

FlexiPanel designs and manufactures value-added RF modules and specializes in off-the-shelf solutions for OEMs, which include all RF circuitry, including antennas, and FCC/CE certifications. The aim is to make RF integration easy. FlexiPanel is also a leading provider of Bluetooth and ZigBee/IEEE 802.15.4 modules. The company regularly patents key aspects of its designs and is continually reinvesting in order to diversify its offering of modular electronics products.

2.4 GHZ RF MODULES AND ADAPTERS

EasyBee is an IEEE 802.15.4 compliant RF transceiver. It enables designers to easily add ZigBee / IEEE 802.15.4 wireless capability to their products without the need for RF or antenna design expertise.

For quantities greater than listed, call for quote.

PIXIE ZIGBEE FFD MODULES

Pixie provides a complete ZigBee solution for OEMs, integrating IEEE 802.15.4 2.4GHz PHY / MAC layers with Microchip Technology's NWK / APL / ZDO layers. It provides a path for extremely rapid migration from Microchip's PICDEM Z ZigBee development environment to market-ready product.

Pixie is capable of full function device (FFD) operation and is suitable for router and coordinator nodes. The lower cost Pixie Lite version is used for reduced function devices, e.g. endpoints, with 2 fewer I/O lines.

BLUETOOTH 2.0 TRANSCEIVERS

LinkMatik 2.0 is a serial / PCM audio to Bluetooth data link. It can be controlled from a host controller using simple commands. LinkMatik 2.0 can also operate without a host controller for point-to-point serial connections. Auto-Slave and Auto-Master modes allow LinkMatik 2.0 to operate a slave, master or wedded pair. LinkMatik is shipped in Auto-Slave mode.

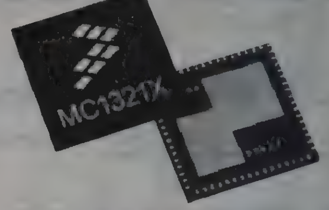
MC1321x Family



FREESCALE ZIGBEE WIRELESS SOLUTIONS

Freescale Semiconductor offers an extensive set of low cost wireless networking solutions, hardware and software, to provide you "A fast start to wireless networking". Consider using Freescale Semiconductor's Transceiver or System-in-Package (SiP) solutions for the following applications. Application spaces include, but are not limited to:

- **Residential and Commercial Automation**
- **Industrial Control Applications**
- **Healthcare Products**
- **Consumer Products**

MC1319x Family of Generation I Transceivers

RoHS Compliant

The Generation I MC1319x and Generation II MC1320x families of transceivers may be utilized with Freescale's 8-bit or 32-bit MCU's. The transceivers in combination with the MCU and the selected MAC software provide a flexible set of wireless solutions to fit the customer's applications requirements in a cost-effective manner.

For quantities 250 and up, call for quote.

MC1320x Family of Generation II Transceivers

RoHS Compliant

The MC1320x family is a series of short range, low power, 2.4 GHz ISM band second generation transceivers. The MC1320x family contains a complete packet data modem compliant with the IEEE® 802.15.4 standard PHY (Physical) layer. The solutions also offer an integrated TX/RX switch for fewer components and lower cost BOM. When combined with an appropriate MCU, the MC1320x family provides a cost-effective solution for short-range data links and networks.

For quantities 250 and up, call for quote.

MC1321x Family of System in a Package (SiP)

RoHS Compliant

The MC1321x family is Freescale Semiconductor's ZigBee platform technology with a low power 2.4 GHz RF transceiver and an 8-bit MCU in a 71-pin LGA package. The MC1321x family also offers broad range of integrated peripherals and interfaces including I2C, SCI, Timers/PWM, KBI, as well as an 8 channel 10-bit ADC. The combination of the radio and microcontrollers, as well as the incorporation of key peripherals and functions, in a small footprint package allows for a cost-effective solution.

For quantities 250 and up, call for quote.

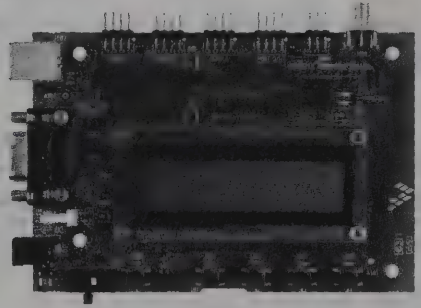
FREESCALE ZIGBEE DEVELOPMENT KITS

Freescale Semiconductor provides a range of comprehensive yet cost-effective development tools designed to provide developers with the necessary hardware and software required to evaluate and develop wireless solutions ranging from simple point-to-point networks to ZigBee mesh networks.



BeeKitTM Wireless Connectivity Toolkit

Freescale's BeeKit development environment for Windows operating systems provides a GUI in which users can create, modify, save and update wireless network solutions based on Freescale's Simple MAC (SMAC), IEEE 802.15.4 PHY/MAC and BeeStack ZigBee protocol stack. BeeKit provides a wizard and solution explorer that allows the user to quickly and easily configure parameters before creating the project, greatly reducing the need to sift through individual files and manually configure parameters. With the comprehensive code base of wireless networking libraries, application templates, and sample applications, the user generates the appropriate workspace files to be imported into an integrated development environment (IDE) for continued development and debugging.

MAXSTREAM Embedded Wireless Products

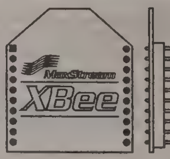
Products may be RoHS compliant.
Check mouser.com for RoHS status.

Easy-to-Use! No configuration is necessary for out-of-box RF operation. Simply feed data into one module, then the data is sent out the other end of the wireless link. If more advanced functionality is needed, the modules support an extensive set of AT commands.

MaxStream 900 MHz solutions are certified for use in North American, but integrators in Europe must use MaxStream's 2.4 GHz solutions.

XBee Specifications:
- Indoor/Urban Range: Up to 100' (30m)
- Outdoor Line-of-Sight Range: Up to 300' (100m)
- Transmit Power Output: 1mW (0dBm)
- Power-Down Current: <10μA
- Operating Frequency: 2.4GHz
- RF Data Rate: 250,000bps

RoHS Compliant



XBee-Pro Specifications:
- Indoor/Urban Range: Up to 300' (100m)
- Outdoor Line-of-Sight Range: Up to 1 mile (1.6km)
- Transmit Power Output: 100mW (20dBm) EIRP
- Power-Down Current: <10μA
- Operating Frequency: 2.4GHz
- RF Data Rate: 250,000bps

RoHS Compliant

PHOENIX CONTACT Wireless I/O Systems

PHŒNIX CONTACT
INSPIRING INNOVATIONS

900MHZ ONE-WAY WIRELESS SYSTEMS

With these unidirectional radio systems it is possible to record and safely transmit an analog and two digital sensor signals. With very simple installation, it is possible to collect signals where cables cannot be laid or can only be laid with great difficulty. In addition to point to point connections, the possibilities also exists of constructing multi-receiver systems. The sets include a receiver, transmitter, and antennas with connecting cable.

Features:

- 1 watt transmit power
- Interference free - Frequency Hopping Spread Sprectrum technology
- Licence free 902 - 928MHz Industrial, Scientific, and Medical (ISM) band
- Class I, Division 2 approved for hazardous area installation (UL, CUL and CSA approved)
- Temperature Range: -40°C to +70°C
- Easy to use, wire in - wire out, no setup or programming
- Range: 600 - 1000 ft in plant, no line of sight

MOUSER STOCK NO.	Phoenix Type	Fig.	Description	Price Each
651-2867102	RAD-ISM-900-SET-UD-ANT	A	24V DC set with one 4-20mA and 2 discrete signals. DIN rail mount	1397.00
651-2867021	RAD-ISM-900-SET-AC-UD	B	110-240V AC set with one 4-20mA and 2 discrete signals. Weatherproof NEMA 4X conduit mount transmitter , DIN rail mount receiver.	1477.00
651-2867034	RAD-ISM-900-SET-DC-UD	B	12-30V DC set for one 4-20mA and 2 discrete signals. Weatherproof NEMA 4X conduit mount transmitter , DIN rail mount receiver.	1397.00
651-2867047	RAD-ISM-900-RX	-	Spare Receiver to expand point to multipoint connections. DIN Rail mount	696.00

900MHZ TWO-WAY WIRELESS SYSTEMS WITH EXPANDABLE I/O OPTIONS

Besides duplex operation, the bi-directional radio system offers the possibility of lining up additional moudules for recording and outputting analog and digital signals. This unique design gives the user flexibility to add on multiple channels of I/O to the pared transceiveres in combinations. They are ideal for moving numerous signals within high interference enviornments without costly cable and conduit runs. The sets include a receiver, transmitter, and antennas with connecting cable.

Features:

- 1 watt transmit power
- Interference free - Frequency Hopping Spread Sprectrum technology
- Licence free 902 - 928MHz Industrial, Scientific, and Medical (ISM) band
- Range: 600 - 1000 ft in plant, no line of sight
- Class I, Division 2 approved for hazardous area installation (UL, CUL and CSA approved)
- Up to 8 expandable I/O modules per transceiver on common power
- Max 33 analog or 66 discrete signals in one direction
- Dry contact LINK diagnostic output
- Temperature Range: -40°C to +70°C

MOUSER STOCK NO.	Phoenix Type	Fig.	Description	Price Each
651-2867270	RAD-ISM-900-SET-BD-BUS-ANT	A	9-30V DC set with one 4-20mA in/out and 2 discrete signals in/out with bus connection for power and communicatrion. DIN Rail mount.	2637.00

2.4 GHZ POINT TO MULTIPOINT BLUETOOTH WIRELESS DATA

PSI BLUETOOTH CONVERTER

The PSI Bluetooth converter provides a quick and easy wireless connection between serial interfaces of RS-232, RS-422, and RS-485 2-wire standard. Data connections can be established to third party devices or the PSI Bluetooth RS-232 adapter. This module has been specifically designed to meet the requirements of industrial enviornments and supports operation without software drivers thanks to its full integrated protocol stacks.

Features:

- Din Rail Mount
- Supply of 24V DA or AC
- Transmission speeds of up to 187.5 kbps
- Integrated Bluetooth path diagnostics
- Class I, Division 2 approved for hazardous area installation (UL, CUL and CSA approved)
- Can be set to V.24(RS-232), RS-422, or RS-485
- Supports all popular 10/11-bit UART data formats
- Bluetooth access protected by password, fixed device pairing or device access list
- Scalable transmission power (-28dBm - +20 dBm)

MOUSER STOCK NO.	Phoenix Type	Fig.	Description	Price Each
651-2708517	PSI-WL-RS232-RS485/BT	D	Bluetooth converter for wireless RS 232, RS 422, & RS 485, MCX connection for external antenna	388.00

PSI BLUETOOTH RS-232 ADAPTER

The PSI Bluetooth V.24 (RS-232) adapter provides an easy wireless connection between devices with V.24(RS-232) interface or from devices with V.24(RS-232) interface to Bluetooth devices. Data connections can be established to the PSI Bluetooth Conveter or other third party devices. The adapter is connected directly to an operator interface or laptop and is immediately ready for operation. The user can switch over easily from one control system to another without installing any drivers.

Features:

- Direct connect to the interface
- Operation without software drivers
- Fully integrated protocol stacks
- Industrial supply with 5V DC
- Transmission speeds of up to 115.2 kbps
- Supports all popular 10/11-bit UART data formats
- Bluetooth access protected by password, fixed device pairing or device access list
- Multipoint-compatible with up to 3 servers

MOUSER STOCK NO.	Phoenix Type	Fig.	Description	Price Each
651-2708494	PSI-WL-PLUG-RS232/BT	E	232 Bluetooth adapter for direct mounting on 9-pos serial port, internal antenna, power supplied via USB/PS2 power adapter cable	183.00
651-2708025	PSM-VLTG-USB/PS2/0,5	-	USB/PS2 power adapter cable for Bluetooth RS-232 adapter, supplies approx. 5Vdc using the USB or PS2 port of a computer.	20.00

FL COM SERVER - SERIAL RS-232 DEVICE SERVER FOR 10/100BASE-T(X)

The FL COM SERVER converts a serial RS-232 interface to Ethernet. It allows easy integration of RS-232 devices into 10/100Base-T(X) networks.

Features:

- Supports all common Network Protocols
- Diagnostic display
- Integrated surge voltage protection
- 10/100 Base T(X) Auto Detect
- Din Rail Mount
- 22.5 Housing width

MOUSER STOCK NO.	Phoenix Type	Fig.	Description	Price Each

QUATECH Wireless Device Servers and Modules

Products may be RoHS compliant.
Check mouser.com for RoHS status.

Quatech supplies high performance device networking and connectivity solutions. Quatech has achieved this high level of performance through quality design and manufacturing, and world-class service and support. Since 1983, Quatech has become well-known for quality by investing in meticulous design, valuable features and best-in-class components like PowerPC® microprocessor. Customers also enjoy responsive, U.S.-based support. We deliver expert pre- and post-sales, technical support and specialized customization services for both large and small projects. Quatech's products are used in a wide variety of markets including banking, retail, airports, medical, traffic control, access control and security.

QUATECH WIRELESS MODULES AIRBORNE™ EMBEDDED WIRELESS

AirborneTM is a line of highly integrated 802.11 modules. The wireless module includes a radio, a base-band processor, an application processor and software for a "drop-in" web-enabled WiFi solution. Since there's no need to develop the software, or to develop the RF and communications expertise in-house, OEM's can realize reduced product development costs and a quick time-tomarket. AirborneTM modules provide instant LAN and Internet connectivity, and connect through standard serial interfaces to a wide variety of applications.

RoHS Compliant

QUATECH WIRELESS BOARDS

When you need unmatched performance, ease of use and reliability, ask for Quatech.
Quatech features the highest throughout and lowest latency available in device server technology.

Features:

- Includes the fastest and easiest Installation Wizard available
- A built-in Web server makes configuration and support available via Web browser
- Freescale™ architecture is the industry standard in networking solutions
- PowerPC® processor eliminates data bottlenecks and common latency issues
- Serial baud rates to 921 kbps and autonegotiating 10/100 Ethernet support means fast serial and network data transfers
- Operating modes such as serial tunneling, IP multicast, virtual COM ports and other protocols provide true flexibility and easy integration

QUATECH EXTERNAL WIRELESS DEVICE SERVERS AIRBORNEDIRECT™

AirborneDirectTM is a family of fully integrated 802.11 wireless LAN device server products designed to provide wireless LAN and Internet connectivity to transportation, medical, warehouse logistics, POS, industrial, military and scientific applications. The highly integrated hardware and software enables plug-and-play capability. This significantly reduces the complexity of wireless system deployment and network connectivity. Integrating AirborneDirectTM with existing OEM platforms can significantly enhance the product's value and functionality giving the OEM a competitive advantage.

QUATECH EXTERNAL WIRELESS DEVICE SERVERS - PREMIUM

All Quatech Wireless Device Servers offer a simple, integrated configuration process and the embedded 802.11b wireless radio from DPAC offers superior power and receive sensitivity. Combined with the industry's best processor, a PowerPC® from Freescale™, these models incorporate a world-class architecture that ensures compatibility with market-leading wireless infrastructures, boosts throughput and reduces latency to the lowest levels possible. This allows a broader range of serial devices to communicate over a wireless Ethernet network without modifying host software designed to use COM ports.

QUATECH EXTERNAL DEVICE SERVERS

Quatech's serial device servers are featuring a PowerPC® from Freescale™ (formerly Motorola® Semiconductor). This processor is part of a world-class architecture that offers the lowest latency available anywhere. In addition, the auto-sensing 10/100 Ethernet interface, and Quatech's proven high-speed, 921k-baud serial technology offer the best performance in the industry and ensure that your critical business applications won't be harmed by data throughput issues.

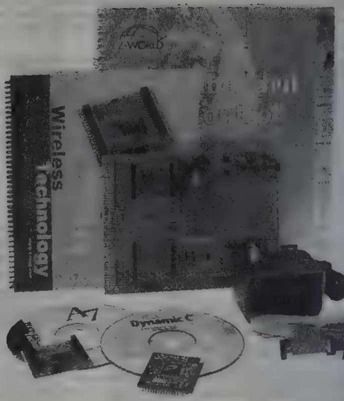
RABBIT Wireless Application Kits

BLUETOOTH RADIO MODULE APPLICATION KIT

Bluetooth Application Kit The Bluetooth Application Kit provides all of the hardware and software necessary to develop a Bluetooth application. The Application Kit includes an RCM3100, EmbeddedBlue eb506-AHC-IN Bluetooth Radio Module, prototyping board, and miscellaneous cables and hardware. The Application Kit also includes the Dynamic C Integrated Development Environment, Bluetooth drivers, libraries, sample programs, and manuals.

Features and Benefits:

- Bluetooth radio modules plug directly into supported RCMs and SBCs
- Simple serial UART communications and control
- Seamless connectivity with any Bluetooth device
- 2.4 GHz FHSS (Frequency Hopping Spread Spectrum) technology ensures high reliability and is robust to interference
- Low current consumption for long battery life
- Complete with sample applications and source code
- Internal Surface-mount antenna.



Features	EmbeddedBlue eb506-ACH-IN
Transmit Power	4dBm (max) class 2 operation
Open Field Range	More than 50 meters (164 feet)
Receiver Sensitivity	-85dBm
Operating Temperature	0° to 70° C
Supply Power	3.3 VDC
Interfaces	3.3 V logic level UART Baud rate: 9.6 k – 230.4 k
Connectors	Two 17-pin 2 mm headers
Antenna	Internal surface mount
Bluetooth Support	Version 1.2 compliant (L2CAP, RFCOMM, SDP, SPP)
Firmware	Upgradeable via PC application

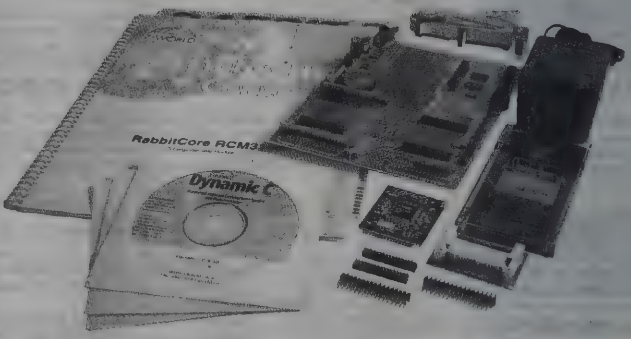
WI-FI (802.11B) APPLICATION KIT

Integrating Wi-Fi (IEEE 802.11b) with a RabbitCore™ Development Kit, embedded system integrators can now enable a wireless embedded system. Wireless connectivity eliminates Ethernet cables allowing for greater flexibility and mobility of wireless embedded Networks.

Z-World's Wi-Fi Applications Kit provides all the tools necessary to sample and design communications from a Rabbit-based device to a WiFi-enabled device (i.e. PC Laptop or any device using a Compact Flash based Wi-Fi card). The libraries and sample programs allow for a Wi-Fi card to send and receive data to/from a RabbitCore module (RCM) over a wireless connection. The RCM can also send/receive email from any PC or device with a compatible Wi-Fi card. The Wi-Fi Applications Kit includes Z-World's Dynamic C software with royalty-free TCP/IP stack.

Features and Benefits:

- Kit developed w/ LinkSys WCF12 Wi-Fi Card
- Other compatible Wi-Fi cards are Sandisk, Netgear, SMC, and D-Link
- Seamless connectivity with any Bluetooth device
- 2.4 GHz FHSS (Frequency Hopping Spread Spectrum) technology ensures high reliability and is robust to interference
- Low current consumption for long battery life
- Complete with sample applications and source code
- Internal Surface-mount antenna.



Features	Wi-Fi Application Kit
Microprocessor Core Module	RCM3100 RabbitCore module @ 29.4 MHz
Prototyping Board	Standard RCM3100 Prototyping Board
Serial Ports	RS-232 (2 3-wire or 1 5-wire). Additional CMOS ports available on RCM3100
Protocol	IEEE 802.11b (Wi-Fi) 11Mbps, 2.4 GHz
Compact Flash Connector	Type 1 Compact Flash Adapter: I/O CF based 802.11b Dual 2 x 17, 0.1" pitch socket strip
Software Compiler	Dynamic C with TCP/IP stack

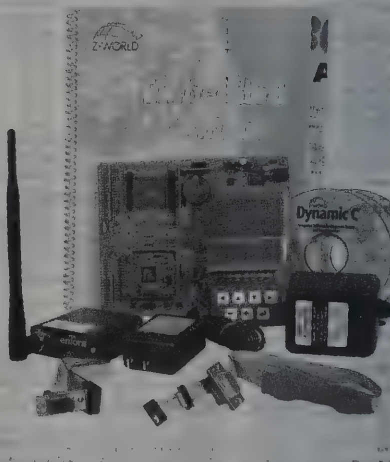
GPRS/GSM APPLICATION KIT

Cell phones are not the only devices that can communicate in a GSM network –a Rabbit-based control device is also on the list. Imagine your machines notifying you when they need servicing change settings from anywhere in the world upload data wirelessly send commands from one machine to another receive vehicle location/conditions via e-mail.

Z-World's GPRS/GSM Application Kit provides all the tools necessary to sample and develop applications that combine a Rabbit-based control device with a GSM/GPRS modem. The libraries and sample programs allow for a device connected to the cellular network to send SMS (text) messages to a RabbitCore module (RCM) that can interpret messages as commands and in turn execute control functions. The RCM can also send/receive GPRS e-mail wirelessly to/from any PC, GSM device, or cell phone. The LCD/keypad module included in the GPRS/GSM Application Kit incorporates a menu system that provides for an easy interface to read or send text messages and e-mail.

Features and Benefits:

- Hardware/Software for wireless RCM communication and control via GPRS/GSM.
- EnforaTM Spider SA-GL Quad Band wireless modem and antenna.
- GUI and Keypad configuration menu system.
- Royalty-free TCP/IP stack in source code.
- Sample programs/libraries for generic modem operation.
- Fully integrated development software: compiler, editor, and debugger for control applications.



Features	GPRS/GSM Application Kit
Microprocessor Core Module	RCM3100 RabbitCore module @29.4MHz
Prototyping Board	Standard RCM3100 Prototyping Board
Serial Ports	6 CMOS-compatible ports available on RCM3100
Display	122 x 32 Keypad/Display Unit with LCD menu system
GSM Modem	Enfora Spider SA-GL Quad Band GSM/GPRS modem
Antenna	1/2 Wave Device R/A Antenna. (1850-1990 MHz)
SIM Card (Sold separately)	Available through wireless service provider or AIRDESK
Software Compiler	Dynamic CTM with TCP/IP stack
Software Libraries	GPRS/SMS modes, Modem-specific Library
Additional Libraries	Dynamic C PPP module, Generic Modem Library
Sample Programs	For SMS and GPRS communications and control. FTP datalogging,TCP/IP, SMTP, POP3, Telnet
Menuing System	For display of SMS and GPRS communications
Power Supplies	12VDC adapter for RCM3100, 5V DC for Enfora Modem

RADIOTRONIX Embedded Wireless Modules

Products may be RoHS compliant.
Check mouser.com for RoHS status.

WI.232DTS/EUR UART-TO-RF EMBEDDED WIRELESS MODULES

The Wi.232DTS/EUR module combines a state-of-the art low power wireless transceiver with a powerful multipoint-to-multipoint protocol controller to form a transparent wireless communication solution capable of replacing wires in any RS-232/422/485 application. With a 120dB link budget and very low power operating modes, the Wi.232DTS/EUR module is excellent for AMR, RFID, Home Automation, and any other application requiring long range (<1500ft LOS) and long battery life . The Wi.232DTS module is designed for North American operation in the 902-928 MHz band. The Wi.232EUR module is designed for European operation in the 868-870 MHz band.

WI.232DTS/EUR EVALUATION MODULES

EVMs were created as an easy-to-use prototyping tool for our Wi. family of surface mount modules. Each EVM is populated with the appropriate module, a LDO regulator, a SMA connector, and two pinned headers. Customers can prototype with these modules without having to be concerned with RF specific design considerations. Therefore, these modules are ideal for hobbyists or engineers that need to get a quick proof of concept prototype working. To properly evaluate the range performance of the modules, Radiotronix does recommend the use of our RAD kits.

WI.232DTS/EUR DEVELOPMENT KITS (RAD)

The RAD kit for the Wi.232DTS/EUR modules is designed to support rapid evaluation and development using the modules. The RAD boards have both USB and RS-232 interfaces. All module pins are brought to a prototyping header. A prototyping area is provided. The boards are powered from either three on-board AAA batteries, or an external wall transformer. Software is provided to simplify evaluation/testing of the modules. Wi.232 kits support putting one board in loop-back mode for range testing.

Development Kit Contents:
Qty 2 - RAD boards
Qty 2 – EVM populated with the appropriate modules
Qty 2 – Whip antennas
Qty 2 – RS-232 cables
Qty 2 – USB cables
Qty 1 – Documentation/Software CD
Qty 6 – AAA batteries

WI.232DTS/EUR Modules Features:

- Small Size - .8"x.935"x.08"
- PHY/ MAC layer protocol built in
- CSMA medium access control
- Channel quality of service indicator
- 114 dB link budget in DTS mode
- 5 volt tolerant I/O
- Data encryption/ encoding for PGP
- 16 bit CRC data checking
- True UART to RF solution
- Range up to 1500ft Line of Sight
- Data Rate up to 152.34 kBps

WI.M900/868 RF-ONLY DROP-IN EMBEDDED WIRELESS MODULES

The Wi.M series of modules are microcontroller-less variations of the popular Wi.232 family of modules. They offer the same excellent RF performance, yet allow the design engineer to control the radio at the physical level using any microcontroller. They are an excellent choice when product cost is a critical issue or when support of legacy protocols is required. The modules in the family are footprint compatible with the entire Wi.module family. This gives the designer a level of flexibility not offered by others. Additional, the Wi.M family of modules are all factory calibrated and the calibration constants are stored in non-volatile memory on the module. By using these constants, the designer can calibrate the module in software, eliminating the need for RF testing in production. A typical circuit consists of a low-cost microcontroller, a power source, a Wi.M900X module, and an antenna. The Wi.M modules are designed to work with any microcontroller that is equipped with a hardware or software SPI port, including Microchip microcontrollers, Rabbit microcontrollers and core modules, BASIC stamps, NETBURNER core modules, and many others.

WI.M900/868 EVALUATION MODULES

EVMs were created as an easy-to-use prototyping tool for our Wi. family of surface mount modules. Each EVM is populated with the appropriate module, a LDO regulator, a SMA connector, and two pinned headers. Customers can prototype with these modules without having to be concerned with RF specific design considerations. Therefore, these modules are ideal for hobbyists or engineers that need to get a quick proof of concept prototype working. To properly evaluate the range performance of the modules, Radiotronix does recommend the use of our RAD kits.

WI.M900/868 DEVELOPMENT KITS (RAD)

The RAD kit for the Wi.232DTS/EUR modules is designed to support rapid evaluation and development using the modules. The RAD boards have both USB and RS-232 interfaces. All module pins are brought to a prototyping header. A prototyping area is provided. The boards are powered from either three on-board AAA batteries, or an external wall transformer. WI.232FHSS-25/250 FREQUENCY HOPPING EMBEDDED WIRELESS MODULES

WI.232FHSS-25

The Wi.232FHSS-25 module combines a state-of-the art low power wireless transceiver with a powerful multipoint-to-multipoint frequency protocol controller to form a complete wireless communication solution. With a simple UART interface, a 111dB link budget, and very low power operation modes the Wi.232FHSS-25 module is excellent for AMR, RFID, Home Automation, and any other application requiring long range (< 1500 feet, line of sight) and long battery life.

WI.232FHSS-250

The Wi.232FHSS-250 module combines a state-of-the art low power wireless transceiver with a powerful multipoint-to-multipoint frequency protocol controller to form a complete wireless communication solution. With a simple UART interface, a 125dB link budget, and very low power operation modes the Wi.232FHSS-250 module is excellent for AMR, RFID, Home Automation, and any other application requiring long range (7 miles LOS, 1500 feet indoors) and long battery life.

Features:
- Frequency Hopping Spread Spectrum
- 30mW TX and 250 mW TX versions
- No RF PCB Layout Necessary
- Pick and Place compatible package
- 2.7 - 3.6V power supply
- Channels: 32
- Transparent and Networking modes
- Small size: 0.8"x.935"x.08" thick for Wi.232FHSS-25
  1.25"x1.25"x .08" thick for Wi.232FHSS-250
- Hopping sequences: 6
- Max Data Rate: 115 kbps
- Temperature Range: -20° to +70°C
- Max RX Sensitivity: -104dBm

Development Kit Contents:
Qty 2 –RAD boards
Qty 2 – EVM populated with
the appropriate modules
Qty 2 – Whip antennas
Qty 2 – RS-232 cables
Qty 2 – USB cables

FCC PRE-APPROVED UART-TO-RF EMBEDDED WIRELESS MODULES

The FCC-Wi.232DTS/FHSS features our powerful and popular Wi.232DTS/FHSS modules in a FCC modular approved solution. It is designed to greatly simplify implementation of the Wi.232DTS module into a working design without the complications of FCC testing.

Features:
- FCC modular approved
- FCC ID: Q7V-3F090003X
- Temperature Range: -20° to +70°C
- Through-Hole/ Socket Mounting
- 4.5-16VDC Supply Voltage
- RP-SMA Antenna Connection
- Data Rate: 152.34 kbit/sec.
- Size: 1.5" x 1.25"
- 24Pin DIP Package

Applications:
- Remote Control
- Wire Replacement
- Automated Meter Reading
- Industrial Automation
- Medical
- Security
- Home Automation
- HVAC

Wi.232DTS-FCC

The Wi.232DTS-FCC module is a pre-certified version of the Wi.232DTS-EVM module. It is certified for use in the US and requires no FCC testing when used with any of the Radiotronix antennas. The only physical difference between the Wi.232DTS-EVM and the Wi.232DTS-FCC is that the antenna connector on the FCC version is a reverse polarity SMA. The module requires a 3.6 - 9V power supply capable of supplying 175mA continuously.

Wi.232FHSS-250-FCC

The Wi.232FHSS-250-FCC module is a pre-certified version of the Wi.232FHSS-250-EVM module. It is certified for use in the US and requires no FCC testing when used with any of the Radiotronix antennas. The only physical difference between the Wi.232FHSS-250-EVM and the Wi.232FHSS-250-FCC is that the antenna connector on the FCC version is a reverse polarity SMA. The module requires a 3.6 - 9V power supply capable of supplying 175mA continuously.

WI.M900X-DP/WI.M868X-DP EMBEDDED WIRELESS MODULES

The Wi.M900X-DP/ WI.M868X-DP module is a microcontroller-less version of our popular Wi.232DTS/EUR module. It is a drop replacement for the DP1203 from Xemics. It offers the same excellent RF performance, yet allows the design engineer to control the radio at the physical level using any microcontroller. The module supports two modes of operation: wide-band and narrow-band. In wide-band mode, the channel width is 600kHz and in narrow-band mode the channel width is 200kHz. The module is configured via a simple SPI style serial interface. Data is transmitted and received using a separate digital serial interface that includes pre-amble and start of packet detection. A typical circuit consists of a low-cost microcontroller, a power source, a Wi.M900X-DP/ Wi.M868X-DP module and an antenna.

Features:
- Based on the Xemics XE1203F transceiver
- Drop in replacement for DPI 203
- Instant physical radio solution - no external RF components required
- Supports frequency hopping
- Simple FCC certification as digital spread spectrum device
- Automatic packet start detection
- 2.4 - 3.6 volt operation
- 1.2 - 152.34 k/bit sec. data rate
- A SPI style digital serial interface
- Small size (.8"x .935"x .08" thick)
- Maximum output power = +15 dBm
- Maximum RF sensitivity = 1 12 dBm
- RF sensitivity @ max data rate = -103 dBm typ
- TX current = 52 mA @ 15 dBm typ.
- RX current = 12 - 13 mA typ.
- Sleep current = 0.2 ÌA typ.

Development Kit Contents:

WI.FREESTAR ZIGBEE READY MODULES

Long Range Zigbee Performance:
The Wi.FreeStar module is designed around the MC13192 RF transceiver from Freescale™, which based on the IEEE802.15.4 standard. The Wi.FreeStar modules is ideally suited for use in a point to point/multipoint networks or in a ZigBee™ mesh applications. The module provides enhanced range performance over standard 802.15.4 or ZigBee implementations with an integrated 100mW power amplifier, allowing the module to communicate over 4000 feet line of sight.

Partnering with L.S. Research:
Radiotronix has worked closely with LS Research, a leading Zigbee technology company, in the development of these modules. This alliance combines the RF design and manufacturing expertise of Radiotronix with the extensive Zigbee design skill sets and FCC compliance capability of LS Research to provide customers with a great new product, strong support channel, and a flexible design platform.

Star or ZigBee™ Mesh:
The Wi.FreeStar module uses the MC13192 for the LSR Star protocol and is upgradeable to use the Freescale Bee-Stack™ ZigBee solution. The module includes the MC9S08GT60CFD uP, 100mW power amplifier, power supply, & an inverted-F PCB antenna. The module is FCC and CE certified for fast and simple integration into an end application. Radiotronix can provide product modification to accommodate specific application requirements. The Wi.FreeStar module provide the lowest cost, best in class range in a small form factor.

Features:
- Communications Modes: - Point-to-point
  - Point-to-multipoint
  - Mesh (Z-Star only)
- 4000+ feet line of sight performance
- Very small form factor 1.4" X 1.0"
- Integrated PCB Trace Antenna
- FCC, IC, and CE Certified
- Direct Sequence Spread Spectrum
- CSMA-CA
- Wireless boot loader
- Flash-based/upgradeable
- 10 Bit A/D (2 inputs)
- General Purpose I/O (8 ports)
- Microsoft® Windows®-based Configuration & Test Tool
- Simple Serial UART Interface
- Over 65,000 network addresses

RoHS Compliant

EWD-900-HDTC MODULE (DATA)

The EWD-900-HDTC is an embedded wireless module based on the CC1000 transceiver from ChipCon. It can operate in the 902-928 MHz band for the US and the 868-870 MHz band for Europe. It is a good choice for short range applications where size is a consideration. An on-board EEPROM stores calibration information and a unique 48-bit MAC address.

Features:
- Operating temperature: 0°C to 70°C
- Small size: 0.7 x 0.7 x .20"
- Easy to use through hole package
- Works in 902-928 and 868-870 MHz bands
- Maximum data rate is 33.6kbit/second
- 2.7-3.3V power supply

Applications:
- Automatic Meter Reading
- Wireless Lighting
- Industrial Automation
- RFID
- Home Automation

Development Kit Contents:
- Qty 2 – RApid Development boards
- Qty 4 – EWD-900-HDTC modules
- Qty 2 – RS-232 serial DB-9 cables
- Documentation/Software CD
- Supports rapid evaluation and development with EWD-900-HDTC Modules

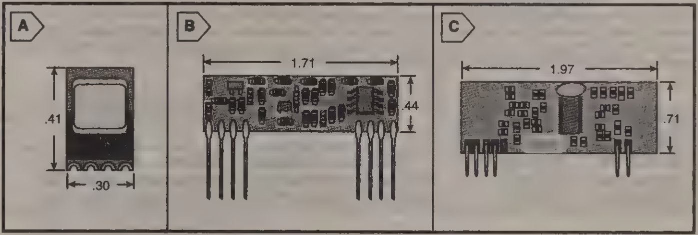
REMOTE CONTROL MODULES

RCT Series Transmitters
The RCT series of remote control OOK transmitter modules from Radiotronix are the smallest, lowest cost transmitter modules available. They are very easy to apply, just connect a data source, antenna, and power. RCT transmitters are compatible with our RP and HP series receivers. These modules operate from 2-12V.

RCR-RP Series Receivers
The RCR-RP series of remote control receiver modules from Radiotronix allow the designer to create a very low cost, wireless link capable of operation at up to 300 feet. The RP modules are based on a super-regenerative receiver architecture, allowing them to work with virtually any AM/ASK/OOK transmitter available, including SAW and LC based transmitters. These modules operate at 5V.

RCR-HP Series Receivers
The RCR-HP series of remote control receiver modules from Radiotronix offer better performance than the RP series. The receiver is based on a super-heterodyne architecture, making the receiver much more immune to outside interference. When coupled with our RCT transmitters, a very simple RF link is formed that is capable of operation over distances of up to 1000 feet. These modules are available in 3V and 5V versions.



Dimensions are approximate: in.

For quantities of 250 and up, call for quote.

RF MONOLITHICS Short Range Radios and RFICs

RF Monolithics, Inc.

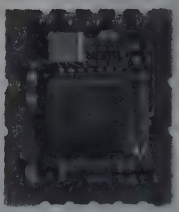
RFM's RF Components and Short-range Radio Transmitters, Receivers, & Transceivers enable M2M capabilities as embedded components within telemetry devices in order to enable wireless connectivity. Original equipment manufacturers (OEMs) embed RFM products to provide RF functionality and connectivity within single piece of equipment or across entire operating systems.

VIRTUAL WIRE RADIO

RFM's 2G and 3G Virtual Wire products are based on RFM's ultra low power, proprietary amplifier-sequenced hybrid (ASH) radio architecture and offer the following features:

Features:

- Integrated RF IC with quartz SAW filtering and frequency control components in a single hybrid
- High Data rates for data, control and digitized voice transmissions
- Stable, sensitive receiver technology with excellent "channel capture" performance
- Ultra Low current consumption for operation from small 3 V batteries
- Very small, low-profile package to make "watch size" applications practical
- Rugged, self-shielding, metal-ceramic hybrid package
- Wide operating temperature range for industrial and outdoor applications
- Easy to optimize for a wide range of application requirements
- Easy certification to stringent short-range radio regulatory requirements
- No external RF filters, IF filters, resonators or crystals are required



RF Modules

RF Modules

For quantities of 500 and up, call for quote.

MOUSER STOCK NO.	RF Monolithic Part No.	Description	Power Output	Operating Voltage	Operating Temparature	Price Each		
						1	100	250

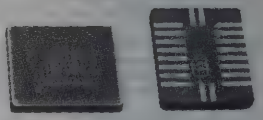
Transceivers

RFM's amplifier-sequenced hybrid (ASH) transceiver is specifically designed for short-range wireless data communication applications. The transceiver provides robust operation, very small size, low power consumption and low implementation cost. All critical RF functions are contained in the hybrid, simplifying and speeding design-in. The ASH transceiver can be readily configured to support a wide range of data rates and protocol requirements. The transceiver features excellent suppression of transmitter harmonics and virtually no RF emissions when receiving, making it easy to certify to short- range (unlicensed) radio regulations.



Transceivers

For quantities of 500 and up, call for quote.

Transmitters

RFM's TX-series hybrid transmitters are specifically designed for short range wireless data communication applications. These transmitters provide robust operation, very small size, low power consumption and low implementation cost. All critical RF functions are contained in the hybrid, simplifying and speeding design-in. The transmitters can be readily configured to support a wide range of data rates and protocol requirements. TX-series transmitters feature excellent suppression of output harmonics and virtually no other RF emissions, making them easy to certify to short range (unlicensed) radio regulations.

RFICs

RFM's RFIC Products include PLL based, single or multi-channel Transceiver, Transmitter and Receiver products, Evaluation boards and RF Design Assistant Software, servicing varied wireless applications in the market place and offer the following features:

Features:

- Integrated PLL, IF, Baseband Circuitry, thus minimizing external component count and simplifying and speeding design-ins
- Support for Multiple Channels
- Wide Frequency range
- Wide operating supply voltage
- Frequency Hopping Spread Spectrum capability
- Low current consumption
- Very few external components required
- Small size plastic packages

For quantities of 500 and up, call for quote.

SKYETEK Developer Kits and Modules

skyetek™

SKYEMODULE™ DEVELOPER KITS

The SkyeTek™ Developer Kit is a complete RFID development tool kit that enables quick demonstrations, proof-of-concepts, and trials when integrating RFID into numerous applications and products. The SkyeTek™ Developer Kit includes all the components needed to get started, including: reader modules, sample tags, RFID antennas, connectors, demo software, device drivers, design guides, application notes, and more.

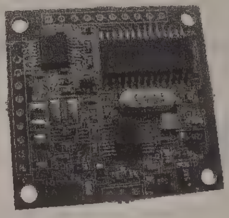
SKYEMODULE™ M1

SkyeModule™ M1, a multi-protocol embedded HF RFID reader module for OEM's, provides a low power, high-performance, and cost-effective option to embedded RFID as a feature in a variety of products.



Features:

- Multi-protocol, 13.56 MHz +/- 7kHz
- Effective Range: 5.5-8.5cm
- Internal (On-board) antenna
- 50 Ohm port for External antenna
- Host-interface options: RS-232, TTL, I2C, SPI
- Operates from 1.8 to 5.0V and as low as 60 μA
- Eight programmable GPIO pins

Benefits:

- Low cost and small form factor
- Easy to embed
- Low power consumption and high performance

Target Applications:

- Medical equipment, Pharmaceuticals, Kiosks, Printers, Handhelds, Ticketing, Industrial equipment, etc.

For quantities greater than listed, call for quote.

MOUSER STOCK NO.	SkyeTek Part No.	Price Each

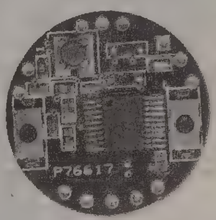
SKYEMODULE™ M1-MINI

SkyeModule™ M1-mini provides a low power, high performance, and cost-effective platform designed to enable any device with RFID reader technology. The M1-mini is the world's smallest, self-contained multi-protocol 13.56 MHz OEM module.



Features:

- Multi-protocol, 13.56 MHz +/- 7kHz
- Smaller than a US quarter
- Effective Range: 5.5-8.5cm
- Internal (On-board) antenna
- 50 Ohm port for External antenna
- Host-interface options: TTL serial, I2C, and SPI
- Operates from 3.2 to 6.0V; and as low as 50 μA

Benefits:

- Worlds smallest form factor
- Simple and intuitive API for fast integration/time to market
- Low power consumption and high performance

Target Applications:

- Medical equipment, Pharmaceuticals, Kiosks, Printers, Handhelds, Ticketing, Industrial equipment, etc.

For quantities greater than listed, call for quote.

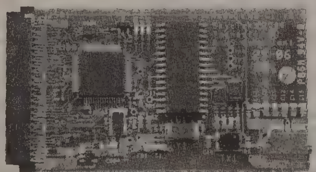
SKYEMODULE™ M2

SkyeModule™ M2, the industry's most secure multi-protocol embedded HF RFID reader module for OEMs, was designed specifically for flexibility and encrypted authentication across a range of vertical markets.



Features:

- Multi-protocol, 13.56 MHz +/- 7kHz
- Effective Range: 3-16cm
- Robust security libraries (DES, 3DES, AES etc.)
- Host-interface options: RS-232, I2C, SPI, USB
- Seven programmable GPIO pins
- Output power adjustable between 17-23 dBm

Benefits:

- Industry leading security and best-in-class cryptographic standards
- Miniscule foot print and Greatest tag compatibility with Tagnostic capabilities
- Superior embeddability and open, flexible architecture for investment protection

Target Applications:

- Anti-counterfeiting, Contactless Payment, Patient Safety, Item-Level Inventory, Printing/Encoding, Handhelds, Patron Management

For quantities greater than listed, call for quote.

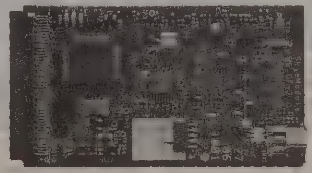
SKYEMODULE™ M9

SkyeModule™ M9, a small globally compliant UHF RFID reader module, is a high-performance, secure, power-efficient solution for a broad range of products. Half the size of a typical business card, the module is cost-effective and highly scalable.



Features:

- 862-955 MHz
- Effective Range: 2.5M+
- Meets worldwide regulatory requirements.
- Industry's first standards-based UHF security
- Host-interface options: UART (TTL), I2C, SPI, USB
- RF output power is software adjustable from 15mW to 500mW

Benefits:

- Supports more standards and tags than any other comparable reader
- Global SKU that provides regulatory pre-scan certification for all major markets
- Unprecedented price-performance and TCO

Target Applications:

- Anti-counterfeiting, Handheld reading/encoding, Printing, Patron Management, Item-Level Inventory, Supply Chain Management

For quantities greater than listed, call for quote.

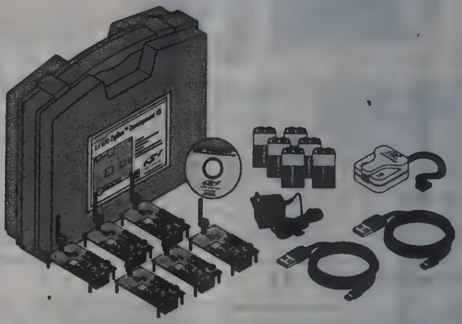
SILICON LABS 2.5 GHZ ZIGBEE™ DEVELOPMENT KITS

Silicon Labs offers 802.15.4 and ZigBee development kits that allow customers to focus on application development rather than hardware selection. These comprehensive kits include all the hardware and software needed to immediately begin developing 802.15.4 or ZigBee network solutions.



2.4GHz ZigBee Development Kit:
This kit combines a high-performance C8051F121 MCU, an IEEE 802.15.4 compliant RF transceiver, the MAC firmware, the Helicomm ZigBee Protocol stack and the Silicon Laboratories Integrated Development Environment (IDE).

2.4GHz 802.1504 Development Kit:
This kit combines a high-performance C8051F121 MCU, an IEEE 802.15.4 compliant RF transceiver, the MAC firmware and the Silicon Laboratories IDE.

Kits Contain:

- Application examples
- MAC and ZigBee protocol stack software
- 802.15.4 MAC-level application development
- ZigBee application development
- Silicon Labs Integrated Development Environment (IDE)
- Complete modules based on 8051 MCUs

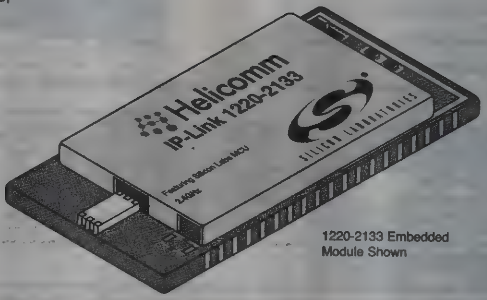
Helicomm 2.4 GHZ ZIGBEE™ EMBEDDED OEM MODULES

WIRELESS SOLUTIONS • SIMPLIFIED™

Helicomm's award-winning products allow you to quickly and easily integrate wireless networking solution and increase your competitive advantage. Helicomm's highly integrated IP-Link Modules simplify wireless integration and reduce development cycles by six months or more. Each IP-Link embedded module includes an IEEE 802.15.4-compliant radio, a Silicon Laboratories 8051 microcontroller, programmable I/O, flexible antenna and range solutions, and ZigBee-Ready IP-Net " networking software.



1220-2133 Embedded Module Shown

Module Specifications:

- Frequency: 2.4GHz
- Max Data Rate: 250Kbps
- Receive Sensitivity: -94dBm
- Transmit Range: 150m (122x-2033 Models)
  400m (122x-2133 Models)
- Data Encryption: 128-bit AES
- Antenna: On Board Chip
- Certification: FCC Part 15, CE
- Transmit Power: 55mA (122x-2033 Models)
  100mA (122x-2133 Models)
- Receive Power: 55mA (122x-2033 Models)
  100mA (122x-2133 Models)
- Microcontroller: Silicon Laboratories, 8051 based
- Transceiver Chip: Chipcon CC2420
- Model (122x-2033) Size: 1.6 x 0.7 x 0.2 in.
  41x19x4 mm
- Model (122x-2133) Size: 1.8 x 0.7 x 0.2 in.
  46x19x4 mm
- Operating Temp.: -20°C to +70°C
- Humidity: 10% - 90%
- Physical Pins: 62 (122x-2033 Models)
  70 (122x-2133 Models)
- RF Channels: 16 (5MHz)

Helicomm EZDK 1220PA DEVELOPMENT KIT FOR OUT-OF-THE- BOX ZIGBEE™ NETWORKING

WIRELESS SOLUTIONS • SIMPLIFIED™

Use your EZDK 1220PA Kit to implement and test both simple and sophisticated networks of IP-Link Modules. Helicomm's WIN-View Software lets you individually program Modules, build Networks and view Network Summary Tables. Test your Network's robustness by inducing link breakages using the blacklisting function and observing resultant Network behavior. Link and Network level reliability test and monitoring functions let you evaluate Network reliability over time. The power that the EZDK 1220PA gives you to rapidly build and test Module and Network configurations translates to saved time and money and reduced development risk.

Development Kit Contains:

- (6) 2.4 GHz IP-Link Boards with integral IPLink 1220PA Modules
- WIN-View Networking Management Software
- Complete documentation including Module API specifications, networking examples and tutorials
- All required cables and power supplies

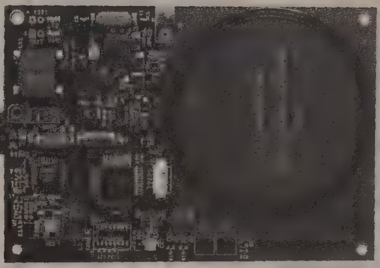
TEK Embedded RFID Products

TEK Industries, Inc. is a technologically advanced corporation dedicated to providing tomorrow's solutions today through innovation and technology. An innovative RFID and contract manufacturing company, TEK is a technologically advanced corporation dedicated to the design and development of custom electronic products for a vast range of applications. As a dynamic small business in the RFID and Auto-ID market, TEK offers stationary and mobile RFID readers along with a complete active tag system.

MOUSEMAT BARE BOARD

The TEK Mousemat is a custom-designed RFID reader/writer capable of reading and writing to the industry standard 13.56MHz tags. The Mousemat was originally designed for a large supply chain application. It attaches to the computer through a USB port. Applications for the Mousemat include order entry, computer security and inventory control.
Software source files are free and available for developers upon request. USB cable not included.



For quantities of 500 and up, call for quote.

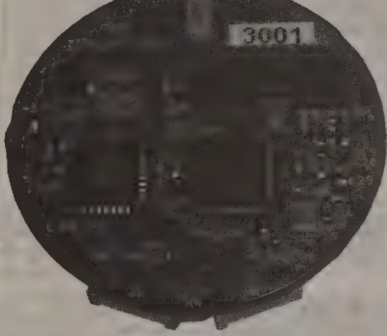
Z-TAG (ROUND TAG)

This compact 1.4" diameter PCB includes a holder for a single 3V lithium coin cell. The Z-TAG is intended as a complete minimal low power radio module for monitoring or active tagging applications. It has CC2420 plus PIC18LF2520 in a tiny package with ceramic antenna. This runs the 3.5 stack with enough resources for a basic RFD. The Z-TAG has three spare IO lines brought to a header for remote control or monitoring applications. The tag can easily accommodate a memory size of 128Kbytes.



For quantities of 500 and up, call for quote.

Z-RADIO SYSTEM

Z-USB Interface:

This is a USB interface for connecting the radio network to a laptop or PC.The PCB is 1.1" x 2.1". A mini-USB port is built into the board for easy networking with a computer or PC. Using the FTDI FT232R chip, PIC 18LF2620 and CC2420, the Z-USB can run the Microchip 3.5 stack coordinator or RFD and is self-powered from the USB. Use with a standard mini-USB cable.

Z-Link Interface:

This is a slightly larger PCB, measuring 3.3" x 2.2". It has a battery holder for 3xAA cells on the back and a DC supply jack. The Z-LINK uses the PIC18F66J10 plus CC2420, folded PCB dipole antenna The Z-Link also has an RS232 interface and fits into a readily available Hammond enclosure. The Z-LINK can run RFD, FFD, Coordinator, or Router. PIC is a trademark of Microchip Technology Inc.

Products may be RoHS compliant.
Check mouser.com for RoHS status.

Tyco Electronics
Authorized Distributor

With the mission of supporting our customers to implement GPS functionality into their systems, Tyco Electronics is offering a large product portfolio to cover almost all integration possibilities in an easy way. All GPS products are manufactured in our ISO9001 and TS16949 certified factory inside the EU. Beyond that our modules follow RoHS standards and are 100% electrically and functionally tested prior to packaging.

USB1029-C:
The USB1029-C is a demonstration kit for the A1029-C GPS Receiver Module. It is easily installed to you PC environment via USB connections.
Each Kit contains the following:
- A1029-C module
- Active Antenna
- USB cable
- CD w/ GPS Cockpit Software

DKS1029-D:
The DKS1029-D is a demonstration kit for the A1029-C GPS Receiver Module. This kit connects to your PC environment via RS232 connections
Each Kit contains the following:
- A1029-D module
- Active Antenna
- Serial cable
- CD w/ GPS Cockpit Software

EVA1037-A:
The EVA1037-A is an evaluation board for the A1037-A GPS Receiver Module. It is easily installed to you PC environment via USB connections.
Each Kit contains the following:
- A1037-A module
- Active Antenna
- USB cable
- CD w/ GPS Cockpit Software

EVA1080-A:
The EVA1080-A is an evaluation board for the A1080-A GPS Receiver Module. It is easily installed to you PC environment via USB connections.
Each Kit contains the following:
- A1080-A module
- Active Antenna
- USB cable
- CD w/ GPS Cockpit Software

DKS1035-C:
The DKS1035-C is a demonstration kit for the A1029-C GPS Receiver Module. This kit connects to your PC environment via RS232 connections
Each Kit contains the following:
- A1035-C module
- Active Antenna
- Serial cable
- CD w/ GPS Cockpit Software

CONNECT ONE iChip, Socket Modules, & Device Servers

Connect One
The Device Networking Authority

Products may be RoHS compliant.
Check mouser.com for RoHS status.

CONNECT ONE ICHIP

iChip™ updateable Internet Controller™ chips provide a cost-effective and reliable solution for embedding IP-based communication and other network services in low-cost, non-PC devices running M2M (machine-to-machine) applications. iChip mediates the connection between a host device and the Internet, operating as an embedded device server. It eliminates the need for Internet programming and avoids the hassle, risks and costs of a development project. Instead, you are assured a fast design-in, with predictable timing and budget. Typical design time is one man-month.

iChip CO120SQ:
- 64-pin TQFP form-factor, measuring 10 x 10mm
- Designed for WiFi and 10/100BaseT access
- Includes USB v2.0 Full Speed Device (client) interface
- Host interface supports 250 kbits/second in Serial mode
- Locally updatable firmware
- Operates in the industrial temperature range
- WPA/WPA2 support for WiFi

iChip CO711AG:
- Packaged in a 121-ball micro BGA form-factor
- Host interface supports 230 kbits/second in Serial mode
- Supports switchable dial-up, wireless and LAN connectivity
- Locally or remotely updatable firmware
- Supports SSL3/TLS1 protocol for secure sockets and FTP (FTPS), WEP and WPA encryption for WiFi
- Supports up to 10 simultaneous TCP or UDP sockets, two listen sockets, Web server, RAS server, SMTP and POP3 clients, MIME attachments, FTP and Telnet clients, and SerialNET™ mode for plug-and-play functionality

iChip CO710AG:
- Packaged in a 121-ball micro BGA form-factor
- Host interface supports 230 kbits/second in Serial mode
- Supports switchable dial-up, wireless and LAN connectivity
- Locally or remotely updatable firmware
- Supports up to 10 simultaneous TCP or UDP sockets, two listen sockets, Web server, RAS server, SMTP and POP3 clients, MIME attachments, FTP and Telnet clients, and SerialNET™ mode for plug-and-play functionality
- WPA/WPA2 support for WiFi

CONNECT ONE IWIFI SOCKET MODULE

Socket iWiFi Sec™ is a secure serial-to-Wireless LAN device server module that also acts as a bridge to connect serial devices to 802.11b/g Wireless LANs. It supports up to 10 simultaneous TCP/UDP sockets, two listening sockets, SMTP, MIME, POP3, FTP, Telnet, and HTTP clients, a Web server, and a serial-to-IP bridging mode. Socket iWiFi Sec supports numerous security protocols It is packaged in RoHS-compliant SocketModem™ form factor, uses the standard SocketModem pin-out, and operates in an extended temperature range.

Hardware Specifications:
- Size: 64.5 x 27.4 x 11 mm (2.54 x 1.08 x 0.433 in.).
- Operating Humidity: 90% maximum (non-condensing).
- Operating Temperature Range: -20° to 70° C (-4° to 158° F).
- Operating Voltage: 3.3v, +/- 5% DC.
- Power supply current from VDD (Operating Mode): 350 mA typical, 500 mA maximum
- Power Consumption Power Save mode: 24 mA typical, 30 mA maximum
- Power Consumption Sleep mode: 5 mA typical, 8 mA maximum
- Connector: UFL ultra-miniature coax to antenna.
- Host Interface: RS-232

Performance Specifications:
- Host Data Rate: 2,400 bps to 230 kbps
- AT+i mode: Asynchronous character: binary: 8 data bits: no parity: 1 stop bit
- SerialNET mode: Asynchronous character: binary: 7 or 8 data bits: odd, even, or no parity: 1 stop bit
- Standard Operating Mode: EIA RS-232 full duplex.
- Flow Control: hardware (DTR, RTS, CTS, DSR) and software flow control (Connect One's Wait/Continue method).
- Supports SSL3/TLS1.0 and FTPS

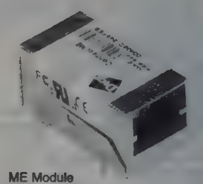
DIGI INTERNATIONAL Embedded Modules & Development Tools

Products may be RoHS compliant.
Check mouser.com for RoHS status.

DIGI CONNECT® ME FAMILY WIRED AND WIRELESS EMBEDDED MODULES

The industry's first interchangeable secure wired and wireless embedded modules with plug-and-play functionality and comprehensive development tools make it easy to add embedded web-enabled wired and wireless network connectivity.

Based on a unique common platform design approach, the Digi Connect® ME and Digi Connect® Wi-ME embedded modules offer complete "drop-in" integration. This allows you to build future-proof products based on a single design supporting secure wired 10/100Base-T and 802.11b wireless Ethernet connectivity. The family of Digi Connect® embedded modules makes all of this possible without the traditional complexities of hardware and software integration work, and at a fraction of the time and cost required to create custom solutions.



ME Module

Hardware:
- 32-bit NET+ARM high-performance RISC processor (NS7520 @ 55 MHz)
- Digi Connect ME on-board memory
  - 2 MB Flash and 8 MB RAM
- Digi Connect Wi-ME on-board memory
  - 4 MB Flash and 8 MB RAM
- On-board power supervisor
- High-speed TTL serial interface
  - Throughput up to 230 Kbps
  - Full signal support for TXD, RXD, RTS, CTS, DTR, DSR and DCD
  - Hardware/software flow control
- Five shared General Purpose Input/Output (GPIO) ports
- Wave-solderable design (no clean flux process)

Network Interface:
Digi Connect ME:
- Standard: IEEE 802.3
- Physical Layer: 10/100Base-T
- Data rate: 10/100 Mbps (auto-sensing)
- Mode: Full or half duplex (auto-sensing)
- Connector: RJ-45
- 802.3af mid-span power pass-through

Digi Connect Wi-ME:
- Standard: IEEE 802.11b
- Frequency: 2.4 GHz
- Data rate: Up to 11 Mbps
- Modulation: CCK (11/5 Mbps), DQPSK (2 Mbps), DBPSK (1 Mbps)
- Transmit power: 16 dBm typical
- Receive sensitivity: -82 dBm @ 11 Mbps
- Antenna connector: 1 x RP-SMA

Wireless Security:
- WEP (Wired Equivalent Privacy)
  - 64/128-bit encryption (RC4)
- WPA/WPA2/802.11i
  - 128-bit TKIP/CCMP encryption
  - 802.1x EAP authentication LEAP (WEP only), PEAP, TTLS, TLS GTC, MD5, OTP, PAP, CHAP, MSCHAP, MSCHAPv2, TTLS-MSCHAPv2
  - Pre-Shared Key mode (PSK)

Dimensions (LxWxH):
- Digi Connect EM
  49.149mm x 40.005mm x 15.621mm
  1.935in x 1.575in x 0.803in
- Digi Connect Wi-EM
  49.149mm x 47.117mm x 19.939mm
  1.935in x 1.855in x 0.785in

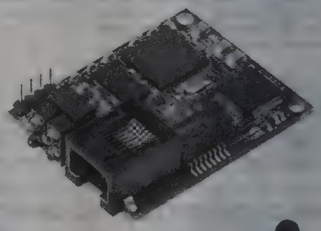
DIGI CONNECT® EM FAMILY WIRED AND WIRELESS EMBEDDED MODULES

The Digi Connect® EM and the Digi Connect® Wi-EM are the industry's first interchangeable secure embedded modules, delivering wired and wireless Ethernet network connectivity that is cost-effective and easy to implement.

Based on a unique common platform design approach, the Digi Connect EM and Digi Connect Wi-EM embedded modules offer complete "drop-in" integration. This allows you to build future-proof products based on a single design supporting secure 10/100Base-T wired and 802.11b wireless Ethernet connectivity. Digi Connect EM embedded modules make all of this possible without the traditional complexities of hardware and software integration work, and at a fraction of the time and cost required to create custom solutions.



EM Module

Hardware:
- 32-bit NET+ARM high-performance RISC processor (NS7520 @ 55 MHz)
- On-board memory 4 MB Flash and 8 MB RAM
- On-board power supervisor
- Two high-speed TTL serial interfaces
  - Throughput up to 230 Kbps
  - Full signal support for TXD, RXD, RTS, CTS, DTR, DSR and DCD on port 1
  - TXD / RXD signals on port 2
  - Hardware/software flow control
- Serial Peripheral Interface (SPI)
- Nine shared General Purpose Input/Output (GPIO) ports
- Wave-solderable design (no clean flux process)

Network Interface:
Digi Connect EM:
- Standard: IEEE 802.3
- Physical Layer: 10/100Base-T
- Data rate: 10/100 Mbps (auto-sensing)
- Mode: Full or half duplex (auto-sensing)
- Connector: RJ-45

Digi Connect Wi-EM:
- Standard: IEEE 802.11b
- Frequency: 2.4 GHz
- Data rate: Up to 11 Mbps w/ auto talk back
- Modulation: CCK (11/5 Mbps), DQPSK (2 Mbps), DBPSK (1 Mbps)
- Transmit power: 16 dBm typical
- Receive sensitivity: -82 dBm @ 11 Mbps
- Antenna connector: 2 x RP-SMA

Wireless Security:
- WEP (Wired Equivalent Privacy)
  - 64/128-bit encryption (RC4)
- WPA/WPA2/802.11i
  - 128-bit TKIP/CCMP encryption
  - 802.1x EAP authentication
    - LEAP (WEP only), PEAP, TTLS, TLS
    - GTC, MD5, OTP, PAP, CHAP, MSCHAP, MSCHAPv2, TTLS-MSCHAPv2
  - Enterprise and Pre-Shared Key

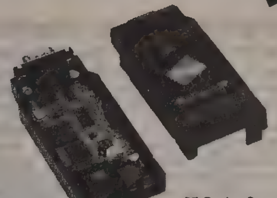
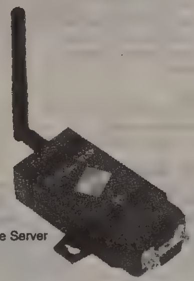
DIGI CONNECT® SP FAMILY WIRED AND WIRELESS DEVICE SERVERS



SP Device Server



Wi-SP Device Server

The Digi Connect SP device server delivers a powerful, compact and cost-effective off-the-shelf hardware platform for embedded networking solutions.

Built on leading NetSilicon 32-bit NET+ARM technology, the Digi Connect SP device server provides a powerful off-the-shelf hardware platform for embedded web and network applications with a seamless migration path to embedded modules and a fully integrated NetSilicon system-on-chip solution using the award-winning family of Ethernet-enabled NET+ARM microprocessors.

Features:
- 32-bit NET+ARM high-performance RISC processor (NS7520 55 MHz)
- 4 MB Flash and 16 MB RAM integrated
- Switch-selectable RS-232/422/485 interface (DB-9M)
    - Throughput up to 230,400 bps
    - 7, 8 data bits
    - 1, 1.5, 2 stop bits
    - Mark/space/even/odd parity
    - Full signal support with software/hardware flow control
- Auto-sensing 10/100 Mbit Ethernet interface and network link

Environmental:
- Operating Temp: -0°C to +60°C
- Relative Humidity: 5% to 90% (non-condensing)

Wi-SP Wireless Security:
- WEP (Wired Equivalent Privacy)
    - 64/128-bit encryption (RC4)
- WPA/WPA2/802.11i
    - 128-bit TKIP/CCMP encryption
    - 802.1X EAP authentication

Wi-SP Wireless Interface:
- Standard: IEEE 802.11b
- Frequency: 2.4 GHz
- Data rate: Up to 11 Mbps with automatic fallback
- Modulation: CCK (11/5 Mbps), DQPSK (2 Mbps), DBPSK (1 Mbps)
- Transmit power: 16 dBm typical
- Receive sensitivity: -82 dBm @ 11 Mbps
- Antenna connector: 1 x RP-SMA

Dimensions:
- Length: 4.188 in (10.64 cm)
- Width: 1.680 in (4.267 cm)
- Depth: 0.999 in (2.537cm)

Development Kit Contents:
- Digi Connect SP or Wi-SP w/JTAG
- Macgraigor Raven JTAG debugger
- NET+Works software components
- SMICng MIB compiler
- Micro XML SAX parser
- Additional utilities
    - HTML-to-C compiler
    - Flash download
- Sample code
- Documentation
- Cables
- Loop-back adapter
- Power supplies

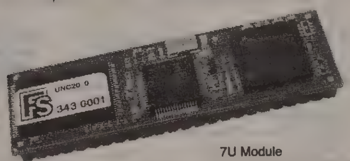
CONNECTCORE™ 7U POWERFUL ARM7 CORE MODULE



7U Module

Universal 32-bit NET+ARM embedded core processor module offers a wide range of component connectivity options and superior software design flexibility through complete development platform support options.

Built on leading NetSilicon 32-bit NET+ARM technology, the ConnectCore 7U is a powerful and universal embedded module in a compact 48-pin Dual In-line Package (DIP) form factor. It provides the ideal core processor platform for product designs demanding an additional level of performance, connectivity and development platform flexibility.

Complete and royalty-free LxNETES Linux and NET+OS development kits with development board, documentation, hardware debugging options, cables and accessories are available for evaluation/development use.

In addition, ready-to-run application-focused development kits for Java based development, serial LCD integration, CAN bus communication, Bluetooth connectivity, CompactFlash/WLAN support, and biometric fingerprint reading are also available. These kits provide all required hardware/software components and are specifically designed to reduce overall development cost and time-to-market of your products

Hardware:
- 32-bit NET+ARM high-performance RISC processor NS7520 @ 55 MHz
- 2/8 MB Flash and 16 MB RAM onboard
- Integrated 10/100 Mbps Ethernet MAC/PHY
- Two serial interfaces
    - UART mode w/data rates up to 230 Kbps
    - SPI mode (Master only)
- 8 KB serial EEPROM for configuration storage
- Standard mode I2C software bus interface (100 kHz)
- External memory bus interface
    - 10 address bits
    - 8 data bits
    - 2 external chip selects
- Two independent 27-bit timers (IRQ/FIQ, 2microseconds to 20 hours)
- On-board JTAG interface

Ethernet Interface:
- Standard: IEEE 802.3
- Physical layer: 10/100Base-T
- Data rate: 10/100 Mbps (auto-sensing)
- Mode: Full or half duplex (auto-sensing)

Power Requirements:
- 3.3VDC @ 280 mA (max)

Features:
- Core processor module in compact 48-pin DIP form factor
- Powerful 32-bit NET+ARM processor
- 16 MB RAM and up to 8 MB Flash
- Integrated 10/100 Ethernet MAC/PHY
- Up to 2 high-speed serial ports – UART and SPI (Master) configurations
- Standard mode I2C software interface
- 16 shared GPIO port options
- External memory bus interface
- Software design flexibility through royalty-free development platforms – NET+OS® and LxNETES™ Linux
- Optional VxWorks® support package
- Application-specific development kits – Java®, CAN, Bluetooth®, Biometrics, CompactFlash®/Wireless LAN, LCD

Environmental:
- Operating temperature: 0° C to +70° C (+32° F to +158° F)
- Relative humidity: 5% to 90% (non-condensing)

Dimensions:
- Length: 2.475 in (6.287 cm)
- Width: 0.728 in (1.850 cm)
- Height: 0.409 in (1.040 cm)

CONNECTCORE™ 9C POWERFUL ARM9 CORE MODULE

Highly-integrated, compact DIMM form factor module based on the 155 MHz NS9360 ARM9 processor provides core processing functionality with integrated network connectivity.

Built on leading NetSilicon 32-bit NET+ARM technology, the ConnectCore 9C module also provides a seamless migration path to a fully integrated system-on-chip solution. Based on the easy-to-use and entirely royalty-free NetSilicon NET+Works® development platform, the ConnectCore 9C delivers a complete out-of-the-box solution for embedded software development. It provides all the integrated building blocks needed to quickly and cost-effectively create secure and fully network-enabled product solutions. This minimizes design risk and significantly accelerates the overall embedded software development process.

Hardware:
- 32-bit NS9360 high-performance RISC processor (155 MHz) w/MMU
- Board memory - 4 MB Flash /16 MB RAM
- Up to 4 high-speed TTL serial ports
- Up to 4 SPI ports
- I2C v1.0 bus interface
- USB 2.0 Host/Device Interface
- LCD controller
- General Purpose Timers/Counters/PWM
- 4 programmable external interrupts
- Up to 55 shared General Purpose
- Real-time clock

Dimensions:
- Length: 3.50 in (88.90 mm)
- Width: 2.10 in (53.34 mm)
- Height: 0.80 in (20.32 mm)

Network Interface:
- Standard: IEEE 802.3
- Physical Layer: 10/100Base-T
- Data rate: 10/100 Mbps
- Mode: Full or half duplex
- On-board connector: RJ-45 w/magnetics
- 802.3af power pass-through

Environmental:
- Operating temperature: -40° C to +85° C (-40° F to +185° F)
- Relative humidity: 5% to 95% (non-condensing)

Power Requirements:
- Module: 3.3VDC @ 450 mA max
- USB interface: 5VDC @ 500 mA max per port (optional)

Development Kit Contents:
- ConnectCore 9C module
- Development board
- Macgraigor Raven JTAG debugger or gdb software debugger
- Microcross™ GNU X-Tools
- Sample code
- Driver source code
- ThreadX Real-Time Operating System
- Fusion™ TCP/IP stack with full networking protocol
- Universal IP address assignment
- Network discovery services - ADDP, LDAPv3
- Allegro Software Embedded Web Server
- SSL 3.0/TLS 1.0 with strong encryption
- Flexible & robust file system supporting RAM & Flash
- SMICng SNMP MIB compiler
- Micro XML SAX parser
- Utilities - HTML-to-C compiler, Flash download

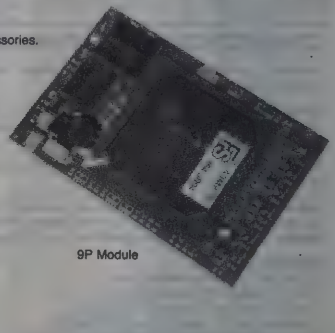
CONNECTCORE™ 9P POWERFUL ARM9 CORE MODULE

Compact high-performance 32-bit NET+ARM processor module family combines superior performance and design integration flexibility with complete embedded software platform support.

Built on leading NetSilicon® 32-bit NET+ARM technology, the network-enabled ConnectCore 9P family provides a modular and scalable core processor solution that significantly minimizes software and hardware design risk and dramatically improves the time-to-market aspects of your product development process.

Complete and royalty-free development kits supporting the NET+OS, LxNETES Linux, and Microsoft Windows CE environments are available for platform evaluation and product development use. All development kits include a development board, hardware debugging options, board support packages, sample code, documentation, cables, and related accessories.



9P Module

Hardware:
ConnectCore 9P 9750
- 32-bit NET+ARM (ARM926EJ-S) high-performance RISC processor NS9750 @ 200 MHz
- Up to 128 MB NAND Flash and 64 MB SDRAM
- Integrated 32-bit PCI v2.2/Cardbus Bridge (33 MHz)
- 16 General Purpose Timers/Counters
- Up to 50 GPIO port options

ConnectCore 9P 9360
- 32-bit NET+ARM (ARM926EJ-S) high-performance RISC processor NS9360 @ 177 MHz
- Up to 128 MB NAND Flash and 128 MB SDRAM
- 8 General Purpose Timers/Counters or 4 PWM funct.
- Up to 73 GPIO port options

ConnectCore 9P Features:
- 240-pin core processor module in compact 60 x 44 mm form factor
- Integrated 10/100 Mbps Ethernet MAC/PHY
- Up to four serial interfaces w/UART and SPI mode
- Integrated USB 2.0 compliant host/device interface
- On-chip I2C bus interface (100/400 kHz)
- Flexible LCD controller with support for TFT/STN displays
- External memory bus interface
  - 32-bit data bus and 28-bit address bus
- Real-Time Clock (RTC) with external battery backup
- 8 KB serial EEPROM for configuration storage
- On-board JTAG interface
- USB host and device mode support
- Fast-mode I2C hardware interface

Ethernet Interface:
- Standard: IEEE 802.3
- Physical layer: 10/100Base-T
- Data rate: 10/100 Mbps
- Mode: Full or half duplex

Dimensions:
- Length: 2.362 in (6.0 cm)
- Width: 1.732 in (4.4 cm)
- Height: 0.395 in (1.0 cm)

Environmental:
- Operating temperature: 0°C to +70°C (+32°F to +158°F)
- Relative humidity: 5% to 90% (non-condensing)

Power Requirements:
- **9750** - 3.3VDC @ 600 mA (max)
- **9360** - 3.3VDC @ 400 mA (max)

DIGI/ FS FORTH A9M2410/ A9M2440 EMBEDDED CORE MODULES

These high performance, Samsung processor based, modules are members of FS Forth-System's ModARM9 family of modular solutions for embedded systems. These modules includes SDRAM, Flash and control logic in a compact 60x44mm form factor. Low power consumption allows for battery-powered applications. Other typical applications include those in Industrial Automation, Retail Point-Of-Sale, Medical Instrumentation, Data Acquisition.

A9M2410:
- Samsung's S3C2410 microcontroller
- ARM920T core (200MHz) with MMU

A9M2440:
- Samsung's S3C2440 microcontroller
- ARM920T core (400MHz) with MMU

Features:
- LCD controller (STN & TFT)
- Touch screen interface
- USB 1.1 Host and Device controller
- 32/64/128 MBytes NAND Flash
- 16/32/64/128 MBytes SDRAM
- 3 UART channels
- I2C interface SPI interface
- Serial EEPROM for storing configuration parameters
- RTC
- Single 3.3V power supply
- Optional 10Mbps Ethernet controller CS8900A
- Size 60mm x 44mm with 240-pin connector

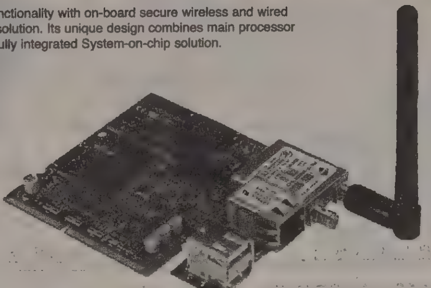
DIGI CONNECTCORE™ WI-9C, 32-BIT 155 MHZ ARM 9 CORE MODULE

Highly integrated, compact SO-DIMM form factor core module based on the powerful NetSilicon® NS9360 processor combines main processing functionality with on-board secure wireless and wired network connectivity. Built on leading 32-bit NET+ARM technology, the ConnectCore Wi-9C module is a powerful network-enabled core processor solution. Its unique design combines main processor performance, secure wireless/wired network connectivity, embedded software and hardware design flexibility, and a seamless migration path to a fully integrated System-on-chip solution.



Features:
- Compact SO-DIMM Core Module
- Powerful 32-bit NS9360 w/ARM926EJ-S core
- Up to 256 Mbyte SDRAM/Flash
- 802.11b/g or 802.11a/b/g with strong WPA2/802.11i security
- 10/100 Mbit Ethernet interface
- I/O connectivity options: USB, UART, I2C, SPI, PWM, GPIO
- On-chip LCD controller
- Industrial operating temperature
- Pre-certified radio reduces cost, design risk and time to market
- FCC Class B compliant low emissions design
- Population options for unique design flexibility
- Complete embedded software platform offering with support and design services: ThreadX®, Microsoft® Windows® CE, Linux

Hardware:
- 32-bit NS9360 high-performance RISC processor @ 155 MHz
- Up to 256 MB Flash and 256 MB SDRAM
- Up to 4 Serial and SPI ports
- I2C v1.0 bus interface
- USB 2.0 host/device full speed interface
- On-chip LCD controller for TFT / STN LCD
- Up to 8 programmable timers/counters
- Up to 4 PWM functions
- Four programmable external interrupts
- Up to 55 shared General Purpose Input/Output (GPIO) ports
- Real-time clock

Environmental:
- Storage temperature: -50° C to 125° C (-58° F to 257° F)
- Operating temperature: -40° C to 85° C (-40° F to 185° F)
- Relative humidity: 5% to 90% (non-condensing)
- Altitude: 12,000 feet (3,658 meters)
- 3.3VDC @ 800 mA max

Network Interface:

Wired
- Standard: IEEE 802.3
- Physical layer: 10/100Base-T
- Data rate: 10/100 Mbps (auto-sensing)
- Mode: Full or half duplex (auto-sensing)
- Connector: RJ-45 w/magnetics (optional)

Wireless
- Standard: IEEE 802.11b/g
  - Frequency: 2.4 GHz -Data rate: Up to 54 Mbps w/fallback
  - Modulation: DBPSK (1 Mbps), DQPSK (2 Mbps), CCK (11,5.5 Mbps), BPSK (6,9 Mbps), QPSK (12,18 Mbps), 16-QAM (24, 36 Mbps), 64-QAM (48, 54 Mbps)
  - Transmit power: 16 dBm typical
  - Receive sensitivity: -73 dBm @54Mbps
- Standard: IEEE 802.11a
  - Frequency: 5 GHz
  - Data rate: Up to 54 Mbps w/fallback
  - Modulation: BPSK (6,9 Mbps), QPSK (12, 18 Mbps), 16 QAM (24, 36 Mbps), 64-QAM (48, 54 Mbps)
  - Transmit power: 16 dBm typical
  - Receive sensitivity: -66 dBm @ 54 Mbps
- Connector: 1/2 x RP-SMA or 2 x U.FL

Wireless Security:

WEP (Wired Equivalent Privacy)
- 64/128-bit encryption (RC4) WPA/WPA2/802.11i
- 128-bit TKIP/CCMP(AES) encryption
- 802.1x EAP authentication
  - LEAP (WEP only), PEAP, TTLS, TLS
  - GTC, MD5, OTP, PAP, CHAP, MSCHAP, MSCHAPv2, TTLS-MSCHAPv2
  - Pre-shared key mode (PSK)

Dimensions:
- Length: 3.06 in (7.76 cm)

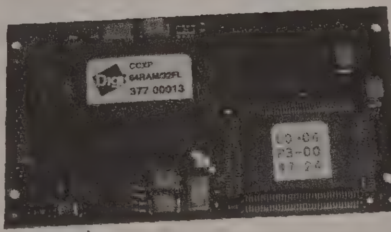
DIGI CONNECTCORE™ XP, 32-BIT 520 MHZ INTEL XSCALE CORE MODULE

High-performance core module with Intel XScale processor provides complete embedded platform support, combining industry-leading performance, multimedia capabilities and low power requirements in an ulta-compact form factor. The ConnectCore XP module introduces high-performance Intel XScale technology to the ConnectCore™ family of network-enabled embedded core processor modules. It provides the core processor platform solution of choice for applications demanding the combination of scalable Intel PXA270 performance at speeds up to 520 MHz, on-chip video and audio capabilities, low power requirements, integrated network connectivity, and complete embedded software platform flexibility. The ConnectCore XP offers a complete system on a module in an ultra-compact form factor with processor, on-board memory, integrated 10/100 Mbit network interface, LCD controller (VGA/SVGA), AC'97 and I2S audio codec interfaces, plus a complete set of peripheral connectivity options such as SSP/NSSP, I2C, UARTs, and IrDA. The external 32-bit address/ data bus interface provides additional flexibility and almost unlimited design freedom.



CCXP
64RAM/32FL
377 00013

Features:
- Intel PXA270 processor with Intel XScale microarchitecture core
- 64 MB SDRAM and 32 MB Intel StrataFlash®
- Wide variety of I/O connectivity options
- Strong multimedia capabilities w/LCD controller and audio interfaces
- Comprehensive USB 1.1 host/device interface support, plus USB 2.0 OTG
- Memory/expansion card interfaces
- External 32-bit memory bus interface
- Low-power requirements
- Complete embedded software platform offering w/support and design services -Microsoft Windows CE and Linux

Ethernet Interface:
- Standard: IEEE 802.3
- Physical layer: 10/100Base-T
- Data rate: 10/100 Mbps (auto-sensing)
- Mode: Full or half duplex (auto-sensing)

Environmental:
- Storage temperature: -50° C to +125° C (-58° F to +257° F)
- Operating temperature: 0° C to 70° C (32° F to 158° F)
- Relative humidity: 5% to 90% (non-condensing)

Power Requirements:
- 3.3VDC @ 190/350 mA (min/max)

Hardware:
- 32-bit Intel XScale PXA270 high-performance RISC processor @ 520 MHz
- 32 MB Intel StrataFlash and 64 MB SDRAM on-board
- 1024-bit 1-Wire® EEPROM
- Integrated 10/100 Mbps Ethernet MAC/PHY
- On-chip LCD controller for TFT/STN LCD panels – Up to SVGA (800x600) resolution w/up to 24 bpp color depth
- On-board USB 1.1 host/device and USB 2.0 OTG interface – Full speed (12 Mbps) and low speed (1.5 Mbps) modes
- 2 SSP/NSSP ports – Synchronous Serial Protocol (SSP), Serial Peripheral Interface (SPI), Microwire, Programmable Serial Protocol (PSP) modes
- 1 full-function UART w/maximum data rate of 921kbps – TX, RX, RTS, CTS, DTR, DSR, DCD, RI
- 1 Bluetooth UART w/maximum data rate of 921kbps – TX, RX, RTS, CTS
- Fast Infrared Communications Port (FICP) – Up to 4 Mbps half-duplex operation
- 1 I2C bus interface w/fast mode (400 KHz) support
- I2S interface and AC'97 audio controller
- 2 Pulse Width Modulator (PWM) signals
- Memory and expansion card interfaces – PCMCIA/CompactFlash®, SD/SDIO, MMC, and Memory Stick
- 32-bit external memory bus interface
- Up to 75 GPIO port options
- On-board JTAG interface

Dimensions:
- Length: 2.661 in (6.760 cm)
- Width: 1.444 in (3.670 cm)
- Height: 0.192 in (0.490 cm)

Products may be RoHS compliant.
Check mouser.com for RoHS status.

DIGI ONE® SP

Efficient RS-232/422/485 serial-to-Ethernet connectivity for applications requiring simple and cost-effective data communications.

- Cost-effective serial-to-Ethernet connectivity
- 1 RS-232/422/485 switch selectable DB-9 serial port
- Compact form factor – only 3.7 in (9.4 cm) in length

The Digi One SP device server easily allows any device with a serial port to be connected to Ethernet. The compact design of the Digi One SP delivers cost-effective performance and capability in one of the smallest form factors available. The Digi One SP delivers efficient serial-to-Ethernet connectivity and is ideal for applications where TCP Socket, UDP Socket, or UDP multicast functionality is needed.

For quantities of 10 and up, call for quote.

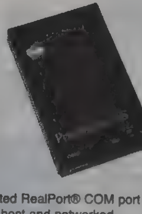
DIGI PORTSERVER® TS



Standard multiport RS-232/422/485 serial-to-Ethernet connectivity that is ideal for applications requiring low port count and seamless integration into existing application.

- Standard, reliable serial-to-Ethernet connectivity
- 1/2/4 ports; RS-232 RJ-45 serial
- 9-30VDC power supply
- Easy configuration using installation CD

PortServer TS delivers standard serial-to-Ethernet connectivity simply and reliably. It easily addresses the growing need to connect individual devices to the network over industry standard Ethernet in many applications. PortServer TS is ideal for applications requiring COM ports or where TCP/UDP Sockets, or UDP multicast functionality is required. It includes Digi's patented RealPort® COM port redirector technology which makes it possible to establish a connection between the host and networked serial device by creating a local COM or TTY port on the host computer, allowing existing software applications to work without modification.

For quantities of 10 and up, call for quote.

DIGI PORTSERVER® TS W MEI

Universal, high-performance RS-232/422/485 serial-to-wireless connectivity. Advanced features include WEP (64- and 128-bit), SSH, easy management and many more.

- Easily connect serial devices to an 802.11b wireless Ethernet network
- Switch selectable RS-232/422/485 serial RJ-45
- WEP encryption (64-/128-bit)
- 1/2/4 port models available

The PortServer TS W MEI family of device servers makes it easy to network-enable serial devices to a wireless 802.11b infrastructure. Users will appreciate the new external antenna and hidden wireless card offered by the versatile one-, two-, and four-port solutions. PortServer TS W MEI also delivers easy installation through an auto-run wizard on the CD for Microsoft® and UNIX® platforms, RS-232/422/485 serial ports for connectivity to almost any serial interface, and many advanced networking features.

For quantities of 10 and up, call for quote.

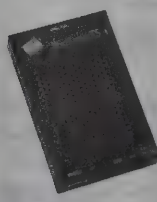
DIGI PORTSERVER® TS H MEI



Hardened solution delivers high-performance RS-232/422/485 serial-to-Ethernet connectivity. Designed specifically for traffic management, pipelines or any application requiring extended operating ambient temperatures of -35° C to +70° C.

- Extended temperature tolerance
- Locking power connector
- 1/2/4 port models available
- Switch-selectable RS-232/422/485 RJ-45 serial

The PortServer TS H MEI family of device servers is designed specifically for utility plants, pipelines, traffic management facilities or any remote application requiring a hardened serial-to-Ethernet solution that can withstand extreme temperatures. Available in 1/2/4-port versions, PortServer TS H MEI makes it easy to network-enable and remotely manage variable message signs, loop detectors, ramp meters or any RS-232/422/485 serial device.

For quantities of 10 and up, call for quote.

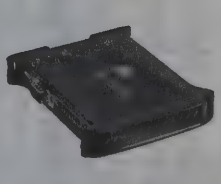
DIGI ONE® IA



The Digi One IA device server delivers easy and reliable serial-to-Ethernet and Modbus-to-Modbus/TCP connectivity solutions for industrial automation applications

- Switch selectable RS-232/422/485 for use with virtually any device with a serial port
- Extended input voltage of 9-30VDC with screw terminal connections
- 32° F to 140° F (0° C to 60° C) operating temperature to meet the demands of the factory floor
- An industrial strength, ergonomic enclosure designed to mount vertically on a standard 35 mm DIN rail, saving valuable cabinet space
- Industry-leading low latency to meet the strict data throughput requirements for CNC/DNC equipment and other applications

For quantities of 10 and up, call for quote.

DIGI CONNECT® WI-SP

The industry's first secure 802.11b wireless device server delivers leading network-to-serial connectivity and strong WPA2/802.11i security.

- Compact design with integrated mounting tabs
- Switch selectable RS-232/422/485 interface
- Enterprise-class WPA2/802.11i wireless security
- Product integration and customization flexibility

The Digi Connect Wi-SP is the industry's first wireless device server providing enterprise-class wireless security through a complete set of strong encryption and authentication services, which are compliant with the WPA2 and 802.11i standards.

For quantities of 10 and up, call for quote.

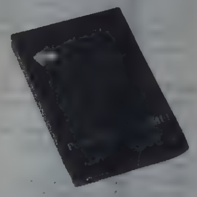
DIGI PORTSERVER® TS MEI



Universal, high-performance device servers for RS-232/422/485 serial-to-Ethernet connectivity. Advanced features include SSH v2, SNMP, PPP, port buffering and many more.

- Standard, reliable serial-to-Ethernet connectivity
- 1/2/4 serial port models available
- Switch selectable RS-232/422/485 RJ-45 serial

PortServer TS MEI (Multi-Electrical Interface, RS-232/422/485) makes it easy to connect any serial device to your network. Available in 1, 2 and 4 port models, it combines the inherent benefits of data networking with proven asynchronous connectivity to deliver powerful, yet simple Ethernet connectivity for all your serial devices. PortServer TS MEI delivers universal and powerful features including data security via SSH v2, port buffering, and full SNMP management, making it ideal for applications like console management where device management and monitoring are critical.

For quantities of 10 and up, call for quote.

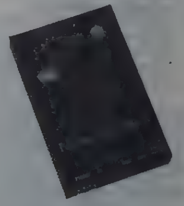
DIGI PORTSERVER® TS M MEI MODEM



Device server with internal modem provides both IP networking and standard phone line dial-up connectivity for remote access to RS-232/422/485 serial devices.

- Device server with internal modem
- Modem connection can act as backup during network failure
- Access remote devices and IP networks via internal modem

The new PortServer TS M MEI family offers Ethernet and RS-232/422/485 serial connections, with the addition of an internal modem. The one- and three-port device servers are ideal for applications requiring both IP networking and standard phone line dial-up connectivity for remote access to serial devices. The embedded modem adds another level of flexibility to the PortServer TS line. It allows remote hosts to dial in to a serial device attached to a device server, as well as the serial device to dial out to a remote location using a standard phone line. The modem helps to create a PPP connection so that applications and devices can communicate via an IP network, even when the primary LAN or WAN is not available.

For quantities of 10 and up, call for quote.

DIGI PORTSERVER® TS P MEI

Designed for universal, high-performance RS-232/422/485 serial-to-Ethernet where traditional power alternatives such as powered Ethernet and powered serial are required.

- Supports powered Ethernet and powered serial
- One, two or four RS-232/422/485 ports

The PortServer TS P MEI family makes it easy to connect RS-232/422/485 serial devices to an IP network. By supporting versatile powering options like powered Ethernet and powered serial, PortServer TS P MEI can adapt to many applications where traditional power alternatives are required. PortServer TS P MEI delivers universal, high performance multiport serial-to-Ethernet connectivity. It is ideal for applications requiring COM ports, serial tunneling, or where TCP/UDP Socket functionality is needed.

For quantities of 10 and up, call for quote.

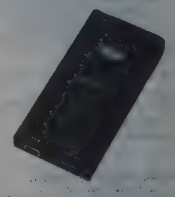
DIGI EASYPOWER™



The Digi EasyPower family provides simple, safe and efficient device power over existing LAN data cabling (Ethernet). It is ideal for applications where power outlets are not available at the optimal device location.

- Provides simple, safe and efficient device power over Ethernet
- 1/6 power and data ports
- IEEE 802.3af compliant

The Digi EasyPower provides one or six data/Ethernet ports for connecting powered Ethernet devices to the corporate hub/switch. The Digi EasyPower has two ports for each device. One port provides power and can transmit/receive data to the powered Ethernet device. The second port connects to the corporate hub/switch for Ethernet connectivity. The Digi EasyPower makes powering device servers easy and cost-effective. There is no need to provide separate power supplies for the Digi One® IAP, PortServer® TS P MEI family and Digi Connect® 50. The Digi EasyPower is fully compatible with the IEEE 802.3af standard.

For quantities of 10 and up, call for quote.

FTDI EVAL232R SERIAL TO USB EVALUATION MODULE

The EVAL232R is a USB to RS232 development and evaluation module for the FT232RL IC device. Additional header pins on the board provide access to the FT232RL device's configurable CBUS interface pins. Powered from USB, the EVAL232R supports both 5V and 3V level IO interface voltage on the CBUS via a jumper setting. Full RTS/CTS and DTR/DSR hardware handshaking are supported. DCD and RI are also available. Data transfer rates from 300 baud to 1 mega baud at RS232 levels. LEDs are fitted to indicate activity on the FT232RL's TXD and RXD lines, thus showing when the module is transmitting or receiving data.

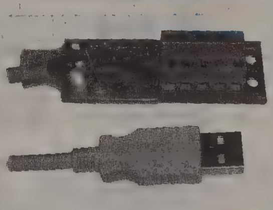
626-DLP-EVAL232R	EVAL232R	FTDI Evaluation Module for FT232RL	21.00

DLP-IO8 USB BASED 8-CHANNEL DATA ACQUISITION MODULE

NEW FROM SUPPLIER

The DLP-IO8 Data Acquisition Module is a low-cost, easy-to-use data acquisition system for measuring voltages, controlling and monitoring processes, and acquiring temperature data. Each of the 8 available channels can be configured for any ot the digital, analog, or temperature modes via single-byte commands. All operational power is taken from the host PC via the USB port.



Features:

- 8 Channels: Digital I/O, Analog In, Temperature
- USB 1.1 and 2.0 Compatible Interface
- Easy to use with single byte commands - Can utilize a simple terminal emulator to control all functions.
- USB Port Powered
- Small Footprint; Easily Fits on Desktop

For quantities of 200 and up, call for quote.

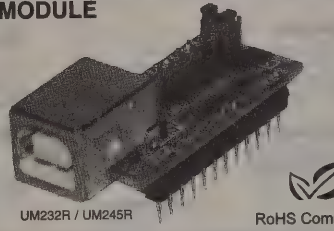
FTDI UM232R USB SERIAL MODULE

The UM232R module is a USB - Serial UART (TTL) development module for the FT232R IC device. The UM232R is supplied on a PCB designed to fit a 24 pin DIP socket and provides access to all UART and CBUS interface pins of the FT232R device. The UM232R can be configured as either USB bus-powered or self-powered and also supports 5V or 3V level interface IOs via two sets of jumper setting pins. Full hardware handshaking is supported and the UM232R can communicate at up to 3MBaud at TTL/CMOS levels.



UM232R / UM245R

RoHS Compliant

MOUSER STOCK NO.	FTDI Part No.	Description	Price Each
626-DLP-UM232R	UM232R	FTDI UM232R USB Serial Module	20.00

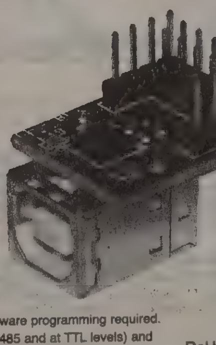
FTDI UM245R USB FIFO MODULE

The UM245R can be configured as either USB bus-powered or self-powered and also supports 5V or 3V level interface IOs via two sets of jumper setting pins. The UM245R can transfer data at up to 1 MegaByte per second. Ideal for rapid prototyping and development of FT245R designs, an attractive quantity discount structure also makes this module suitable for incorporation into low/medium volume finished product designs.

MOUSER STOCK NO.	FTDI Part No.	Description	Price Each
626-DLP-UM245R	UM245R	FTDI UM245R USB FIFO Module	20.00

FTDI MM232R MODULE

The MM232R is a mini development module for the FT232RQ IC device. It is a little bigger than a USB connector and provides USB - Serial UART interface in a extremely small form factor. It is ideal for new development purposes, and also for adding a USB interface to existing product designs. Based on the FT232RQ device, the MM232R supports RTS/CTS hardware handshaking and is powered from the USB port. Serial data communication is possible at up to 3MBaud at TTL level. In addition, some of the EEPROM configurable CBUS pins of the FT232R are brought out allowing the MM232R to be used to provide clock signals to external logic. Two 1x4 and one 2x4 board headers with a standard 0.1" pitch are supplied with the MM232R to allow for rapid prototyping and development.



- Single chip USB to asynchronous serial data transfer interface.
- Entire USB protocol handled on the chip - No USB-specific firmware programming required.
- Data transfer rates from 300 baud to 3 Megabaud (RS422 / RS485 and at TTL levels) and 300 baud to 1 Megabaud (RS232).

RoHS Compliant

626-DLP-MM232R	MM232R	FTDI MM232R Module	18.00

FTDI UC232R "CHIPI" USB TO RS232 CABLE

The UC232R "ChiPi" USB to RS232 converter is an evaluation cable for the FT232R. It utilizes the minimum number of components required for a basic USB - RS232 converter designed using the FT232RL. Using the FT232R with an RS232 level converter and a few capacitors, the ChiPi is a CE and FCC approved module that is one of the simplest USB - RS232 solutions around. Using a standard DB9 connector and powered from the USB port, the ChiPi can be used with the VCP drivers to provide a COM port on a PC which is capable of communicating with RS232 devices at up to 250kBaud.

- UC232R converter cable provides USB to RS232 (DB9) interface.
- FCC and CE Class B approval
- Connect to a PC via standard USB 'A' plug on 30cm USB cable.
- Full design files available from FTDI website.

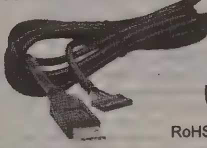
RoHS Compliant

MOUSER STOCK NO.	FTDI Part No.	Description	Price Each
626-DLP-UC232R	UC232R	FTDI USB to RS232 Cable	20.00

FTDI USB TO TTL SERIAL CONVERTER CABLE

The new TTL-232R is a USB - TTL serial converter cable which will allow for a simple way to connect serial TTL level devices to USB.

The TTL-232R uses a FT232RQ chip which is housed within the USB "A" connector. A 1.8 meter (6 foot) cable is terminated with a 6 way 0.1" pitch header socket which provides access to the Transmit (Tx), Receive (Rx), RTS#, and CTS#, as well as VCC (5V) and GND



RoHS Compliant

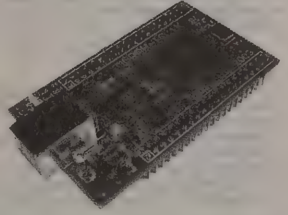
626-DLP-TTL232R	TTL-232R	USB to TTL Serial Coverter Cable (5V I/O)	20.00
626-DLP-TTL-232R-3V3	TTL-232R-3V3	USB to TTL Serial Coverter Cable (3.3V I/O)	20.00

FTDI MORPH-IC FPGA BASED MODULE

The FTDI Morph-IC module combines the flexibility of the FT2232C interface together with an Altera ACEX 1K series FPGA in a compact ready to use module. The power and IO pins of the module are brought out onto 2 x 20-pin, 0.1in pitch headers on the underside of its PCB, allowing easy connection to the pins. The module can also be plugged into a PCB using readily available mating connectors (two supplied). Morph-IC uses the Multi Protocol Synchronous Serial Engine (MPSSE) interface of the FT2232C to program/reprogram the FPGA over USB in a fraction of a second. No external FPGA programmer or serial EEPROM devices are required to use Morph-IC. The module is powered directly from the USB port and so does not require an external power supply. Morph-IC comes complete with a CD containing USB drivers, a Windows interface DLL with example code in several different programming languages. A full demo project is included, demonstrating how to use and interface to the module. VHDL source code and application software code (in Delphi) is included. Linux drivers and a Linux loader program are also included for those who are interested in alternative operating systems. The package also includes a Quartus II Software Starter Suite CD courtesy of Altera, which contains software for simulation and synthesis of the on-board FPGA, so no other software is required for FPGA development.



For quantities of 1000 and up, call for quote.

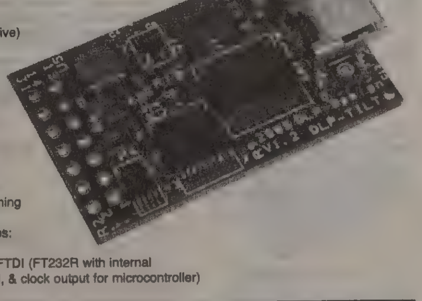
DLP TILT MODULE

USB-Based Tilt Sensor / Accelerometer / Vibration Analysis / AC Signal Analysis Module. The DLP-TILT USB-to-accelerometer module incorporates the FT232RL USB UART into its design and has many applications:

- Vibration Analysis
- AC Signal Analysis
- Tilt Sensing
- Two-button mouse (pointing device alternative)
- +1-5V Analog In (single channel)
- Data Aquistion: 0-5V analogin, digtial 1/0
- Robotic/Motion Sensing and Control



Features:

- Microcontroller preprogrammed with data-acquisition functions
- 2-Axis, 2g accelerometer
- Single-byte access to all firmware features
- Virtual COM port drivers for easy programming interface
- Continuously streaming analog sample rates: 100-6K samples per second
- 4th-Generation USB Interface silicon from FTDI (FT232R with internal ceramic resonator, internal setup EEPROM, & clock output for microcontroller)

626-DLP-TILT	DLP-TILT	DLP TILT USB Based Module	50.00

DLP DESIGN USB Interface Products

Products may be RoHS compliant.
Check mouser.com for RoHS status.

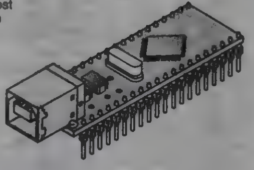
"Add USB to your next project–it's easier than you might think!"

DLP Design's USB Interface products provide a high-speed, hot-swappable, user-friendly connection between your electronic device and a host PC. The USB interface will provide up to 500mA at 5 volts of power for your electronics. These boards make the extremely complex USB interface easy for just about anyone to start using, without requiring any in-depth prior knowledge.

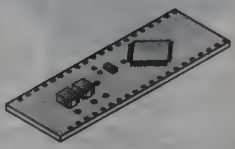
DUAL CHANNEL USB ADAPTERS

626-DLP2232M-G

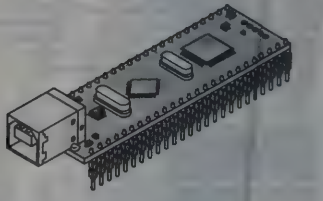
The DLP-2232M uses FTDI's FT2232C 3RD generation Dual Channel USB-FIFO/UART and offers a simple solution for interfacing ASIC/MCU/FPGA/DSP based designs to a host computer via USB. Each channel can be configured for either USB-UART or USB-FIFO via the on-board setup EEPROM. Rev 3 silicon from FTDI. No in-depth knowledge of USB required!



626-DLP2232M-G



626-DLP2232ML-G



626-DLP2232PB-G

626-DLP2232ML-G

Same functional design as the DLP-2232M, the DLP-2232ML is perfect for space constrained designs.

- Dual channel, each can be configured for USB-FIFO or USB-UART
- Up to 8 megabit per second data rate
- USB 1.1/2.0 Compatible

626-DLP2232PB-G / 626-DLP2232PB-CCS

The DLP-2232PB uses FTDI's 3RD generation FT2232C USB IC and a PIC Microchip 16F877A to form a rapid prototyping development tool. On-board firmware uploader included - no device programmer required!

- Simple USB-FIFO interface to PIC Microchip 16F877A microcontroller
- On-board device programmer for uploading firmware to the 16F877A - no device programmer required!
- Plugs into a standard 50 pin, 0.9in wide DIP socket
- Example source code provided for Token firmware feature
- Up to 2 megabit per second data rate to host computer.
- USB 1.1/2.0 Compatible
- CCS Version includes a DLP2232PB Module and CCS Compiler CD (Limited Version)
- RoHS Compliant

RoHS Compliant

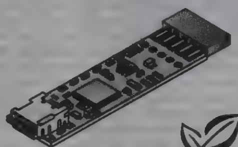
USB TO SERIAL ADAPTER

This USB-to-serial adapter is designed to easily connect a microcontroller/DSP/FPGA/etc to a host PC or upgrade a legacy RS232 device to USB with minimal design effort. Virtual Com Port (VCP) drivers are provided royalty-free that make the DLP-TXRX look like a standard Windows/Linux/Mac RS232 port to the users host program. An attractive quantity discount structure makes this module suitable for incorporation into low- and medium-volume finished products.

Features:

- Connection to host PC/Mac made via mini USB connector
- As few as 2 wire serial interface (RX, TX and ground)
- Standard baud rates from 300 to 921,600 baud
- Support for non-standard baud rates (ApNote AN232-01)
- Open-collector output available for resetting microcontroller under software control (DTR)
- Input provided for user-selectable interface voltage
- Red and green LEDs to indicate transmit and receive activity



RoHS Compliant

DLP-D USB BASED SECURITY DONGLE

The DLP-D Security Dongle is pre-programmed with a unique identification number (Serial Number) that is readable over USB but cannot be altered by any means. Since each serial number is unique, this device provides a way of linking application software to a specific hardware dongle with a high level of security.

Features:

- Hard-coded, unique serial number
- USB 1.1 and 2.0 compatible interface
- Small size; easily fits on key chain
- 3rd-Party support for application development

Applications:

- Access control
- Copy protection

RoHS Compliant

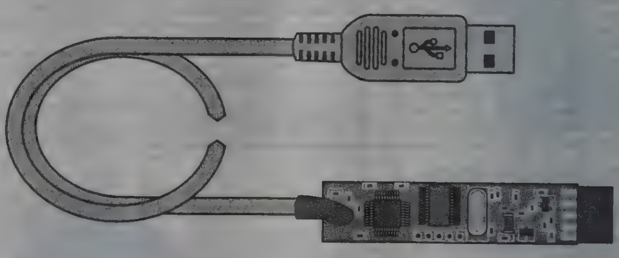
DLP-FLASH PROGRAMMER



The DLP-FLASH is an innovative USB based adapter for programming both Scenix (Ubicom) and Microchip PIC Flash based MPU's. Not only is it the ideal companion for the DLP USB/Microcontroller modules and training kits, but is a worthy addition to the toolkit of any hobbyist or professional who develops projects using either family of MPU's.

No additional cables or external power source required. All power is taken from the USB port via the provided USB cable. In-circuit programming -- no more loading the target microcontroller into a device programmer. Full application software provided.

Compatible With:	
PIC Microchip	**Scenix/Ubicom**
16F84A	SX28
16F870	SX48
16F871	
16F872	
16F873	
16F874	
16F876	
16F877	

For quantities of 500 and up, call for quote.

DLP DESIGN USB Interface Products

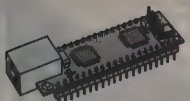
Products may be RoHS compliant.
Check mouser.com for RoHS status.

"Add USB to your next project--it's easier than you might think!"

DLP Design's USB Interface products provide a high-speed, hot-swappable, user-friendly connection between your electronic device and a host PC. The USB interface will provide up to 500mA at 5 volts of power for your electronics. These boards make the extremely complex USB Interface easy for just about anyone to start using, without requiring any in-depth prior knowledge.

USB MICROCONTROLLER DEVELOPMENT BOARDS

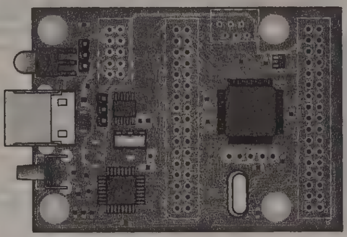
RoHS Compliant



DLP-245SY-G

- Simple USB-FIFO interface to Parallax SX48 microcontroller (50MHz)
- Plugs into a standard 40-pin, 0.6in wide DIP socket
- Example source code provided for Token firmware feature
- Up to 7 megabit per second data rate to host computer
- USB 1.1 compliant
- Rev 2 silicon from FTDI
- No in-depth knowledge of USB required

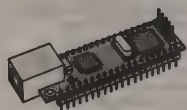
The DLP-245SY is a powerful integrated module based on the DLP-USB245M USB-FIFO adapter coupled with a Ubicom SX48 microcontroller and royalty free USB drivers. It plugs into a standard 40 pin 0.6in wide DIP socket and is ideal for rapid prototyping and development of USB / Ubicom based designs. Token I/O code pre-programmed into the SX48's ROM for basic port pin input/output capability including access to an external, on-board EEPROM, and external digital temperature sensors. The SX48's Flash ROM can be easily erased and reprogrammed if required using the optional DLP-Flash Programmer. Refer to the datasheet for full details.



DLP-245PL-G

- Simple USB-FIFO interface to PIC Microchip 18LF8720 microcontroller
- 50 I/O pins (including A/D inputs) plus 8-bit data bus
- Example source code provided for Token firmware feature
- Up to 2 megabit per second data rate to host computer
- USB 1.1/2.0 compatible
- Rev 2 silicon from FTDI
- No in-depth knowledge of USB required
- RoHS Compliant

The DLP-245PL is a powerful integrated module based on the DLP-USB245M USB-FIFO adapter coupled with a PIC 18LF8720 MPU and royalty free USB drivers. The 18LF8720 microcontroller is preprogrammed with basic functionality for accessing the port pins and can be reprogrammed with user hex code via a 5-pin header that is compatible with Microchip's MPLAB ICD2 device programmer/debugger (purchased separately). Refer to the datasheet for full details.



DLP-245PL-G-CCS

- Simple USB-FIFO interface to PIC Microchip 16F877 microcontroller
- Plugs into a standard 40-pin, 0.6in wide DIP socket
- Example source code provided for Token firmware feature
- Up to 2 megabit per second data rate to host computer
- USB 1.1/2.0 Compatible
- Rev 2 silicon from FTDI
- No in-depth knowledge of USB required

The DLP-245PB is a powerful integrated module based on the DLP-USB245M USB-FIFO adapter coupled with a PIC 16F877 MPU and royalty free USB drivers. It plugs into a standard 40 pin 0.6in wide DIP socket and is ideal for rapid prototyping and development of USB / PIC based designs. Token I/O code pre-programmed into the 16F877's ROM for basic port pin input/output capability including access to the A/D, EEPROM, and external digital temperature sensors. The 16F877's Flash ROM can be easily erased and reprogrammed if required using the optional DLP-Flash Programmer. Refer to the datasheet for full details.

USB ADAPTER BOARDS

RoHS Compliant

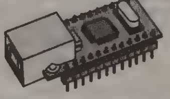
DLP-USB245M-G

- Add USB connectivity to your next project
- Up to 8 megabit per second data rate
- USB 1.1 compliant
- Simple FIFO interface to MCU, FPGA, CPU, etc.
- Rev 2 silicon from FTDI
- No in-depth knowledge of USB required
- RoHS Compliant

The DLP-USB245M USB-FIFO adapter offers a simple straight-forward solution for interfacing ASIC or MCU based designs to USB. It comes complete with royalty-free drivers for most common operating systems. Features include an easy to use FIFO-like interface, a data transfer rate of up to 8 megabits per second and a standard .6 inch, 24 pin DIP footprint.

DLP-USB232M-G

- Easily convert legacy RS-232 devices to USB
- Up to 3 megabaud data rate
- USB 1.1 compliant
- Full handshaking & modem interface signals
- Rev 2 silicon from FTDI
- No in-depth knowledge of USB required
- RoHS Compliant



The DLP-USB232M USB-UART Adapter PCB is the ideal solution for upgrading legacy RS232 designs to USB. It comes complete with royalty-free drivers for most common operating systems. Features include data transfer rates of up to 3 million baud, a full set of modem handshaking controls and a standard .6 inch, 24 pin DIP footprint.

For quantities of 100 and up, call for quote.

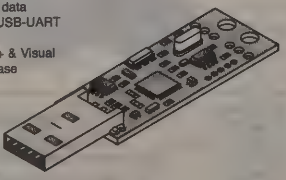
USB DATA ACQUISITION

Schematics available on-line. USB 1.1 Compliant.
The onboard PIC12F629 microcontroller can be reprogrammed with user code (requires programmer). Drivers and test applications can be downloaded from the website

Acquire data from the world around you using these USB based data acquisition boards. Learn how to interface to FTDI's FT232BM USB-UART IC using small microcontrollers & simple RS232-like commands. Demonstration code now available upon purchase for Visual C++ & Visual Basic. Microcontroller C source code also available upon purchase



626-DLP-TEMP-G

- DLP-TEMP 2-Channel Temperature Acquisition Board
- Monitor & log digital temperature data from 1 or 2 sensors (one DS18B20 sensor included with purchase of board)
- RoHS Compliant

MINIATURE USB MICROCONTROLLER MODULE

NEW FROM SUPPLIER

Measuring in at only 1.375x0.6 inches, this new module is our lowest cost and smallest USB to Microcontroller module to date. The DLP-232PC uses single byte commands and FTDI's Virtual COM Port (VCP) drivers to provide an easy to use USB interface to a PIC 18F2410 microcontroller. Features include 14 I/O channels (8 can be used for analog inputs measuring 0-5 volts), a standard 0.3 inch wide DIP footprint and preprogrammed firmware for easy access to the I/Os and external digital temperature sensors (purchased separately).

RoHS Compliant

Miniature, Low Cost, USB to Microcontroller Module

626-DLP-232PC	DLP-232PC	29.95	29.00	28.75

FTDI UART Chips and Vinculum Host Controllers

RoHS Compliant **This page of product is compliant.**

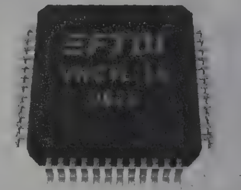
The VNC1L USB Host Controller ICs not only handle the USB Host Interface, and data transfer functions but owing to the inbuilt 8/32-bit MCU and embedded Flash memory, VNC1L encapsulates the USB device classes as well. When interfacing to mass storage devices such as USB Flash drives, VNC1L also transparently handles the FAT file structure communicating via UART, SPI or parallel FIFO interfaces via a simple to implement command set. The VNC1L device features two USB Ports which can be individually configured by firmware as Host or Slave ports. VNC1L brings cost effective USB Host capability to products that previously did not have the hardware resources available. As VNC1L comes complete with FTDI's in-house developed firmware, there are no USB software stacks to license, indeed, no knowledge of USB is required to use these devices.

FTDI VNC1L-1A USB HOST CONTROLLER IC

The VNC1L device which features two USB Ports which can be individually configured by firmware as Host or Slave ports.

RoHS Compliant

Features:
- 8/32 bit V-MCU Core
- Dual DMA controllers for hardware acceleration
- 64k Embedded Flash Program Memory
- 4k internal Data SRAM
- 2 x USB 2.0 Slow/Full speed Host/Slave Ports
- UART, SPI and Parallel FIFO interfaces
- PS2 legacy Keyboard and Mouse Interfaces
- Up to 28 GPIO pins depending on configuration
- 3.3V operation with 5V safe inputs
- Low power operation (25mA running/2mA standby)
- Inbuilt FTDI firmware easily updated in the field
- LQFP-48 RoHS compliant package
- Multi-processor configuration capable



For quantities of 1000 and up, call for quote.

MOUSER STOCK NO.	FTDI Chip Part No.	Description	Price Each

895-VNC1L-1A	VNC1L-1A	FTDI Vinculum Host Controller IC	10.25	8.75	8.25	7.90

FTDI VDIP1 AND VDIP2 MODULE

The VDIP modules are MCU to USB host controller development modules for the VNC1L device. The VDIP1 is supplied on a PCB designed to fit a 24-pin DIP socket and the VDIP2 is supplied on a PCB designed to fit into a 40-pin DIP socket and provides access to all UART, SPI and FIFO interface pins of the VNC1L device. All other Vinculum I/O pins are also accessible.

RoHS Compliant

Features:
- Jumper selectable UART, SPI or FIFO MCU Interfaces
- Uses FTDI's VNC1L device
- Single 5V supply input
- Auxiliary 3.3V/200mA power output to power external logic
- Power and traffic indicator LEDs
- VDIP1: USB "A" type socket to interface with USB peripherals
- VDIP2: Two vertically mounted USB "A" type sockets to interface with USB peripheral devices

FTDI VDRIVE2 MODULE

VDRIVE is possibly the easiest solution for adding a USB Flash drive interface to existing products. Only four signal lines plus 5V/GND require to be connected. Using the VDIF firmware, the interface can be selected between UART or SPI modes using the on-board jumpers.

RoHS Compliant

Features:
- One USB "A" socket to connect to USB Flash Drive
- Uses FTDI's VNC1L device
- Link Selectable UART or SPI interface
- Only 4 signals to connect excluding PWR/GND
- 0.1" (2.54mm) pitch 6-pin connector compatible with TTL-232R-3V3 for easy evaluation
- Single 5V supply required
- Uses VDIF firmware and command set

For quantities of 50 and up, call for quote.

FTDI VMUSIC2 MODULE

VMUSIC is a product that not only lets you add USB Flash drive interfacing to your product but allows you to play back MP3 and other popular digital music formats direct from a USB Flash drive.

RoHS Compliant

Features:
- One USB "A" socket to connect to USB Flash Drive
- Stereo 3.5mm headphone jack socket and audio line-out connector for audio playback.
- Uses FTDI's VNC1L device coupled with VLSI VS1003 IC for music playback.
- Link Selectable UART or SPI interface
- Only 4 signals to connect excluding PWR/GND
- 0.1" (2.54mm) pitch 6-pin connector compatible with TTL-232R-3V3 for easy evaluation
- Single 5V supply required
- Uses extended VDIF command set

For quantities of 50 and up, call for quote.

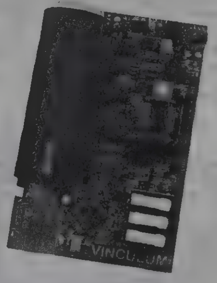
FTDI DLP-VLOG MODULE

Features:
- Virtually unlimited data storage utilizing FTDI's new Vinculum™ USB Host IC
- Data logged to USB Flash drive
- Low-power modes for long battery life
- System power via two AA batteries
- Lead-free; RoHS compliant

RoHS Compliant

Development Kit Includes:
- VDLP-VLOG module
- C source code for the microcontroller firmware
- Windows support software for real time clock setup
- Windows data conversion software
- C compiler and device programmer/debugger
- 32MB USB Flash drive containing all documentation, software & source code



The DLP-VLOG is intended as both a demonstration platform for the new Vinculum IC as well as a learning tool. The development kit is designed to log temperature, humidity and voltage data to a USB Flash drive. Using the Vinculum IC from FTDI, this system demonstrates how one can provide virtually unlimited data storage for a small microcontroller.

This system can be beneficial to electronics enthusiasts with virtually any level of technical expertise. Based on the Vinculum Host Controller IC and the Microchip PIC16F88 Microcontroller, the DLP-VLOG can function as a digital design trainer, a microprocessor development system or as a rapid path to learning how to implement a USB Host Controller for interfacing a USB Flash drive to a small microcontroller.

For quantities greater than listed, call for quote.

626-DLP-VLOG	DLP-VLOG	DLP VLOG Vinculum Development Kit	250.00

USB-UART AND USB INTERFACE IC'S

FTDI USB To Serial UART IC Devices:

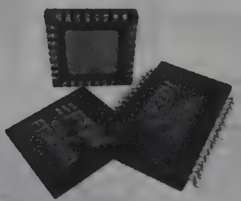
The FT232BL includes a 3.3V regulator, USB Tranceiver that provides USB 1.1 / USB 2.0 full speed physical interface and a 6MHz Oscillator. The FT232RL/RQ has all the features of the BL but includes onboard EEPROM, as well as a 12MHz Oscillator and the FTDIChip-ID™ security dongle feature. The FT232R features a wide range of royaltyfree FTDI developed drivers for 32 and 64 bit operating systems including Windows, CE, XP, Vista, Linux and Mac OS.

FTDI FT2232 Dual UART/FIFO IC Devices:

The FT2232 device features two multi-purpose UART/FIFO controllers which can be configured individually in several different modes. As well as a UART interface, a FIFO interface and the Bit-Bang IO mode of the FT232B and FT245B devices, the FT2232 offers a variety of additional new modes of operation including a Multi-Protocol Synchronous Serial Engine (MPSSE) interface which is designed specifically for synchronous serial protocols such as I2C, JTAG and SPI bus. The FT2232D has an extended temperature range (-40°C to +85°C) and adds CPU FIFO mode.

FTDI FT245R USB To Parallel FIFO IC Devices:

The FT245R is a USB to parallel FIFO interface, with the new FTDIChip-ID™ security dongle feature. In addition, asynchronous and synchronous bit bang interface modes are available. USB to parallel designs using the FT245R have been further simplified by fully integrating the external EEPROM, clock circuit and USB resistors onto the device. The FT245R adds a new function compared with its predecessors, effectively making it a "2-in-1" chip for some application areas.



RoHS Compliant

For quantities of 1000 and up, call for quote.

LANTRONIX Embedded Device Servers

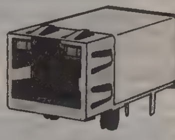
LANTRONIX®

Products may be RoHS compliant.
Check mouser.com for RoHS status.

Lantronix recognizes that design engineers are looking for a simple, cost-effective and reliable ways to seamlessly embed network connectivity into their products. With very little effort, minimal development time and at a fraction of the time required to develop an in-house solution, OEMs can add full Ethernet and/or wireless connectivity to their products so they can be managed over a network or the Internet. Why build it from scratch yourself when we can provide a small module that's ready for your application? Lantronix embedded device servers are a cost-effective and reliable way to seamlessly embed network connectively into your products. Our expertise in device networking, a stable real-time operating system (RTOS) and TCP/IP stack enables you to add full Ethernet and/or wireless connectivity your products with minimal effort, programming and development time. Lantronix's compact, cost-effective embedded device networking products deliver a complete feature set, including encryption, serial support options, management flexibility, 10/100 Base-T Ethernet or wireless connectivity, and the ability to customize.

XPort®/ XPort® AR - Embedded Device Server

XPort® is the most compact, integrated solution available to web-enable any device with a serial interface. By simply adding XPort to a product design, device manufacturers can now offer Ethernet connectivity as a standard feature within weeks—instantly increasing product value, enhancing end-user experience and facilitating new service delivery options.



XPort® Illustrated

XPort® Features:
- Minimal engineering effort required to web enable a serial device
- Remote command and control of edge devices
- Real-time edge device status via e-mail alerts
- 256-bit AES encryption for secure communications
- EMC/EMI-compliant; RoHS-compliant
- Everything you need – all in a single RJ45 package

XPort® AR Features:
- A fully programmable device computing platform based on corporate IT standards – Cisco®-like CLI, XML, RSS
- Web-enable up to three electronic devices, quickly and easily
- Provide robust "data center grade" security, including SSL and SSH, for networked devices
- Offer true IEEE 802.3af compliant pass-through Power over Ethernet (PoE)

RoHS Compliant

For quantities of 100 and up, call for quote.

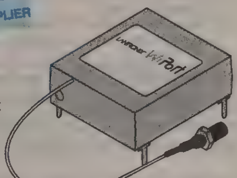
WiPort™ / WiPort™NR - Wireless Embedded Device Server Modules

NEW FROM SUPPLIER

WiPort™ Features:
- Serial to 802.11 b/g conversion
- Wired ethernet to 802.11 b/g WLAN bridging
- Optional end-to-end 128, 192 and 256 bit AES encryption
- WPA, PSK, TKIP security, 128 bit WEP encryption
- Easy configuration through a web interface
- Embedded web server

RoHS Compliant



WiPort™NR Features:
- Ethernet 10/100 connectivity
- Two serial inputs
- PoE-capable with external circuitry
- EMC/EMI-compliant
- Optional 256-bit AES Rijndael encryption for secure communications
- 2MB of Flash memory
- 11 GPIO pins
- Electrical Interface to CAN and SPI Bus available
- Extensive networking protocol support including TCP/IP

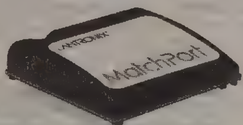
MatchPort™ - Embedded Wireless Device Server

MatchPort™ b/g enables you to build wireless networking into virtually any electronic device with a serial interface. With this full-featured, turnkey embedded device server module your products can be wirelessly accessed and controlled over the Internet!



PRODUCT NEW

RoHS Compliant

MatchPort b/g Features:
- Extremely affordable embedded 802.11 b/g wireless networking
- Common platform form factor for a family of wired and wireless module
- Bulletproof security with IEEE 802.11i-PSK, WPA-PSK, TKIP and optional 256-bit AES end-to-end encryption
- Full TCP/IP stack, web server and Windows deployment software
- Up to 230 Kbps data rate
- FCC Class B, UL and EN EMC and safety-compliant
- Compact: 45mm x 45mm with 40-pin 2 mm header

MatchPort AR Features:
- Application-ready, secure SSL/SSH networking module for high-volume applications
- Low cost, high-performance, 32-bit, 166Mhz 159 MIPS platform
- Built-in CGI and AJAX web server
- Pin compatible family includes 802.11 b/g wireless
- Ethernet MAC/PHY; add only RJ45 jack and magnetics to device's PCB
- SNMP V2c ready, MIB II support
- "Cisco-like" CLI, XML, serial and Telnet management capability

For quantities of 100 and up, call for quote.

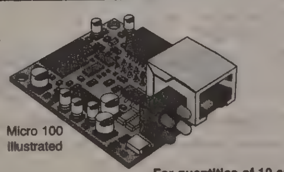
Micro 100 / WiMicro™ Board Level Device Servers

The Lantronix Micro100 is a board-level product for OEM users who want to embed proven mainstream Ethernet connectivity in their products quickly and economically.

Micro 100 Features:
- Flexible, well-developed IP protocol stack
- Ethernet RJ45 (10/100Base-T) connector on the board
- Accepts 5 VDC regulated input power
- HTTP, serial, Telnet and SNMP management
- Flash ROM for easy software upgrades
- Custom protocol support available
- 256-bit AES encryption for secure communications
- TTL serial interface
- Two serial ports

WiMicro™ Features:
- Upgrade to board level wireless – quickly and easily
- Form factor compatible with our Micro and Micro100 boards
- "Plug and Play" wireless connectivity
- Wireless security using 128-bit WEP and WPA-PSK, TKIP
- End-to-end security using 256-bit Rijndael encryption
- Data Rate: 300bps to 230 Kbps
- Embedded web server



Micro 100 Illustrated

LANTRONIX Device Servers

LANTRONIX®

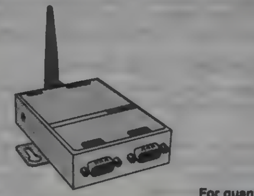
Products may be RoHS compliant.
Check mouser.com for RoHS status.

EXTERNAL DEVICE SERVERS

External device servers from Lantronix can network-enable just about any device with serial connectivity in a matter of minutes. They provide the ability to remotely control, monitor, diagnose and troubleshoot your equipment over a network or the Internet. And they enable you to preserve your investment in your present equipment. You can choose Ethernet or wireless, advanced encryption for maximum security, and device servers designed for commercial or heavy-duty industrial applications.

WiBox® - Wireless External Device Servers

WiBox® dual-port device servers enable you to connect serial devices to 802.11b/g wireless networks, quickly and easily. By merging wireless communications and Lantronix device server technology, WiBox simplifies connectivity to devices in applications where mobility is required or cabling is impractical.



WiBox® Features:

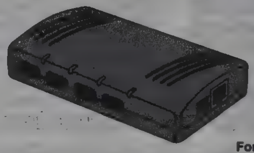
- Enables access to remote devices while minimizing costly cabling
- Provides network mobility for untethered communication
- Two DB9 DTE serial ports supporting RS-232, RS-422 or RS-485 communication
- Compact size enables it to fit almost anywhere
- Industry standard 802.11b/802.11g wireless interface
- Secure wireless communication: WEP, WPA, TKIP
- 256-bit AES – end-to-end encryption
- Ethernet-or-wireless bridging

For quantities of 10 and up, call for quote.

MOUSER STOCK NO.	Lantronix Part No.	Description	Price Each
515-WB2100EG1-01	WB2100EG1-01	Serial to 802.11b wired or wireless device server with 10/100 Ethernet. Two serial ports (DB9-male, DTE) pinned the same as a standard PC and 4kv direct ESD protection provided for both serial, domestic power supply, 9-30 Volt DC.	**349.00**
515-WB2100EG0-01	WB2100EG0-01	Board level Serial to 802.11b wired or wireless device server with 10/100 Ethernet. Two serial ports (DB9-male, DTE), pinned the same as a standard PC and 4kv direct ESD protection provided for both serial, domestic power supply, 9-30 Volt DC.	**349.00**

UBox® - USB - to - Ethernet Device

UBox removes the distance limitations of USB, enabling you to access USB peripherals over a network. These devices can be individually dedicated or shared among users, maximizing your USB device investment.



UBox® Features:

- Enables USB peripherals to be shared over a network
- Eliminates distance limitations of USB
- Removes the necessity of a dedicated PC
- Ethernet enabled USB host controller
- 4 USB ports (12Mbps)
- 10/100 Ethernet interface
- Supports DHCP, Static IP or Zero config IP addressing

RoHS Compliant

For quantities of 10 and up, call for quote.

515-UB4100001-02	UB4100001-02	"UBox® USB-to-Ethernet Device Server, enables 4 USB ports to be shared over a network, 10/100 Ethernet Interface, US Power, Windows® 98/ME/NT200/XP-based software included.	**179.00**

UDS/EDS - External Device Servers

The UDS single-port and dual port device servers provide a quick, simple and cost-effective way to bring the advantages of data accessibility and remote management to equipment not currently connected to a network.

UDS Features:

- Replace expensive dedicated PCs with fast and reliable networking technology
- Compact size enables it to fit almost anywhere
- Supports RS-232, RS-422 and RS-485 serial connections
- 10Mbps or 10/100 Mbps Ethernet through an RJ45 connector
- Configure via HTTP, DHCP, Telnet or serial
- Flash ROM for easy upgrades

EDS Features:

- Remotely monitor, manage and share devices over a network or internet
- True IEEE 802.3af POE

515-ED41000P0-01	ED41000P0-01	YES	EDS 4100, 4 DB9M serial ports, 2 RS-232, 2 RS-232/422/485, 10/100 RJ45 network interface, POE - 802.3af power source. Power connections: 9-30 VDC barrel and 42-56 VDC screw terminal. No power supply included.	**475.00**

SecureBox® - Secure External Device Servers

The SecureBox family of device servers offers the most secure way to add formerly isolated electronic equipment to the Ethernet network. With this capability, virtually any device with a serial port can be remotely accessed and controlled securely over the network or the Internet. This adds an unprecedented level of flexibility and efficiency to your business, and breathes new life into your existing equipment.

Features:

- Securely network-enable serial devices with 128-256 bit AES-certified encryption
- Transparent communications - no need to develop special software
- Two RS-232 DTE serial ports pinned the same as PC for easy connection
- 10/100 Ethernet Interface

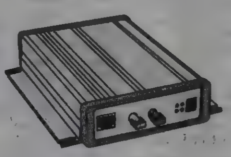
515-SD1101002-11	SD1101002-11	Secure Serial Interface Dual DB9 RS232 DTE serial ports, 10Base-T/100Base-TX Ethernet, diagnostic LEDs, AC power adapter, CD-ROM with configuration tools and documentation, printed Quick Start Guide	**259.00**

CoBox® -FL - External Fiber Optic Device Servers

The CoBox-FL is the first Device Server to support fiber optic cabling. The CoBox-FL enables devices to connect to an Ethernet network over fiber optic medium. It provides exceptional functionality for users with IP applications requiring two serial ports.



Features:

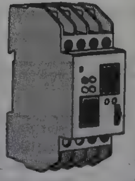
- Flexible, well-developed TCP/IP protocol support
- RJ45 (10BASE-T) and ST Multi-mode Fiber (10BASE-FL) Ethernet interfaces
- RS-232 and RS-485 serial connections via a DB-9 and a DB-25 serial ports
- Serial speeds up to 115Kbps supported
- Configurable via internal WEB server, serial port, and Telnet login
- 128-bit encryption for the maximum level of security
- Flash ROM for easy software upgrades

For quantities of 10 and up, call for quote.

515-COBOX-FL-11	COBOX-FL-11	1 DB9 (RS-232) serial port, 1 DB25 (RS232/485/422) serial port, 1 10-BASE-T (RJ45) plus 1 10-BASE-FL Ethernet port, FlashROM, CD-ROM with Device Comm Manager software, external Universal 100-240Volt AC.	**574.00**

XPress-DR - DIN Rail Mount Industrial Device Servers

Remotely configure, program, monitor, and manage: PLCs, Drives, Process Controls, Power Monitoring Equipment, Barcode Scanners, and other factory floor serial devices



Features:

- Connect enterprise (ERP, MES) systems to factory floor devices without disturbing existing control networks
- Allow remote firmware upgrades, saving money and time from manual upgrades
- Includes industrial protocols MODBUS, TCP, MODUS ASCII/RTU, DFI
- Configurable serial interface supports RS-232, RS-422, or RS-485
- 10Base-T/100Base-TX Ethernet (RJ45)
- Isolated serial and Ethernet ports
- FM-approved for hazardous locations Class I, Div. 2

RoHS Compliant

For quantities of 10 and up, call for quote.

515-XSDRIN-02	XSDRIN-02	Din Rail mounting, RS422/232/485, RJ45 plus screw terminal serial port, 10/100-BASE-T Ethernet networking port, Diagnostic LEDs, CD-ROM with configuration tools, installable industrial communication drivers.	**425.00**

Multi-Tech's embedded device networking solutions instantly add communication ability to your existing or new product with minimal engineering effort giving you an edge on your competition while accelerating your time-to-market. Backed by 35+ years of proven modem experience and rock-solid performance, Multi-Tech sets the standard for quality and performance in the industry. With complete global compliance, Multi-Tech gives you an edge on your competition while accelerating your time-to-market.

UNIVERSAL SOCKET MODULES

Multi-Tech's Universal Socket is a flexible, comm-port architecture that provides cellular, Ethernet, PSTN or Wi-Fi® network access with interchangeable modules.

Features:

- Interchangeable socket module
- Quick-to-market
- Global approvals
- Easy migration to future networks

For quantities of 250 and up, call for quote.

NETBURNER Embedded 32-bit Core Modules

Products may be RoHS compliant.
Check mouser.com for RoHS status.

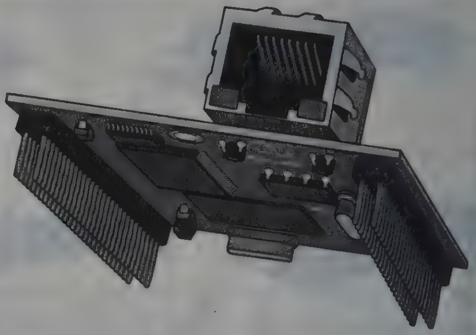
NetBurner
Networking In 1 Day!

32-BIT 10/100 ETHERNET CORE PROCESSOR MODULES

The NetBurner core processor modules are devices containing everything needed for design engineers to add network control and to monitor a company's communications assets. For a very low price point, the modules solve the problem of network-enabling devices with 10/100 Ethernet, including those requiring digital, analog, and serial control.

Traditionally, companies using 8 and 16-bit platforms find it nearly impossible to run resource-intensive applications on fast Ethernet connections. The NetBurner modules feature a Web-based control interface, a full 32-bit architecture providing 60+ MIPS, and the full suite of TCP/IP protocols. The 32-bit high performance processing platform provides the horsepower to handle both, 10/100 Ethernet connections and resource demanding applications with ease and flexibility.

Custom Applications: Quickly and easily customize your specific application requirements using the NetBurner Network Development Kits.



Development Kit Contents:

- 32-bit Core Processor Module
- Development Board
- CD-ROM
- Network Cables
- Serial Cable
- 12 Volt Power Supply for US/Canada

32 BIT MOD5213 HIGH PERFORMANCE EMBEDDED PROCESSOR MODULE

The Mod5213 has a rich set of peripherals making it ideal for both communications and control applications. This small form factor module is targeted at the high performance extended temperature low power market. Available in a 40 pin DIP, the Mod5213 boasts 66MHz of performance on a 32 bit ColdFire platform. The Mod5213 development kit also includes all the tools necessary to complete your embedded design, including a world class IDE, Graphical Debugger, and Real Time Operating System.

Process Specifications:

- 32-bit Freescale ColdFire 5213 running at 66MHz

Hardware Specification:

- 32 KB SRAM
- 256 KB Flash
- MAC Module and HW Divide
- Low-power optimization
- Four 32-bit timer channels with DMA capability
- Four 16-bit timer channels with capture/compare/PWM
- 4-channel 16-bit/8-channel 8-bit PWM generator
- Two periodic interrupt timers (PITs)
- 4-channel DMA controller
- 8-channel 12-bit ADC
- Up to 33 general-purpose I/O
- System integration (PLL, SW watchdog)
- CAN 2.0B controller with 16 message buffers
- Three UARTs with DMA capability

Software Development:

- NetBurner Development Kit includes: Mod5213 Development Board, Real-Time OS, C/C++ Compiler, Integrated Development Environment (IDE), Graphical Debugger, configuration and deployment tools.

Connectors:

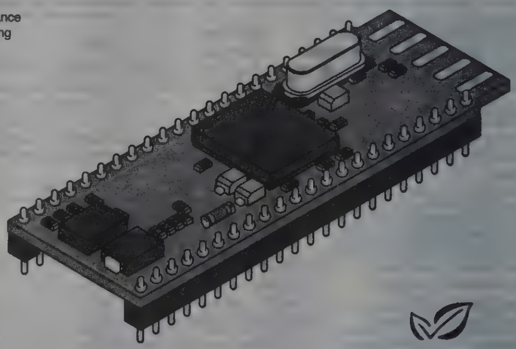
- Two standard single row 20-pin 0.1" headers
- PIN Dimensions: 1.9" x 0.6"

Physical Characteristics:

- Industry Standard 40-pin DIP
- Dimensions: 2.0" x 2.6"

Power Requirements:

- DC Input Voltage: 4V - 7V, or 3.3V Regulated
- Operating current: 120mA Environmental
- Operating Temperature: -40 - +85°C



RoHS Compliant

MOD5213 Development Kit

This Development kit contains all the hardware, software, and tools you need to start writing application code for your product or idea immediately. All components are integrated and ready to run so you don't waste any time configuring individual components.

The kit contains the NetBurner Mod5213 Processor Board. This processor board can be incorporated into your final product as a high performance main processor or as a low cost secondary processor.

The kit also contains the Mod5213 Development Board, which provides convenient DB-9 connectors, RS-232 and RS-485 level shifters, Segmented LED display, Real-Time Clock, dip switches, discrete LED's, CAN connector, 8 A/D inputs and filter locations, easy access connectors to processor signals, and a switching power supply.

NETBURNER Serial-to-Ethernet Modules

Products may be RoHS compliant.
Check mouser.com for RoHS status.

32-BIT SERIAL-TO-ETHERNET PROCESSOR BOARDS

If your application requires TTL level serial ports, just plug in the SB70 and go! If you require RS-232, RS-422 or RS-485, please see the SB72 Ethernet to Serial Processor Board.

SB70 Processor Board

The NetBurner SB70 is designed for applications that require a high performance/low cost 10/100 Ethernet interface to serial devices. The SB70 come preloaded with software to translate serial and Ethernet data, and is configurable through any web browser. The SB70 application code can be customized to any specific application requirements with the NetBurner Network Development Kit.

SB70 Features:

- Instantly allows any serial device to communicate over a network or the Internet
- The SB70 can be used a single board computer for custom applications.
- Includes TCP/IP, Telnet, SNMP, and Web Server (HTTP)
- Supports TTL, and QSPI* serial devices
- Web page configuration
- Powerful 32-bit Motorola ColdFire processor with integrated 10/100 Ethernet MAC
- Development kit required for QSPI

Development Kit Contents:

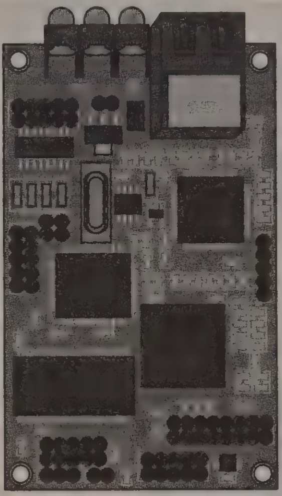
- SBXX Processor Board
- Adapter board to assist in development. It is not required to operate. The adapter board includes a switching power supply, RS-232 level shifters and two DB-9 connectors.
- CD-ROM containing source code, development tools, manuals and documentation.
- Cross-wired and straight-through twisted pair network cables
- Serial cable
- 12 VDC power supply (US and Canada only)

SB72 Processor Board

The NetBurner SB72 is designed for applications that require a high performance/low cost 10/100 Ethernet interface to serial devices. The SB72 come preloaded with software to translate serial and Ethernet data, and is configurable through any web browser. The SB72 application code can be customized to any specific application requirements with the NetBurner Network Development Kit. The SB72 is similar to the SB70, with the addition of RS-232 and RS-485 level shifters.

SB72 Features:

- Instantly allows any serial device to communicate over a network or the Internet
- The SB72 can be used a single board computer for custom applications.
- Includes TCP/IP, Telnet, SNMP, and Web Server (HTTP)
- Supports RS-232, RS-485/422, TTL, and QSPI* serial devices
- Web page configuration
- Powerful 32-bit Motorola ColdFire processor with integrated 10/100 Ethernet MAC
- Development kit required for QSPI



RoHS Compliant

SB72-EX DUAL PORT SERIAL-TO-ETHERNET EXTERNAL DEVICE

SB72-EX to Network-Enable Existing Applications:

The SB72-EX network-enables serial devices right out of the box. No programming or development is required; the SB72-EX is pre-programmed to convert RS-232, RS-422, RS-485, and TTL data to Ethernet, enabling communication with the serial device over a network or the Internet. The onboard web server provides easy device configuration using a standard web server.

Hardware Specifications:

- 10/100BaseT with RJ-45 connector
- 32-bit Motorola ColdFire 5272 with integrated 10/100 Ethernet
- 2MBytes flash, 8MBytes of SDRAM
- Power: 12V, 500mA
- Operating Temperature: 0° to 70°C
- Dimensions: 4.2" x 3.0"
- Weight 5 oz
- UL and CUL approvals
- LED's: Link, Speed/Data, Power
- The 2 UARTS can be configured:
  Two RS-232 ports
  One RS-232 port, one RS-485/422 port (full or half duplex)

Software Specifications:

- Configuration through web browser, telnet, SNMP, or NetBurner IP Setup utility
- Password protection
- Firmware updates through network or serial connections

Network Protocols Supported:

- ARP, DHCP, BOOTP, TCP, UDP, ICMP, Telnet, HTTP, SNMP

Note: additional protocols supported with development kit.

Development Kit

The SB72-EX Network Development kit contains everything you need to create custom applications on your SB72-EX device: Real-time operating system, TCP/IP Stack, Web Server, C/C++ compiler and linker, Integrated Development Environment (IDE), Debugger, and product deployment tools.

Development Kit Contents:

- SB72-EX Device Box
- CD-ROM containing source code, development tools, manuals, and documentation
- Cross-wired and straight-through twisted pair network cables
- Serial cable
- 12 VDC power supply (US and Canada only)

PARALLAX BASIC Stamp Modules and Accessories

Products may be RoHS compliant.
Check mouser.com for RoHS status.

BASIC STAMP MODULES

BASIC Stamps are small computers with 8 or 16 I/O lines that can be connected to TTL level devices and also, with a few extra components, solenoids, relays, and RS232 networks. Their simple language and easy interfacing make BASIC Stamps ideal for many applications for industrial, educational, and hobbyist customers. BASIC Stamps require only editor software, a prototype area, and cable to get started. Each BASIC Stamp has on board it's own non-volatile EEPROM, voltage regulator, resonator, and microcontroller.

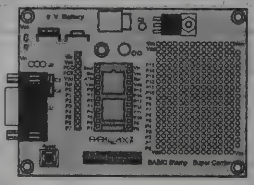
BASIC STAMP SUPER CARRIER BOARD

The Super Carrier provides wire-wrap prototyping space and holes placed to accommodate DIP ICs. The Super Carrier supports the BS1-IC, BS2-IC, BS2E-IC, BS2SX-IC, and BS2P 24 pin modules.



Features:

- 3" x 4" Double-sided plated through-hole prototype board
- Sockets support BS1-IC and all 24 pin BS2 modules
- On-board voltage regulator accepts 6-30 VDC, from wall-pack or battery
- Serial programming port (D89) can be used for run-time communication (BS2-IC and BS2SX-IC)
- Prototype area (1.5" x 2.0") holes arranged to easily support: servos, 300 and 600 mil DIP ICs, D89, DB25, RJ-11 connectors
- AppMod header
- Size measures 7.7 x 10.2cm (3" x 4")

For quantities of 10 and up, call for quote.

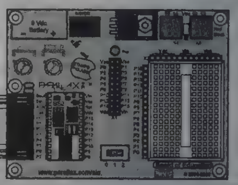
BOARD OF EDUCATION - SERIAL VERSION

The Board of Education was designed in coordination with educational customers to each microcontroller interfacing and programming. It is a quick platform for building a circuit without requiring soldering or wire wrapping tools.



Features:

- Mechanically interlocked power supply to prevent dual connection of wall pack and 9V battery.
- DB9 connector for BS2-IC programming and serial communication during run time.
- Female 10 pin dual row connector for optional AppModules (more breadboard space)

For quantities of 10 and up, call for quote.

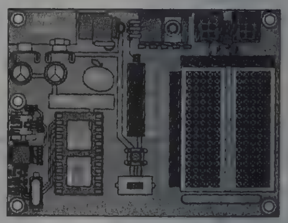
BOARD OF EDUCATION - USB VERSION

The Board of Education was designed in coordination with educational customers to each microcontroller interfacing and programming. It is a quick platform for building a circuit without requiring soldering or wire wrapping tools.



Features:

- USB connector for BS2-IC programming
- P0 - P15 I/O pins, Vdd and Vss connections brought adjacent to 5.1 x 3.5 cm (2" x 1 3/8") breadboard area
- Includes set of ten (10) color-coded 22 gauge wires
- Female 10 pin dual row connector for optional AppModules (more breadboard space)

For quantities of 10 and up, call for quote.

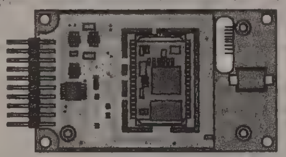
BASIC STAMP EMBEDDEDBLUE TRANSCEIVER APPMOD

The EmbeddedBlue Transceiver AppMod provides standard Bluetooth connectivity for BASIC Stamp applications without the need for detailed Bluetooth knowledge.

Specifications:

- Frequency: 2.4GHz FHSS
- Transmit Power: 4dBm (max) class 2 operation
- Open Field Range: 300 feet
- Bluetooth: Compliant with the v1.1 standard
- Receiver sensitivity at 0.1% BER: -85dBm



Features:

- Integrates with BASIC Stamp 2 Series
- Seamless connection with Bluetooth devices
- Perfect for wireless cable replacement

For quantities of 10 and up, call for quote.

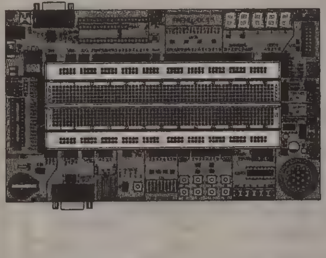
PROFESSIONAL DEVELOPMENT BOARD

The Parallax Professional Development Board (PDB) is high-quality, fully-integrated development platform for BASIC Stamp®, Javelin Stamp, and Ubicom® SX28AC/DP microcontrollers.

Features:

- 40-pin DIP socket (for all BASIC Stamp 24/40-pin and Javelin Stamp modules)
- 14-pin SIP socket (for BS1-IC)
- 28-pin "skinny" DIP socket (for SX28AC/DP)
- USB, DB-9, BS1, and SX-Key programming connectors
- 5 volt, 1.0 amp power-supply with power switch
- Five blue 7-segment (with decimal point), common-cathode LED displays
- Parallel LCD (available separately) may be configured in 4-bit or 8-bit mode
- Two servo-compatible headers
- Two 10k Ohm potentiometers
- L293D high-current driver for motors, solenoids, etc.
- Eight, normally-open pushbuttons (I/O lines protected, and pulled-up to Vdd via 10K)
- Pulse generator with selectable frequency (1 Hz, 10 Hz, 100 Hz, or 1 kHz)
- RS-232 DCE port with MAX232E transceiver



For quantities of 10 and up, call for quote.

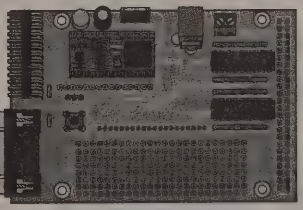
STAMP CONTROLLER INTERFACE BOARD

The Stamp Controller Interface allows the BASIC Stamp® microcontroller to connect directly to industrial type digital I/O control boards produced by Opto22, Grayhill, Allen-Bradley, and others that accept 0-5 VDC voltage control levels. These optically isolated modules are ideal for interfacing microcontrollers to the real world, and are more reliable by providing proper isolation. The Stamp Controller Interface accepts all BASIC Stamp modules. A 9-12 VDC, 2.1 mm jack is included for external power supply (sold separately).



For quantities of 10 and up, call for quote.

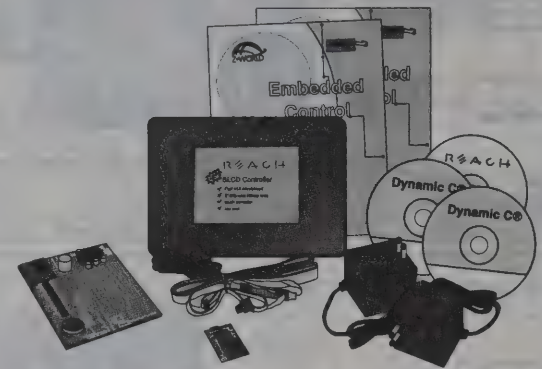
RABBIT Core Modules and Development Kits

Products may be RoHS compliant.
Check mouser.com for RoHS status.

COLOR TOUCHSCREEN APPLICATION KIT - CONTROL AT YOUR FINGER TIPS

The Reach Technology Color Touchscreen with a RabbitCore creates an application kit that provides embedded systems integrators the ability to add advanced interface functionality to embedded systems. Color touchscreens provide real-time feedback, allowing for better control in industrial-automation applications.
Controller and TFT Color Touch Screen The Reach Technology SLCD controller allows an LCD graphic display to be accessed as an intelligent serial device. Text can be written to the display and graphic images shown by using high-level commands. The touchscreen interface enables buttons to be defined on-screen and return a serial string when touched. User-defined bitmaps provide a modem looking interface including tabbed document interface pages and many different types of controls, such as radio buttons and check boxes.



Key Features

- RCM3720 RabbitCoreTM
- Rabbit 3000 @ 22.1 MHz
- 512K Flash / 256K SRAM
- 10Base-T Ethernet, RJ-45 port
- 33 digital I/O, alternate I/O bus
- 4 serial ports
- 3.3 V (with 5 V-tolerant I/O)
- Small footprint
- Rugged, industrial enclosure
- Audible beeper for audible touch feedback and alarms
- 5.7" TFT Hitachi Display
- Waterproof NEMA 4 compliant steel enclosure.
- Supports user-created bitmaps with RLE compression (512K of flash memory)
- Backlight enable and brightness control

Color Touchscreen Application Kit includes:

- RCM3720 RabbitCore with Proto Board
- Reach Technology SLCD Graphics
- Touch Terminal with NEMA 4 steel enclosure
- Supplemental CD's
- Dynamic C development system and complete documentation on CD-ROM
- User manuals, sample programs, and libraries
- 5 serial and conversion cables .
- Two AC adapters (U.S./Canada only)

For quantities of 10 and up, call for quote.

RCM2XXX RABBITCORE MICROPROCESSOR MODULES

The Rabbit 2000 is a high-performance 8-bit microprocessor designed expressly to power a new generation of embedded systems. Its extensive integrated feature set and glueless architecture facilitate rapid hardware design, and its C-friendly instruction set permits efficient development of complex applications. For embedded systems, the Rabbit 2000 out-performs most 16 and some 32-bit processors without losing the efficiency of an 8-bit architecture.

The RabbitCore family of microprocessor core modules is designed to facilitate rapid development and implementation of embedded systems. The RabbitCore mounts on a user-designed motherboard and acts as the controlling microprocessor for the user's system. Small in size but packed with powerful features, these core modules give designers a complete package for control and communication.

RoHS Compliant

RABBIT Microprocessor Core Modules

Products may be RoHS compliant.
Check mouser.com for RoHS status.

RCM3XXX RABBITCORE MICROPROCESSOR MODULES

The Rabbit 3000 is a high-performance, low-EMI microprocessor designed specifically for embedded control, communications, and Ethernet connectivity. The 8-bit Rabbit 3000 outperforms most 16-bit processors without losing the efficiency of an 8-bit architecture. Extensive integrated features and glueless architecture facilitate rapid hardware design, while a C-friendly instruction set promotes efficient development of even the most complex applications.

RoHS Compliant

RCM3000 and RCM3010 RabbitCore

The RCM3000 RabbitCore is our powerful and feature-packed 10Base-T Ethernet microprocessor core module. Powered by the new Rabbit 3000™ - the "EMI-Free microprocessor"—the RCM3000 is the ideal option for designers who want to rapidly develop and implement embedded systems with fully integrated Ethernet connectivity.

Measuring only 2.73" x 1.85" (69 x 47 mm), the RCM3000 operates at 3.3 V (with 5 V-tolerant I/O) and features 6 serial ports. Built-in low-EMI features, including a clock spectrum spreader, help designers eliminate the kind of emissions-related problems that frequently derail tight development schedules.

For quantities of 250 and up, call for quote.

RCM3100 and RCM3110 RabbitCore

The RCM3100 RabbitCore microprocessor core module is the ideal option for designers who want to rapidly develop and implement embedded systems. Powered by the new Rabbit 3000™ microprocessor, the compact RCM3100 boasts powerful features and a small footprint–1.85" x 1.65" (47 x 42 mm)–to simplify integration.

The RCM3100 has 6 serial ports and operates at 29.4 MHz and 3.3 V (with 5 V-tolerant I/O). Built-in low-EMI features, including a clock spectrum spreader, help designers eliminate the kind of emissions-related problems that frequently derail tight development schedules.

RCM3600 AND RCM3610 RABBITCORE MODULES

The RCM3600 RabbitCore is the lowest priced Rabbit 3000 microprocessor based core module designed for a wide variety of applications.

Design Advantages:
- Ready-made platform for fast time-to-market, up to 3 months design integration time savings
- Compact size
- Dynamic C® development environment for real-time development and debugging
- Exceptionally fast performance for math, logic, I/O

Applications:
- Handheld devices & Instrumentation
- Remote Data Logging

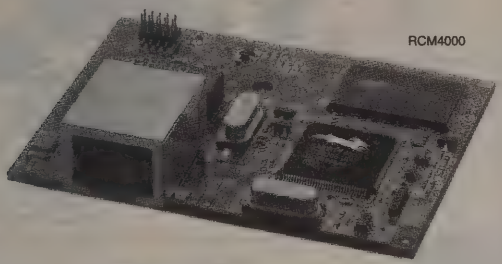
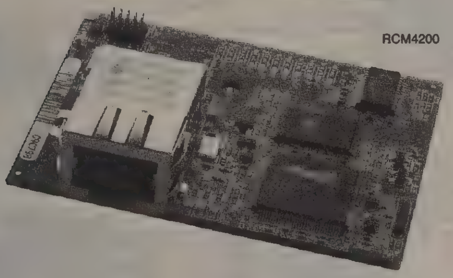
RCM4000 RABBITCORES – EMBEDDED NETWORKING AND CONTROL

The new Rabbit 4000 is a high-performance, low-EMI microprocessor designed specifically for embedded control, communications, and Ethernet connectivity. The Rabbit 4000 outperforms most 16–bit processors without losing the efficiency of an 8–bit architecture. Extensive integrated features, glueless architecture and 10Base-T Ethernet facilitate rapid hardware design, while a new C-friendly instruction set promotes efficient development of even the most complex applications.

The Rabbit RCM4XXX series of RabbitCore modules enable powerful embedded networking and control in a small package. RabbitCores mount directly onto a user designed motherboard, and can interface with CMOS-compatible digital devices via the user's motherboard. Programs are developed with our industry-proven Dynamic C development system that includes an editor, compiler, and in-circuit debugger.



RCM4000



RCM4200

RCM4XXX Development Kits include:
- RCM4xxx RabbitCore Module
- Prototyping Board
- Serial Cable for Programming and Debugging
- Dynamic C® integrated development software
- Complete product documentation on CD
- AC adapter (U.S. only)
- Rabbit 4000 pin specifications poster
- Connectors and accessories

Application Possibilities:
- Wireless device/data management
- Serial-to-Ethernet applications
- Remote monitoring and communications
- Web-enabling devices
- Device/data management and control
- Device-level control
- Remote data logging
- Asset management
- Security Access Systems

RCM4400W – THE ON-CORE WI-FI SOLUTION

The RCM4400W RabbitCore modules adds Wi-Fi/802.11b functionality to existing Rabbit® 4000 microprocessor features, allowing you to create a low-cost, low-power, Wi-Fi based control and communications solution for your embedded system. The RCM4400W RabbitCore modules are equipped with on-board Wi-Fi/802.11b wireless connectivity. Features also include 512K flash memory and fast-program execution SRAM, 35 general-purpose I/O, 3.3 V I/O line, and low-power modes.

RCM4510W – THE ZIGBEE IS ON-BOARD

The RCM4510W next-generation RabbitCore module adds ZigBee®/802.15.4 connectivity to the existing Rabbit® 4000 microprocessor features allowing you to create a low-cost, low-power, wireless network as part of your control solution for your embedded application. The RCM4510W RabbitCore module is equipped with an on-board ZigBee/802.15.4 modem for wireless connectivity. Features also include 512K flash memory and SRAM, 40 general-purpose I/O, and up to 9 general-purpose I/O 4 of which can be set up as analog inputs via the ZigBee module.

RABBIT Ethernet and M2M Development Kits

SERIAL-TO-ETHERNET KIT

Ethernet designers now have a Serial-to-Ethernet Application Kit that is easy to use out of the box. The simple 3-Step Setup for transmitting data from a digital volt meter via a serial port to a TCP/IP stream enables even the newest user to quickly develop a Serial-to-Ethernet application. The kit features digital volt meter software libraries, sample programs and a menuing system, in addition to the Dynamic C integrated development environment. The digital volt meter application software provides a framework for users to start their design with minimal time and effort (volt meter not included in kit).

The Serial-to-Ethernet Application Kit includes a popular RCM3000 RabbitCore module featuring 10Base-T Ethernet and TCP/IP libraries with source code. Measuring only 2.73" x 1.85" (69 x 47 mm) the RMC3000 operates at 3.3V (with 5 V-tolerant I/O) and features 6 serial ports and 52 digital I/O. Available in two models, the RCM3000 is equipped with up to 512K each of Flash and SRAM, quadrature encoder inputs, PWM outputs, and pulse capture and measurement capabilities. Two 34-pin connection headers provide 52 digital I/O shared with the 6 serial ports and alternate I/O features.

Serial-to-Ethernet Kit Pictured

Features:
- Serial to Ethernet applications for:
- Digital Volt Meter reader
- Binary & hexadecimal ASCII
- Configuration menuing system
- Royalty-free TCP/IP stack with source code

Design Advantages:
- 3 Step setup
- Minimal Ethernet experience required
- Software compatible with other Rabbit-based products

Serial to Ethernet Application Kit Specifications:

Feature	Serial-to-Ethernet Application Kit
Core Module	RCM3010
Prototyping Board	Standard RCM3000 Prototyping Board
Ethernet	10Base-T, RJ-45
Serial Ports	1 RS-232 hardware defined (additional ports available on RCM3010)
Cables	DB9 Null Modem Cable
Software Compiler	DB9 Null Modem Cable, 10-pin ® DB9 Conversion Cable, Ethernet Crossover Cable Programming Cable
Software Library	Allow faster serial communications: 1 Mbit/s
Sample Programs	Transmit data from DVM and store on a PC
Menuing Systems	For Serial-to-Ethernet configuration
Manuals	Serial-to-Ethernet 3-Step Setup Sheet, RCM3000 Getting Started Manual, RCM3000 User Manual (on CD)
Display	122 x 32 Keypad/Display Unit with LCD menu system

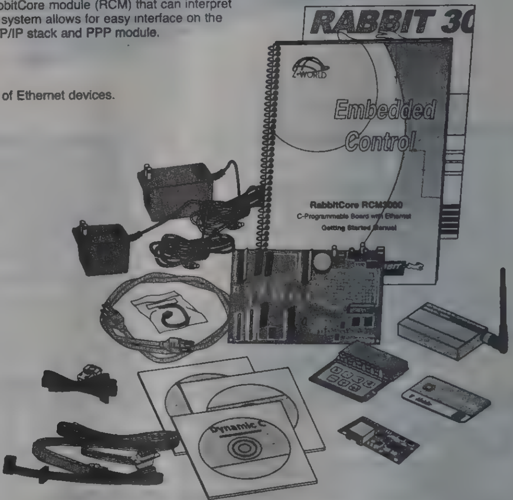
MACHINE TO MACHINE (M2M) APPLICATION KIT

M2M (machine-to-machine/mobile) brings together **machine control with wireless communications**. With 50 billion "machines" in the world, M2M allows a machine to be monitored or controlled from anywhere, anytime, using current wireless data technologies such as GSM, SMS (text messaging) and GPRS.

Rabbit Semiconductor's M2M Applications Kit provides all the tools necessary to sample and design communications between a Rabbit-based device to a GSM/GPRS-enabled device (e.g. GSM modem/phone, PDA phone). The libraries and sample programs allow for a GSM modem/phone to send SMS (text) messages to a RabbitCore module (RCM) that can interpret messages as commands and in turn can execute control functions. The RCM can also send/receive email from any PC, device or phone. A menu system allows for easy interface on the keypad/display, as well as reading text messages and email. The M2M Application Kit includes Z-World's Dynamic C software with royalty-free TCP/IP stack and PPP module.

Machine2ME Node
Is a configuration involving an Ethernet-enabled Rabbit-based device at the heart of a Machine equipped with a GSM modem.
The Rabbit-based device acts as a server/node to other Ethernet devices. So a single Rabbit device with a wireless modem can control a number of Ethernet devices.



M2M Applications Kit Highlights:
- HW/SW for wireless RCM-to-GSM communication
- Dual Band GSM/GPRS modem and antenna
- Keypad/Display configuration menu system
- Royalty-free TCP/IP stack with source code & PPP
- Samples/Libraries including Machine2ME Node Applications

Applications:
- Wireless Embedded Control
- Alarms & Notification Systems
- Remote Device Monitoring
- Data and Event Logging
- Machine Communication

M2M Application Kit Specifications:

Feature	Serial-to-Ethernet Application Kit
Control Device and Display System	
Microprocessor Core Module	RCM3200 RabbitCore module
Microprocessor	Rabbit 3000 running at 44.2 MHz
Ethernet Connectivity	10/100Base-T, RJ-45
Memory	512K Flash, 512K SRAM (program). 256K SRAM (data)
General Purpose I/O	52 digital I/O, Auxiliary I/O Bus
Prototyping Board	RCM3200 Prototyping Board
Serial Ports	RS-232 (2 3-wire or 1 5-wire). Additional CMOS ports available on RCM3200
Display	122 x 32 Keypad/Display Unit with LCD menu system
GSM Modem	Wavecom Fastrack Dual Band GSM/GPRS modem (900/1900 MHz for US Kit, 900/1800 MHz for International Kit)
Antenna	Wave Device Antenna. 90° Adjustable Knuckle Antenna (1850-1990 MHz for US Kit, 870-960MHz for International Kit)
SIM Card (US Kits only)	T-Mobile SIM card (Activation required)
Software Development System	
Software Compiler	Z-World's Dynamic C 8.x with TCP/IP stack
Software Libraries	SMS/GPRS modes, Modem-specific Library
Additional Libraries	Dynamic C PPP module, Generic Modem Library, TCP/IP, SMTP, POP3, Telnet
Sample Programs	For SMS and GPRS communication and control Machine2ME components. FTP datalogging
Menuing System	For display of SMS and GPRS communications
Included Accessories	
Cables	Programming Cable for RCM 10-pin ® DB15 Conversion Cable Ethernet Crossover Cable
Documentation	M2M Applications Kit Getting Started Manual RCM3200 Getting Started Manual Full Documentation on CD
Power Supplies (US Kits Only)	9 V DC adapter for RCM3200 12 V DC, 1 Amp (min.) for GSM Modem. Power cable included.

SILEX TECHNOLOGY Device Servers and Biometric Devices

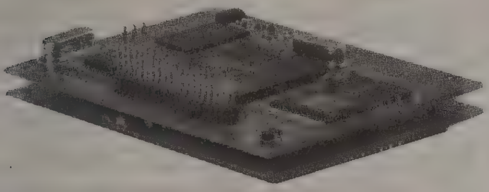
silex technology

silex technology, Inc. has more than 30 years experience designing, manufacturing and marketing embedded products. During the past 10 years, silex has become the number-1 global supplier of print server solutions designed to help businesses improve the way they move, print and secure information.

WIRELESS/WIRED SERIAL DEVICE SERVERS

SX-550

The advantages of wireless networking are obvious. But as an OEM device manufacturer, how can you easily and securely implement wireless capabilities in your devices? The solution is the silex SX-550 Module, the first embedded networking solution that supports all of the major wireless networking standards – 802.11a, 802.11b, and 802.11g as well as 100Base-T and 10Base-T wired Ethernet. The SX-550 provides the most extensive network security capabilities in the industry, so it can be used in virtually any application or environment that requires wireless communications.



For quantities of 200 and up, call for quote.

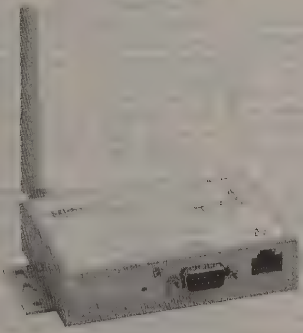
SX-500

In addition to a built-in web browser interface, silex provides ExtendView, a Windows utility for easy configuration and management. A console accessible via TELNET or the serial port is available for more sophisticated diagnostics and configuration. The SX-500 series is also compatible with the Simple Network Management Protocol (SNMP) for compatibility with most popular network management systems. The included Serial Port Emulator software allows you to configure virtual serial ports on a Windows system (for example, COM3) that redirect all of the data out to the silex serial servers on your network allowing you to continue use of your current applications.



For quantities of 200 and up, call for quote.

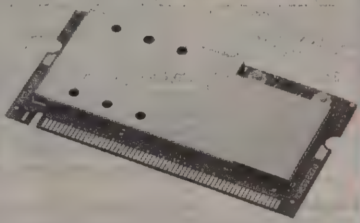
CORRESPONDING MINIPCI WIRELESS LAN MODULES

SX-10WAG:

- 802.11abg miniPCI wireless LAN module
- Chipset: Atheros Communications AR5414A-001
- Antenna Connector: U.FL connector x Diversity antenna
- Operating Voltage: 3.3V +/- 0.3V
- Radio Output: 11a, 11b, 11g/16dBm
- Power Consumption:500mA



SX-10WG:

- 802.11g Compliant miniPCI Wireless LAN Module
- Chipset: Atheros AR5005G
- Antenna Connector: 2 x U-FL Connector
- Operating Voltage: 3.3V +/- 0.3V
- Radio Output: 11g Mode:
  2-10ch, 12, 13ch./15dBm
  11ch./14dBm, 1ch./12dBm
  11b Mode:
  1-14ch./16dBmm
- Power Consumption (500mA):
  11g transmit: 3.3V 420mA
  11g Receive: 3.3V 240mA
  11b transmit: 3.3V 410mA
  11b receive: 3.3V 215mA

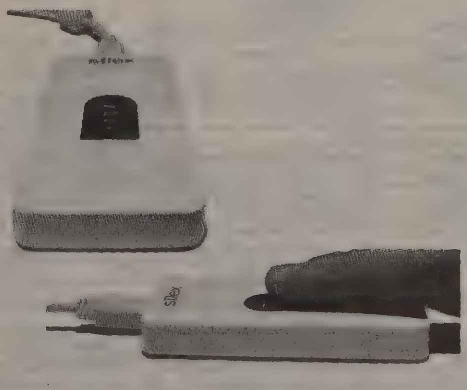
BIOMETRICS, LOCAL ACCESS AND FINGERPRINT AUTHENTICATION

Biometrics authentication seems convenient, but can everyone use it? Are you looking for reliability? silex technology now has the solution for you. We've used our biometric expertise gained through years of experience to develop a new fingerprint reader with RF swipe sensor technology. The new fingerprint reader will enable 100% usability. Those users who in the past have had a difficult time using fingerprint readers, will be able to easily use the silex S1

Superior Performance
Skin damage, dirt, dry-finger, and other unfavorable conditions can make surface-level fingerprint patterns unreadable. silex S1 reads below the surface level at the corium where the fingerprint pattern remains consistent.

High Level of Anti-spoofing
The unique sensor technology used by the S1 simply will not read gummy fingers or other methods used to spoof fingerprint readers.

Compact and Mobile
The simple, sleek design of the S1 is suited for any PC desktop or laptop. By making the USB cable detachable, the standard cable can be replaced based on the reader's proximity to the computer.



For quantities of 50 and up, call for quote.

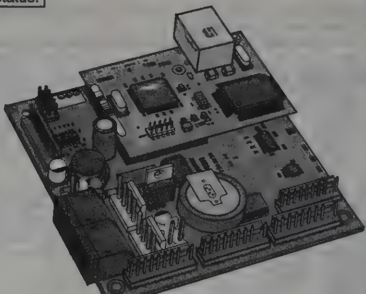
BL2500 COYOTE

Gives OEM designers extremely low-cost embedded control for high-volume applications such as product control, factory equipment control, access control, HVAC, and vending machines. Two standard models—one with Ethernet, one without—feature the Rabbit 3000™ microprocessor at 29.4 MHz, with 256K Flash and 128K SRAM.



RoHS Compliant*

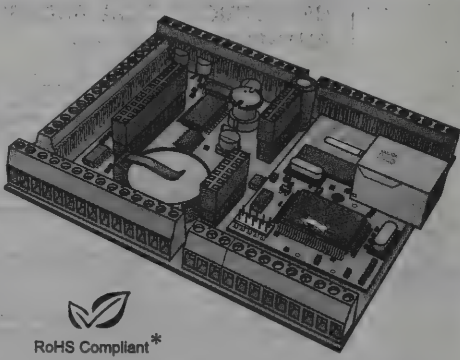
Specifications:

Feature	BL2500	BL2510
Microprocessor	Rabbit 3000™ at 29.4 MHz	
Ethernet Port	10Base-T, RJ-45	N/A
Flash Memory	256K (standard)	
SRAM	128K (standard)	
LED's	4-User-programmable	
Digital Inputs	16: 15 protected to ±36 VDC, 1 protected to +5 –36V; threshold is 1.5 V nom.	
Digital Outputs	8, sink up to 200 mA each, 36 V DC max. standoff voltage	
Analog Inputs	One 10-bit resolution, 8-bit accuracy, input range 0.1–3.1 V, 10 samples/s	
Analog Outputs	Two 9-bit PWM, 0.1–3.1 VDC, 17ms settling time	
Serial Ports	6 serial ports: 1 RS-485, 2 RS-232 or one RS-232 (with CTS/RTS), 1 CMOS level asynchronous or clocked serial port, 1 expansion serial port multiplexed to two RS-422 clocked SPI ports, 1 CMOS compatible serial port for programming/debug	
Serial Rate	Max. async = CLK/8, Max. sync = CLK/2	
Real-Time Clock	Yes	
Timers	Ten 8-bit timers (6 cascadable from the first) and one 10-bit timer with 2 match registers	
Watchdog/Supervisor	Yes	
Power	8 – 40 V DC 1 W typical w/ no load	8 – 40 V DC 0.8 W typical w/ no load
Backup Battery	3 V lithium coin-type, 1000 mA•h, supports RTC & SRAM	
Operating Temperature	–40° to +70°C	
Humidity	5 – 95%, noncondensing	
Connectors	5 polarized 9-pin Molex® type terminals with 0.1" pitch, Two 4-pin 0.156" pitch Molex type, two 0.156" pitch 2-pin Molex type, two RJ-45, one 0.1" pitch 2x5 IDC, one 2 mm pitch 2x5 IDC programming port	
Board Size	3.95" x 3.95" x 1.16" (100 x 100 x 29 mm)	3.95" x 3.95" x 0.80" (100 x 100 x 20 mm)

BL2100 SMARTCAT

Designed for medium-scale control and monitoring applications, the Smartcat is a high-performance single-board computer that gives OEM designers Ethernet and keypad/display options all in one low-cost package. The Smartcat offers plenty of sinking/sourcing digital I/O with A/D and D/A, providing comprehensive integrated control capabilities in a compact 4.14" x 3.41" (105 x 87 mm) form factor. Ethernet models are ideal for remotely monitoring and supervising another programmable system or web-enabling new or existing products. The Ethernet interface is fully supported by software to enable network and Internet connectivity.



RoHS Compliant*

RABBIT Single Board Computers

BL2000 WILDCAT

The Wildcat gives OEM designers optional Ethernet connectivity in a low-cost, high-performance single-board computer. These compact boards are rich with the digital I/O, A/D, and D/A designers need for embedded control and monitoring applications, and the Wildcat's compact board size of 4.15" x 3.43" (105 x 87 mm) allows for easy integration. Ethernet models are ideal for remotely monitoring and supervising another programmable system or web-enabling new or existing products.

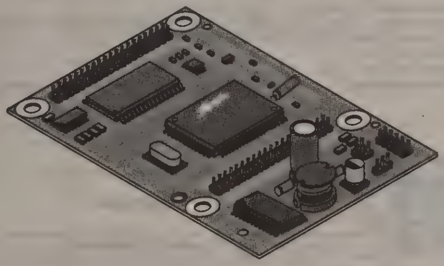
BL1800 JACKRABBIT

The Jackrabbit is RABBIT's most compact and lowest cost C-programmable single-board computer. The Jackrabbit is the perfect solution for applications that have significant cost and size constraints but need a dependable SBC. Fast number crunching is provided by a Rabbit 2000 microprocessor operating at up to 29.5 MHz.



Specifications:

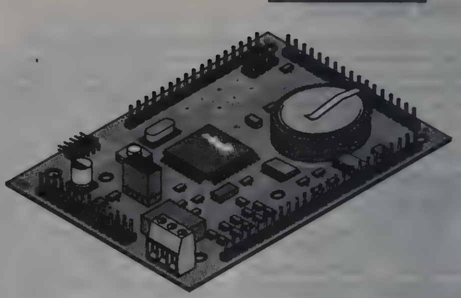
RABBIT Single Board Computers

LP3500 FOX



The LP3500 Fox is a low-power single-board computer designed to operate reliably virtually any place it is deployed, especially where power is limited, such as in portable, hand-held, battery-powered, and remote monitoring systems. The LP3500 features built-in analog and digital I/O and consumes less than 20 mA when fully operational and less than 100 μA in power-save mode.

Specifications:

Feature	LP3500	LP3510
Microprocessor	Low-EMI Rabbit 3000™ at up to 7.4 MHz	
Flash	512K (2 x 256K)	256K
SRAM	512K (2 x 256K)	128K
Backup Battery	Socketed 3 V lithium coin-type, 265 mA·h, supports RTC and SRAM	
Keypad/Display	Optional keypad/display module with 7 keys and 122 _ 32 graphic display, easy to use menuing software	
Digital Inputs	16 protected to ±36 V DC	
Digital Outputs	10 total: 8 sink and 2 source 200 mA each, 36 V DC max.	
Relay	1 SPDT, 1 A, 30 V DC, bi-stable	None
Analog Inputs	Eight 11-bit single-ended or four 12-bit differential, 1MW input impedance, up to 200 samples/sec. Multiple software-controlled programmable gain voltage ranges from 0-1 V to 0-20 V. 4 channels can be set individually for 4-20mA with plug-in jumpers 1 channel has software-selectable power voltage monitoring option	None
Analog Outputs	Unfiltered PWM, 1 kW output impedance	None
Serial Ports	6 total: 1 RS-485 3 RS-232 (three 3-wire OR one 5-wire and one 3-wire 1 logic level serial interface for optional add-ons 1 3 V CMOS-compatible (programming)	
Serial Rate	Max. asynchronous baud rate = CLK/8	
Real-Time Clock	Yes	
Timers	Ten 8-bit timers (6 cascadable from the first) and one 10-bit timer with 2 match registers	
Watchdog/Supervisor	Yes	
Main Power	3–30 V DC, 20 mA max. @ 7.4 MHz, 100 μA max. @ 2 kHz	
Backup Power	Used to reduce current in power-save mode, 2.7–3.3 V @ 100μA max	
Operating Temp	–40° to +70°C	
Humidity	5–95%, noncondensing	
I/O Connectors	Two 1 _ 17, 0.1" pitch headers	
Board Size	3.65" _ 2.60" _ 0.45" (93 x 66 x 11 mm)

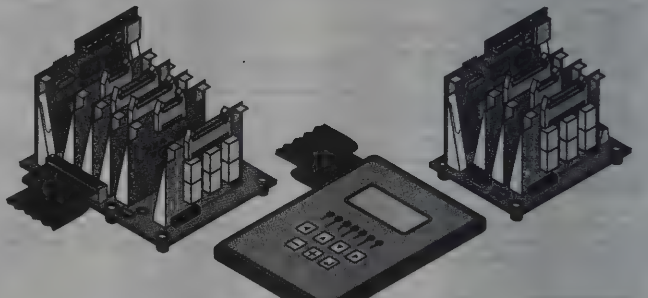
SR9000 SMART START SYSTEM

The Smart Start is a modular and expandable embedded control system designed for demanding real-time control and data acquisition applications. Multiple I/O card options--including digital, A/D, D/A, and relays--allow users to closely match their specific I/O needs. The Smart Star CPU card comes in both Ethernet and non-Ethernet versions, and a cost-effective keypad/display is also available.



Ethernet connectivity - CPU card with or without Ethernet
Flexible functionality - modular configuration to easily interchange or replace individual I/O cards
Multiple I/O card options - digital I/O, A/D, D/A, relay
Expandable - up to 168 I/O
Cost-effective - low cost per I/O
Optional keyboard/display - backlit 122 x 32 pixel graphic LCD with 7 user-relegendable keys, 7 LEDs

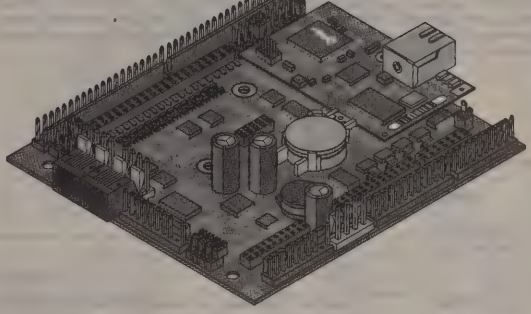
RABBIT Single Board Computers and Software

BL2600 WOLF - MODELS BL2600, BL2610

The BL2600 Wolf single-board computer provides embedded systems engineers a complete and expandable performance package. Two standard models-one with 10/100 Ethernet and one without 10/100 Ethernet - feature the Rabbit 3000® microprocessor at 44.2 and 29.4 MHz respectively, with at least 512K Flash and 512K SRAM (standard).

Programming the BL2600
Programs are developed and debugged using industry-proven Dynamic C® software, which runs on a Windows PC. The programming device is connected via a serial cable, a USB cable, or Ethernet. Comprehensive debugging support includes break points, watch expressions and many other extensive features oriented toward real-time embedded systems programming. An extensive library of drivers and sample programs is provided, including a royalty-free TCP/IP stack for network and Internet communications. Full source code is provided for most library routines.



BL2600 Specifications & Features

Feature	BL2600	BL2610
Microprocessor	Rabbit 3000™ at 44.2 MHz	Rabbit 3000™ at 29.4 MHz
Ethernet Port	10/100Base-T, 3 LEDs	None
Flash Memory	512K (standard)	
SRAM	512K Program Execution, 256K Data	512K (standard)
Backup Battery	Panasonic CR2477 or equivalent 3 V lithium coin type, 950 mAh, socket mounted	
Configurable I/O	16: Individually software configurable digital inputs @ ±36 V DC, 1.5 V switching threshold, or sinking digital outputs up to 40 V, 200 mA each	
Digital Inputs	16: Hardware-configurable pull-up or pull-down, ±36VDC, switching threshold 1.4 V typ.	
High-Current Digital Outputs	4: Individually software configurable, +40 V DC, 2 A max. per channel, sinking or sourcing	
Analog Inputs	8 channels with 11-bit resolution, software selectable ranges Unipolar: 1, 2, 2.5, 5, 10, 20 V DC; Bipolar: ±1, ±2, ±5, ±10 VDC; Four of the eight channels maybe hardware-configured for 4-20 mA, 12 kHz update rate	
Analog Outputs	4 channels, 12-bit resolution, buffered (0-10 V DC, ± 10 V DC), 4-20 mA, 12 kHz update rate	
RabbitNet	Compatible Expansion Cards: Digital I/O, A/D, D/A, Relay, Keypad Display Interface	
Serial Ports	Up to 5 serial ports: • 1 RS-485 or 1 RS-232 • 2 RS-232 or one RS-232 (with CTS/RTS) • 1 clocked serial port multiplexed to 2 RS-422 SPI master ports • 1 CMOS compatible serial port for programming/debug	
Serial Rate	Max. async = CLK/8, Max. sync = CLK/2	
Real-Time Clock	Yes	
Timers	Ten 8-bit timers (6 cascadable from the first) and one 10-bit timer with 2 match registers	
Watchdog/Supervisor	Yes	
Power	9/36 V DC, 25 W max. (includes power to RabbitNet expansion boards)	
Operating Temperature	-40° to +70°C (-40° to +85°C without battery)	
Humidity	5-95%, noncondensing	
Connectors	One Ethernet and two RabbitNet™ RJ-45 connectors Two polarized, 9-position with 0.1" pitch friction-lock connectors Three 4-position power terminals with 0.156" pitch friction-lock connectors Two 20-position terminals with 0.1" pitch (and 2 x 20 IDC headers) friction-lock connectors One 13-position terminal with 0.1" pitch (and 2 x 13 IDC header) friction-lock connector One 10-position terminal with 0.1" pitch (and 2 x 7 IDC header) friction-lock connector One 2 x 5 IDC, 1.27 mm pitch (BL2600) programming port One 2 x 5 IDC, 2 mm pitch (BL2610) programming port	
Board Size	4.85" x 4.96" x 1.00" (123 x 126 x 25 mm)	

For quantities of 5 and up, call for quote.

DYNAMIC C® 9 SOFTWARE

Dynamic C® is an integrated C compiler, editor, loader, and debugger designed specifically for Rabbit microprocessor-based products. The Dynamic C integrated development environment provides a platform for developing applications quickly for fast time to market. Since 1990, Z-World's effective integration of hardware and software has helped design engineers develop thousands of successful OEM products.

Dynamic C's enhancements to standard C facilitate real-time programming on powerful embedded systems. Language extensions include constructs for cooperative and preemptive multi-tasking and protecting writes to variables during power failures. Libraries for standard C functions, board-specific peripheral drivers, chip peripherals, and other features are included in source code format. Assembly language programming is fully supported, and Assembly code is easily mixed with C code for time-critical applications.

Developing software with Dynamic C is simple. Users can write, compile, and test C and Assembly code without leaving the Dynamic C development environment. Debugging occurs while the application runs on the target. Alternatively, users can compile your program to an image file for later loading. Dynamic C runs on PCs under Windows 95, 98, 2000, NT, ME, and XP. Programs are downloaded at baud rates of up to 460,800 bps while the program compiles.

TCP/IP Libraries
Dynamic C includes extensive TCP/IP libraries and sample programs that serve as application templates for fast program development
Standard Modules: TCP/IP Libraries and Sample Programs
HTTP — Hypertext Transfer Protocol. Protocol for web browsers and servers to transfer files, such as text and graphics. Contains facilities for Server Side Includes (SSI) and CGI routines.
POP3 — Post Office Protocol. Standard protocol to retrieve e-mail.
TFTP — Trivial File Transfer Protocol. Simplified version of FTP that allows files to be transferred from one computer to another over a network file transfers between network nodes.
SMTP — Simple Mail Transfer Protocol. Internet protocol providing e-mail services.
DHCP — Dynamic Host Configuration Protocol. A method for a device to assign its network configuration information from a central server.
Socket-Level UDP — User Datagram Protocol. Protocol exchanging datagrams without acknowledgements or guaranteed delivery.
Socket-Level TCP — Transmission Control Protocol. Reliable full-duplex data transmission.
ICMP — Internet Control Message Protocol. Network protocol to verify connecting to another host. (PING)

Standard Features
- Full-feature source and/or Assembly-level debugger, no in-circuit emulator required.
- Royalty-free TCP/IP stack with source code and most common protocols.
- Hundreds of functions in source-code libraries and sample programs
- Exceptionally fast support for floating-point arithmetic and transcendental functions
- RS-232 and RS-485 serial communications
- Analog and digital I/O drivers
- I2C, SPI, GPS, file system
- LCD display and keypad drivers
- Powerful language extensions for cooperative or preemptive multi-tasking
- Loader utility program to load binary images into Z-World targets in the absence of Dynamic C
- Create your own source code libraries and augment on-line help by creating "function

Standard Debugging Features
Breakpoints - Set breakpoints that can optionally disable interrupts.
Single-stepping - Step into or over functions at a source or machine code level — uC/OS-II aware.
Code disassembly - The disassembly window displays addresses, opcodes, mnemonics, and machine cycle times. Switch between debugging at machine code level and source code level by simply opening or closing the disassembly window.
Watch expressions - Watch expressions are compiled when defined, so complex expressions including function calls may be placed into watch expressions.
Watch expressions can be updated with or without stopping program execution.
Register window - All processor registers and flags are displayed.
The contents of general registers may be modified in the window by the user.
Stack window - Shows the contents of the top of the stack.
Hex memory dump - Displays the contents of memory at any address.
STUDIO window - print outputs to this window, and keyboard input on the host PC can be detected for debugging purposes. Print output may also be sent to a serial port or file.

Dynamic C 9 Promotional Bundle – Limited Time Offer
Dynamic C 9 Promotional Bundle: Includes Dynamic C 9, SSL, FAT, RabbitWeb, PPP, SNMP, and AES software modules. $1304 if purchased separately

RABBIT Single Board Computers

OP7200 EDISPLAY

The OP7200 eDisplay is an intelligent operator interface that offers rugged I/O, built-in Ethernet connectivity, and optional A/D and touchscreen capabilities. The compact eDisplay is an ideal data acquisition and display device for OEM products and stand-alone systems such as factory floor controls. The unit's 10Base-T Ethernet facilitates remote diagnostics, control, and communication, including sending and receiving E-mails and alerts.

Specifications:

Feature	OP7200	OP7210
Microprocessor	Rabbit 2000™ at 22.1 MHz	
Ethernet Port	10Base-T, RJ-45	
Flash	256K	
SRAM	128K	
Backup Battery	Socketed 3 V lithium coin-type, 265 mA·h, supports RTC and SRAM, connection for user-supplied external battery	
Keypad/Display	1/4 VGA (320 _ 240 pixels) with programmable on/off white LED backlight, 9-key tactile feedback keypad	
	4096 x 4096 analog touchscreen	No touchscreen
LEDs	4: Power On, Microprocessor Error, Ethernet Link Alive, Ethernet Activity	
Digital Inputs	19 protected to ±36 VDC	16 protected to ±36 VDC
Digital Outputs	8: individually configurable in software; sink up to 350 mA, source up to 250 mA, or tri-state; 40 VDC max.	
Analog Inputs	Eight 11-bit single-ended or four 12-bit differential, 200 kW input impedance, 2.5 ksamples/sec. Eight software-controlled programmable gain/voltage ranges from 0–1 V to 0–20 V.	None
Serial Ports	4 CMOS-compatible: 1 RS-485 (or I/O expansion port), 2 RS-232 (one 5-wire or two 3-wire), One 5V CMOS-compatible (programmable)	
Serial Rate	Max. burst rate = CLK/32, Max. sustained rate = CLK/64	
Real-Time Clock	Yes	
Timers	Five 8-bit timers (4 cascadable from the first) and one 10-bit timer with 2 match registers	
Watchdog/Supervisor	Yes	
Power	9–40 VDC or 24 VAC, 4 W max.	
Operating Temp	–10° to +65°C	
Humidity	20–70%, noncondensing	
I/O Connectors	Screw terminals support max. 14 AWG/1.5 mm2 (standard)	
Product Size	5.67" x 4.41" x 1.70" (144 x 112 x 43 mm)	
Display Area	3.0" x 2.2" (76 x 56 mm)

OP6800 MINICOM

The MiniCom is a low-cost, C-programmable operator interface and single-board computer that offers Ethernet connectivity, plenty of industrialized I/O, a graphic LCD, and keypad. The MiniCom's compact 4.5" x 3.6" (112 x 91 mm) form factor makes it ideal for use in designs and areas with size constraints. Available in both Ethernet-enabled and non-Ethernet versions, the MiniCom provides comprehensive integrated control, display, and networking capabilities via Internet/Ethernet or serial communications.

Specifications:

Feature	OP6800	OP6810
Microprocessor	Rabbit 2000 at 22.1 MHz	
Ethernet Port	10Base-T, RJ-45	None
Flash	256K	128K
SRAM	128K	128K
Backup Battery	Connection for user-supplied battery (to support RTC and SRAM)	
Keypad/Display	122 x 32 pixel graphic LCD in two stacked sections (with programmable backlight), user-relegendable keypad with 7-key / 7-LED interface	
LEDs	7 hardware- or software-driven: 1 red, 4 green, 2 yellow	
Digital Inputs	13 total: 8 protected to ±36 VDC, 5 protected to ±25 VDC	
Digital Outputs	11 total: sink 200 mA, 40 VDC max., 4 with built-in inductive load-protection diode	
Serial Ports	4 total: two 3-wire or one 5-wire RS-232, 1 RS-485, and one 5 V CMOS-compatible (programming)	
Serial Rate	Max. burst rate = CLK/32 Max. sustained rate = burst/2	
Connectors	2 x 20, 0.1" pitch ribbon-cable header	
Real-Time Clock	Yes	
Timers	Five 8-bit timers (four cascadable from the first) and one 10-bit timer with 2 match registers	
Watchdog/Supervisor	Yes	
Power	9–36 VDC, 1.5 W max.	
Operating Temp	0–50°C	
Humidity	5–95%, non-condensing

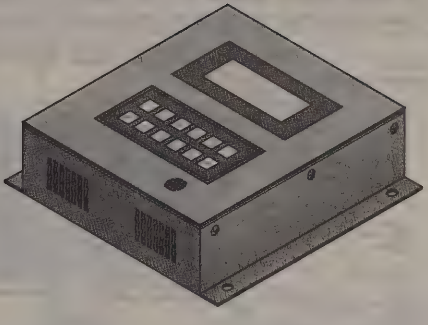
RABBIT Single Board Computers

OP6700 INTELLICOM

The Intellicom is a C-programmable, 12-key graphic display with Ethernet for network connectivity and a VFD option for applications requiring high visibility. To accommodate users' installation preferences, the versatile Intellicom can be either wall or panel mounted.



Specifications:

Feature	OP6700	OP6600
Microprocessor	Rabbit 2000 at 18.432 MHz	
Ethernet Port	10Base-T, RJ-45	None
Flash	512K (2 x 256)	256K
SRAM	128K	
Backup Battery	Socketed board with 3 V lithium coin-type, 1,000 mA·h, supports RTC and SRAM	
Keypad/Display	2 x 6 domed tactile keypad with customizable legend, supertwist 4 x 20 LCD with backlighting	
Digital Inputs	4 protected to ±36 VDC	
Digital Outputs	4 sink 200 mA, 40 VDC max.	
Speaker Outputs	Software-adjustable frequency and volume	
Serial Ports	3 total: one 5 V CMOS-compatible (programming) and either two 3-wire RS-232, one 3-wire RS-232 and one RS-485, or one 5-wire RS-232	
Serial Rate	Max. burst rate = CLK/32 Max. sustained rate = burst/2	
Connectors	Screw terminals	
Real-Time Clock	Yes	
Timers	Five 8-bit timers (four cascadable from the first) and one 10-bit timer with 2 match registers	
Watchdog/Supervisor	Yes	
Power	9–40 VDC, 2.4 W (backlighting on)	
Operating Temp	0–50°C	
Humidity	5–95%, non-condensing	
Board Size	4.7" x 4.3" x 0.8" (119 x 109 x 20 mm)	
Enclosure	6.7" x 5.7" x 2.0" (170 x 145 x 51 mm)

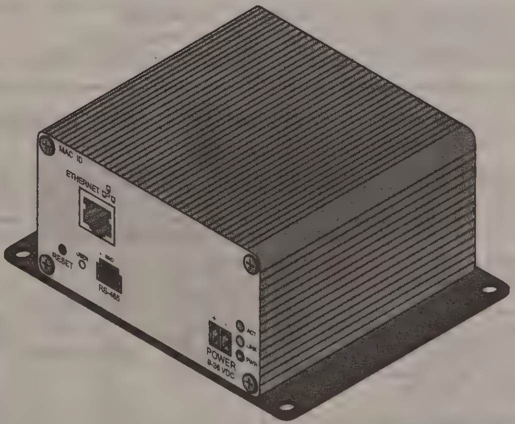
EM1500 SERIAL-ETHERNET BRIDGE

The EM1500 Serial-Ethernet Bridge is a device that converts multi-point serial communications to a TCP/IP network. The EM1500 connects to and network enables as many as 4 RS-232 serial devices simultaneously, while also acting as master on a multi-drop RS-485 network. In addition, the EM1500 provides an SPDT relay, 2 digital open collector outputs and 3 digital inputs suitable for interfacing to mechanical switches or logic level circuits.

Success in today's marketplace demands rapid, low-cost access to information. The EM1500 is designed to allow easy setup and monitoring via a "black box" approach. No programming is needed. The tight integration of hardware and software offers unparalleled reliability. Quick configuration over Ethernet, using a web browser or the stand-alone GUI configuration program, is easy and convenient.

The EM1500 interfaces with all types of serial devices: modems, sensors, card readers, bar scanners, printers, etc. Having 2 EM1500s allows the creation of a transparent serial bridge, thereby using some of the more advanced software features, such as packaging and protocol conversions.



Hardware Features:
- 10/100Base-T Ethernet
- 4 Serial Ports
- Guaranteed throughput 600 Kpbs (subject to network throughput)
- Serial ports 3 & 4 are either independent RS-232 ports up to 120 Kbps or TTL
- RS-485 up to 230.4 Kbps
- Easily interface legacy serial devices to Ethernet
- Extend the communication distance between 2 serial devices
- Metal enclosure for industrial applications

Software Features:
- Web browser interface for remote configuration
- GUI for easy configuration and monitoring
- Secure remote configuration
- AT command set emulation

Specifications:

Feature	EM1500
Microprocessor	Rabbit 3000 at 44.2 MHz
Ethernet	10/100Base-T, RJ-45
Flash	512K/256K data
SRAM	512K program execution
Backup Battery	3 V lithium coin type, 950 mAh
Relay	SPDT, 1 A @ 30 VDC, 0.3 A @ 120 VAC
Digital Inputs	3 protected to ± 36 V
Digital Outputs	2 sinking up to 750 mA, > -0.5V; < (Vin + 0.5V).
Serial Ports	1 DTE RS-232, 1 DCE RS-232, 1 RS-485 half duplex, 1 or 2 configurable serial port(s): Two 3-wire, One 5-wire, or one 9-wire (TTL only)
Serial Rate	75-230.4 Kpbs, 7/8 data bits, N/O/E/M/S parity, 1 stop, min thru-put: 600 Kbps
Serial buffer	1020 bytes
Configuration GUI	Supports WIN32, x86 Linux
Flow Control (RS-232)	None, XON/XOFF, RTS/CTS, DTR/DSR, DCD set independently for each directions (Tx, Rx)
Protocols	TCP/IP, telnet, RFC2217, DHCP, ARP, ICMP, DNS
LEDs	4: PWR (red), ACT (yellow), LINK (green), USER (red and green)
Power	9-36 VDC @ 1.5 W max
Operating Temp	–40°C to +70°C
Humidity	5–95%, noncondensing
Connectors	2 DB9 (1 male, 1 female), 1: 1x9 IDC, 0.1" pitch header, 1: 1x3 IDC, 0.1" pitch header 1: 2x5 IDC, 0.1" pitch header, RJ – 45, 1: 2 Position screw terminal
Enclosure Size	3.56" x 4.18 " x 1.72" (90 x 106 x 44 mm)

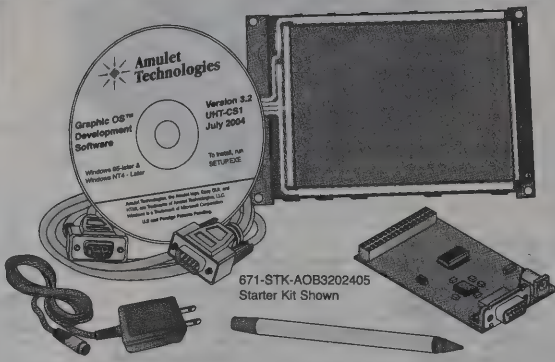
AMULET TECHNOLOGIES Graphical Display Solutions

Products may be RoHS compliant.
Check mouser.com for RoHS status.

Amulet Technologies offers graphical display solutions that include controller boards and LCD modules. All feature the patent-pending Amulet Graphic Operating System (OS) chip (also sold stand-alone). All offer easy hardware integration path from prototype to production. The chip includes a dedicated GUI microprocessor, LCD controller, and graphical library. The GUI is visually created with HTML based development tools for rapidly creating good looking and feature-rich graphical user interfaces (GUI's). Amulet's expertise is graphical LCD integration and control.

GRAPHICAL OS LCD STARTER KIT - The fastest path for integrating a graphical user interface (GUI) into embedded products.



671-STK-AOB3202405
Starter Kit Shown

STK-AOB3202405 Kit Contains:

- 5.7" 1/4 VGA Monochrome Display
- White LED Backlight
- Fully Integrated Analog Touch Panel
- Amulet's Graphical OS Chip fully integrated on the back of the display
- Graphical OS Development Software
- 5VDC Power Supply
- Serial Cable
- Stylus Pen
- Programmable Interface Board

STK-GT380 Kit Contains:

- MKGT380B Display
- 3.8" 1/4 VGA STN Blue Monochrome Display
- Bright-white LED Backlight
- Fully Integrated Analog Touch Panel
- AC Adapter Power Supply
- LCD Controller Board with Graphical OS Controller Chip
- Graphical OS Development Software & Compiler
- Serial Cable
- Stylus Pen

RoHS Compliant

Use these starter kits to evaluate the GRAPHICAL OS hardware and software, and to create the user-interface for your end product. Then use the module kits, controller boards, and Graphical OS controller chip to go from prototype-to-production (below).

MOUSER STOCK NO.	Description	Price Each
671-STK-GT380	Starter Kit with MK-GT380B display and AC power adapter	327.00
671-STK-AOB3202405	Starter Kit with MK-AOB3202405X module and 5VDC power supply	396.00

GRAPHICAL OS LCD MODULE KIT - The most complete LCD solution for production.

Kit Contains:

- 1/4 VGA Monochrome Backlit Display
- Fully Integrated Analog Touch Panel
- LCD Controller Board with Graphical OS Controller Chip

∗ NOTE: If purchasing an above unit for evaluation, you will also need to purchase a Program Interface Board **(PIB-1)**. These modules require a 5V power supply **(SAD105-SF5C)** if you do not already have a 5V power supply.

RoHS Compliant

GRAPHICAL OS CONTROLLER CHIP

Combination LCD Controller and user-interface engine makes it easy to integrate LCD's into embedded products that use 8/16/32-bit micros and DSP's. Replaces traditional LCD controller chip. Eliminates need for complex code to draw each pixel on LCD. Chip renders graphical user interface (GUI) pages containing graphic images, widgets, and other UI objects directly to LCD. Works with single-scan, monochrome displays, up to full VGA. Rapidly create GUI using HTML-based development platform. Development software can be purchased separately (below) or comes bundled with Graphical OS Starter Kits (above).

† Starting September 1st, 2006, Amulet Technologies will begin shipping an updated version of its AGB64LV01 Graphical OS Chip and phasing out the previous version. The main enhancement of the updated version is an increase in programming speed while in Program Mode. Due to a new manufacturing process, the new updated version of the AGB64LV01 may potentially require one or more circuit board changes from earlier designs. If necessary, all current and future board designs should incorporate the circuit modifications immediately.

RoHS Compliant

GRAPHICAL OS DEVELOPMENT SOFTWARE

Amulet Technologies

For use with Graphical OS Controller Chip, LCD Controller Boards, or LCD Modules. Includes Amulet Operating System, HTML-Compiler with built-in flash programmer, Windows Font Converter, Protocol Simulator, and all user help documentation, plus an evaluation version of a web page authoring tool. Enables you to quickly and easily create feature-rich graphical user interfaces (GUI's) for embedded systems, using web page editing tools. Compiler then compresses HTML, GIF, and JPEG files and converts them to Amulet µHTML pages. Includes widgets for creating UI objects such as bargraphs, lineplots, check boxes, function buttons, radio buttons, text strings, numeric fields, etc.

EPSON ELECTRONICS AMERICA Graphic Controllers

EPSON®

The EPSON LCD Controller family of products offers operating system independent display solutions for embedded markets, such as Mobile Communications, Hand-Held PCs, Office Automation, and other embedded devices. EPSON LCD controllers feature high-performance and low power consumption and include support for the most popular RISC processors. EPSON LCD Controllers support a wide range of LCD panels, including those from small to large scale and those from monochrome to color.

Support for the most popular RISC processors, in addition to all LCD panel types, provides the OEM with complete flexibility. EPSON innovative features such as EPSON Independent Simultaneous Display, SwivelView™, 2D Acceleration, "Picture-In-Picture Plus", integrated USB Client, Digital Camera Interface, and Power Saving technology combine to provide an ideal display solution for a wide variety of applications.

FUJITSU LCD Touch Panels and Accessories

FUJITSU

**Products may be RoHS compliant.
Check mouser.com for RoHS status.**

FUJITSU TOUCH PANELS

Features:
- Superior long life using a unique construction method offering improved life over typical technologies; by sensing data input only on the glass layer typically a 10x improvement in product life is achieved.
- Excellent specification and high quality
- Anti-Newton ring technology
- High reliability materials
- 1.1mm glass with AG topcoat

RoHS Compliant

Features:
- Small footprint PCB
- Supports all major OS types with Fujitsu Driver software
- A complete solution for quick prototype to production use or as a design tool to speed up application and compatibility testing

Main Applications:
- For use with any of the Fujitsu Resistive Touch Panels
- Point of Sale devices
- Access terminals
- Monitoring Systems and Data input terminals

RoHS Compliant

HANTRONIX LCD Display Modules

Products may be RoHS compliant.
Check mouser.com for RoHS status.

HANTRONIX GRAPHIC DISPLAY MODULES

The Hantronix Advantage is the ability to add value and provide a competitive-edge for their customers in the global market. As a partner-supplier, they are committed to delivering additional value to your business. All Hantronix production facilities are ISO9001 certified and utilize the most modern production equipment to produce the highest quality displays. Hantronix offers one of the largest selection of standard LCD's in the industry. Power Supply Voltage (VDD) is +5.0V.

Our TFT displays deliver amazingly high contrast ratio, crisp color-saturation, exceptional viewing angles, and super bright WLED backlight performance. Additionally, most of our displays are available with integrated touch panel options. Some ideal applications for our TFT displays include instrumentation, industrial controls, handhelds, medical, control/home automation, and POS/retail applications.

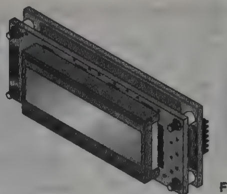
MATRIX ORBITAL Serial/12C LCD, VFD and PLED Displays

RoHS Compliant **This page of product is compliant.**

MATRIX ORBITAL ALPHANUMERIC DISPLAYS

Control of the modules has been simplified to a set of commands delivered to the modules via RS232 and I2C communications protocols. PLED's bring hew and exciting diode technology, which are self-luminous displays that do not require backlighting. This means that the display uses much less power than a traditional LCD or VFD and has the added benefit of a 160 degree viewing angle! PLEDs are very thin, lightweight and compact which can be used in a myriad of applications. VFDs are the brightest of all displays and performance is not affected by temperature. All of these displays can be software controlled.



For quantities of 50 and up, call for quote.

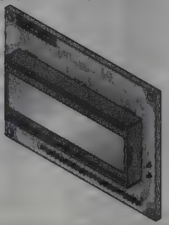
MATRIX ORBITAL SERIAL/12C GRAPHIC DISPLAYS

These modules are one of the more recent and excellent additions to the Matrix Orbital line of products. Control of the modules has been simplified to a set of commands delivered to the modules via RS232 and I2C communications protocols. Innovative and labor saving, these modules allow you to download high quality fonts in any size, style or language. Create graphics using primitives such as bitmaps, pixels, lines, rectangles and bar graphs in a flash!



For quantities of 50 and up, call for quote.

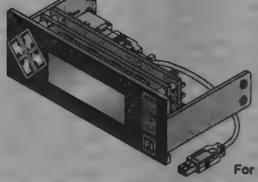
MATRIX ORBITAL USB ALPHANUMERIC DISPLAYS W/PC BAY INSERTS

With the MX2 series you can now monitor CPU statistics, Hard drive space, and other system critical information. The MX2 also allows you to plug 3 fans and 4 temperature probes directly into the back of the unit for all you quiet and cooling PC needs. Includes everything you will need to get going.

Features:

- Controls fans and LEDs
- Monitor CPU temperatures
- Provide WinAmp support: keypad controls, song information
- Additional features listed in Users Manual



For quantities of 25 and up, call for quote.

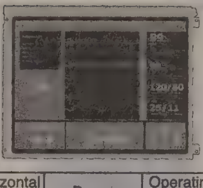
OPTREX LCD Modules

RoHS Compliant **This page of product is compliant.**

For more Optrex Graphic Modules and Optrex Character Modules, please see our full Optrex offering at www.mouser.com/optrex.

TFT LCD MODULES



Optrex America's TFT (thin film transistor) flat panel displays are rugged, high performance modules designed for the most demanding non-PC applications. They deliver best-in-class, front-of-screen performance with wide viewing angles, powerful backlights and exceptionally high contrast, color saturation and luminance for a range of non-PC applications. These modules are exceptionally rugged – and can operate reliably over wide temperature ranges.

Optrex America's TFT modules are ideally suited for the requirements of the industrial, medical, multimedia and instrumentation markets. Applications include diagnostic equipment, industrial control equipment, POS displays, kiosks, ATMs, and amusement/entertainment systems.

LCD TOOLKITS™

Optrex, the LCD Total Solution Provider, has introduced its new LCD ToolKIT™, which provides a convenient kit solution that speeds design and saves engineering and procurement time for developers of products using flat panel displays. Optrex's LCD ToolKIT™ contains everything you need to operate the included TFT display right out of the box. Supports VGA, composite video, and S-video interfaces. Included in the LCD ToolKIT are: LCD panel; TFT controller board with on-screen display board; backlight inverter board; inverter power cable; 12V DC power supply; power supply AC line cord; VGA (analog RGB) cable; 3-ft. video input cable; and a Quick Set-up and document CD-ROM. IT'S ALL IN THE BOX!

OPTREX
ToolKIT

Kits support VGA (Analog RGB), composite video, and S-video interfaces

Kit Includes:
- TFT Panel
- TFT Controller Board with On-Screen Display (OSD) Board
- Backlight Inverter Board
- Inverter Power Cable
- Power Supply AC Line Cord
- VGA (Analog RGB) Cable
- 3 ft. Video Input Cable (S-Video/Composite)
- LCD-to-controller-board interface cable
- CD-ROM with Quick Set-Up Guide and controller manual

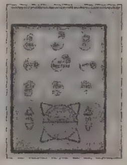
GRAPHIC MODULES

Optrex color and monochrome STN (super twisted nematic) graphic modules offer a wide range of sizes and display formats to satisfy virtually any application. Extensive array of color/background combinations, with high brightness, high contrast, low power consumption, and LED or CCFL backlights. New Highly Reflective models feature crisp, clear black graphics on a silvery, "winter white" backgrounds, providing exceptional clarity, sharpness and readability in all types of ambient lighting conditions. Serial or parallel interface options and economical Chip-on-Glass (COG) construction available.



* At backlight surface
** Includes touch panel

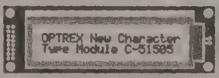
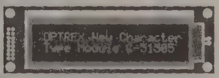
CHARACTER LCD MODULES





Optrex offers the broadest range of monochrome character LCD modules in a wide range of dot pixel formats and color/background combinations in industry standard configurations. High contrast, wide operating temperature range, low operating current, and more luminance per watt. Positive (transflective) types and negative (transmissive) types utilizing Optrex's High Performance Color technology are available.

New Highly Reflective models feature crisp, clear black characters on a silvery, "Winter White" background, providing exceptional clarity, sharpness and readability in all types of ambient lighting conditions. If you need a monochrome character LCD for your information display, Optrex has the right one for your application.

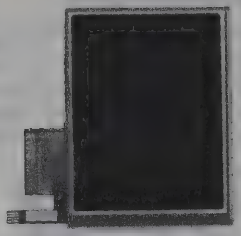
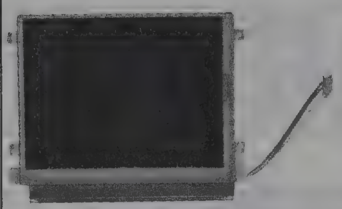
SHARP LCD Products

SHARP.
MICROELECTRONICS
OF THE AMERICAS

A



B



C

D

Sharp LCD displays meet the demand for rugged and versatile color displays with greater performance in areas such as light output, viewability in a wide range of ambient light, and wider operating temperatures, as well as greater options in display orientation. They're capable of being used not only in harsher environments, but also in a wider range of industrial settings.

VISHAY / DALE LCD and Plasma Displays

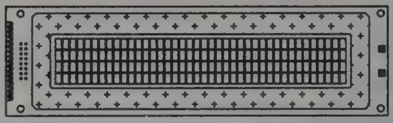
VISHAY / DALE LCD CHARACTER DISPLAYS

Vishay LCD components offer distinct, cost effective solutions for common display interfaces.

If your next design requires a monochrome character display module, look to Vishay brand products for a quality LC module.

Features:

- RoHS compliant
- Offering a wide range of Liquid Crystal modules from 8 x 2 to 40 x 4 format
- High contrast
- Wide temperature operation (-20 to +70° C)
- +5 volt operation with low current parameters
- Standard product offers Transflective polarizer, with 6:00 viewing.



RoHS Compliant

For quantities of 50 and up, call for quote.

PLASMA DISPLAY MODULES

Vishay Dale's patented "open" construction method provides superior viewing angles that are unsurpassed by any display technology. Vishay Dale displays are designed to exploit the inherent high brightness capability of DC Plasma displays to make them excellent choices for practically any application. The nature of the plasma glow make the display characters or graphics appear much larger than they actually are. State-of-the-art design using the latest SMT components and DC/DC converters result in modules that provide minimum front panel space and depth.

Features:

- TTL level video interface
- On board converter
- Viewing angle of 150° minimum
- Ideal for low to medium level information content messages: arcade games POS terminals, medical equipment, and ATM machines

For quantities 100 and up, call for quote.

VIDEO CONTROLLERS

The plasma graphic display controllers can drive a variety of popular plasma displays having a common 14 pin video interface. The controller can clock displays with 128 x 32, 128 x 64, 192 x 64, 256 x 64, and 320 x 64 pixel formats. Three fonts are available: 4 x 5, 5 x 7, and 10 x 14. Custom non-standard characters and images may be loaded.

For quantities 100 and up, call for quote.

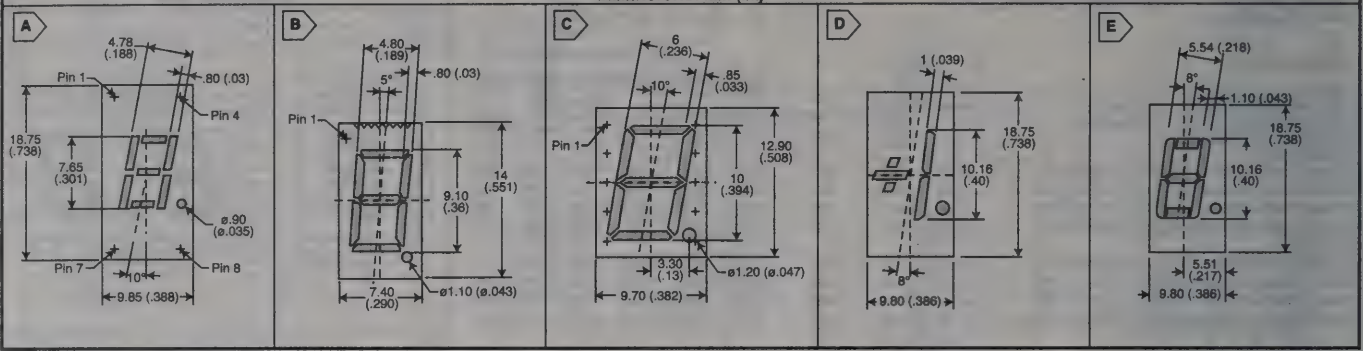
LITE-ON LED Displays

LITEON®

RoHS Compliant **This page of product is compliant.**

DIMENSIONS: mm (in.)



Providing high contrast, high brightness and wide viewing angle, Lite-On LED displays are available in a wide range of sizes, brightness and orientations. Displays can be stacked vertically or horizontally and are designed for numeric indication on applications requiring low current or low power consumption.

.30" SINGLE DIGIT DISPLAYS

CATALYST SEMICONDUCTOR, INC. WHITE LED DRIVERS

The CAT3200 series LED Drivers are switched capacitor boost converters that deliver a low noise, regulated output voltage. The CAT3200 has an adjustable output using external resistors. The constant frequency 2MHz charge pump allows small 1µF ceramic capacitors to be used.

- Constant high frequency (2MHz) operation
- 100mA output current
- Regulated, adjustable output voltage
- Low quiescent current (1.7mA typ.)
- Input voltage operation down to 2.7V
- Soft start, slew rate control
- Thermal overload shutdown protection
- Low value external capacitors (1µF)
- Foldback current overload protection
- Shutdown current less than 1µA

For quantities of 500 and up, call for quote.

Supertex EL BACKLIGHTING DRIVER INTEGRATED CIRCUITS AND DEMO BOARDS

Applications:

- Pagers - HV823, HV826, HV830, HV850
- Portable Instrumentation - HV809, HV823, HV830, HV835, HV843, HV845, HV850, HV857L
- Global Positioning Systems (GPS) units - HV823, HV830, HV833, HV857, HV860
- LCD backlighting - HV833, HV835, HV843, HV845, HV857, HV857L
- Mobile cellular phones - HV823, HV826, HV830, HV835, HV843, HV845, HV850, HV857, HV857L, HV860
- PDAs - HV809, HV823, HV830, HV833, HV857, HV860
- Wireless handheld - HV835, HV843, HV845, HV857, HV857L, HV860
- Portable Transceivers - HV826, HV833, HV850
- Remote Control Units - HV826, HV833
- Calculators - HV826, HV833
- Electronic personal organizers - HV809, HV830
- Display Signs - HV809
- Dual segment lamps - HV835, HV843, HV845
- MP3 players - HV850
- Watches - HV850

HV809 Features:
Input voltage up to 200V DC, 400V peak-to-peak output voltage, output load up to 350nF (100 in2 for 3.5nF/in2 lamp), adjustable output lamp frequency, adjustable On/Off pulsing frequency

HV823 Features:
180V peak-to-peak output voltage, large output load capability, adjustable output lamp frequency adjustable converter frequency, enable/disable function low current draw under no load condition.

HV826 Features:
1.8V to 3.5V operating supply voltage, adjustable output frequency, adjustable switch frequency, output voltage regulation, enable/disable function

HV830 Features:
2.0V to 9.5V operating supply voltage, 200V peak-to-peak typical output voltage, large output load capability, permits the use of high-resistance elastomeric lamp connectors, adjustable output lamp frequency, adjustable converter converter frequency, enable/disable function, low current draw under no load condiction, very low standby current

HV833 Features:
1.8V to 6.5V operating supply voltage, serparately adjustable lamp and converter frequency, <100nA shutdown current, output voltage regulation, enable/disable function, output timing for high efficiency

HV835 Features:
Low audible noise, indepenent input control for lamp selection, 160V peak-to-peak output voltage, split supply capability, output timing, low shutdown current, wide input voltage range, output voltage regulation, no SCR output

HV843/HV845 Features:
Low audible noise, indepenent input control for lamp selection, 180V peak-to-peak output voltage, split supply capability, output timing, low shutdown current, wide input voltage range, output voltage regulation, no SCR output

HV850 Features:
Designed to drive EL lamps of up to 2.0in2, with capacitive values up to 4.5nF, no external components needed when using an external EL clock frequency, low noise and enable function

HV857/HV857L Features:
Audible noise reduction, lamp aging compensation, wide input voltage range, 190V peak-to-peak output voltage, single cell lithium ion compatible, 150nA shutdown current, separately adjustable lamp and converter frequencies, output voltage regulation, split supply regulation

HV860 Features:
Adjustable out regulation for dimming, 220V peak-to-peak output voltage, single cell lithium ion compatible, 150nA shutdown current, seperately adjustable lamp for converter frequencies, split supply capability

ZETEX LED/LCD DRIVER SOLUTIONS/LIGHTING ICS

The inherent flexibility of the ZXSC circuit means that parallel or series LEDs can be driven depending on application needs. A simple modification to the application circuit means that the maximum pulse current can be programmed to match the characteristics of the chosen LED load, and pulse current in the range 10mA to 3A and beyond can be easily achieved.

LED Driver IC Demo Boards

MOUSER STOCK NO.		Description	Price Each
Mfr.	Mfr. Part No.		
689	HV9903DB1	Contains all the necessary circuitry to demonstrate the features of the HV9903 white LED driver	50.00
689	HV9910DB1	Off-line, high brightness LED driver demo board. It contains all the necessary circuitry to test the performance of the HV9910 as a constant currentdriver to drive a string or multiple strings of LEDs	150.00
689	HV9910DB2	Universal off-line high brightness LED driver demo board. The board can be used to test the performance of HV9910 as a constant driver to power a string or multiple strings of LEDs	150.00
689	HV9910DB3	Low voltage, high brightness LED driver demo board. The board can be used to test the performance of the HV9910 as a constant driver to power LEDs	110.00
689	HV9911DB1	High brightness boost LED driver demo board. The demo board is capable of driving up to 20 one-watt LEDs in series from an input of 21-27VDC. The demo board uses the HV9911 in a boost topology.	150.00
689	HV9921DB1	Universal off-line LED driver demo board. The demo board is a complete LED power driver to supply a string of LEDs using the HV9921, an integrated 3-pin high input voltage constant-current buck regulator IC	90.00
689	HV9922DB1	Universal off-line LED driver demo board. The demo board is a complete LED power driver to supply a string of LEDs using the HV9922, an integrated 3-pin high input voltage constant-current buck regulator IC	90.00
689	HV9923DB1	A complete LED power driver demo board that can supply a string of LEDs using the HV9923 driver IC. It integrates a 500V switching MOSFET and can operate directly from the rectified universal AC line voltage range of 80 to 264VAC	90.00
689	HV9930DB1	High brightness LED driver demo board. The board uses an LED driver that is capable of driving up to 7 1-watt LEDs in series from an automotive input of 9 to 25 VDC. The demo board uses Supertex's HV9930 in a boost-buck topology.	110.00
689	HV9930DB2	High brightness boost-buck LED driver demo board. The demo board uses an LED driver that is capable of driving 4 3-watt LEDs in series from an input of 9 to 25 VDC. The demo board uses Supertex's HV9930 in a boost-buck topology.	110.00
689	HV9931DB1	A universal input non-isolated constant current source for powering a strings of high-bright LEDs. It operates from the universal 90-260VAC range and accepts an external PWM dimming signal for controlling the duty ratio of the output current.	150.00

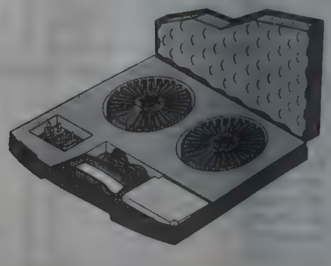
LAMINA DEVELOPER KITS

Lamina's "Discovery" kits contain ALL necessary components to allow the customers to "plug and play." It contains light engines, solder, wire, heatsinks, power supplies, screws, and thermal interface tapes to make it simple for you to learn and interact with Lamina Atlas/Titan light sources.

Kit Contains:
- Light Source Assembly
- Adapter plugs (DK-04F00396, DK-04D0-0395)
- AC Adapter (DK-04F0-0396)
- Spare DC Cable (DK-04D0-0394 and 0395)
- Driver
- Optics
- AC Cord

lamina
Bright Lights. Bright Ideas.



MOUSER STOCK NO.	Lamina Part No.	Light Source Series	Description	Price Each
599-DK-04D0-0394	DK-04D0-0394	Atlas	White 5500K Developer Kit, 120VAC	160.00
599-DK-04D0-0395	DK-04D0-0395	Atlas	White 5500K Developer Kit, 230VAC	140.00
599-DK-04F0-0396	DK-04F0-0396	Atlas	RGB Developer Kit	280.00
599-DK-05D0-0399	DK-05D0-0399	Titan	White LED Developer Kit	280.00
599-DK-05F0-0398	DK-05F0-0398	Titan	RGB Developer Kit	347.00

SEOUL SEMICONDUCTOR Z-Power LEDs

RoHS Compliant **This page of product is compliant.**

Seoul Semiconductor, as a world class semiconductor lighting company, has been working on high brightness LEDs since 1987. You can find their LEDs all over the world in illumination, signs, displays, traffic signals, automotive components, mobile phones, etc.

Z-Power LEDs from Seoul Semiconductor have a low thermal resistance. They are environmentally friendly, and have a low energy consumption with a high output.

Compatible Heat Sinks can be found in our Thermal Management Section of this Catalog

For quantities of 200 and up, call for quote.

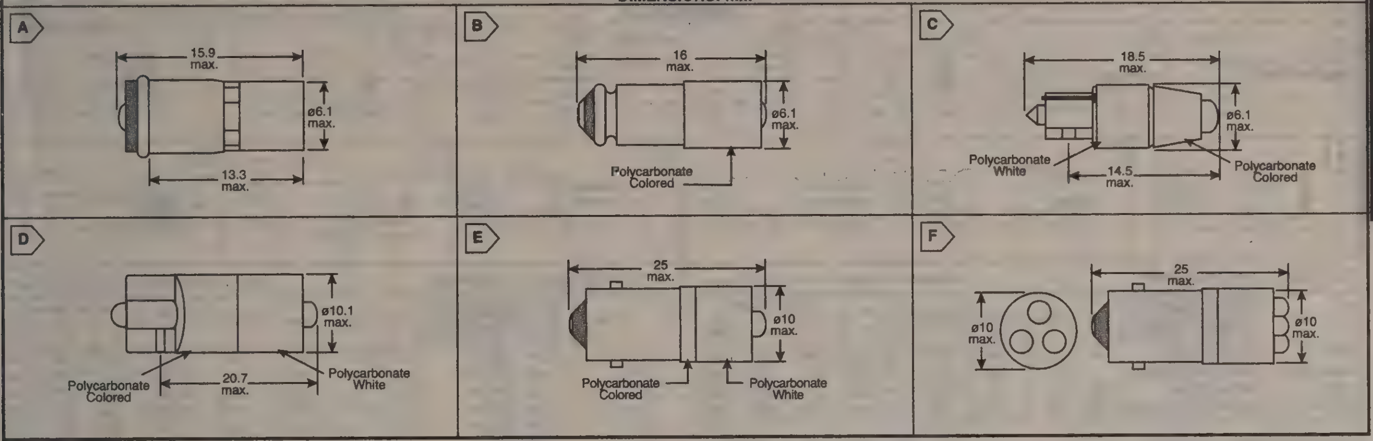
CHICAGO MINIATURE Incandescent Replacements

RoHS Compliant **This page of product is compliant.**

DIMENSIONS: mm



Features:
- Extremely High Brightness with Low Current Draw
- Low Heat Generation
- Shock and Vibration Proof
- Five Standard Colors

Specification:
- Long Life: 100K Hours vs. 10K Hours
- Storage Temperature: -25°C to +80°C
- Ambient Temperature: -20°C to +60°C

For quantities of 1000 or more, call for quote.

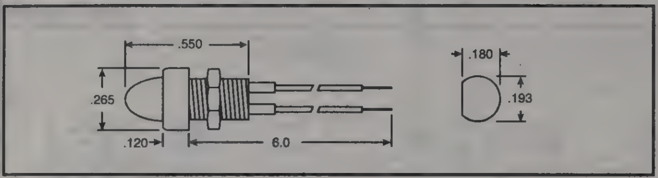
DIMENSIONS: In.



Specifications:

- Mounting hole: 6063 Series - .375" / 6073 Series - .500"
- Mounting centers: 6063 Series - .500" / 6073 Series - .688"
- Panel thickness: 6063 Series - 1.25" / 6073 Series - .078"
- Bezel (6073 only): chrome plated brass
- Wire leads: 22AWG stranded black 105°C PVC
- Electrical: 125VAC, built-in 30KΩ 1/4W resistor
- UL Recognized, CSA Certified

For quantities of 500 or more, call for quote.

MOUSER STOCK NO.	Fig.	Color	Description	Price Each

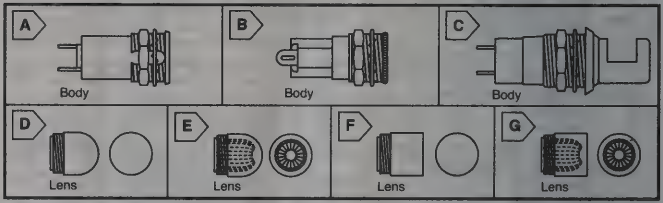
606-6073-001-634W	D	White	Conical face with chrome bezel	3.80	3.29	3.16

T-2 AND T-3 1/4 MINIATURE RELAMPABLE INDICATORS

(For use with Bayonet Incandescent and Neon Lamps)



Specifications:

- Mounting hole: .688"
- Mounting centers: .969" min.
- Panel thickness: .406" max.
- lock washer: chromate treated steel
- Housing material: 5100 Series - glass filled polyester
  5200 Series - phenolic
  900-200 Series - black anodized aluminum
- Hex nut: zinc plated steel
- Lens (5100 and 5200 Series): high temperature lexan

Body

LED LAMPS (CONT.)

Square .2" X .2" (5mm X 5mm) LEDs

• Forward current: 20mA

For quantities of 2000 and up, call for quote.

MOUSER STOCK NO.	Kingbright Part No.	Fig.	Color		Wave-length	Luminous Intensity		Forward Voltage	Viewing Angle	Price Each

✻ Kingbright's "Hyper Orange" is the same wavelength as Industry Standard Terminology "Hi-Efficiency Red"
✻✻ Luminous intensity with asterisk is measured at 50mA

LITE-ON Surface Mount LEDs

RoHS Compliant This page of product is compliant.

SURFACE MOUNT LEDS

Lite-On surface-mount lamps are extraordinarily popular with buyers and engineers. Lite-On's combination of a solid-state LED die with mechanical robustness of packaging has set a new standard for quality and durability. High reliability, high brightness and full-color range make Lite-On SMD LED highly suitable for signs, network systems, automotive applications, computers and a wide variety of other electronic equipment.

For quantities of 250 and up, call for quote.

For quantities of 250 and up, call for quote.

LITE-ON LED Arrays and Light Bars

RoHS Compliant **This page of product is compliant.**

LITEON®

LED ARRAYS

Features:

- Rectangular light bar
- Large, bright, uniform light emitting areas
- Low power requirement
- Excellent ON-OFF contrast
- Can be used with panel and legend mount
- Easy mounting on P.C. Board
- Categorized for light output

For quantities of 250 and up, call for quote.

LIGHT BARS

Features:

- Rectangular light bar
- Large, bright, uniform light emitting areas
- Low power requirement
- High brightness and high contrast
- Solid state reliability
- Easy mounting
- Categorized for luminous intensity

For quantities of 250 and up, call for quote.

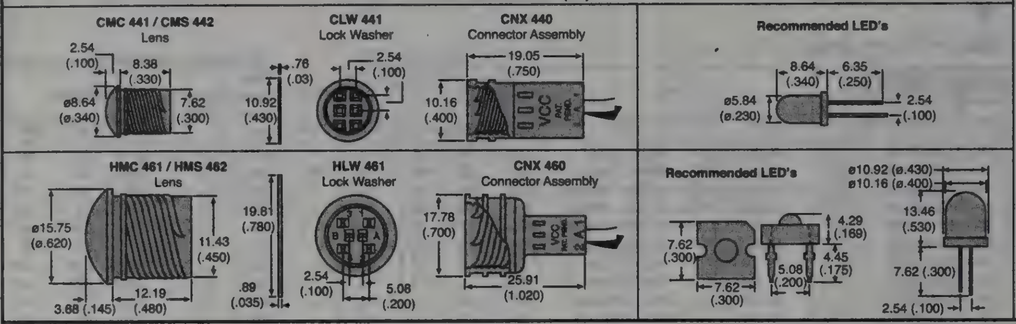
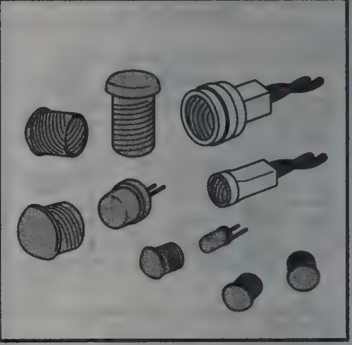
VCC LED Assemblies and Mounting Components

RoHS Compliant **This page of product is compliant.**

DIMENSIONS: mm (in.)





CABLE ASSEMBLIES FOR 5MM AND 10MM LED LIGHTS

Features:
- 180° viewing angle for LED that have 20 to 20K mcd.
- Lens threads into holder for easy assembly
- Sealed style exceeds NEMA 4 for dust, water, and ice.

Additional Options:
- Can be made with 3 or 4 wire configuration.
- 24 AWG stranded wire is standard, 22 AWG wire upon request.

Pre-wired Solderless LED Holders - Twist Fit

For quantities of 1000 and up, call for quote.

CABLE ASSEMBLIES FOR 5MM LED LIGHTS WITH BUILT-IN RESISTOR

NEW PRODUCT

Features:
- Made for CMC441 and CMC442 Lenses
- Lens threads into holder for easy assembly
- Sealed style exceeds NEMA 4 for dust, water, and ice.
- Internal Resistor to make LED to power source easy

Additional Options:
- Other resistance available
- Lead lengths from 4 to 24 inches
- 2 or 3 Position Headers available
- Custom Color wire available

For quantities greater than listed, call for quote.

VCC LED Assemblies and Mounting Components

RoHS Compliant **This page of product is compliant.**

PRE-WIRED SOLDERLESS LED INTERCONNECTIONS

Material Specifications:

- Panel connector socket and ring: thermoplastic
- Header connector: thermoplastic (UL Listed materials)
- Terminals: phosphor bronze, tin plated
- Wire: 24AWG, 7 strand copper, insulated
- For **Locking Header** use Mouser Stock No.: 538-22-23-2021
- For **Plain Header** use Mouser Stock No.: 538-22-03-2021

Electrical Specifications:

- Terminal: 3A continuous service
- Unique three-finger design mates to round, square, or rectangular leads .017" to .025"

Insert LED into connector, Install lens in panel opening. Press connector and lens together.

PRESS-FIT MOISTURE SEALED LITEPIPE® ASSEMBLY

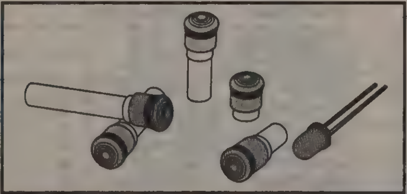
NEW FROM SUPPLIER

Features:

- Exceeds NEMA 4 rating
- 180° viewing angle for LEDs
- Panel Mount independent of circuit board

Installation:

593-RNG286 Must be used. Pass assembly through the panel opening and press retaining ring to secure unit to panel. Slide PCB into position aligning LED with end of the LITEPIPE® unit.



For quantities of 1000 and up, call for quote.

VCC LED Lenses and Mounting Components

RoHS Compliant This page of product is compliant.

CLIPLITE® ROUND LENS MOUNTS FOR T1 AND T1-3/4 LEDS

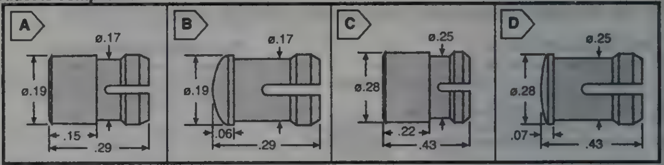
Features:

- Provides 180° viewing angles for LEDs
- Easy snap-mount method for front panel assembly
- ESD protection for LED and internal components to 16K volts
- Lens utilize striated lines and fresnel rings to increase apparent brightness up to 125%

Specifications:

- Lens material: Polycarbonate

DIMENSIONS: in.



T1 (3mm)

LITEPIPES

Material Specifications:

- Litepipe: acrylic (optical grade)

Mounting Specifications:

- **T1 (3mm)**: mates with lens SMB 200. Panel mounting hole .171 (4.3mm) on 1/4" centers. Panel thickness 1/32" to 1/8". Litepipe lengths from .200" to 1.200".
- **T1-3/4 (5mm)**: mate with lens CLB 300 and SQB 400. Panel mounting hole .250 (6.35mm) on 3/8" centers. Panel thickness 1/32" to 1/4". Lengths from .360" to 1.360". For panels less than 3/16" use SPC 125 spacer.

Standoff Specifications:

- Use VCC's standoff to adjust the height of a standard LED above the PCB and maintain a maximum .050" clearance between litepipe and LED.

DIMENSIONS: in.

VCC LED Light Pipes and Mounting Components

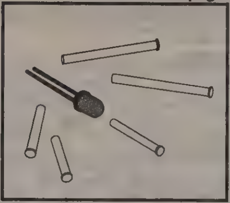
RoHS Compliant **This page of product is compliant.**

2.5MM "MICRO" LIEPIPE ASSEMBLIES

Material Specifications:
- Litepipe: Acrylic (optical grade)
- Grommet: Polyethylene (black)

Mounting Specifications:
- Panel hole: Round .102" Dia. (2.59mm)
- Panel thickness: 1/32" to 1/8"
- Use grommet retainer (RTN100)

Standoff Recommendation:
- Use standoff to adjust height of standard LED above PCB in order to maintain a maximum .050" clearance between LITEPIPE and LED.



For quantities of 1000 and up, call for quote.

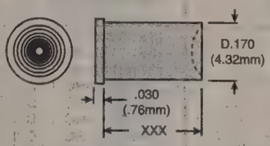
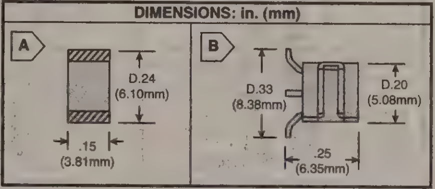
LIGHTPIPES FOR SURFACE MOUNT LEDS

Material Specifications:
- Litepipe: Acrylic (optical grade)
- Grommet: Polyethylene (black)
- Spring Clip: Spring steel, Nickel plated

Mounting Specifications:
- Panel hole: Round .171" Dia. (4.32mm)
- Panel thickness: .062" min. (1.57mm)
- Litepipes from .200" to .500" use grommet retainer
- Litepipes from .500" to 2.00" the spring clip is recommended for rigidity

Features:
- Surface mount, vertical and horizontal 3mm LEDs, litepipes for blending multicolor LEDs are available on special request.





DIMENSIONS: in. (mm)

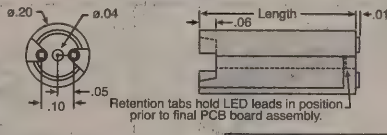
PCB STANDOFFS FOR BI AND TRI-LEAD COMPONENTS

Standoffs are designed for printed circuit board mounting of multi-lead devices ie. LEDs. They cope with various problems in mounting passive components. They include height control, lateral stability, lead retention, lead shorting, and solder flux removal. Device height control is simplified with mounts ranging in lengths from .12" to 1.0"

- Material: thermoplastic (black) UL 94V-0

DIMENSIONS: in.



Retention tabs hold LED leads in position prior to final PCB board assembly.

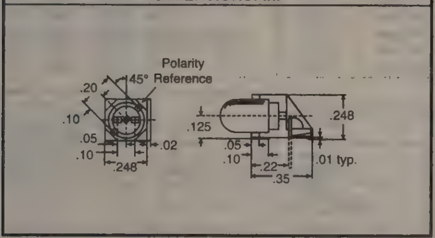
PCB MOUNTS FOR BI AND TRI-LEAD LEDS

Allows the right angle mounting of 5mm LEDs used as diagnostic and logic indicator lights of PC boards. Permits the right angle mounting of the bi-lead as well as both configurations of the tri-lead LED.

DIMENSIONS: in.



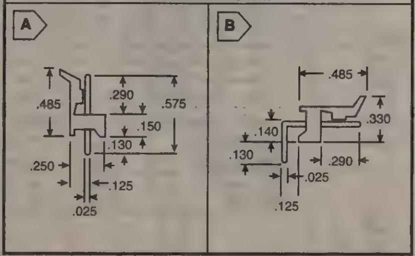
For quantities of 1000 and up, call for quote.

MOUSER STOCK NO.	Price Each		
	1	10	100
593-PCH175	.10	.085	.078

TWO POSITION PCB MOUNTS

Specifically made for VCC's header post that are used on cable assemblies. This allows a proper lock of the two parts to resist disconnecting under normal use.

DIMENSIONS: in.



For quantities of 1000 and up, call for quote.

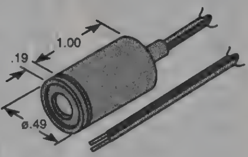
DLC Diode Laser Modules

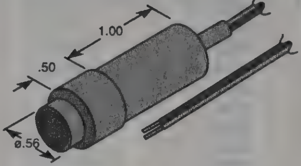
DIODE LASER CONCEPTS

DIMENSIONS: In.

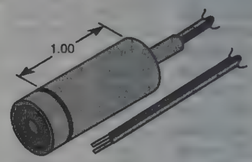
A



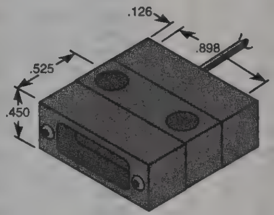
B



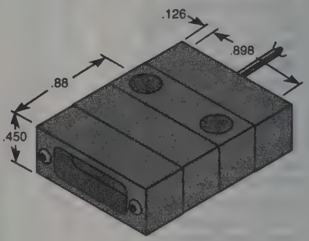
C



D



E



DLC STANDARD LASER MODULES

- Voltage Required: 5.0VDC (regulated)
- Wire Leads: 7in. long; (+) red, (-) black
- Line Width: 1mm (nominal)
- Emissions Indicator: Green LED
- Internal Electronics: Static, Surge and Reverse Polarity Protected
- Mechanical Axis Alignment to Optic Axis: 1/4 degree (1/2 angle)
- Anodized Aircraft Aluminum
- Warranty: Limited 2 year

CAUTION
LASER LIGHT - DO NOT STARE INTO BEAM
PEAK POWER <1mW
WAVELENGTHS 635, 650, 670nm
CLASS II LASER PRODUCT

DANGER
LASER LIGHT - AVOID DIRECT EYE EXPOSURE
PEAK POWERS 1.0 mW - 30mW
WAVELENGTHS 635 - 830nm
CLASS IIIa, IIIb LASER PRODUCT

LITE-ON LED Optocouplers

RoHS Compliant **This page of product is compliant.**

The Lite-On Optocoupler products feature high collector emitter and I/O isolation voltages. They are suitable for a wide-range of applications and are ideal as signal transmitters between circuits of different potentials and impedances. All Lite-On optocouplers have safety approval certificates from VDE, CSA, UL, TUV, BSI, FIMKO, NEMKO, DEMIKO and SEMIKO.

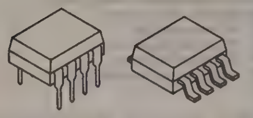
CEL Optocouplers

CEL California Eastern Laboratories

RoHS Compliant This page of product is compliant.

LEAD-FREE

RoHS Compliant



CEL SINGLE TRANSISTOR, GENERAL PURPOSE OPTOCOUPLERS

Applications:

Can be used as an interface circuit for various instrumentations and control equipment in the following:

- AC line/digital logic
- Twisted pair line receiver
- Digital logic/digital logic
- Telephone/telegraph line receiver

Features:

- High isolation voltage
- High current transfer ratio
- Low cost
- High speed switching

Safety Standards:

UL = UL Recognized (UL File No: E72422(S))
UL/BSI = UL Recognized & BSI Approved
UL File No.: E72422(S) / BSI Approved No.: 7112/7420

DC Optocouplers, Low Speed Logic Applications

CEL Optocouplers

CEL California Eastern Laboratories

RoHS Compliant **This page of product is compliant.**

Applications:
Can be used as an interface circuit for various instrumentations and control equipment in the following:
- AC line/digital logic
- Twisted pair line receiver
- Digital logic/digital logic
- Telephone/telegraph line receiver

Features:
- High isolation voltage
- High current transfer ratio
- Low cost
- High speed switching

Safety Standards:
UL = UL Recognized (UL File No: E72422(S))
UL/CSA = UL Recognized & CSA Approved
UL File No.: E72422(S) / CSA File No.: CA101391
UL/BSI = UL Recognized & BSI Approved
UL File No.: E72422(S) / BSI Approved No.: 7112/7420

LEAD-FREE
RoHS Compliant

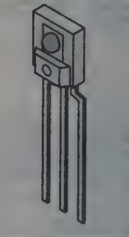
TAOS Opto Components

Products may be RoHS compliant.
Check mouser.com for RoHS status.

Light sensors from TAOS combine precision mixed-signal functionality with photo-detectors on the same integrated circuit to produce product with performance and cost advantages over conventional solutions. TAOS' intelligent opto sensors simplify analog-to-digital conversion of light and are designed to reduce the need for signal conditioning or preprocessing circuitry in light sensing systems. Our light sensing solutions improve system performance and reduce design cycle time giving designers the flexibility they require.



3-lead Sidelooker

LIGHT-TO-VOLTAGE CONVERTERS

Light-to-voltage converters simplify the design by integrating a photodiode and a transimpedance amplifier on a single monolithic IC. This family provides a linear output voltage that is proportional to the light intensity. The devices cover a wide range of speed and responsivity to span a variety of applications.

* RoHS Compliant

TMB-4

LIGHT-TO-FREQUENCY CONVERTERS

Light-to-frequency converters measure light intensity and convert it to a digital format providing a direct interface to a microcontroller or digital signal processor. This compact device performs the functions of light sensing, signal conditioning, and analog-to-digital conversion all in a single package. This family features low dark signal offset and a wide dynamic range of up to 160 dB. The output of these devices is a constant-amplitude waveform with frequency linearly proportional to light intensity.

* RoHS Compliant

For quantities of 100 and up, call for quote.

TMB-6

LIGHT-TO-DIGITAL CONVERTERS

Light- to-Digital Converters combine a broadband photodiode with a visible light blocking photodiode in a single CMOS integrated circuit. With integrated analog-to-digital conversion circuitry, data is output via a serial interface using two standard protocols: SMBus and I2C. One common application is to use the Light-to-Digital Converter in an ambient light sensing application. Light intensity in Lux can be calculated using the output from both photodiodes without the need of using an expensive optical filter.

RoHS Compliant

For quantities of 100 and up, call for quote.

MOUSER STOCK NO.	TAOS Part No.	Package	Selectable Integration	Dynamic Range (lux)	ADC Digital Output	Digital Output Format	Oper. Voltage	Price Each

DIP-8

LINEAR SENSOR ARRAYS

Linear Sensor Arrays provides the capability of measuring spatial relationships in addition to light intensity. These devices consist of a linear array of integrating light sensing elements (pixels) which measure incident light over some exposure time and generate an output that can be either a voltage or a digital word which represents the light exposure at each pixel.

RoHS Compliant

For quantities of 100 and up, call for quote.

MOUSER STOCK NO.	TAOS Part No.	Package	Resolution	# Pixels	Active Length (mm)	Outputs	Price Each

SOIC-8

COLOR SENSOR

The programmable color light-to-frequency converter combines configurable silicon photodiodes and a current-to-frequency converter on single monolithic CMOS integrated circuit. The output is a square wave with frequency directly proportional to light intensity. The full-scale output frequency can be scaled by one of three preset values via two control input pins.

RoHS Compliant

For quantities of 100 and up, call for quote.

MOUSER STOCK NO.	TAOS Part No.	Package	Voltage Range	Colors	Output	Oper. Free-Air Temp. Range (TA)	Price Each

TIL311

LED HEXADECIMAL DISPLAY

The TIL311 is a single-digit LED hexadecimal display with internal four-bit latch, decoder, and constant-current LED drivers in a 14-pin dual-in-line-package. Hexadecimal characters are formed by a 4 x 7 array of red light-emitting-diodes that are illuminated in a modified seven-segment configuration. The device includes right-hand and left-hand externally driven decimal points.

IrDA -ENCODER/DECODER

The TOIM4232 Endec IC provides proper pulse shaping for the SIR IrDA front end infrared transceivers as of the 4000-series. For transmitting the TOIM4232 shortens the RS232 output signal to IrDA compatible electrical pulses to drive the infrared transmitter. In the receive mode the TOIM4232 stretches the received infrared pulse to the proper bit width depending on the operating bit rate. The IrDA bit rate varies from 2.4 kbit/s to 115.2 kbit/s. The TOIM4232 is using a crystal clock 3.6864 MHz for its pulse stretching and shortening. The clock can be generated by the internal oscillator. An external oscillator can be used too. The TOIM4232 is programmable to operate from 1200 bit/s to 115.2 kbit/s by the communication software through the RS232 port. The output pulses are software programmable as either 1,627 us or 3/16 of bit time. The typical power consumption is very low with about 10 mW in operational state and in the order of a few microwatts in standby mode.

RoHS Compliant

For quantities of 2000 and up, call for quote.

ATMEL AVR Microcontrollers

RoHS Compliant **This page of product is compliant.**

AVR MICROCONTROLLERS

Atmel's AVR® microcontrollers have a RISC core running single cycle instructions and a well-defined I/O structure that limits the need for external components. Internal oscillators, timers, UART, SPI, pull-up resistors, pulse width modulation, ADC, analog comparator and watch-dog timers are some of the features you will find in AVR devices.

For quantities of 500 and up, call for quote.

ATMEL AVR Microcontrollers and Development Tools

RoHS Compliant **This page of product is compliant.**

AVR MICROCONTROLLERS (CONT.)

Atmel's AVR® microcontrollers have a RISC core running single cycle instructions and a well-defined I/O structure that limits the need for external components. Internal oscillators, timers, UART, SPI, pull-up resistors, pulse width modulation, ADC, analog comparator and watch-dog timers are some of the features you will find in AVR devices.

For quantities of 500 and up, call for quote.

AVR DEVELOPMENT TOOLS

MOUSER STOCK NO.	Atmel Part No.	Description	Price Each
556-ATSTK500	ATSTK500	Starter kit and development system for AVR Flash microcontrollers to develop prototypes and test new designs. The STK500 interfaces with AVR Studio ®, Atmel's Integrated Development Environment (IDE) for code writing and debugging.	83.79
556-ATSTK501	ATSTK501	Expansion module for the STK500 Starter Kit adding support for all current AVR® devices.	83.79
556-ATSTK502	ATSTK502	Expansion module for the STK500 Starter Kit adding support for the 64-pin LCD AVR family with on-chip LCD controller and the Mega AVR family.	105.07
556-ATSTK503	ATSTK503	Expansion module for the STK500 Starter Kit adding support for the 100-pin AVR microcontrollers.	125.02
556-ATSTK504	ATSTK504	Expansion module for the STK500 Starter Kit adding support for the 100-pin LCD AVR family and the Mega AVR family.	125.02
556-ATSTK505	ATSTK505	Expansion module to the STK500 development board adding support for the 14-pin and 20-pin AVR microcontrollers.	83.79
556-ATSTK525	ATSTK525	Starter Kit for the AT90USB microcontrollers, supporting JTAGICE mkII and AVRISP mkII via AVR Studio. Includes a number demonstration program with source and hex files. The parts can be directly programmed through the USB port with FLIP In-System Programming utility.	211.47
556-ATJTAGICE2	ATJTAGICE2	Development tool for on-chip debugging of all AVR 8-bit microcontrollers with IEEE 1149.1 compliant JTAG interface or debugWIRE Interface.	317.87
556-ATAVRMC100	ATAVRMC100	Motor control kit includes an evaluation board, a 3-phase BLDC motor and demonstration software.	211.47
556-ATAVRMC200	ATAVRMC200	Evaluation kit for asynchronous AC motor control, using various sensors for regulation. Includes an evaluation board and demonstration firmware. Supporting 110-230V motors, the kit also allows evaluation of BLDC motors using the AT90PWM3 AVR microcontroller.	317.87
556-ATAVRMC201	ATAVRMC201	Asynchronous AC Motor for ATAVRMC200.	105.07
556-ATAVRSB100	ATAVRSB100	Smart battery development kit which is an evaluation tool and development board for the ATmega406 single-chip smart battery device from Atmel, acommodating designs incorporating from 2 to 4 Lithium-ion cells.	317.87
556-ATAVRISP2	ATAVRISP2	AVR INSystem Programming Kit.	35.91
556-ATAVRFBKIT	ATAVRFBKIT	Dimmable Fluorescent Ballast kit which demonstrates the ability of the AT90PWM2 to control all the main functions of a DALI Fluorescent Ballast.	211.47
556-ATAVRBFLY	ATAVRBFLY	Evaluation tool shipped with preloaded firmware supporting temperature sensing, light measurement, voltage readings and music playback.	21.28
556-ATATAVRDRAGON	ATATAVRDRAGON	AVR Emulator and Progammer.	51.87
556-A90USBKEY	AT90USBKEY	Low-cost demonstration board for quick evaluation of AVR microcontrollers and the AT90USB family.	31.92
556-ATAVRRZ200	ATAVRRZ200	Demonstration kit that enables development, debugging and demonstration on 802.15.4/ZigBee networks. Contains: 5 Radio controller boards with antennas & batteries; 1 Display board with wall transformer; 1 ATAVRISP mkII programming dongle; Free Atmel IEEE 802.15.4 MAC software; PCB layout reference.	499.99
556-ATAVRRZ502	ATAVRRZ502	Accessory kit that enables point to point links development, debugging and demonstration. Contains: 2 Radio boards (require STK500 + STK501 top module); 2 ATmega1281V TQFP AVR Microcontrollers; Free Atmel IEEE 802.15.4 MAC software; PCB layout reference.	98.42

ATMEL Microcontrollers and Development Tools

32-BIT ARM-BASED MICROCONTROLLERS

RoHS Compliant **This page of product is compliant.**

Atmel's 32-bit Smart ARM®-based microcontrollers offer: Proven architecture based on ten years' experience in ARM-based standard products; predictable response to a real-time event within a specified number of clock cycles; embedded Flash memory for flexible code and reference data storage; code compatibility across all products; and low-cost development tools, all based on the industry-standard ARM 32-bit RISC processor architecture.

For quantities of 500 and up, call for quote.

8051 ARCHITECTURE MICROCONTROLLERS

Atmel offers a broad range of microcontrollers based on the 8051 architecture. The product line includes MCS-51® industry standard socket drop-in devices, In-System Programming capability, and small footprint 20-pin derivatives in ROMless, ROM, OTP & Flash flavors.

For quantities of 500 and up, call for quote.

PSOC® MIXED-SIGNAL ARRAYS

The PSoC® family consists of many Mixed-Signal Array with On-Chip Controller devices. These devices are designed to replace multiple traditional MCU-based system components with one, low cost single-chip programmable device. PSoC devices include configurable blocks of analog and digital logic, as well as programmable interconnects. This architecture allows the user to create customized peripheral configurations that match the requirements of each individual application. Additionally, a fast CPU, Flash program memory, SRAM data memory, and configurable IO are included in a range of convenient pinouts and packages.

PSoC CY8X27x43

The PSoC CY8X27x43 family can have up to 5 I/O ports that connect to the global digital and analog interconnects, providing access to 8 digital blocks and 12 analog blocks.

RoHS Compliant

For quantities of 100 and up, call for quote.

PSoC CY8C29x66

The PSoC CY8C29x66 family can have up to eight I/O ports that connect to the global digital and analog interconnects, providing access to 16 digital blocks and 12 analog blocks.

RoHS Compliant

For quantities of 100 and up, call for quote.

PSOC® MIXED-SIGNAL ARRAYS

The PSoC® family consists of many Mixed-Signal Array with On-Chip Controller devices. These devices are designed to replace multiple traditional MCU-based system components with one, low cost single-chip programmable device. PSoC devices include configurable blocks of analog and digital logic, as well as programmable interconnects. This architecture allows the user to create customized peripheral configurations that match the requirements of each individual application. Additionally, a fast CPU, Flash program memory, SRAM data memory, and configurable IO are included in a range of convenient pinouts and packages.

PSoC CY8C21x34

Each CY8C21x34 PSoC device includes four digital blocks and four analog blocks. Depending on the PSoC package, up to 28 general purpose I/O (GPIO) are also included. The GPIO provide access to the global digital and analog interconnects.

RoHS Compliant

For quantities of 100 and up, call for quote.

PSoC CY8C21x23

The PSoC architecture is comprised of four main areas: the Core, the System Resources, the Digital System, and the Analog System. Configurable global bus resources allow all the device resources to be combined into a complete custom system. Each PSoC device includes four digital blocks. Depending on the PSoC package, up to two analog comparators and up tp 16 general purpose I/O (GPIO) are also included. The GPIO provide access to the global and analog interconnects.

RoHS Compliant

For quantities of 100 and up, call for quote.

PSoC CY8C24x94

The PSoC CY8C24x94 devices are unique members of the PSoC family because it includes a full-featured, full-speed (12Mbps) USB port. Configurable analog, digital, and interconnect circuitry enable a high level of integration in a host of industrial, consumer, and communications applications.

POWERQUICC™ COMMUNICATIONS PROCESSORS

Freescale Semiconductor delivers intelligence to embedded networking and communications solutions with proven and evolving PowerQUICC™ integrated communications processors. PowerQUICC processors are a key element to Freescale Semiconductor's Smart Networks Platform. With more than 5000 design wins and greater than 80 percent market share in communications processors, PowerQUICC processors enable network equipment vendors to reach the market fast with next generation communications equipment.

Features:
- Available in CPU frequencies up to 400MHz
- Up to three SCC's available
- System Integration Unit (SIU)
- PCMCIA support
- Support for Fast Ethernet

RoHS Compliant

Applications:
- Low-end routers, including VPN routers
- SOHO and enterprise routers
- Home networking equipment
- Integrated Access Devices (IADs)
- General-purpose controller
- Factory automation
- Industrial control
- Embedded control

MPC852T: PowerQUICC™ Integrated Communications Processors

The MPC852T is an "ethernet-only" member of the MPC866 Family. Like the MPC866, the MPC852T is a 0.18 micron version of the PowerQUICC Family and can operate up to a maximum of 100 MHz on the MPC8xx Core with a maximum of 66 MHz external bus. The MPC852T Integrated Communications Controller is a versatile one-chip integrated microprocessor and peripheral combination that can be used in a variety of controller applications. The MPC852T is ideal for ethernet to ethernet applications such as line card.

For quantities 250 and up, call for quote.

MPC859DSL: PowerQUICC I™ Integrated Communications Processors

The MPC859DSL Integrated Communications Controller is a versatile, one-chip integrated microprocessor and peripheral combination that can be used in a variety of controller applications. It particularly excels in CPE applications, including DSL modems, IADs, and residential gateways. The memory controller supports many memory types, including SDRAM. The CPM (Communications Processing Module) is optimized for CPE applications supporting simultaneous operation of Fast Ethernet (MII) and parallel ATM (UTOPIA), UTOPIA II Multi-PHY (up to 4 addresses), and many more features.

For quantities 100 and up, call for quote.

MPC885 Family: PowerQUICC™ I Integrated Communications Processor Family

The MPC885 Family includes the MPC870, MPC875, MPC880, and MPC885 processors. These highly integrated PowerQUICC devices are designed to deliver a versatile, single-chip communications processor and peripheral solution that can be used in a variety of controller applications, excelling particularly in communications and networking products. The MPC885 family of processors are engineered to deliver on-chip security, dual Fast Ethernet (MII and RMII) ports, USB, and bus speeds scaling to 80 MHz for higher system throughput.

For quantities 100 and up, call for quote.

MPC8272 Family: PowerQUICC II™ Integrated Communications Processor Family

This PowerQUICC II™ processor family contains a PowerPC® core addressing the cost-sensitive needs of a wide variety of networking and communications applications. By offering integrated hardware security, this family is well suited for networking equipment requiring encryption capabilities, such as small and medium enterprise (SME) routers, virtual private network (VPN) and firewall routers, wireless access points, residential gateways and xDSL equipment, as well as imaging, industrial control, and test and measurement equipment.

For quantities 25 and up, call for quote.

POWERQUICC™ COMMUNICATIONS PROCESSORS (CONT.)

MPC8241: PowerQUICC™ Integrated Host Processors

The MPC8241 Integrated Host Processor fits applications where cost, space, power consumption, and performance are critical requirements. This device provides a high level of integration, reducing chip count from five discrete chips to one, thereby significantly reducing system component cost. High integration results in a simplified board design, less power consumption, and a faster-time-to-market solution. This cost-effective, general purpose integrated processor targets systems using PCI interfaces in networking infrastructure, telecommunications, and other embedded markets. It can be used for control processing in applications such as routers, switches, network storage applications, and image display systems.

For quantities 100 and up, call for quote.

MC68360: PowerQUICC™ Quad Integrated Communication Controllers

The MC68360 Quad Integrated Communication Controller is a versatile one-chip integrated microprocessor and peripheral combination family that can be used in a variety of controller applications. The MC68360 particularly excels in communications activities. The QUICC can be described as a next-generation MC68302, with higher performance in all areas of device operation, increased flexibility, and higher integration. The term "quad" comes from the fact that there are four serial communications controllers (SCCs) on the device. However, there are actually seven serial channels which include four SCCs, two serial management controllers (SMCs), and one serial peripheral interface (SPI).

For quantities 100 and up, call for quote.

RS08 - REDUCED INSTRUCTION SET S08 CORE MICROCONTROLLERS

The RS08 core is a reduced version of the S08 central processing unit (CPU) that has been specifically designed for small pin-count devices with under 16KB memory. Thirty percent smaller than the S08 CPU, it is more efficient and cost-effective for simple electro-mechanical devices that are migrating to fully solid-state electronic operation or portable devices that have evolved into smaller or even disposable versions.

◆Surface Mount Device

HCS08 - CORE MICROCONTROLLERS

High-performance and low power, the HCS08 does not sacrifice performance to provide low power 1.8 V operation.
HCS08 Features - Multiple power management modes, including a 20 nanoamp (nA) power-down mode

- A zero-component auto-wakeup from "stop" to help reduce costs and reduce power to 0.7 microamp (uA) - Up to 40 MHz CPU/20 MHz bus at 2.1 V and 16 MHz CPU/8 MHz bus at 1.8 V
- A programmable internal clock generator with temperature and voltage compensation (typical drift < 2%) designed for reliable communications, fast start up and reduced system cost
- In-application reprogramming and data storage via third-generation 0.25μ flash technology
- High integration including four serial communication ports, up to 8 timer/PWMs, and an 8-channel 10-bit analog-to-digital converter specified down to 1.8 V.

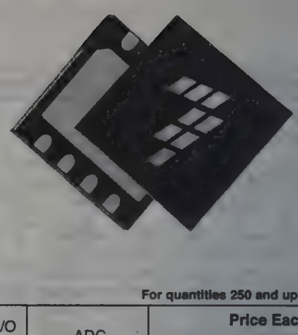
FREESCALE 8-Bit Microcontrollers

freescale™
semiconductor

HC08 CORE MICROCONTROLLERS



Freescale's HC08 Family of 8-bit microcontrollers are small, general purpose, low-power and feature rich. The HC08 Core products are highly integrated, general purpose devices with ADC, analog comparator, multiple communications options, timers, and on-chip ICE.

From a basic bare-bones controller in a tiny 8-pin quad flat non-leaded (QFN) package to feature-rich silicon in a 64-lead quad flat package (QFP), the HC08 MCU is an industry workhorse that can flaunt an impressive array of peripherals.

Here's just a sampling:

- 8- or 10-bit analog-to-digital converters (ADCs)
- Multichannel timers
- A wide variety of communications protocol support, including universal serial bus (USB), controller area network (CAN), local interconnect network (LIN), J1850 and radio frequency (RF)

◆ **Surface Mount Device**

FREESCALE 32-Bit Microcontrollers

COLDFIRE® 32-BIT MICROCONTROLLERS

The ColdFire® product portfolio offers a wide mix of performance, price, integration and debugging capabilities for embedded designers. Its integration possibilities are limited only by imagination, and its 20-year history of 68K legacy is something no other competitor can offer. With these features to work with, the ColdFire® architecture is in a leadership position in the 32-bit embedded space.

For quantities 250 and up, call for quote.

MC56F8300DSK KIT

Freescale's advanced 56F8300 Developers Start Kit brings demonstration, evaluation and development capabilities to the 56F8300 series of Digital Signal Controllers (DSCs). This comprehensive kit includes a demonstration board that utilizes the 60 MIPS 56F8323 DSC with on-chip oscillator to illustrate the enhanced capabilities of the 56F8300 Series. To demonstrate some typical 56F8300 applications in which processing power must be combined with remote sensing capabilities, the MC56F8300DSK integrates Freescale's MC33794 E-field sensor. It also features a built-in JTAG-to-parallel port command converter, with parallel cable included, providing fast and simple out-of-the-box debugging.

Kit Contents:

- MC56F8300DSK Board
- Parallel cable, DB25, M/F
- Universal power supply
- Code-Warrior™ CD for Freescale MC56F8300DSK
- Software, training and documentation CD
- Preprogrammed sample applications

MOUSER STOCK NO.	Freescale Part No.	Price Each
841-MC56F8300DSK	MC56F8300DSK	89.00

MC56F8323EVM KIT

The MC56F8323EVM is a low-cost kit that contains everything you need to quickly evaluate the features and capabilities of the MC56F8322 and MC56F8323 digital signal controllers silicon and tools.

Kit Contents:

- MC56F8323EVM board
- Installation guide
- Switch mode power supply (12 Volt)
- Parallel cable
- CodeWarrior™
- Development studio for 56800/E special edition

MOUSER STOCK NO.	Freescale Part No.	Price Each
841-MC56F8323EVM	MC56F8323EVM	317.59

DSP56303EVM KIT

The DSP56303 Evaluation Module is designed as a low-cost platform for developing real-time software and hardware products to support applications in wireless, telecommunications and multimedia products using multi-line voice/date/fax processing, videoconferencing, audio applications, control and general digital signal multi-line voice/date/fax processing, videoconferencing, audio applications, control and general digital signal processing. PC-compatible computer (90MHz or higher) running Windows 95 or NT4 with an RS-232 serial port. 12 Mbytes RAM, 3-1/2 inch diskette drive, CD-ROM drive, hard drive with 20 Mbytes of free disk space. Power supply 7-9 V AC or DC 500 mA with 2.1 mm coaxial connector not included.

Kit Contents:

- DSP56303EVM board
- DSP56300 literature
- Suite56 for Freescale DSP 563xx
- Freescale The DSP56300 Family Documentation
- Domain Technologies Debugger for DSP563xxEVM

MOUSER STOCK NO.	Freescale Part No.	Price Each
841-DSP56303EVM	DSP56303EVM	269.88

DSP56309EVM KIT

The DSP56309 Evaluation Module is a low-cost platform for developing real-time software and hardware products to support a new generation of wireless, telecommunications and multimedia applications. The DSP56309EVM targets applications requiring a large amount of on-chip memory, such as wireless infrastructure applications. PC compatible computer (Pentium-90 MHz or higher) running Windows 95 (or higher) with an RS-232 serial port. Requires Power supply 7-9 V DC, 500mA, (not included).

Kit Contents:

- DSP56309EVM Board
- GUI Debugger Software Disk
- Assembler Linker-Test files disk
- DSP56309EVM User's Manual and Other Documentation

MOUSER STOCK NO.	Freescale Part No.	Price Each
841-DSP56309EVM	DSP56309EVM	296.93

DSP56311EVM KIT

The DSP56311 Evaluation Module (EVM) is used to demonstrate the abilities of the DSP56311 device and provide a hardware tool to allow development of applications that use the DSP56311. The DSP56311EVM includes a DSP56311 device, peripheral expansion connectors, external memory and a voice codec. The peripheral expansion connectors allow for signal monitoring and user-feature expendability.

Kit Contents:

- DSP56311EVM Board
- Parallel port extender cable
- Plastic standoffs and plastic screws
- DSP56300 Tools Software
- Device and Tools Documentation
- Tutorial/example software
- DSP56311EVM Development Tools Release Notes
- DSP56311EVM Product Installation Guide

MOUSER STOCK NO.	Freescale Part No.	Price Each
841-DSP56311EVM	DSP56311EVM	377.83

DSP56F800DEMO KIT

The 56F800 Demonstration kit is a low-cost kit that contains everything you need to quickly evaluate the features and capabilities of the DSP56F801FA60 and DSP56F802TA60 silicon and tools. It also provides an efficient and cost-effective vehicle for hardware and software development.

Kit Contents:

- Demo board
- Complimentary CodeWarrior™ license (8K word program memory limit)
- SDK CD
- Parallel cable
- Instructions for kit
- Training CD
- US Power Supply

MOUSER STOCK NO.	Freescale Part No.	Price Each
841-DSP56F800DEMO	DSP56F800DEMO	55.20

DSP56F801EVM KIT

The DSP56F801EVM Kit is a low cost kit that contains everything you need to quickly evaluate the features and capabilities of the DSP56F801 silicon and tools. It can be used standalone or in conjunction with our broad range of modular motion control development hardware. The DSP56F801EVM Kit is targeted for use on PC Compatible systems running Windows 95, Windows 98 and Windows NT 4.0.

Kit Contents:

- DSP56F801EVM Installation Guide
- DSP56F801 Evaluation Module Board
- 12 Volt universal switching mode power supply
- IEEE 1284 parallel port cable DB25 male to DB25 female
- Metrowerks CodeWarrior™ for Freescale DSP evaluation CD-ROM (30 day)
- Embedded Software Development Kit (SDK) CD-ROM

MOUSER STOCK NO.	Freescale Part No.	Price Each
841-DSP56F801EVM	DSP56F801EVM	338.09

DSP56F803EVM KIT

The DSP56F803EVM Kit is a low cost kit that contains everything you need to quickly evaluate the features and capabilities of the DSP56F803 silicon and tools. It can be used standalone or in conjunction with our broad range of modular motion control development hardware. The DSP56F803EVM Kit is targeted for use on PC Compatible systems running Windows 95, Windows 98 and Windows NT 4.0.

Kit Contents:

- DSP56F803EVM Installation Guide
- DSP56F803 Evaluation Module Board
- 12 Volt universal switching mode power supply
- IEEE 1284 parallel port cable DB25 male to DB25 female
- Metrowerks CodeWarrior™ for Freescale DSP evaluation CD-ROM (30 day)
- Embedded Software Development Kit (SDK) CD-ROM

MOUSER STOCK NO.	Freescale Part No.	Price Each
841-DSP56F803EVM	DSP56F803EVM	337.82

DSP56F805EVM KIT

The DSP56F805EVM Kit is a low cost kit that contains everything you need to quickly evaluate the features and capabilities of the DSP56F805 silicon and tools. It can be used standalone or in conjunction with our broad range of modular motion control development hardware. This kit is targeted for use on PC Compatible systems running Windows 95, Windows 98 and Windows NT 4.0.

Kit Contents:

- DSP56F805EVM Installation Guide and DSP56F805 Evaluation Module Board
- 12 Volt universal switching mode power supply
- IEEE 1284 parallel port cable DB25 male to DB25 female
- Metrowerks CodeWarrior™ for Freescale DSP evaluation CD-ROM (30 day)
- Embedded Software Development Kit (SDK) CD-ROM

MOUSER STOCK NO.	Freescale Part No.	Price Each
841-DSP56F805EVM	DSP56F805EVM	337.95

DSP56F826EVM KIT

The DSP56F826EVM Kit is a low cost kit that contains everything you need to quickly evaluate the features and capabilities of the DSP56F826 silicon and tools. It can be used standalone, or in conjunction with our broad range of modular motion control development hardware. This kit is targeted for use on PC Compatible systems running Windows 95, Windows 98 and Windows NT 4.0.

Kit Contents:

- DSP56F826EVM Installation Guide and DSP56F826 Evaluation Module Board
- 12 Volt universal switching mode power supply
- IEEE 1284 parallel port cable DB25 male to DB25 female
- Codec sample rate selector
- Peripheral Daughter Card Expansion Connector to allow the user to connect his own SCI, SSI, SPI or GPIO compatible peripheral to the DSP
- Memory Daughter Card Expansion Connector to allow the user to connect his own memory or memory device to the DSP
- 16-Bit stereo codec interface
- Metrowerks CodeWarrior™ for Freescale DSP evaluation CD-ROM (30 day)
- Embedded Software Development Kit (SDK) CD-ROM

MOUSER STOCK NO.	Freescale Part No.	Price Each
841-DSP56F826EVM	DSP56F826EVM	309.88

KEIL Development Tools

KEIL
An ARM® Company

RoHS Compliant **This page of product is compliant.**

Keil Software makes C compilers, macro assemblers, real-time kernels, debuggers, simulators, integrated environments, and evaluation boards for the 8051, 251, ARM, and XC16x/C16x/ST10 microcontroller families.

8051 MCU DEVELOPMENT TOOLS FOR CLASSIC AND EXTENDED 8051 DEVICES

MOUSER STOCK NO.	Keil Software Part No.	Description	Price Each
830-PK51	PK51	C51 V8 Professional Developer's Suite - Includes CA51 + µVision Simulator and Target Debugger, Extended Device Support, LX51 Code Packing Linker, ISD51 In-System Debugger, and RTX Tiny RTOS	2895.00
830-CA51	CA51	C51 V8 Compiler - Includes A51 + C Compiler	1695.00
830-A51	A51	A51 V8 Assembler - Includes Assembler, Utilities, and µVision IDE	695.00
830-MCBX51	MCBX51	8051/251 Single Board Comp. - Includes 2K- Limited 8051/251 Tools with Assemble/Compiler/Debug/Simulator/Monitor	295.00
830-ULINK2	ULINK2	USB-JTAG Adapter - Connects PC's USB Port to Hardware's JTAG Interface	300.00

LPC DEVELOPMENT TOOLS FOR PHILIPS 89LPC9XX DEVICES

MOUSER STOCK NO.	Keil Software Part No.	Description	Price Each
830-MCB900	MCB900	Prototype Board for Phillips 89LPC9xx - Includes µVision LPC Studio and 4K-Limited Tools with Assembler/Compiler/Debugger/Simulator	60.00
830-MCB950	MCB950	Evaluation Bard for the NXP LPC95x Microcontroller Family	
830-EPM900	EPM900	Emulator/Programmer for Philips 89LPC9xx - Includes µVision LPC Studio and 4K-Limited Tools with Assembler/Compiler/Debugger/ Simulator	200.00

251 MCU DEVELOPMENT TOOLS FOR ATMEL, INTEL, AND SANYO DEVICES

MOUSER STOCK NO.	Keil Software Part No.	Description	Price Each
830-DK251	DK251	C251-V3 Developer's Suite - Includes CA251 + µVision Simulator and Target Debugger	2595.00
830-CA251	CA251	C251 V3 Compiler - Includes A251 + C Compiler	1795.00
830-A251	A251	A251 V3 Assembler - Includes Assembler, Utilities, and µVision IDE	695.00
830-MCBX51	MCBX51	8051/251 Single Board Computer - Includes 2K- Limited 8051/251 Tools with Assembler/Compiler/ Debugger/Simulator/Monitor	295.00

ARM® MCU DEVELOPMENT TOOLS FOR ARM-POWERED DEVICES

MOUSER STOCK NO.	Keil Software Part No.	Description	Price Each
830-MDK-ARM	MDK-ARM	RealView Microcontroler Development Kit - Includes C/C++ Compiler, Assembler, µVision IDE/Debugger/Simulator, and RTX Kernel Library.	4095.00
830-DB-ARM	DA-ARM	Debugger/Simulator for ARM® - Includes µVision IDE/Debugger/Simulator supports GNU GCC, Keil CARM. or ARM ADS/RealView Compilers.	2295.00
830-RL-ARM	RTL-ARM	RealView Real-Time Library - RTX-ARM Kernel Source Code, Flash File System, TCP/IP Networking Libraries, CAN and USB Drivers.	4195.00
830-MCBSTR7	MCBSTR7	MCBSTR7 Eval Board - uses the new STMicroelectronics STR710FZ2 controller - Includes everything that is required for a single-chip STR7 system — USB, CAN, and two UART interfaces, analog input (via potentiometer), and 8 LEDs.	149.00
830-MCBSTR9	MCBSTR9	Evaluation board for the STMicroelectronics STR9 Microcontroller Family	199.00
830-MCBSTR730	MCBSTR730	Evaluation board for the STMicroelectronics STR730 Microcontroller Family	169.00
830-MCBSTR750	830-MCBSTR750	Evaluation board for the STMicroelectronics STR750 Microcontroller Family	229.00
830-MCB2100	MCB2100	LPC211x/212x Single-Board Computer with CAN & JTAG - Includes Evaluation Keil ARM Tools with Assembler/ Compiler/Debugger/ Simulator.	149.00
830-MCB2130	MCB2130	LCP213x Single-Board Computer with JTAG - Includes Evaluation Keil ARM Tools with Assembler/Compiler/Debugger/Simulator.	179.00
830-MCB2140	MCB2140	LPC214x Evaluation USB Board - Uses the new Philips LPC2148 ARM Power Microcontroller, Includes an eval version of the Keil Development Suite for ARM that includes extensive example projects on the usage of the LPC2100 devices	179.00
830-ULINK2	ULINK2	USB-JTAG Adapter - Connects PC's USB Port to Hardware's JTAG Interface.	300.00

C166 MCU DEVELOPMENT TOOLS FOR XC16X/C16X/ST10

MOUSER STOCK NO.	Keil Software Part No.	Description	Price Each
830-PK166	PK166	C166 V5 Pro Developer's Suite - Includes all components of the CA166 + µVision Simulator and Target Debugger	3495.00
830-CA166	CA166	C166 V5 Compiler - Includes all components of the A166 + C166 Compiler, EC++ Compiler, Run Time Libraries, and RTX166 Tiny RTOS	2395.00
830-A166	A166	A166 V5 Assembler - Includes Assembler, Utilities, and µVision IDE	695.00
830-AR166	AR166	Advanced RTX Real-Time Operating System for C16x/XC16x/ST10 - Includes Flash File System and TCP/IP Networking Support	3495.00
830-MCB167NET	MCB167NET	C167 Single Board Computer with CAN & Ethernet - Includes 4K-Limited XC16x/C16x/ST Tools with Assembler/Compiler/ Debugger/ Simulator/ Monitor	295.00
830-MCBXC167-BASIC	MCBXC167-BASIC	XC167 Single Board Computer - Includes 4K-Limited XC16x/C16x/ST10 Tools with Assembler/ Compiler/ Debugger/ Simulator / Monitor	149.00
830-MCBXC167-NET	MCBXC167-NET	XC167 Single Board Computer with CAN & Ethernet - Includes 4K-Limited XC16x/ C16x/ST10 Tools Assembler/ Compiler/Debugger/ Simulator/ Monitor	399.00
830-ULINK2	ULINK2	USB-JTAG Adapter - Connects PC's USB Port to Hardware's JTAG Interface	300.00

PC-LINT SYNTAX CHECKER - TIME-SAVING SOFTWARE PACKAGE

MOUSER STOCK NO.	Keil Software Part No.	Description	Price Each
830-PC-LINT-V8	PC-Lint V8	PC-Lint Syntax Checker - Software pkg that finds errata in your C programs using the K&R and ANSI standards for C	239.00

LUMINARY MICRO Development Kits & Microcontrollers

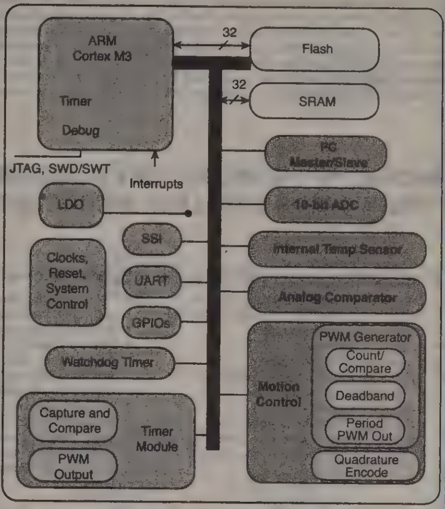
LUMINARYMICRO™

Products may be RoHS compliant.
Check mouser.com for RoHS status.

STELLARIS™ FAMILY OF ARM® CORTEX-M3™ MICROCONTROLLERS

Luminary Micro, Inc. designs, markets, and sells ARM® Cortex™-M3-based microcontrollers (MCUs). As ARM's lead partner for Cortex-M3 technology, Luminary Micro has delivered the world's first silicon implementation of the Cortex-M3 processor, providing 32-bit performance at 8-/16-bit cost. Luminary Micro's Stellaris family of microcontrollers incorporates the ARM Cortex-M3 MCU core running up to 50 MHz, embedded Flash and SRAM, a low-dropout voltage regulator, integrated brown-out reset and power-on reset functions, analog comparators, 10-bit ADC, SSI, GPIOs, watchdog and general purpose timers, UARTs, I C, motion control PWMs, and quadrature encoder inputs. With peripherals provided directly to the pins without feature multiplexing, this rich feature set is ideal for applications such as building and home automation; factory automation and control; industrial control power devices; stepper motors; brushed and brushless DC motors; and AC induction motors.

The Stellaris™ Family of microcontrollers build on this core to bring high-performance 32-bit computing to cost-sensitive embedded microcontroller applications, such as motion control, process control, and medical instrumentation. The Stellaris family is your only source for ARM-based microcontrollers featuring 32-bit performance for the same price as current 8/16-bit microcontroller designs!



Features:

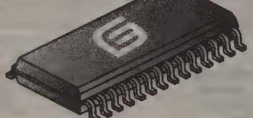
- Thumb-2 instruction set, delivering the high-performance expected of an ARM core in the memory size usually associated with 8- and 16-bit devices; typically in the range of a few kilobytes of memory for microcontroller class applications.
- Exceptional interrupt handling, by implementing in hardware the register manipulations required for handling an interrupt.
- Memory protection unit (MPU) to provide a privileged mode of operation for complex applications.
- Compact core.

Architected to bring 32-bit to the 8-/16-bit MCU space:

- Small, fast, power-efficient ARM Cortex-M3 core
- Powerful software debug capabilities
- Up to 4x better code density than 8-bit 8051

Greater than 50 MIPS with a demonstrable 20x performance roadmap:

- No-worry roadmap



Dramatically extends ARM7 capabilities in critical MCU applications:

- 5x improvement in MIPS/Watt
- 5x improvement in real time response to interrupts
- Highly predictable, deterministic behavior

Best-in-industry development environment and debug tools:

- Hundreds of 3rd party supporters
- Most time-efficient software development environment

STELLARIS™ FAMILY DEVELOPMENT KITS

The Luminary Micro Stellaris™ Family Development Kit provides the hardware and software tools that engineers need to begin development quickly.

Features:

- Fully functional evaluation versions of microcontroller toolsets from ARM/Keil, CodeSourcery (GNU), and IAR
- Everything needed to develop and prototype embedded applications right out of the box, including all cables, jumpers, and power over USB

Includes:

- Development board (motherboard, daughterboard)
- Software tools
- Compiler, assembler, debugger
- ARM, GNU, and IAR
- Hardware tools
- JTAG emulator
- Product collateral
- Datasheets, example programs
- Power supply, cables

MICROCHIP PICMicro Microcontroller Family

Microchip's RISC-based PICmicro® MCUs are designed for applications requiring high performance and low cost. The PICmicro® MCU portfolio is comprised of more than 140 products and features a variety of memory configurations, low voltage and power, small footprint and ease-of-use. There is a great deal of "smarts" packed into a tiny space in our minimal footprint 8-bit MCUs. As your designs grow in complexity, the code you write (later) can be easily transitioned to larger Microchip MCUs with more peripheral resources. A seamless product migration path between PICmicro® MCU families provides for complete upward compatibility in embedded control designs. If you already know the specifications you need for you application, you can select that criteria through Microchip's parametric search engine. The criteria used in this selection process are: Program Memory, Data RAM, Memory Type and Package. If you are not yet familiar with Microchip's PICmicro® MCUs the following information will help you get started. PICmicro® MCUs combine high performance, low cost, and small package size, offering the best price/performance ratio in the industry. Microchip offers five families of 8-bit MCUs to best fit your needs.

MICROCHIP PIC10FXXX 8 BIT FLASH MCUs "THE WORLDS SMALLEST MICROCONTROLLER."

High-Performance RISC CPU:

- Only 33 single-word instructions to learn
- All single-cycle instructions except for program branches, which are two-cycle
- 12-bit wide instructions
- 2-level deep hardware stack
- Direct, Indirect and Relative Addressing modes for data and instructions
- 8-bit wide data path
- 8 Special Function Hardware registers
- Operating speed: 4 MHz internal clock
  1μs instruction cycle

Special Microcontroller Features:

- 4 MHz precision internal oscillator: Factory calibrated to ±1%
- In-Circuit Serial Programming™ (ICSP™)
- In-Circuit Debugging (ICD) support
- Power-on Reset (POR)
- Device Reset Timer (DRT)
- Watchdog Timer (WDT) with dedicated on-chip RC oscillator for reliable operation
- Programmable code protection
- Multiplexed MCLR input pin
- Internal weak pull-ups on I/O pins
- Power-saving Sleep mode
- Wake-up from Sleep on pin change

Low-Power Features/CMOS Technology:

- Operating Current: < 350 μA @ 2V, 4 MHz
- Standby Current: 100 nA @ 2V, typical
- Low-power, high-speed Flash technology:
  100,000 Flash endurance
  > 40 year retention
- Fully static design
- Wide operating voltage range: 2.0V to 5.5V
- Wide temperature range: Industrial: -40°C to +85°C
  Extended: -40°C to +125°C

579-PIC16F505-I/P	PIC16F505-I/P	PDIP-14	1.5KB Flash, 72B RAM, 4MHz intosc	1.46	.79	.77
579-PIC16F505-I/SL	PIC16F505-I/SL	SOIC-14	1.5KB Flash, 72B RAM, 4MHz intosc	1.30	.69	.67
579-PIC16F505-I/ST	PIC16F505-I/ST	TSSOP-14	1.5KB Flash, 72B RAM, 4MHz intosc	1.54	.82	.80
579-PIC16F506-I/P	PIC16F506-I/P	PDIP-14	1.5KB Flash, 72B RAM, 8MHz intosc, ADC, comparator	1.39	.84	.82
579-PIC16F506-I/SL	PIC16F506-I/SL	SOIC-14	1.5KB Flash, 72B RAM, 8MHz intosc, ADC, comparator	1.22	.74	.72
579-PIC16F54-I/P	PIC16F54-I/P	PDIP-18	0.75KB Flash, 25B RAM	1.00	.80	.52
579-PIC16F57-I/P	PIC16F57-I/P	PDIP-28	3KB Flash, 72B RAM	1.55	1.24	.81
579-PIC16F59-I/P	PIC16F59-I/P	PDIP-40	3KB Flash, 134B RAM	1.87	1.00	.98
579-PIC16F610-I/P	PIC16F610-I/P	PDIP-8	1.75KB Flash, 64B RAM, 8MHz intosc, comparator	1.92	1.03	1.00
579-PIC16F610-I/SL	PIC16F610-I/SL	SOIC-16	1.75KB Flash, 64B RAM, 8MHz intosc, comparator	1.68	.90	.88
579-PIC16F616-I/P	PIC16F616-I/P	PDIP-8	3.5KB Flash, 128B RAM, 8MHz intosc, comparator, ADC, ECCP	1.82	1.08	1.06
579-PIC16F616-I/SL	PIC16F616-I/SL	SOIC-8	3.5KB Flash, 128B RAM, 8MHz intosc, comparator, ADC, ECCP	1.66	.98	.96
579-PIC16F630-I/P	PIC16F630-I/P	PDIP-14	1.75KB Flash, 128B RAM, 4MHz intosc, comparator, Data EE	2.06	1.19	1.16
579-PIC16F630-I/SL	PIC16F630-I/SL	SOIC-14	1.75KB Flash, 128B RAM, 4MHz intosc, comparator, Data EE	1.99	1.07	1.04
579-PIC16F631-I/P	PIC16F631-I/P	PDIP-20	1.75KB Flash, 64B RAM, 4MHz intosc, comparator, Data EE	1.92	1.56	1.52
579-PIC16F631-I/SO	PIC16F631-I/SO	SOIC-20	1.75KB Flash, 64B RAM, 4MHz intosc, comparator, Data EE	2.09	1.25	1.22
579-PIC16F631-I/SS	PIC16F631-I/SS	SSOP-20	1.75KB Flash, 64B RAM, 4MHz intosc, comparator, Data EE	1.92	1.15	1.12
579-PIC16F636-I/P	PIC16F636-I/P	PDIP-14	3.5KB Flash, 128B RAM, 4MHz intosc, comparator, Data EE	2.38	1.27	1.24
579-PIC16F636-I/SL	PIC16F636-I/SL	SOIC-14	3.5KB Flash, 128B RAM, 4MHz intosc, comparator, Data EE	2.16	1.15	1.12
579-PIC16F636-I/ST	PIC16F636-I/ST	TSSOP-14	3.5KB Flash, 128B RAM, 4MHz intosc, comparator, Data EE	2.45	1.31	1.28
579-PIC16F648A-I/P	PIC16F648A-I/P	PDIP-18	7KB Flash, 256B RAM, 4MHz intosc, comparator, Data EE	3.65	1.90	1.83
579-PIC16F676-I/P	PIC16F676-I/P	PDIP-14	1.75KB Flash, 64B RAM, 4MHz intosc, comparator, Data EE, ADC	2.38	1.27	1.24
579-PIC16F676-I/SL	PIC16F676-I/SL	SOIC-14	1.75KB Flash, 64B RAM, 4MHz intosc, comparator, Data EE, ADC	2.14	1.15	1.12
579-PIC16F677-I/ML	PIC16F677-I/ML	QFN-20	3.5KB Flash, 128B RAM, 4MHz intosc, comparator, Data EE, ADC	2.26	1.34	1.31
579-PIC16F677-I/P	PIC16F677-I/P	PDIP-20	3.5KB Flash, 128B RAM, 4MHz intosc, comparator, Data EE, ADC	2.06	1.64	1.60
579-PIC16F677-I/SO	PIC16F677-I/SO	SOIC-20	3.5KB Flash, 128B RAM, 4MHz intosc, comparator, Data EE, ADC	2.21	1.33	1.30
579-PIC16F677-I/SS	PIC16F677-I/SS	SSOP-20	3.5KB Flash, 128B RAM, 4MHz intosc, comparator, Data EE, ADC	2.06	1.23	1.20
579-PIC16F684-I/ML	PIC16F684-I/ML	QFN-16	3.5KB Flash, 128B RAM, 4MHz intosc, comparator, Data EE, ADC	2.52	1.35	1.32
579-PIC16F684-I/P	PIC16F684-I/P	PDIP-14	3.5KB Flash, 128B RAM, 4MHz intosc, comparator, Data EE, ADC	2.52	1.35	1.32
579-PIC16F684-I/SL	PIC16F684-I/SL	SOIC-14	3.5KB Flash, 128B RAM, 4MHz intosc, comparator, Data EE, ADC	2.30	1.23	1.20
579-PIC16F684-I/ST	PIC16F684-I/ST	TSSOP-14	3.5KB Flash, 128B RAM, 4MHz intosc, comparator, Data EE, ADC	2.62	1.39	1.36
579-PIC16F685-I/P	PIC16F685-I/P	PDIP-20	7KB Flash, 256B RAM, 4MHz intosc, comparator, Data EE, ADC	2.90	1.80	1.76
579-PIC16F685-I/SO	PIC16F685-I/SO	SOIC-20	7KB Flash, 256B RAM, 4MHz intosc, comparator, Data EE, ADC	3.14	1.68	1.64
579-PIC16F685-I/SS	PIC16F685-I/SS	SSOP-20	7KB Flash, 256B RAM, 4MHz intosc, comparator, Data EE, ADC	2.76	1.48	1.44
579-PIC16F687-I/P	PIC16F687-I/P	PDIP-20	3.5KB Flash, 128B RAM, 4MHz intosc, comparator, Data EE, ADC	2.59	1.80	1.76
579-PIC16F687-I/SO	PIC16F687-I/SO	SOIC-20	3.5KB Flash, 128B RAM, 4MHz intosc, comparator, Data EE, ADC	2.95	1.64	1.60
579-PIC16F687-I/SS	PIC16F687-I/SS	SSOP-20	3.5KB Flash, 128B RAM, 4MHz intosc, comparator, Data EE, ADC	2.59	1.39	1.36
579-PIC16F688-I/P	PIC16F688-I/P	PDIP-14	7KB Flash, 256B RAM, 4MHz intosc, comparator, Data EE, ADC	2.69	1.44	1.40
579-PIC16F688-I/SL	PIC16F688-I/SL	SOIC-14	7KB Flash, 256B RAM, 4MHz intosc, comparator, Data EE, ADC	2.45	1.31	1.28
579-PIC16F689-I/P	PIC16F689-I/P	PDIP-20	7KB Flash, 256B RAM, 4MHz intosc, comparator, Data EE, ADC	2.90	1.80	1.76
579-PIC16F689-I/SO	PIC16F689-I/SO	SOIC-20	7KB Flash, 256B RAM, 4MHz intosc, comparator, Data EE, ADC	3.14	1.68	1.64
579-PIC16F689-I/SS	PIC16F689-I/SS	SSOP-20	7KB Flash, 256B RAM, 4MHz intosc, comparator, Data EE, ADC	2.76	1.48	1.44
579-PIC16F690-I/ML	PIC16F690-I/ML	QFN-20	7KB Flash, 256B RAM, 4MHz intosc, comparator, Data EE, ADC	3.14	1.68	1.64
579-PIC16F690-I/P	PIC16F690-I/P	PDIP-20	7KB Flash, 256B RAM, 4MHz intosc, comparator, Data EE, ADC	3.07	1.80	1.76
579-PIC16F690-I/SO	PIC16F690-I/SO	SOIC-20	7KB Flash, 256B RAM, 4MHz intosc, comparator, Data EE, ADC	3.14	1.68	1.64
579-PIC16F690-I/SS	PIC16F690-I/SS	SSOP-20	7KB Flash, 256B RAM, 4MHz intosc, comparator, Data EE, ADC	2.76	1.48	1.44
579-PIC16F716-I/P	PIC16F716-I/P	PDIP-18	3.5 KB Flash, 128 RAM, 13 I/O	1.85	.98	.96
579-PIC16F716-I/SO	PIC16F716-I/SO	SOIC-18	3.5 KB Flash, 128 RAM, 13 I/O	1.68	.90	.88
579-PIC16F716-I/SS	PIC16F716-I/SS	SSOP-20	3.5 KB Flash, 128 RAM, 13 I/O	2.69	1.61	1.57
579-PIC16F72-I/SO	PIC16F72-I/SO	SOIC-28	3.5 KB Flash, 128 RAM, 13 I/O	3.60	2.16	2.10
579-PIC16F72-I/SP	PIC16F72-I/SP	SPDIP-28	3.5 KB Flash, 128 RAM, 13 I/O	3.60	2.16	2.10
579-PIC16F737-I/SO	PIC16F737-I/SO	SOIC-28	7 KB Flash, 368 RAM, 25 I/O	6.36	3.48	3.42
579-PIC16F737-I/SP	PIC16F737-I/SP	SDIP-28	7 KB Flash, 368 RAM, 25 I/O	6.24	3.41	3.35

MICROCHIP PIC18XXX FLASH MCUs

- Upwardly Compatible with PIC18CXXX/PIC17C7XX/PIC16CXX/PIC16C5X/PIC12CXXX, 77 Instructions, C Compiler Efficient Instruction Set, Software Stack Capability, Table Read/Write, 10 MIPS, 4x PLL, Switchable Oscillator Sources, 25mA Source/Sink per I/O.

MICROCHIP 16-BIT PIC24 FLASH MCUs

16-bit PIC24 microcontrollers offer a new level of performance and higher integration. Features supporting this compatibility between these families include common:

- Instruction set & architecture (dsPIC DSCs add DSP capability)
- Peripherals
- Pin-out
- Tool Suite including MPLAB® IDE, C30 C Compiler & MPLAB® PM3 Programmer, Real Ice, Explorer 16 Development Board

MICROCHIP Demo Boards and Development Products

PICDEM Z ZIGBEE™ DEMONSTRATION KIT

The PICDEM™ Z demonstration kit is an easy-to-use ZigBee™ Technology wireless communication protocol development and demonstration platform. The demonstration kit includes the ZigBee protocol stack and two PICDEM Z boards, each with an RF daughter card. The demonstration board is also equipped with a 6-pin modular connector to interface directly with Microchip's MPLAB® ICD 2 in-circuit debugger (DV164005).

Key Features of the PICDEM Z Demonstration Kit Includes:

- ZigBee software stack supporting RFD (Reduced Function Device), FFD (Full Function Device) and Coordinator
- PIC18LF4620 MCU featuring nanoWatt Technology, 64 KB Flash memory and robust integrated peripherals
- Microchip MRF24J40 RF transceiver and antenna interface via daughter card for flexibility
- ZENA™ wireless network analyzer tool including software protocol stack configuration (DM183023)
- ICSP™ and MPLAB ICD 2 interface connector
- RS-232 interface
- 9V DC to 3.3V DC regulator
- Temperature sensor (Microchip TC77), LEDs, and button switches to support demonstration

OKI 16/32-BIT ARM®-BASED MICROCONTROLLERS

◆ Surface Mount Device

Features:

- Max Frequency (Single Cycle FLASH): 33.333 MHz
- System Timer: 1
- DMA: 2 Channel
- 16-bit Real Time Clock: 1
- 16-bit Watchdog Timer: 1
- 16-bit Flexible Timer (AR/IC/OC/PW/SM): 6 Channel
- 10-bit A/D: 4 channel
- Multi-Master I²C: 1
- Master/Slave SPI with FIFOs: 2
- 9-bit capable UARTS with FIFOs: 2
- 12S: 1 Channel
- 2 Channels
- Serial I/O: 1 Channel
- GPIO 40/108

For quantities 50 and up, call for quote.

OKI VOICE OVER IP CODECS AND ECHO/NOISE CANCELLERS

Features:

- FSK modem for caller ID, tone/DTMF/dial pulse generator/detector (VoIP)
- Support G.711 A-Law/u-Law, G.729A (VoIP), G.711 u-Law, 16-bit Linear PCM codecs (ML7037)
- Integrated Acoustic and Line Echo/Noise Canceller for Hands Free Communication Applications (ML7037)

OKI EVALUATION BOARDS

Oki's Microcontroller Evaluation tools contains all that is needed to evaluate OKI's top of the line product series. Based on a concept of modularity, Oki has developed processor boards which provides everything necessary for today's development. Fully operational designs gives easy access to all I/O and peripherals of these devices.

Products may be RoHS compliant. Check mouser.com for RoHS status.

PROPELLER
by Parallax, Inc.

32 BIT PROPELLER MULTICORE MICROCONTROLLERS

What can you do with eight 32-bit processors (COGs) in one chip? Real simultaneous multi-processing!

The new Propeller chip is the result of our internal design team working for eight years. The Propeller chip was designed at the transistor level by schematic using our own Altera Stratix tools to prototype the product. The Propeller is programmed in both a high-level language, called Spin™, and low-level (assembly) language. With the set of pre-built Parallax "objects" for video, mice, keyboards, RF, LCDs, stepper motors and sensors your Propeller application is a matter of high-level integration. The Propeller is recommended for those with previous microcontroller experience.

Propeller Specifications	
Model Number	P8X32A
Package Types	40-pin DIP, 44-pin LQFP, 44-pin QFN
Parallax Stock Codes	P8X32A-D40 - DIP package P8X32A-Q44 - LQFP package P8X32A-M44 - QFN package
Power Requirements	3.3 volts DC
External Clock Speed	DC to 80 MHz (4 MHz to 8 MHz with Clock PLL running)
Internal RC Oscillator	12 MHz or 20 KHz
System Clock Speed	DC to 80 MHz
Global RAM/ROM	64 K bytes; 32K RAM / 32K ROM
RAM/ROM Organization	32 bits (4 bytes or 1 long)
I/O Pins	32
Current Source/Sink per I/O	50 mA

8 BIT SX SERIES RISC MICROCONTROLLERS

The SX family of configurable communications controllers are fabricated in an advanced CMOS process technology. The advanced process, combined with a RISC-based architecture, allows high-speed computation, flexible I/O control, and efficient data manipulation. Throughput is enhanced by operating the device at frequencies up to 75 MHz and by optimizing the instruction set to include mostly singlecycle instructions. In addition, the SX architecture is deterministic and totally reprogramable.

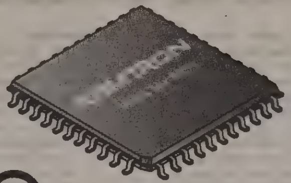
RAMTRON VERSA 8051 MICROCONTROLLERS

VRS51L2070 and VRS51L3074 (FRAM-Enhanced Versa 8051 MCU)

Upgrade 8-bit designs with the VRS51L2070/3074, fast and flexible 8051-based systems-on-chip (SoCs) that deliver the power and speed of a 16-bit MCU without having to migrate from an 8-bit device. The first of its kind, the VRS51L3074 combines a high performance SoC with nonvolatile FRAM memory, for a quick and reliable nonvolatile data storage/processing system that only a FRAM-enhanced MCU can provide.



Memory:
- 8K Bytes FRAM (VRS51L3074)
- 64KB ISP/IAP Flash
- 4KB SRAM

High performance 8051 CPU:
- Up to 40-MIPS processing power
- Drastically faster than standard 8051s
- Same instruction set as standard 8051s

Unique MCU Features:
- 40 MHz internal oscillator
- Enhanced hardware Arithmetic unit with barrel shifter for DSP operations
- JTAG Interface for Programming/Debugging/Emulation
- UARTs include baud rate generator with micro baud rate adjustment
- Enhanced SPI and I²C Interfaces
- PWCs, PWMs Timers and Watchdog Timer
- Port Change and Pin Change Interrupt

RoHS Compliant LEAD-FREE

RAMTRON EVALUATION BOARD FOR FRAM BASED VERSA MICROCONTROLLERS

The VersaKit-20XX and VersaKit-30XX development kits are a plug-and-play evaluation system for the VRS51L2074 and VRS51L3074 of high performance, fully-integrated, FRAM-enhanced 8051 microcontrollers. These kits provide a complete and comprehensive programming and development platform, with ample prototyping space and easy access to chip peripherals and I/Os.

Development Board Features:
- VRS51L2070/VRS51L3074 in QFP-64 package soldered onboard
- FM31xx MCU companion, FM25xx SPI FRAM and FM24xx I²C FRAM devices installed
- 5x2 header to connect Versa-JTAG programming/debugging interface
- 2 DB9 serial port female connectors and 1 onboard RS-232 transceiver with configuration jumper
- Tact switches for manual reset and external interrupt of the processor
- Four sets of 16 probing points around VRS51L2070/VRS51L3074 device
- 22x2 header alongside prototyping area to access QFP-44 device pins (header pin number corresponds to device pin number)
- 32x2 header alongside prototyping area to access QFP-64 device pins (header pin number corresponds to the device pin number)
- Character LCD interface header footprint
- External crystal footprint
- 8 uncommitted user LEDs
- Onboard 3.3V regulator with power-on LED
- Optional regulator footprint 1.1

Kit includes:
- Development board that supports the VRS51L2070 or VRS51L3074
- VJTAG-USB programming/debugging interface
- USB Cable
- Power supply

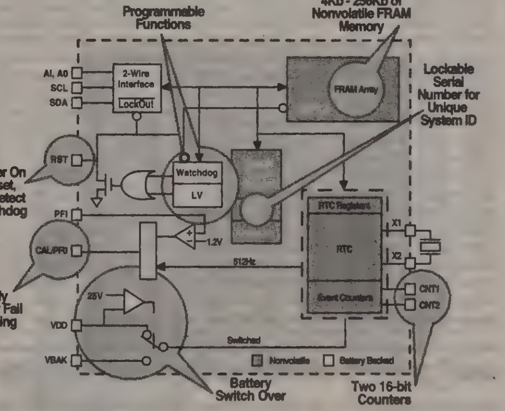
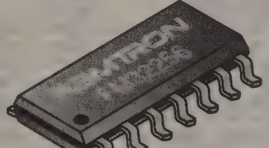
RAMTRON PROCESSOR COMPANIONS

Ramtron's Processor Companion is a complete support and peripheral solution with highly integrated functions for processor-based systems. Never before has a solution combined the fast read/write performance and unlimited endurance of nonvolatile FRAM (ferroelectric random access memory) with a real-time clock (RTC), processor supervisor and other common peripherals.

In addition to memory (not included in the FM4005) and a RTC (not included in the FM32XX series), these devices include commonly needed CPU support functions such as programmable low-VDD reset, programmable watchdog timer, nonvolatile event counter, loackable 64-bit serial number area and early power-fail warning (NMI) interrupt. Complementary but distinct functions share a common 2-wire interface eliminating the need for multiple devices.



Features:
- High integration device replaces multiple parts
- Serial non-volatile memory (except FM4005-G)
- Real-time clock (RTC) (except FM32XX series)
- Low voltage reset
- Watchdog timer
- Early power-fail warning interrupt/NMI
- Two 16-bit event counters
- Serial number with write-lock for security



RoHS Compliant LEAD-FREE

SILICON LABS Microcontrollers

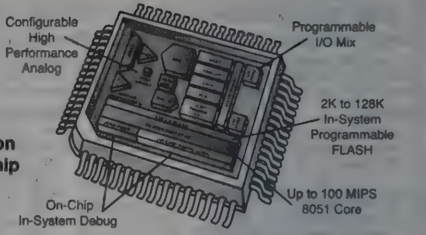
SILICON LABS

C8051FXXX HIGH PERFORMANCE MIXED-SIGNAL MICROCONTROLLERS

Silicon Laboratories' mixed-signal microcontrollers integrate world-class analog, a high-speed pipelined 8051 CPU, ISP Flash memory and on-chip JTAG based debug in each device. Configurable high-performance analog, up to 100 MIPS core and in-system programmability provide the user with complete design flexibility, improved time-to-market, superior system performance and greater end product differentiation

Features:
- 20 to 100 MIPS 8051 CPU
- 32 to 128KB Flash memory
- 256 to 8448KB RAM
- Up to 24-bit ADC
- Up to 12-bit DACs
- Up to three comparators
- Voltage reference
- Temperature sensor
- 45 16-bit Timers
- 36 channel PCA
- 864 Digital I/O
- 16 x 16 MAC

Applications:
- Industrial and process feedback control systems
- Instrumentation
- Test systems
- Point-of-sale terminals
- Satellite radio systems
- Cellular base stations
- Fiber optics systems
- Portable and stationary test equipment
- Weigh scales
- Smart transmitters
- Automatic Test Equipment (ATE)



Configurable High Performance Analog
Programmable I/O Mix
2K to 128K In-System Programmable FLASH
Up to 100 MIPS 8051 Core
On-Chip In-System Debug

USB MICROCONTROLLERS

USB MCUs feature an on-board USB 2.0 function controller with an integrated transceiver and on-chip clock recovery. No external resistors, crystal, voltage regulator, EEPROM or other components are required. On-chip resources include a high-speed 8051 CPU with up to 64 kB Flash, UARTs, SMBus, SPI, timers, counters and PWM generators. On-chip analog features include a multi-channel 10-bit ADC, voltage reference, internal oscillator, comparators and a temperature sensor. Available in 28-pin QFN, 32-pin LQFP or 48-pin TQFP packages, these devices provide a single-chip solution for embedded USB applications.

RoHS Compliant

USB TO UART BRIDGE-SINGLE CHIP SOLUTION

A single-chip USB to UART bridge that converts data traffic between USB and UART formats.

Features:
- USB Function Controller and Transceiver
- Integrated 1024-byte EEPROM
- Programmable Baud rates
- Integrated clock no external crystal required
- USB specification 2.0 compliant 12 Mbps
- EEPROM security lock function
- Integrated transceiver no external resistors required
- USB suspend states supported

Example Applications:
- Upgrade of RS-232 legacy devices to USB
- Cellular phone USB interface cable
- PDA interface cable
- USB to RS-232 serial adapter

Specifications:
- Self-powered: 3.0 - 3.6 V
- USB bus powered: 4.0 - 5.25 V
- Temperature Range: -40 to 85° C
- MIPS (Peak): 0
- Internal Osc: 0

RoHS Compliant

For quantities of 250 and up, call for quote.

SILICON LABS Microcontrollers

This page of product is compliant.

SMALL FORM FACTOR MICROCONTROLLERS

The Small Form Factor family of microcontrollers combines a high-speed 8051 CPU, Flash or OTP memory and high-performance analog circuits in remarkably small packages allowing system designers to reduce component count while improving system performance. These highly-integrated devices are optimized for space-constrained, low-power, low-cost applications in consumer, industrial, communications and automotive markets. Development is quick and easy due to low-cost, professional development tools and in-system debug. High integration, small size, high CPU throughput and best-in-class analog peripherals make the Small Form Factor family ideal for a wide range of applications.

RoHS Compliant

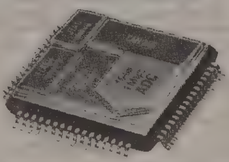
C8051F040 FAMILY WITH CAN BUS

The C8051F040 family features the same 25MIPS 8051 code-compatible CPU, in-system programming/debugging, and analog and digital peripherals. In addition, it has an integrated CAN 2.0B controller with 32 message objects, each with its own filter mask. The 'F040 parts also have a +/- 60V Programmable Gain Difference Amplifier. Available in a 100-pin or 64-pin TQFP with up to 64 Digital I/O, it also has a fully parallel External Memory Interface (EMIF) for data storage, two UART's, a SPI Bus, and an SMBus. There are two independent ADC's, one 12-bit 100ksps, and the other 8-Bit 500ksps each with its own input multiplexer, as well as two 12-bit DAC's, a voltage reference, and a temperature sensor. All 'F040 family members have 64K bytes of in-system programmable FLASH memory and 4352 bytes of SRAM.



RoHS Compliant

SILICON LABS MCU Development Tools

SILICON LABS

MICROCONTROLLER DEVELOPMENT KITS

Silicon Labs development kits provide a comprehensive integrated development environment for unobtrusive real-time debug IN YOUR TARGET SYSTEM. Common debugging features such as breakpoints, read/write memory, run, halt, and single-stepping are all supported. There is no need to purchase expensive emulator-based HW. These kits are complete with all hardware, software, cables and power supply. The user needs only to provide a PC running Windows (95/98/NT/2000/XP) with a free COM port.

MOUSER STOCK NO.	Silicon Labs Part No.	Description	Price Each
634-C8051F005DK	C8051F005DK	Development Kit for C8051F000, F001, F002, F005, F006, F010, F011, F012, F015, F016, F017, F018 and F019 MCUs	69.00
634-C8051F020DK	C8051F020DK	Development Kit for C8051F020, F021, F022, and F023 MCUs	79.00
634-C8051F040DK	C8051F040DK	Development Kit for C8051F040, F041, F042, and F043 MCUs	179.00
634-C8051F060DK	C8051F060DK	Development Kit for C8051F060, F061, F062, and F063 MCUs	179.00
634-C8051F120DK	C8051F120DK	Development Kit for C8051F120, F121, F122, F123, F124, F125, F126, F127, F130, F131, F132 and F133 MCUs	99.00

Silicon Laboratories

USB TOOLSTICK

The USB ToolStick platform is a fully contained evaluation and development system in a USB stick form-factor that demonstrates Silicon Laboratories' easy-to-use development tools. Using only a PC with a USB port, designers can fully experience the Silicon Laboratories software development environment in conjunction with the MCU on-chip debugging hardware that allows full, non-intrusive access to the target CPU, peripherals and memory. The software development environment consists of the easy-to-use Integrated Development Environment (IDE), editor, debugger, Flash programmer and a demonstration version of the Keil compiler.

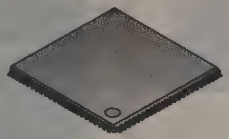
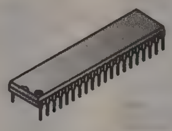
SST Microcontrollers and Power Amplifiers

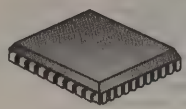
RoHS Compliant This page of product is compliant.



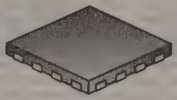
TQFP-100



PDIP-40



PLCC-44



VQFN-16

SST ATA FLASH DISK CONTROLLER

SST's ATA Flash Disk Controller is well suited for solid-state mass storage applications in high-performance, flash media-based data storage systems. They are ideal for smaller, lighter designs and low power consumption in applications such as portable computers, digital cameras, music players, PDAs, hand-held terminals and set-top boxes.

RoHS Compliant

Features:
- Host Interface supports ATA/ATAPI-5 and CFA 2.0 Commands
- Interface and support standard NAND flash media up to 16 Gbit
- Supports 512 Byte and 2K Byte page size Media Flash
- Flash Media Interface: 8-bit and 16-bit access
- Supports up to PIO Mode-4 and Multiword DMA Mode-2
- Low power, 5V/3.3V interface
- Low standby current
- Pre-programmed embedded firmware
- Internal or external system clock option
- 20-byte unique ID for expanded security
- Write-Protect or Power-Down pin for preventing data overwrites
- Advanced security features

SST COMPACTFLASH CARD CONTROLLER

The SST55LC100 CompactFlash Card Controller is the heart of a high-performance, flash media-based Compact-Flash card solution. It supports the Single Level Cell (SLC) media only. This technology suits solid state mass storage applications offering new, expanded functionality while enabling smaller, lighter designs with lower power consumption. The CompactFlash interface is widely used in products such as portable and desktop computers, digital cameras, music players, handheld data collection scanners, PDAs, handy terminals, personal communicators, audio recorders, monitoring devices, and set-top boxes.

Features:
- CompactFlash Association Specification Revision 2.0 standard
- Low current operation
- 20-byte unique ID for enhanced security
- Power management unit
- Interface for standard NAND Flash media
- Flash Media Interface: 8-bit or 16-bit access
  - Supports up to 8 flash media devices directly
  - Supports Single-Level Cell (SLC)
- Integrated Power-On Reset Circuit
- Pre-programmed Embedded Firmware
- Automatic recognition and initialization of Flash Media devices

RoHS Compliant

SST FLASHFLEX51 8-BIT MICROCONTROLLERS

The FlashFlex51 family of 8-Bit microcontroller products include SST's patented and proprietary SuperFlash® CMOS semiconductor process technology.
The products use the 8051 instruction set and are pin-for-pin compatible with standard 8051 microcontroller devices.
They are designed to be programmed in-system and in-application on the PCB for maximum flexibility.

Features:
- 8-Bit 8051-compatible microcontrollers with embedded SuperFlash® memory
- Individual block/page security lock
- Dual-block SuperFlash® memory
- Small sector architecture: 128-byte sector size
- Low power modes:
  - Idle mode
  - Power-down mode with external wake-up
- Clock doubling option
- Three high-current drive pins for LEDs
- Serial interfaces: 1 Channel Enhanced UART and SPI
- Programmable Counter Array (PCA) (5 channel)
- Watchdog Timer (WDT)
- Brown-out detection (BOD)
- In-System Programming (ISP) & In-Application Programming (IAP)
- Two 16-bit (2-byte) data pointer (DPTR)
- Ten interrupt sources with four levels of priority
- Three 16-bit timer/counters

RoHS Compliant

SST HIGH-POWER, HIGH-GAIN AMPLIFIERS

SST's power amplifiers are based on the highly reliable advanced InGaP/GaAs HBT technology. These power amplifiers can easily be configured for high-power, high-efficiency applications with superb power-added efficiency while operating over the 2.4~2.5 GHz frequency range. These are ideal for the final stage power amplification in battery-powered 802.11g/b WLAN transmitter applications.

Features:
- High linear output power
- High power-added efficiency
- Low operating current
- Built-in ultra-low I_{REF} power-up/down control
- Low idle current
- High-speed power-up/down
- High temperature stability
- Low shut-down current
- On-chip power detection
- 25dB dynamic range on-chip power detection
- Simple input-output matching

Applications:
- WLAN (IEEE 802.11g/b)
- Home RF
- Cordless phones
- 2.4 GHz ISM wireless equipment

STMICROELECTRONICS STM32 ARM Cortex™

STMicroelectronics

STMICROELECTRONICS STM32 (CORTEX™-M3)

The STM32 family of 32-bit Flash Microcontrollers is based on the breakthrough ARM Cortex™-M3 core - a core specifically developed for embedded applications. The STM32 family benefits from the Cortex-M3 architectural enhancements including the Thumb-2 instruction set to deliver improved performance with better code density, significantly faster response to interrupts, all combined with industry leading power consumption. ST is now the first leading MCU supplier to introduce a product family based on this core. The STM32 family is built to offer new degrees of freedom to MCU users. It offers a complete 32-bit product range that combines high performance, low power and low voltage, while maintaining full integration and ease of development.

Applications:

Industrial
- Printers, Scanners
- Industrial Networking
- Inverters
- PLC

Building and Security
- Alarm Systems
- Video Intercom
- HVAC

Low Power
- Glucose Meters
- Power Meters
- Battery Applications

Appliances
- Motor Drives
- Application Controls
- 3-phase motor drive (STM32F103 only)

Consumer
- PC Peripherals
- Gaming
- Digital Camera
- GPS Platforms

Advantages:
- Leading-edge
- Superior and innovative
- Low power/low voltage capability
- Maximum integration
- Easy development
- Fast time to market

RoHS Compliant

DEVELOPMENT TOOLS

ST's 32-bit STM32 microcontrollers are supported by a complete range of high-end and low-cost development tools. This extensive line includes easy-to-use starter kits, complete development tool solutions, programming tools and embedded operating systems, all tailored for STM32 ARM Cortex-M3-based MCUs.

For quantities of 10 and up, call for quote.

MOUSER STOCK NO.		Description	Price Each
Mfr.	Mfr. Part Number		
511	**STM3210B-PRIMER**	Complete, ultra low-cost kit for evaluation and application development.	**37.70**
511	**STM3210B-EV/WS**	Complete hardware evaluation platform with the STM32F103, implementing the full range of device peripherals and features.	**362.70**
511	**STM32103B-D/RAIS**	Daughter card that converts the STM3210B-SK/RAIS to the Performance line.	**92.30**

THIRD-PARTY SOFTWARE AND TOOLS

Users can choose from a full range of development solutions that deliver start to finish control of application development from a single environment. Solutions come with in-circuit emulators, and offer project management, source editing, application building and debugging from a single, easy-to-use graphical interface. They are available for all popular C/C++ compilers compatible with ARM cores.

The STM32 is already supported by a range of portable royalty-free, small-footprint operating systems to meet a variety of application constraints from low cost to high security.

As for our other ARM-based microcontrollers, we are developing with our partners a set of low-cost starter kits. These are complete (evaluation board, emulator, software toolset), low-cost, out-of-the-box solutions from Hitex, IAR, Keil and Raisonance for evaluating and starting development on the STM32.

ST6 GENERAL PURPOSE CONTROL 8-BIT

The ST62 family is optimized for low to midrange 8-bit embedded control applications which are often subject to two conflicting requirements: obtaining both high noise immunity and low overall system cost. With a rich selection of peripherals and memory sizes including data EEPROM, the ST62 family is available in packages ranging from 16 to 100 pins, making it easy to find the product that matches the cost target. The ST62 family is based on a standard 8-bit CPU core, surrounded by a powerful range of peripherals. The ST62 family offers all the major functions needed for embedded control: RC oscillator, 32Khz internal oscillator, safe power-on, high-current buffers for directly driving LEDs and TRIACs (with zero-crossing detection directly from the mains), safety oscillator, 8-bit ADC, data EEPROM, LCD driver, SPI, UART, Auto-Reload Timer... Each device offers a different mix of peripherals, so you can pick the one with only those features required by your application and you only pay for the hardware you really need.

Abbreviations:
ART = Auto-reload timer
IC/OC = Input capture/output compare
LVD = Low-voltage detection
OSG = Oscillator safeguard
ROP = Readout protection
SPI = Serial peripheral interface
UART = Universal asynchronous receiver transmitter

For quantities of 250 and up, call for quote.

ST7 INDUSTRY STANDARD FAST CORE ARCHITECTURE

The ST7 core is based on an industry standard 8-bit architecture, extended by STMicroelectronics to improve support for high level language programming and to provide additional interrupt handling features. The accumulator-based core has six internal registers including a 16-bit program counter. The instruction set has 63 instructions with 17 addressing modes offering 8x8-bit unsigned multiply, true bit manipulation, various bit/byte transfer modes and powerful branching logic. Peripheral resources are handled via dedicated interrupts and registers.

- Fast multiplication: 11 cycles or 1.37 μsecs for 8 x 8 bits (16-bit result)
- Rich choice of addressing modes for efficient handling of data in RAM (fast manipulation of tables).
- Direct memory addressing (no page handling overhead)
- Up to 16 interrupt vectors for flexible interrupt management.
- Fast interrupt response: 1.5μs typical (with 5-byte context save).
- Powerful bit manipulation instructions

Abbreviations:
ADC = Analog to digital converter
CAN = Controller area network
DALI = Digital addressable lighting interface
I2C = Inter-integrated circuit
IAP = In-application programming
ICP = In-circuit programming
ISP = In-situ programming
LVD = Low-voltage detection
PLL = Phase locked loop
ROP = Readout protection
SCI = Serial communications interface
SPI = Serial peripheral interface
SWG = Square wave generator
USB = Universal serial bus
WDG = Watchdog timer

For quantities of 250 and up, call for quote.

ST7FMC THREE-PHASE MOTOR CONTROL STANDARD FAST CORE SMD ARCHITECTURE

ST7FMC Three-Phase Motor Control Standard Fast Core Architecture 8-Bit The ST7MC family is built around an industry-standard 8-bit core. All devices feature standard MCU peripherals, and ST's on-chip motor control peripheral, the Motor Control Cell, which consists mainly of a three-phase Pulse Width Modulator multiplexed on six high-sink outputs, with a highly flexible Back EMF (BEMF) zero-crossing detector and co-processor unit for the sensorless control of permanent magnet Brushless Direct Current (BLDC) motors. ST's patented 'three resistors' sensorless control method - in conjunction with on-chip comparators, op-amp - provides the lowest possible system cost and the highest system integration for BLDC motor control.

Abbreviations:
IAP = In-application programming
ICD = In-circuit debugging
ICP = In-circuit programming
LVD = Low-voltage detection
PLL = Phase locked loop
ROP = Readout protection
RTC = Real time clock timer
SCI = Serial communications interface
SPI = Serial peripheral interface

For quantities of 250 and up, call for quote.

STMICROELECTRONICS 8 / 16 / 32-Bit Microcontrollers

STMicroelectronics

ARM™ CORE SERIES 16/32-BIT

**Products may be RoHS compliant.
Check mouser.com for RoHS status.**

Invest in a microcontroller that can grow to meet expanding performance requirements and allows you to reuse your software and hardware investment. The ARM™ series is ideal for embedded applications requiring a compact yet powerful MCU, or versatile scalable solutions such as user interfaces, factory automation systems and point-of sale applications. Built on leading ARM™ architecture, these series makes you extremely responsive to emerging requirements, enabling you to implement changes rapidly at low cost.

Key Benefits:

- Shortens your development cycle and adapts easily to your customers' expectations
- Best-in-class Flash random access times:
  - up to 48MHz with 0 wait states (with acceleration)
  - up to 30MHz with 0 wait states (without acceleration) with no penalty from context switches and branches. This allows deterministic and optimum behavior ideal for real time applications
- Small, low pin-count TQFP64 package
- TQFP144 package with external memory bus

Key Features:

- Industry standard ARM7TDMI RISC 16/32 bit CPU
- 128K / 256K embedded Flash
- 16 /64K high-speed SRAM
- Versatile package options
- Up to 10 communication interfaces including CAN, USB, HDLC, MMC and smartcard interface
- Four low power modes
- Extensive application development tools including a low-cost kit based on the popular ARM RealView® Developer Suite.

Abbreviations:

CAN = Controller area network
EMI = External memory interface
HDLC = High level data link controller
I2C = Inter-integrated circuit
RTC Real time clock
SC = Smart card
SCI = Serial communications interface
SPI = Serial peripheral interface
UART = Universal asynchronous receiver transmitter
USB = Universal serial bus
WDG = Watch dog timer

For quantities of 250 and up, call for quote.

ST7 FLASH STICK (ST IN-CIRCUIT COMMUNICATION KIT)

The ST in-circuit communications kit (STICK) is an ideal introduction to the world of ST7 flash microcontrollers. It is a complete kit for programming the flash ST7 microcontroller. The STICK acts as a communications interface between your PC and the ST7 flash microcontroller soldered on your application board. It can program ST7 flash devices powered with any voltage within their datasheet specified range.

Features:

- ST7 visual programmer software (STVP7)
- Interface board
- Power supply
- All necessary cables

MOUSER STOCK NO.		Supported Devices	Price Each
Mfr.	**Mfr. Part Number**		
511	**ST7-STICK/US**	ST7LITE Series, ST7226x Series, ST7232x Series, ST72252x Series, ST7256x Series	**93.60**

ST7 IAR ARM LOW COST STARTER KIT

The starter kits are complete, cost effective solutions for starting application development and evaluating STMicroelectronic's ARM™-core based microcontrollers. They come with all the hardware and software developers need to start developing applications for STR711F, STR712F, and STR91X devices, including the KickStart Development Board with STR71xF microcontroller, the IAR JLink-KS USB-to-JTAG debugger and IAR Embedded Workbench® integrated development environment with 32KB KickStart version of the C/C++ compiler, built in Flash loader and sample projects covering all STR71xF peripherals.

MOUSER STOCK NO.		Supported Devices	Price Each
Mfr.	**Mfr. Part Number**		
511	**STR711-SK/IAR**	STR711FR1T6 and STR711FR2T6	**310.96**
511	**STR712-SK/IAR**	STR712FR1T6 and STR712FR2T6	**310.96**

STR7 ARM™ EVALUATION BOARDS

NEW FROM SUPPLIER

The STR7 Eval boards are complete development platforms for the STR71x, STR73x, and STR75x boards. These boards are both cost effective, flexible and open design to demonstrate the capability of the STR7x series of flash micro-controllers and to enable rapid evaluation of the STR71x devices and available peripherals. It includes the high performance STR7x devices that boasts 256 Kbytes embedded flash with best-in-class random access time, 64 Kbytes on-chip high spedd SRAM as well as up to 10 serial communication interfaces, including USB and CAN.

MOUSER STOCK NO.		Supported Devices	Price Each
Mfr.	**Mfr. Part Number**		
511	**STR710-EVAL**	Complete STR71x dev platform including STR710FZ2T6 ARM7TDMITMI 256 Kbytes embedded flash, 64 Kbytes on-chip high speed SRAM,10 serial interfaces, including high speed SRAM,10 serial interfaces, including USB and CAN.	**312.00**
511	**STR730-EVAL**	Development platform for the STR73x series. Open design including rich set of peripherals and CAN serial communication.	**206.96**
511	**STR750-EVAL**	Evaluation board with ARM® core-based STR75xF microcontrollers. Includes high performance STR750F with 2.0 USB, 3 UART channels, internal Flash and inernal SRAM memory.	**248.30**

ST LOW COST RAISONANCE & HITEX STARTER KITS

NEW FROM SUPPLIER

These starter kits are complete solutions for starting application development and evaluating STMicroelectronics families of microcontrollers. They come with all the hardware and software you need to start developing applications for the STR7x, ST7LITEx, and ARM series microcontrollers. These kits come complete with evaluation board, targeted micrcontroller, the Ulink USB-to-JTAG in-circuit debugger/programmer and integrated development environment for complete solutions on designing the ultimate application development.

MOUSER STOCK NO.		Supported Devices	Price Each
Mfr.	**Mfr. Part Number**		
511	**ST72F34X-SK-RAIS**	REva Raisonance starter kit supporting ST7LITEx, ST723x, and ST72263 MCU's.	**154.96**
511	**STR750-SK/RAIS**	Reva Starter Kit supporting Raisonance's ARM7TDMI™ and ARM966E™ core-based MCU's.	**206.70**
511	**STR750-SK/HIT**	Hitex Starter Kits for ST ARM® (STR91XSK/HIT, STR750-SK/HIT, STR730-SK/HIT, STR710-SK/HIT) complete development solution.	**206.70**

EZ80F91 FLASH MICROCONTROLLER

Features:

- eZ80 core operating at 50MHz
- On-chip 10/100BaseT Ethernet MAC
- 256KB on-chip Flash memory
- 16KB on-chip SRAM
- Power management features supporting Sleep, Halt, and peripheral power-down controls
- Glueless external bus supporting eZ80, Z80, Intel, and Motorola modes
- 32 GPIO
- IrDA compatible Infrared Encoder/Decoder
- Two independent UARTs with multidrop mode
- SPI and I2C ports
- Four, 16-bit counter/timers with I/O capability
- Watch Dog Timer with selectable clock inputs
- Real-time clock with on-chip 32KHz oscillator
- Full-feature PLL
- JTAG and ZiLOG Debug Interfaces
- Interrupt controller supporting internal and external maskable interrupts as well as non-maskable interrupts input
- New DMA-like eZ80 instructions

Description:

The eZ80F91 is the flagship device of the eZ80Acclaim! family of Flash Microcontrollers (MCUs). With 50MHz speed and an on-chip Ethernet MAC, designers now have the necessary performance to execute complex applications quickly and efficiently. Combining 256KB of Flash with 16KB SRAM, the eZ80F91 provides the memory needed to implement communication protocol stacks and achieve the flexibility when performing in-system updates of application firmware. Complementing the high performance, the eZ80F91 offers a rich set of serial communication peripherals to address application designs ranging from consumer electronics and point-of-sale terminals to security systems and industrial control.

EZ80F92 FLASH MICROCONTROLLER

Features:

- eZ80 core operating at 20MHz
- Up to 128KB on-chip Flash memory
- Up to 8KB on-chip SRAM
- Power management features supporting Sleep, Halt, and peripheral power-down controls
- Glueless external bus supporting eZ80, Z80, Intel, and Motorola modes
- Up to 24 GPIO
- IrDA compatible Infrared Encoder/Decoder
- Two independent UARTs with multidrop mode
- SPI and I2C ports
- Six, 16-bit counter/timers with I/O capability
- Watch Dog Timer with selectable clock inputs
- Real-time clock with on-chip 32KHz oscillator
- JTAG and ZiLOG Debug Interfaces
- Interrupt controller supporting internal and external maskable interrupts as well as non-maskable interrupts input
- New DMA-like eZ80 instructions

Description:

The eZ80F92 is another of the devices which make up the eZ80Acclaim!™ family of Flash Microcontrollers (MCUs). Combining 20MHZ speed, 128KB of Flash, and 8KB SRAM, the eZ80F92 provides the performance and memory needed to implement communication protocol stacks and achieve the flexibility when performing in-system updates of application firmware. Complementing the high performance, the eZ80F92 offers a rich set of serial communication peripherals to address application designs ranging from consumer electronics and point-of-sale terminals to security systems and industrial control. The zZ80L92 is the ROMless equivalent to the eZ80F92/93.

EZ80F93 FLASH MICROCONTROLLER

Attention:

- Above features and development kit for eZ80F92Acclaim!™ are applicable to eZ80F93Acclaim!™.

Description:

The eZ80F93 is a new part comprising part of the eZ80Acclaim!™ family of Flash Microcontrollers (MCU's). Combining 20MHz speed, 64KB of Flash, and 4KB SRAM, the eZ80F93 provides the performance and memory needed to implement communication protocol stacks amd achieve the flexibility when performing in-system updates of application firmware. Complementing the high performance, the eZ80F93 offers a rich set of serial communication peripherals to address application designs ranging from consumer electronics and point-of-sale terminals to security systems and industrial control.

ZILOG Z8 ENCORE!™ FLASH MCU DEVELOPMENT KIT

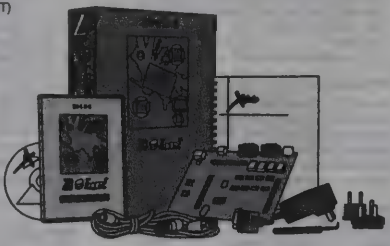
The Z8 Encore! Microcontroller (MCU) Development Kit is a general-purpose platform that allows design engineers to evaluate the capabilities and operation of the Z8 Encore! family of microcontrollers and provides tools to shorten the development cycle. Included with the Development Kit is a free full-version ANSI C-Compiler and a Target Interface Module board that interfaces with the on-chip debugger converting a one-wire interface to a two-wire RS-232-like interface. All necessary hardware, software tools, and technical documentation are included, to provide a complete solution at minimal cost.

Features:

Hardware:
- Evaluation Board, Z8 Encore!
- Smart Cable – DB9 to six-pin male (Z8F08200100KIT)
- RS-232 DB9 Serial Cable
- 9VDC Universal Power Supply

Software:
- ZDS II - Z8 Encore! IDE with ANSI C-Compiler
- Sample code
- Device Driver software

CD-ROM contains:
- ZDS II Quick Start Guide
- Development Kit User Manual
- ZDS II - IDE User Manual
- EZ8 CPU User Manual
- Product Specifications
- Product Briefs
- Application Notes
- Flyer
- Product Linecard



MOUSER STOCK NO.		Description	Price Each
Mfr.	Mfr. Part Number		
692—	Z8F08200100KIT	ENCORE! KIT (4K-8K Flash)	39.95

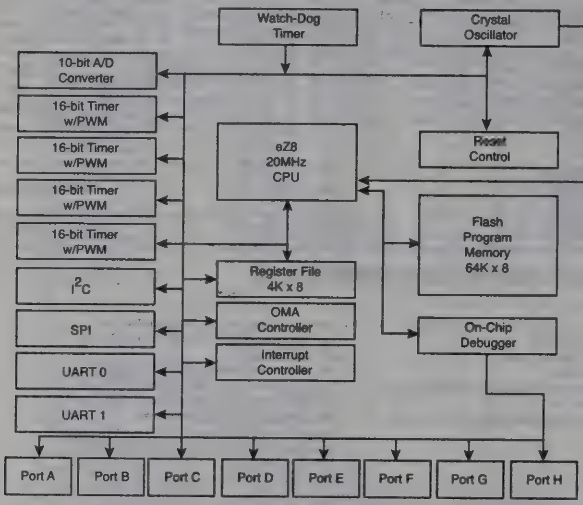
692—	Z8F642ICE00ZEM	In Circuit Emulator	2795.00

The New Z8 Encore!™ MCU Block Diagram



Features:	Benefits
20MHz CPU Operation	Faster execution of CPU instructions at up to 10 MIPS
Up to 12-Channel, 10-Bit A/D Converter	Precise measurement of analog signals
3-Channel DMA (16-64KB Parts Only)	Increases performance by allowing direct peripheral-to-memory swaps
Up to 64KB of Flash	Allows for code upgrades anytime during development (even in final application)
Up to 4KB SRAM	Extends data space to accommodate large stanck and data tables
SPI and I2C Ports	Supports both universal serial communication protocols with ability to operate simultaneously
Up to Two 9-Bit UARTs	Enables full featured serial communications including RS-485 and IrDA Encoder/Decoder interface
Up to Two 9-Bit UARTs	Enables full featured serial communications including RS-485 and IrDA Encoder/Decoder interface
Up to 24 Interrupts	Hardware interrupts increase CPU's bandwidth
Up to Four 16-Bit Timers with PWMs	Multi-mode timers allow for precise measurement of system events
Single-pin, On-Chip Debugger	Eliminates need for external debug hardware

---

ZILOG Z8 ENCORE!™ MICROCONTROLLERS

- Each Z8 Encore! Microcontroller contains the following: Watchdog Timers, SPI Port, 12C Port.
- Core Speed: 20 MHz

RoHS Compliant This page of product is compliant.

ZILOG Z8 ENCORE!™ MICROCONTROLLERS (CONT.)

◆ Surface Mount Device

- Each Z8 Encore! Microcontroller contains the following: Watchdog Timers, SPI Port, 12C Port.
- Core Speed: 20 MHz

RoHS Compliant

ZILOG ZNEO™ Z16F SERIES 16-BIT FLASH MICROCONTROLLERS

This new line of 16-bit Flash Microcontrollers is based on a ground up, highly-effective core architecture that compliments ZILOG's Z8 Encore! 64K Series by providing more memory (128KB Flash) and a higher performance of 20 MIPS. ZNEO is packed with peripherals, balancing price and performance.

Z16F Series Features:

- External 16-bit bus with 16MB linear address space
- 8-,16-, and 32-bit ALU operations
- Single cycle execution
- Fast 600KHz 12-channel SAR ADC
- 5.53MHZ IPO
- Analog Comparator
- Op Amp
- 6 channel synchronized PWM timers
- Internal/external DMA
- Enhanced SPI
- 12C master/slave
- 2 LIN-UARTS

The wide variety of peripherals gives the new Z16F Series the value-added punch necessary for today's budget conscious designs.

Products may be RoHS compliant.
Check mouser.com for RoHS status.

ZILOG Z8 GP SERIES MICROCONTROLLERS

The ZGP323H/L is OTP- and ROM-based members of ZiLOG's new Z8 GP™ MCU family of **general-purpose** microcontrollers. Offering 237 bytes of **general-purpose** RAM and up to 32KB of OTP memory, ZiLOG's Z8 GP MCU family provides support for standard, extended, and automotive temperature ranges. The low-voltage series supports voltage ranges from 2.0V to 3.6V, making it perfect for low-power applications. The high-voltage series supports voltage ranges from 2.0V to 5.5V. Both series offer fast-executing memory use, high GPIO, sophisticated interrupts, input/output bit manipulation, automated pulse generation/reception, and internal key-scan pull-up resistors.

RoHS Compliant

ZILOG DEVELOPMENT TOOLS

MOUSER STOCK NO.	Zilog Part No.	Description	Price Each
692-ZGP32300100ZPR	ZGP32300100ZPR	Z8 GP ZGP323 Programming System (Includes an OTP program module, program I/F, 2 package adapters, the ZDS II, a 28-pin CDIP device, and sample code)	99.00

ZILOG Encore!™ XP Microcontrollers

Products may be RoHS compliant.
Check mouser.com for RoHS status.

ZILOG Z8 ENCORE!™ XP FLASH MCU DEVELOPMENT KIT

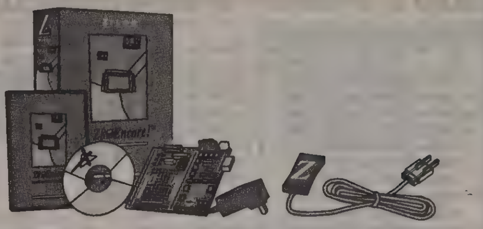
The Z8 Encore! XP Microcontroller (MCU) Development Kit is a general-purpose platform that allows design engineers to evaluate the capabilities and operation of the Z8 Encore! XP family of microcontrollers and provides tools to shorten the development cycle. Included with the Development Kit is a free full-version ANSI C-Compiler and a Target Interface Module board that interfaces with the on-chip debugger converting a one-wire interface to a two-wire RS-232-like interface. All necessary hardware, software tools, and technical documentation are included, to provide a complete solution at minimal cost.

Features:

Hardware:
- Development Board, Z8 Encore! XP (Z8F04A28100KIT)
- Smart Cable - DB9 to six-pin male
- RS-232 DB9 Serial Cable
- 9VDC Universal Power Supply

Software:
- ZDS II - Z8 Encore! IDE with ANSI C-Compiler
- Sample code
- Device Driver software

CD-ROM contains:
- ZDS II Quick Start Guide
- Development Kit User Manual
- ZDS II - IDE User Manual
- EZ8 CPU User Manual
- Product Specifications
- Product Briefs
- Application Notes



MOUSER STOCK NO.	Description	Price Each
692-Z8F04A28100KIT	4K Series (28-Pin) w/Full ANSIC Compiler	39.95
692-Z8F04A08100KIT	4K Series (8-Pin) w/Full USB Smart Cable	49.99

ZILOG Z8 ENCORE!™ XP MICROCONTROLLERS

Specifications:
- Each Z8 Encore! Microcontroller contains the following: Watchdog Timers, Analog Comparator, Temp. Sensor, Current Sense Amplifier, and Internal Precision Oscillator
- Core Speed: 20MHz

Features:	Benefits
20MHz CPU Operation	Faster execution of CPU instructions at up to 10 MIPS
Single pin in-circuit programming	Fast, easy programming
1K - 4K Flash memory sizes	Allows efficiency in program memory
Up to 8 channel 10-bit ADC	Precision analog measurement
Up to 128B non-volatile data storage	Location for frequent or repetitive logging
Up to 1K RAM	Plenty of space for programs, stacks, and data
Internal Precision Oscillator	Eliminates need for crystal or resonator
On-chip Temperature Sensor	Thermostat applications with no external components
Analog Comparator	On-chip saving space
Transimpedence Amplifier	On-chip OPAMP
WDT with "fail-safe"	Back up oscillator for power fail

Z8Encore! XP 4K Series

ZILOG EZ80L92 DEVELOPMENT KIT

The EZ80L92 Development Kit provides the developer with a complete set of tools for either the evaluation of the EZ80L92 device or the development of a new application. The kit features two primary boards: the EZ80™ Development Platform and the EZ80L92 Ethernet Module. In addition, all of the necessary hardware, software, and technical documentation are included. This development kit provides designers comprehensive support to begin designing immediately. The eZ80Acclaim! eZ80F92/F93
are pin-compatible versions of the eZ80L92 with ntegrated Flash memory.

Features:

- EZ80 Development Platform
- EZ80 E-NET Module
- EZ80 Development Kit User Manual
- EZ80 Quick Start Guide
- ZPAK II Debug Interface Module
- ZDS II with C-Compiler Software and Documentation (CD-ROM)
- Ethernet Hub
- EZ80 Software and Documentation (CD-ROM)
- International Power Supply (110/220V) Cables

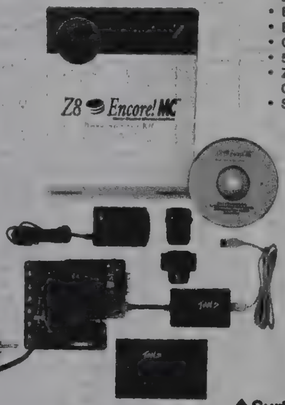
ZILOG ZR06 MOTOR CONTROL

The Z8FMC16100 Series Motor Control Development Kit is our affordable yet comprehensive development tool for the Z8 Encore! MC™ Z8FMC16100 Series motor control microcontrollers. It includes a development board with the Z8FMC16 device which plugs into a brushless DC (BLDC) application board with a BLDC motor. Included is also an opto-isolated USB smart cable for safe programming and debugging and our ZDS II integrated development environment (IDE) with a full ANSI C compiler.



Features:

- Z8FMC16100 series MDS development board
- Brushless DC (BLDC) motor
- BLDC motor control application board
- Opto-isolated USB smart cable
- 5V DC universal power supply
- ZiLOG Developer Studio II IDE with a full ANSI C compiler
- Sample code

RoHS Compliant

ZILOG Z8 OTP Microcontrollers

Products may be RoHS compliant.
Check mouser.com for RoHS status.

The 8-Bit One-Time Programmable (OTP) Microcontrollers are members of ZiLOG's single-chip Z8 MCU family featuring enhanced wake-up circuitry, programmable Watch-Dog Timers, Low-Noise EMI options, and easy hardware/software system expansion capability.

◆ **Surface Mount Device**

RoHS Compliant

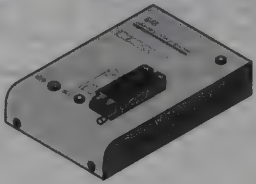
B&K PRECISION Programmers and Erasers

BK PRECISION PROGRAMMERS

Each programmer has been designed for ease-of-use and reliable performance. Whether you are working with PLCC, SOIC, TSOP, DIP, TQFP, SSOP, PSOP or QFP, B+K Precision has an extensive line of socket adapters to interface with any IC package. These programmers are a must for anyone that tests, repairs, or programs any electronic device that uses a memory IC. Fast and reliable, you can depend upon B+K Precision programmers.

Memory Programmer



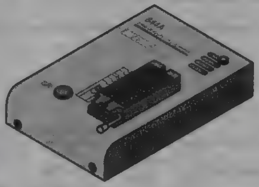
Features:

- EPROM, EEPROM, Flash, NVRAM and serial EEPROM capability
- Low cost
- 32 pin DIL ZIF (Zero Insertion Force) socket accepts both 300/600 mil devices up to 32 pin
- Parallel printer port interface
- Easy to use control program, DOS and Windows 95/98/Me/NT/2000/XP compatible
- One year warranty
- Device library: >6187

B&K Part Number 848

615-848A	EEPROM Programmer, Single Socket	**275.00**

Device Programmer



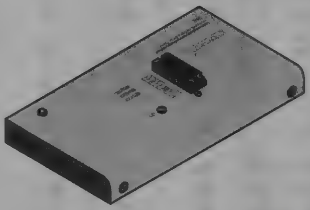
Features:

- Small, fast and powerful programmer
- 40 pin DIL ZIF (Zero Insertion Force) socket accepts both 300/600 mil devices up to 40 pins
- In-circuit serial programming (ISP) capability included
- High-speed IEEE 1284 printer-port interface, up to 1MB/sec. transfer rate
- Easy to use control program, DOS and Windows 95/98/Me/NT/2000/XP compatible
- One year warranty
- Device library: >8996

B&K Part Number 844A

615-844A	Device Programmer (Windows software included)	**449.00**

Universal Device Programmer



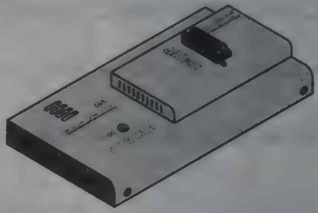
Features:

- Fast and accurate programming
- 48 pin DIL ZIF (Zero Insertion Force) socket accepts both 300/600 mil devices up to 48 pin
- 48 pin ZIF socket, no adapter required for any DIP device up to 48 pins
- Parallel printer port interface
- Windows 95/98/Me/NT/2000 compatible
- One year warranty
- Device library: >11848

B&K Part Number 864

615-864	Universal Programmer	**719.00**

Universal Device Programmer



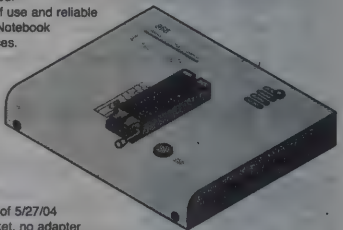
Features:

- Fast and accurate programming
- 48 pin DIL ZIF (Zero Insertion Force) socket accepts both 300/600 mil devices up to 48 pins
- 48 pin ZIF socket, no adapter required for any DIP device up to 48 pins
- Gang programming capability
- Parallel printer port interface
- Windows 95/98/Me/NT/2000/XP compatible
- One year warranty
- Device library: >16874

B&K Part Number 865

615-865	Universal Programmer (Windows based software included)	**995.00**

Universal Device Programmer with USB Interface



Features:

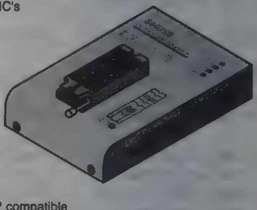
- The 866 is a universal device programmer with an extensive device library that is constantly updated.
- This programmer has been designed for ease of use and reliable performance and it is ideal for use with Laptop/Notebook computers that do not have parallel port interfaces.
- Whether you are working with PLCC, SOIC, TSOP, DIP, TQFP, SSOP, PSOP or QFP, B+K Precision has an extensive line of socket adapters to interface with any IC package.
- This programmer is a must for anyone that Tests, Repairs, or Programs any electronic device that uses a memory IC.
- 48 pin DIL ZIF (Zero Insertion Force) socket accepts both 300/600 mil devices up to 48 pin
- Over 12,438 supported devices (9,734 devices supported via USB interface) as of 5/27/04
- Fast and accurate programming 48 pin ZIF socket, no adapter required for any DIP device up to 48 pins
- Connector for in-circuit programming (ISP) Windows 95/98/Me/NT/2000/XP compatible
- Device library: >16887

B&K Part Number 866

615-866	Universal Device Programmer with USB Interface	**1025.00**

Device Programmer with USB PC Interface

The model 844USB is a great low cost USB interface programmer designed for anyone who wants to read, copy, program or burn common IC's



Features:

- Extensive device libraries, >11510
- Low cost and high performance
- Free technical support
- USB 2.0/1.1 Interface
- 40 pin DIL ZIF (Zero Insertion Force) socket accepts both 300/600 mil devices up to 40 pins
- Small, fast and powerful programmer
- In circuit serial programming (ISP) capability
- Easy to use control program, Windows 95/98/Me/NT/2000/XP compatible

B&K Part Number 844USB

615-844USB	USB Device Programmer	**536.56**

BK PRECISION ERASERS

Features:

- **615-850**: UV-EPROM eraser with small dimensions, high erasing efficiency, and simple operation. Up to 5 EPROMs in 40-pin DIP packages can be erased simultaneously. A built-in timer is preset to an optimum erasing period.
- **615-851**: Heavy duty EPROM eraser that can simultaneously erase up to 40 24 pin EPROMs. It has an all-metal case plus an advanced designed chip drawer that prevents UV radiation from being a hazard to the user. The chip drawer is lined with conductive foam to prevent electrostatic damage to the chips.

Specifications:

- Timer Setting: **615-850**:15 min., 12VDC/500mA (AC/DC adapter included)
  615-851: 60 min., 100-120VAC 50/60Hz
- UV Bulb Wattage: **615-850**: 4W; **615-851**: 10W
- Supplied: **615-850**: AC/DC adapter, Pad, Manual
  615-851: AC Power cord, Manual

For quantities of 5 and up, call for quote.

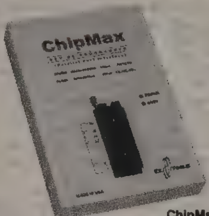
EETools Universal Programmers

ee Tools DEVELOPMENT PROGRAMMERS

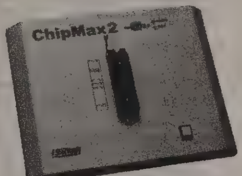
ChipMax and ChipMax2 Programmers



ChipMax

ChipMax Features:

- Supports - EPROM, EEPROM, FLASH memory, PALCE, GAL, Serial PROM, CMOS PROM, and Microcontrollers (NO NAND Flash, NO PAL, NO Bi-Polar, NO Flash Memory over 512Mbit).
- Support over 8500 universal devices.
- B/P/V takes 32 Sec. for AM29F040 Flash Memory.
- Supported voltages down to 5.0 Volt.
- PC interface for Parallel Port.
- External AC (110 or 240) Power Supply.
- Standard 40-pin Textool ZIF socket.
- Win 95/98/NT/2000/XP.



ChipMax2

ChipMax2 Features:

- Supports - EPROM, EEPROM, FLASH (NOR/NAND) memory, PALCE, GAL, FPGA, Serial PROM, Parallel PROM, CMOS PROM, and Microcontrollers (NO PAL/Bi-Polar, NO Flash Memory over 512Mbit).
- Support over 12000 universal devices.
- B/P/V takes 85 Sec. for 64 Mbit Flash Memory.
- Supported low-voltages: 1.8 / 2.0/ 2.7/ 3.0/ 3.3/ 5.0 Volt.
- PC interface for USB Port.
- External AC (110 or 240) Power Supply.
- Standard 48-pin Textool ZIF socket.
- External Start key for auto programming.
- Win 95/98/NT/2000/XP.

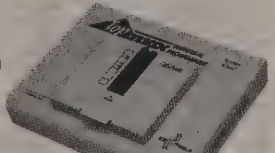
TopMax and TopMaxII Programmers



TopMax

TopMax Features:

- Supports - EPROM, EEPROM, FLASH (NOR/NAND) memory, PLD, FPGA, Serial PROM, Parallel PROM, CMOS PROM, and Microcontrollers (NO Flash Memory over 512Mbit).
- Support over 12000 universal devices.
- B/P/V takes 165 Sec. for 64 Mbit Flash Memory.
- Supported low-voltages: 1.8 / 2.0/ 2.7/ 3.0/ 3.3/ 5.0 Volt.
- PC interface for Parallel Port.
- Built-in AC (110-240) Power Supply.
- Standard 48-pin Textool ZIF socket.
- Win 95/98/NT/2000/XP.

TopMaxII

TopMaxII Features:

- Supports - EPROM, EEPROM, FLASH (NOR/NAND) memory, PLD, FPGA, Serial PROM, Parallel PROM, CMOS PROM, and Microcontrollers.
- New technology and support fast programming time
- Support over 16000 universal devices.
- B/P/V takes 85 Sec. for 8 of 64 Mbit Flash Memory
- Supported low-voltages: 1.8 / 2.0/ 2.7/ 3.0/ 3.3/ 5.0 Volt.
- Built-in AC (110-240) Power Supply.
- Standard 48-pin Textool ZIF socket.
- External Start key for auto programming.
- PC Interface for USB Port.
- Win 95/98/NT/2000/XP.

ee Tools PRODUCTION PROGRAMMERS

ProMax Universal Programmers

ProMax Features:

- High speed universal device programmer for concurrent programming mode.
- Supported devices:
  - EPROM, EEPROM, FLASH (NOR/NAND) memory, PLD
  - FPGA, Serial PROM, Parallel PROM, CMOS PROM, Microcontrollers

  (NO PAL/Bi-Polar, NO Flash Memory over 512Mbit)
- Support over 12000 universal devices.
- B/P/V takes 85 Sec. for 4/8 of 64 Mbit Flash Memory.
- Supported low-voltages: 1.8 / 2.0/ 2.7/ 3.0/ 3.3/ 5.0 Volt
- PC interface for USB Port.
- Built-in AC (110-240) Power Supply.
- Standard 48-pin Textool ZIF socket.
- External Start key for auto & concurrent programming mode.
- Win 95 / 98 / NT / 2000 / XP.

MultiMax-8G+ Stand-Alone Programmer

MultiMax-8G+ Features:

- High-speed Stand-alone Programmer
- Universal Device Supported in 8-sockets (Over 8000 selections):
  - EPROM, EEPROM, FLASH (NOR/NAND) memory, PLD
  - FPGA, Serial PROM, Parallel PROM, CMOS PROM, Microcontrollers
- Keyboard: 22 keys + independent Start key.
- 1.25 Gbit for Standard Buffer Size
- High Speed: 2.5 Mbit/Sec.
- Fast download data via USB 2.0.
- Supported low-voltages: 1.8/ 2.0/ 2.7/ 3.0/ 3.3/ 5.0 Volt.
- Standard 48-pin Textool ZIF socket.
- External Start key for auto programming.
- Display: Wide graphic LCD (40 words, 8 lines).
- B+P+V time: 170 sec. for Intel 28F128J3A.

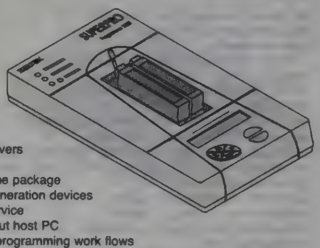
XELTEK Universal Programmers and EPROM Erasers

XELTEK

XELTEK SUPERPRO-3000U AND SUPERPRO-3000U-100 (43,000 + DEVICES)

These high-speed, USB connected universal programmers provide a scalable programming solution, purchased singly for development or 4 units clustered for low volume production and you can add up to 16 SuperPro 3000U. With up to 100 universal pin drivers, low voltage device support down to 1.5V and broad universal adapter range, it supports over 43,000 + devices.



Features:

- Over 43,000 + devices supported including memories, microcontrollers and programmable logic
- 48-Pin ZIF socket, no adapters required for 300/600 mil DIP devices up to 48 pins
- 48 universal pin drivers - full functionality on every pin maximizes adapter flexibility
- Optional 100-Pin PEP module with 100 universal pin drivers (standard on SP-3000U-100)
- Universal adapters support all devices that come in same package
- Low voltage device support – down to 1.5V for latest generation devices
- Operates in standalone mode for manufacturing and service – built in keyboard and LCD display for operation without host PC
- Auto-Sense and Batch mode simplifies and speeds up programming work flows
- Auto Serial number adds unique ID to programmed device for identification & tracking
- USB connectivity to host PC or USB hub for high speed download
- Free software updates from internet – new device updates released monthly
- Operating sytem supports: Windows 95/98/ME/2000/NT/XP/Vista
- High speed operation • Includes TTL and SRAM test • 1-Year warranty

RoHS Compliant

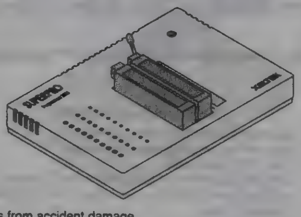
XELTEK SUPERPRO-580U (31,000 + DEVICES)



Features:

- Programs high-density Flash memory devices at near theoretical minimum programming times. (Program+verify INTEL28F320W18, 32Mb less than 13.5s)
- Standard 48 pin universal pin-drivers come with universal package adapters to support all types of devices in same package with a single adapter. No adapters are needed for DIL devices.
- Advanced hardware features minimized Bounce noise.
- Supports 31,000 + devices from up to 144 IC manufacturers including MEMORY, MCU, PLD.
- Pin continuity and wrong chip insertion check prevent chips from accident damage.
- Over-current and over-voltage protection for programmer hardware.
- Operator friendly control software combines many powerful functions with ease of use. Recognizes file formats and detects large file offset automatically.
- Operating sytem supports: Windows 95/98/ME/2000/NT/XP/Vista

Device Supported:

- EPROM, Paged EPROM, Parallel and Serial EEPROM, FPGA Configuration Serial PROM, FLASH Memory (NOR and NAND), BPROM, NVRAM, SPLD, CPLD, EPLD, Firmware HUB, Microcontroller, MCU, Standard Logic.

Socket Adapters Supported:

DIP, SDIP, PLCC, JLCC, SOIC, QFP, TQFP, VQFP, TSOP, TSOPII, SOP, P SOP, TSSOP, SON, EBGA, FBGA, VFBGA, μBGA, CSP, SCSP, etc.

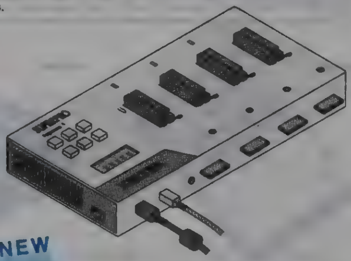
XELTEK SUPERPRO-9000U (35,000 + DEVICES)

Features:



- 4 ea. high speed 48 pin DIP programming sockets.
- Supports 35,000 + devices and growing, more than any gang programmer in the market.
- 430+ socket adapters including 150+ FBGA package types supported.
- Operates in both PC and stand-alone mode without a pC attached for volume production.
- Asynchronous fast programming. Each module is independent from one another.
- Programming starts automatically when a chip is inserted.
- High speed programming
- ISP (In-System Programmable) devices supported.
- No experienced operator with the knowledge of PC or Windows necessary
- Four 128MB compact flash cards included.
- Supports up to 4GB CF card.
- Operating sytem supports: Windows 95/98/ME/2000/NT/XP/Vista

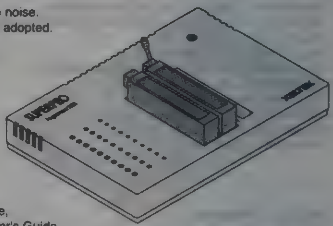
XELTEK SUPERPRO-280U (21,000 + DEVICES)

Features:



- Programs high-density Flash memory devices.
- Standard 48 pin universal pin-drivers come with universal package adapters to support all types of devices in same package with a single adapter. No adapters are needed for DIL devices.
- Advanced hardware features minimized Bounce noise. Only IC manufacturers approved algorithms are adopted.
- Supports 21,000 + devices from up to 129 IC manufacturers including MEMORY, MCU, PLD.
- Free life-time software update.
- Pin continuity and wrong chip insertion check prevent chips from accident damage.
- Over-current and over-voltage protection for programmer hardware.
- Operator friendly control software combines many powerful functions with ease of use.
- PC Interface: USB
- One year warranty.
- Items included: programming unit, DIL48 Module, AC adapter, Program CD-ROM, USB Cable, User's Guide
- Operating sytem supports: Windows 95/98/ME/2000/NT/XP/Vista

Device Support:

- EPROM, Paged EPROM, Parallel and Serial EEPROM, FPGA Configuration Serial PROM, FLASH Memory (NOR and NAND), BPROM, NVRAM, SPLD, CPLD, EPLD, Firmware HUB, Microcontroller, MCU, Standard Logic.

Socket Adapters Supported:

- DIP, SDIP, PLCC, JLCC, SOIC, QFP, TQFP, VQFP, TSOP, TSOPII, SOP, P SOP, TSSOP, SON, EBGA, FBGA, VFBGA, μBGA, CSP, SCSP, etc.

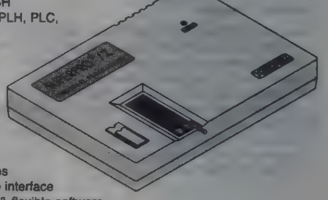
XELTEK SUPERPRO-Z (3,500 + DEVICES)

Features:



- 40 Pin Low Cost Universal Programmer
- 3,500 + devices supported, Most E/EPROM, FLASH
- GAL, EP3xx/6xx/9xx, PEEL, PALCE, PLUS, PLS, PLH, PLC, ATV, ATF, CPL, 85Cxxx,5Cxxx,DS12xx
- Microcontrollers 87xx/ 89xx/ Z86Exx/ TMS320xxx/ D77Pxx/ D75Pxx/ D78Pxx/ PD75xxx/
- HD6370xxx/PIC16Cxx/17Cxx, COP87xx, and PSD3XX
- DOS Shell, Change directory, Print, Quit
- Printer Port Interfaces, parallel communication, uses address 278H,378H, 3BCH
- Supports 3500+ devices
- Easy interface to LAPTOP, PC, PS/2 or compatibles
- Mouse support, user friendly menu driven software interface
- High speed programming, cost effective hardware & flexible software
- Supports most E(E)PROM, Series E(E)PROM, and Flash
- Entry Level Product

FLASH MEMORY

Atmel offers parallel Flash memories in a variety of configurations and architectures to address the unique requirements of today's applications. Our first generation AT29 Series devices were developed for applications requiring updates of small portions of data throughout the memory array. The AT29 Series most notable feature is the small sector sizes which create an ideal solution for both program code and data storage.

EPROM

Atmel has one of the broadest range of OTP EPROMs in the market. Atmel OTPs are widely used for embedded program code storage in applications such as: cordless phones, pagers, video game players, printers, modems, graphics cards, instrumentation, automotive, medical, telecom, networking, industrial control equipment and hard disk drives.

For quantities of 500 and up, call for quote.

ATMEL Memory and Programmable Logic

RoHS Compliant **This page of product is compliant.**

PARALLEL EEPROMS

Atmel is the world's #1 manufacturer of Parallel EEPROM products. The Parallel EEPROM enables the user or application to update the stored data byte-by-byte or by full sector, while providing reliability benefits of high programming endurance and data retention, and faster read timing than Serial Interface protocols.

For quantities of 500 and up, call for quote.

SERIAL EEPROMS

Atmel is the leading supplier of Serial EEPROM devices, used in a broad spectrum of consumer, automotive, telecommunication, medical, industrial and PC related markets. Primarily used to store personal preference data and configuration/setup data, Serial EEPROMs are the most flexible type of non-volatile memory utilized today.

For quantities of 500 and up, call for quote.

CATALYST I²C BUS (2-WIRE) LOW STANDBY CURRENT, PARTIAL ARRAY WRITE PROTECTION

RoHS Compliant

These I2C Serial CMOS EEPROMs, internally organized as 16 pages of 16 bytes each, for a total of 256 bytes of 8 bits each. It features a 16-byte page write buffer and supports both the Standard (100 kHz) as well as Fast (400 kHz) I2C protocol. Write operations can be inhibited by taking the WP pin High (this protects the entire memory) or by setting an internal Write Protect flag via Software command (this protects the lower half of the memory).

Features:

- Supports Standard and Fast I²C Protocol
- 1.7 V to 5.5 V Supply Voltage Range
- 16-Byte Page Write Buffer
- Hardware Write Protection for entire memory
- Software Write Protection for lower 128 Bytes
- Schmitt Triggers and Noise Suppression Filters on I²C Bus Inputs (SCL and SDA).
- Low power CMOS technology
- 1,000,000 program/erase cycles
- 100 year data retention

CATALYST I²C BUS (2-WIRE) LOW STANDBY CURRENT, FULL ARRAY WRITE PROTECTION

These I2C Serial CMOS EEPROMs features a 16-byte page write buffer and supports both the Standard (100 kHz) as well as Fast (400 kHz) I2C protocol. Write operations can be inhibited by taking the WP pin High (this protects the entire memory).

Features:

- Supports Standard and Fast I²C Protocol
- 1.8 V to 5.5 V Supply Voltage Range
- 16-Byte Page Write Buffer
- Hardware Write Protection for entire memory
- Schmitt Triggers and Noise Suppression Filters on I²C Bus Inputs (SCL and SDA).
- Low power CMOS technology
- 1,000,000 program/erase cycles
- 100 year data retention

RoHS Compliant

CATALYST MICROWIRE BUS (3-WIRE)

These Microwire Serial EEPROMs are configured as either registers of 16 bits (ORG pin at VCC) or 8 bits (ORG pin at GND). Each register can be written (or read) serially by using the DI (or DO) pin. They are manufactured using Catalyst's advanced CMOS EEPROM floating gate technology. The devices are designed to endure 1,000,000 program/erase cycles and has a data retention of 100 years.

Features:

- High speed operation: 1MHz
- Low power CMOS technology
- 1.8 to 6.0 volt operation
- Selectable x8 or x16 memory organization
- Self-timed write cycle with auto-clear
- Hardware and software write protection
- Power-up inadvertant write protection
- 1,000,000 Program/erase cycles
- 100 year data retention
- Sequential read

RoHS Compliant

CATALYST SPI BUS WITH LOW STANDBY CURRENT (MOTOROLA COMPATIBLE)

These SPI Serial CMOS EEPROMs use Catalyst's advanced CMOS Technology that substantially reduces device power requirements. They operate via the SPI bus serial interface and is enabled though a Chip Select (CS). In addition to the Chip Select, the clock input (SCK), data in (SI) and data out (SO) are required to access the device. The HOLD pin may be used to suspend any serial communication without resetting the serial sequence.

Features:

- 10 MHz SPI compatible
- 1.8 to 5.5 volt operation
- Hardware and software protection
- Low power CMOS technology
- SPI modes (0,0 & 1,1)
- 1,000,000 program/erase cycles
- 100 year data retention
- Self-timed write cycle
- 16-byte page write buffer
- Block write protection – Protect 1/4, 1/2 or all of EEPROM array

RoHS Compliant

CATALYST LOW VOLTAGE, LOW POWER 3.3 VOLT PARALLEL EEPROMS

These low voltage, low power, CMOS parallel EEPROMs organized as 8K x 8-bits or 32K x 8-bits. They require a simple interface for in-system programming. On-chip address and data latches, self-timed write cycle with autoclear and VCC power up/down write protection eliminate additional timing and protection hardware. DATA Polling and Toggle status bit signal the start and end of the selftimed write cycle. Additionally, they feature hardware and software write protection. They are manufactured using Catalyst's advanced CMOS floating gate technology. It is designed to endure 100,000 program/erase cycles and has a data retention of 100 years.

Features:

- 3.0V to 3.6V Supply
- Low Power CMOS Dissipation
- Simple Write Operation: On-Chip Address and Data Latches Self-Timed Write Cycle with Auto-Clear
- Fast Write Cycle Time
- CMOS and TTL Compatible I/O
- Automatic Page Write Operation
- End of Write Detection
- Hardware and Software Write Protection
- 100,000 Program/Erase Cycles
- 100 Year Data Retention

RoHS Compliant

CATALYST LOW POWER 5.0 VOLT PARALLEL EEPROMS

These are fast, low power, 5V-only CMOS Parallel EEPROMs organized as 2K x 8-bits, 8K x 8-bits, 32K x 8-bits or 64K x 8-bits. They require a simple interface for in-system programming. On-chip address and data latches, self-timed write cycle with auto-clear and VCC power up/down write protection eliminate additional timing and protection hardware. DATA Polling signals the start and end of the self-timed write cycle. They also feature hardware write protection. They are manufactured using Catalyst's advanced CMOS floating gate technology. They are designed to endure 10,000 program/erase cycles and has a data retention of 10 years.

Features:

- Fast read access times
- Low power CMOS dissipation
- Simple write operation:
  - On-chip address and data latches
  - Self-timed write cycle with auto-clear
- Fast write cycle time: 5ms max.
- CMOS and TTL compatible I/O
- Hardware and software write protection
- Automatic page write operation
- End of write detection
- 100,000 program/erase cycles
- 100 year data retention

RoHS Compliant

CATALYST Flash Memory and NVRAM

CATALYST SEMICONDUCTOR, INC.

RoHS Compliant **This page of product is compliant.**

The CAT28F001 is a high speed 128K X 8 bit electrically erasable and reprogrammable Flash memory ideally suited for applications requiring in-system or after sale code updates.

The CAT28F001 has a blocked architecture with one 8 KB Boot Block, two 4 KB Parameter Blocks and one 112 KB Main Block. The Boot Block section can be at the top or bottom of the memory map and includes a reprogramming write lock out feature to guarantee data integrity. It is designed to contain secure code which will bring up the system minimally and download code to other locations of CAT28F001.

The CAT28F001 is designed with a signature mode which allows the user to identify the IC manufacturer and device type. The CAT28F001 is also designed with on-Chip Address Latches, Data Latches, Programming and Erase Algorithms.

The CAT28F001 is manufactured using Catalyst's advanced CMOS floating gate technology. It is designed to endure 100,000 program/erase cycles and has a data retention of 10 years. The device is available in JEDEC approved 32-pin plastic DIP, PLCC or TSOP packages.

FEATURES: CAT28F001 SERIES

Boot Block Flash Memory

- Fast Read Access Time: 70/90/120/150 ns
- On-Chip Address and Data Latches
- Blocked Architecture:
  - One 8 KB Boot Block w/ Lock Out
  - Top or Bottom Locations
  - Two 4 KB Parameter Blocks
  - One 112 KB Main Block
- Low Power CMOS Operation
- 12.0V ± 5% Programming and Erase Voltage
- Automated Program & Erase Algorithms
- High Speed Programming
- Commercial, Industrial and Automotive
- Temperature Ranges
- Deep Powerdown Mode:
  - 0.05 mA ICC Typical
  - 0.8 mA IPP Typical
- Hardware Data Protection
- Electronic Signature
- 100,000 Program/Erase Cycles and 10 Year
- Data Retention
- JEDEC Standard Pinouts:
  - 32 pin DIP
  - 32 pin PLCC
  - 32 pin TSOP
- Reset/Deep Power Down Mode

RoHS Compliant

CAT28Fxxx Series electrically erasable and reprogrammable Flash memory is ideally suited for applications requiring in-system or after-sale code updates. Electrical erasure of the full memory contents is achieved typically within 0.5 second.

It is pin and Read timing compatible with standard EPROM and E2PROM devices. Programming and Erase are performed through an operation and verify algorithm. The instructions are input via the I/O bus, using a two write cycle scheme. Address and Data are latched to free the I/O bus and address bus during the write operation.

FEATURES: CAT28Fxxx SERIES

Bulk Erase Flash Memory

- Fast Read Access Time: 90/120/150 ns
- Low Power CMOS Dissipation:
  - Active: 30 mA max (CMOS/TTL levels)
  - Standby: 1 mA max (TTL levels)
  - Standby: 100 mA max (CMOS levels)
- High Speed Programming:
  - 10 ms per byte
  - 1 Sec Typ Chip Program*
- Commercial, Industrial and Automotive
- Temperature Ranges
- 12.0V ± 5% Programming and Erase Voltage
- Stop Timer for Program/Erase
- On-Chip Address and Data Latches
- Electronic Signature

RoHS Compliant

CATALYST NVRAM

Features:

- Single 5V supply
- Infinite EEPROM to RAM recall
- CMOS and TTL Compatible I/O
- Power up/down protection
- 10 year data retention
- 100,000 Program/Erase cycles (EEPROM)
- Commercial, industrial, and automotive temperature ratings
- JEDEC Standard Pinouts: 18-pin DIP and 16-pin SOIC (CAT22C10)
- Low CMOS Power Consumption: Active - 40mA max., Standby: 30µA max.
- Fast RAM access times (CAT22C10): 200ns, 300ns

ISSI SRAM and DRAM

**Products may be RoHS compliant.
Check mouser.com for RoHS status.**

Integrated Silicon Solution, Inc. (ISSI), a technology leader, designs, develops and markets high performance integrated circuits for the following key markets: digital consumer electronics, networking, mobile communications and automotive electronics. Their primary products are high speed and low power SRAM and low & medium density DRAM. They also design and market EEPROM and Smartcards and are developing selected non-memory products focused on their key markets. They target high growth markets with low cost, high quality semiconductor products and seek to build long-term relationships with their customers. They have been a committed long-term supplier of memory products, including lower density and smaller volume products, even through periods of tight manufacturing capacity.

STATIC RAMS, SURFACE MOUNT

Asynchronous SRAM is an electronic logic circuit in which logical operations are not performed under the control of a clock signal with the result that logic transitions do not occur (nominally) simultaneously. In Asynchronous SRAMs, transitions may follow one another with minimum delay but at some cost in circuit complexity and risk of incorrect operation. Synchronous SRAM is an electronic logic circuit to which logical operations are performed under the control of and hence in synchronism with an externally generated clock signal.

DYNAMIC RAM (DRAM): SDR (SINGLE DATA RATE) SYNCHRONOUS, SURFACE MOUNT

ISSI's offers a wide variety of Dynamic RAM (DRAM). DRAM is a form of volatile memory in which stored information is degraded with time. They include EDO (Extended Data Out)/FPM (Fast Page Output) DRAMs, SDRAMs (Synchronous Dynamic Random Access Memory) and DDR I (Double Data Rate 1 Synchronous Dynamic Random Access Memory) synchronous DRAMs. They achieve a high-speed data transfer using pipeline architecture. All input and output signals refer to the rising edge of the clock input.

Features:

- Fully synchronous operation
- Internal bank for hiding row access/precharge
- Programmable burst length - (1, 2, 4, 8 or full page)
- Random column address every clock cycle
- Burst termination by burst stop and precharge command

RoHS Compliant

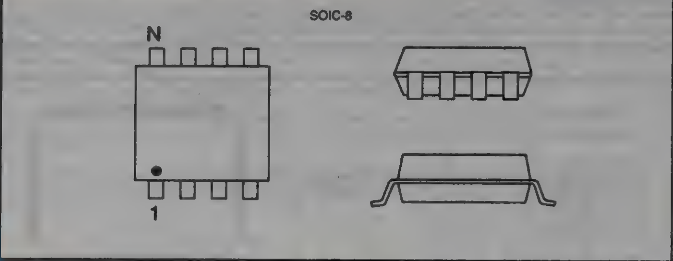
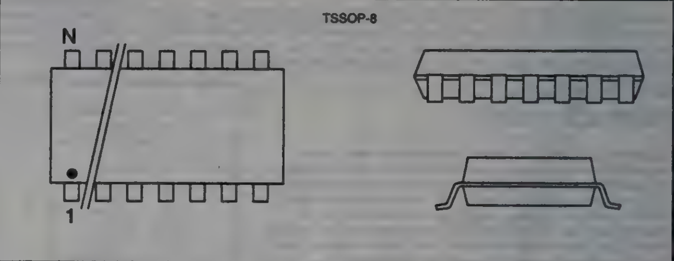
ISSI Serial EEPROMS

ISSI

RoHS Compliant This page of product is compliant.



SOIC-8



TSSOP-8

ISSI offers a wide range of Serial EEPROMS. They offer 2-wire Serial Microwire and SPI Bus EEPROMs in a variety of densities and organizations. They maintains compatibility with the popular protocols in the industry so it is easy to use in applications using each of these bus types.

MICROWIRE BUS SERIAL EEPROMS

Features:

- Industry-standard Microwire serial interface
  - Non-volatile data storage
  - Wide operating voltage VCC = 1.8V to 5.5V
  - Full TTL compatible inputs and outputs
  - Auto increment for efficient data pump
- User configured memory organization
  - By 16-bit or by 8-bit
- Hardware and software write protection
  - Defaults to write-disabled state at power-up
  - Software instructions for write-enable/disable
- Enhanced low voltage CMOS E2PROM technology
- Versatile, easy-to-use interface
  - Self-timed programming cycle
  - Auto erase-before-write
  - Programming status indicator
- Durable and reliable
  - 40-year data retention after 1M write cycles

RoHS Compliant

For quantities of 1000 and up, call for quote.

2-WIRE BUS SERIAL EEPROMS

Features:

- Two wire Serial Interface, I2C Compatible
  - Bi-directional data transfer protocol
- Wide voltage operation
  - VCC = 1.8V to 5.5V
- 400 KHz (2.5V) and 1MHz (5.0V) Compatible
- Low Power CMOS Technology
  - Standby current less than 6 μA (5.0V)
  - Read current less than 2 mA (5.0V)
  - Write current less than 3 mA (5.0V)
- Hardware data protection
  - Write protect pin
- Sequential read feature
- Filtered inputs for noise suppression
- Self time write cycle with auto clear: 5 ms max @ 2.5V

RoHS Compliant

For quantities of 1000 and up, call for quote.

SPI (SERIAL PERIPHERAL INTERFACE) EEPROMS

- Serial Peripheral Interface (SPI) Compatible
  - Supports SPI Modes 0 (0,0) and 3 (1,1)
- Low voltage operation
  - VCC = 1.8V to 5.5V
- Block Write Protection
  - Protect 1/4, 1/2 or entire array
- Low power CMOS
  - Active current less than 3.0 mA (2.5V)
  - Standby current less than 1 μA (2.5V)
- 8-byte page write mode
  - Partial page writes allowed
- 10 MHz Clock Rate (5V)
- Self-timed write cycles
  - 5ms max. @ 2.5V
- High reliability
  - Endurance: 1 million cycles per byte
  - Data retention: 100 years

RoHS Compliant

For quantities of 1000 and up, call for quote.

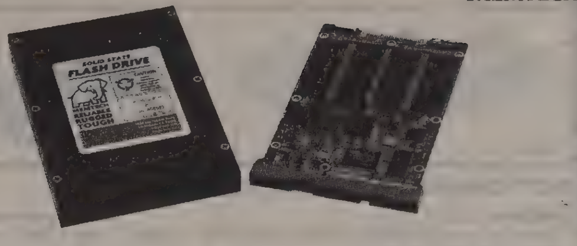
MEMTECH Solid State Flash Drives

MEMTECH



Memtech takes storage to the extreme with its ultra rugged and reliable solid state flash drives. Featuring the Kicker™ Hold Up Circuit for unparalleled data security, high write endurance, low profile and cached speeds to deliver high quality solid state flash drive solutions. Its drive products are designed for low power consumption in critical operating conditions, built to withstand extreme temperature, pressure, moisture, shock, vibration and power loss.

Memtech drives are completely solid state, with no moving parts, so there is no mechanism for mechanical wear-out. No special drivers or flash file managers are required to interface the drives Each drive is warranted for 8 years and goes through a rigorous five-step EnduroTest™ procedure.

Memtech drives have been used in combat aircrafts, locomotives, drilling rigs, high altitude balloons, the Space Shuttle and Mars Rover, and in extreme conditions, including in Antarctica, Mount Everest, and for earthquake and undersea exploration.

WOLVERINE IDE

The Wolverine solid-state flash drive is an UDMA-66 compliant IDE memory module offered in an extremely low profile form-factor. The primary storage media in the drive is sector-erasable NAND E2PROMs (Flash). Using these devices, Memtech is able to deliver uncompressed, non-volatile solid-state storage in an extremely small, rugged form-factor.

For quantities of 10 and up, call for quote.

MUSTANG IDE

The Mustang is the largest capacity 1.8" IDE drive available today. Drives are 100% IDE compatible. It employs sector erasable NAND E2PROMs (Flash) to deliver uncompressed, non-volatile solid state storage in an extremely small, rugged form factor. The drive is implemented using a custom IDE Flash controller with an integrated error detection and correction mechanism and proprietary remapping and wear-leveling technology to greatly improve data reliability. It is ideal for hand-held, portable or embedded applications. Advanced PIO modes and multi sector transfer modes are supported, as well as LBA addressing.

For quantities of 10 and up, call for quote.

BULLDOG IDE

The AT2515 is a low cost solid-state flash drive in an extremely compact low profile form-factor and exceptional speed. It is completely solid state, with no moving parts. Drives are 100% IDE compatible. The drive is implemented using a custom IDE Flash controller with multi-tasking technology. An integrated 72-bit Reed-Solomon error detection and correction mechanism and proprietary remapping and wear-leveling technology along with a power hold-up circuit greatly improve data reliability. It's cost effectiveness and low-power operation make it ideal for applications requiring high reliability at a low cost.

For quantities of 10 and up, call for quote.

STINGER SCSI

The Stinger series is a line of 100% compatible SCSI solid state drives. The Stinger series employs sector erasable NAND E2PROMs (Flash) to deliver uncompressed, non-volatile solid state storage in an extremely small, rugged form factor. Hundreds of transactions occur per second, which is critical in server and high I/O applications. The interface is implemented using a commercially available SCSI peripheral controller with a caching SRAM buffer and a Reed-Solomon error detection and on-the-fly correction mechanism that greatly improves data reliability over other drives. The ECC circuitry, in conjunction with Memtech's proprietary Active Remap™ technology, makes for a virtually bulletproof medium for data storage. All Direct Access Device commands, as well as synchronous data transfers are supported.

For quantities of 10 and up, call for quote.

SIDEWINDER SCSI

The Sidewinder is a modular, high performance solid state flash drive, designed for implementation on systems conforming to the SCSI-2 standard. Composed of a large array of 1 Gbit NAND E2PROM memories, the Sidewinder series can emulate the storage and retrieval operations of a standard rotating drive, but with faster access, throughput, ruggedness and reliability. The drives can be used in applications with harsh operating conditions critical reliability. All control functions are monitored by the on-board microprocessor. The SCSI-2 interface is implemented using a QLogic FAS209 SCSI controller. The unit responds to all Direct-Access device commands. Data integrity is maintained by error detection logic and Memtech's proprietary Active Remap(TM) technology. Active termination is jumper selectable, as is the unit's SCSI ID.

For quantities of 10 and up, call for quote.

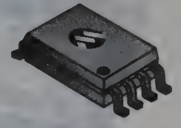
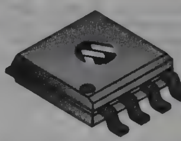
MICROCHIP Serial EEPROMs

PDIP-8



TSSOP-8



SOIC-8

DFN-8

I2C™ COMPATIBLE SERIAL EEPROM FAMILY

Features:

- Range of packages including 8MF, 8SM, 8SN, ST, 8MS, SOT, and wafer
- Maximum bus speed of 400 kHz
- Operating temperature of -40°C to +85°C
- AA=1.8-5.5V, LC=2.5-5.5V

◆ **Surface Mount Device**

SPI™ COMPATIBLE SERIAL EEPROM FAMILY

Features:

- Range of packages including 8MF, 8SM, 8SN, ST, 8MS, and wafer
- Operating temperature of -40°C to +85°C
- Maximum bus speed of 3-10MHz
- AA=1.8-5.5V, LC=2.5-5.5V

◆ **Surface Mount Device**

For quantities of 200 and up, call for quote.

MICROWIRE® COMPATIBLE SERIAL EEPROM FAMILY

Features:
- Range of packages including 8SN, ST8, 8MS, SOT6, and wafer
- Operating temperature of -40°C to +85°C
- Maximum bus speed of 3-10MHz
- AA=1.8-5.5V, LC=2.5-5.5V

RAMTRON FRAM Memory

RAMTRON

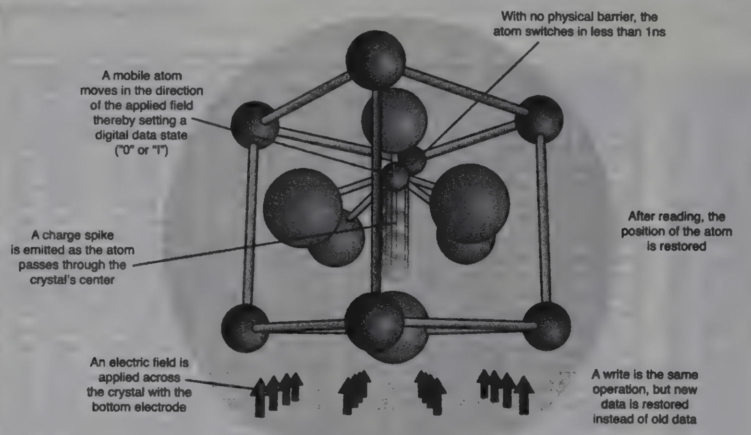
RoHS Compliant This page of product is compliant.

RAMTRON FRAM (FERROELECTRIC RANDOM ACCESS MEMORY) MEMORY

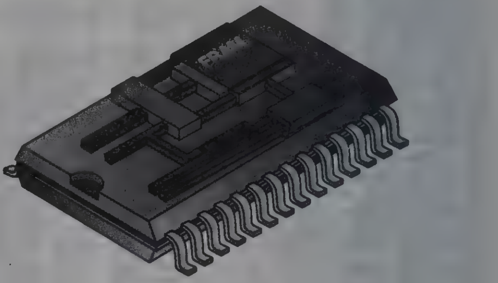
FRAM offers a unique set of features relative to other semiconductor technologies. Traditional mainstream semiconductor memories can be divided into two primary categories -- volatile and nonvolatile. Volatile memories include SRAM (static random access memory) and DRAM (dynamic random access memory). SRAMs and DRAMs lose their contents after power is removed from the electronic system. RAM type devices are very easy to use, and are high performing, but they share the annoying quirk of losing their mind when the lights go out.

Non-volatile memories do not lose their contents when power is removed. However all of the mainstream non-volatile memories share a common ancestry that derives from ROM (read only memory) technology. As you might guess, something called read only memory is not easy to write, in fact it's impossible. All of its descendants make it very difficult to write new information into them. They include technologies EPROM (almost obsolete now), EEPROM, and Flash. ROM based technologies are very slow to write, wear out after being written a small number of times, and use a large amount of power to write. FRAM offers features consistent with a RAM technology, but is non-volatile like a ROM technology. FRAM bridges the gap between the two categories and creates something completely new -- a non-volatile RAM.

When an electric field is applied to a ferroelectric crystal, the central atom moves in the direction of the field. As the atom moves within the crystal, it passes through an energy barrier, causing a charge spike. Internal circuits sense the charge spike and set the memory. If the electric field is removed from the crystal, the central atom stays in position, preserving the state of the memory. Therefore, the FRAM memory needs no periodic refresh and when power fails, FRAM memory retains its data. It's fast, and doesn't wear out!



With no physical barrier, the atom switches in less than 1ns
A mobile atom moves in the direction of the applied field thereby setting a digital data state ("0" or "1")
A charge spike is emitted as the atom passes through the crystal's center
After reading, the position of the atom is restored
An electric field is applied across the crystal with the bottom electrode
A write is the same operation, but new data is restored instead of old data



Serial FRAM

The 2-wire interface is a widely used Master, multi-slave protocol using a serial clock (SCL) and a serial data line (SDA). Multiple memory devices can reside on the 2-wire bus by using the device select pins A0-A2 on selected parts. The 2-wire protocol is designed for multi-drop applications as well.

RoHS Compliant LEAD-FREE

Features:

- Industry standard protocol (2-wire & SPI)
- High Endurance Read/Writes
- Low standby current
- NoDelay™ Writes
- Low power consumption
- Direct hardware replacement for EEPROM

Parallel FRAM

Nonvolatile Parallel High performance reads and writes with true nonvolatility without the battery. All bytewide memories have standard SRAM pinouts. They operate like SRAMs and provide nonvolatile storage with no requirement for battery backup.

RoHS Compliant LEAD-FREE

Features:

- Industry standard SRAM/EEPROM pinout
- NoDelay™ Writes
- Read and write at bus speed
- High Inductance
- Low standby current
- Low power consumption, High Endurance

S-24CXX SERIES: 2-WIRE BUS SERIAL EEPROMS

The Seiko S-24Cxx Series are 2-wire bus serial EEPROMs characterized by low power consumption and wide operating voltage. Each is capable of page write and sequential read.

Specifications:
- Low power consumption: Standby: 2.0 uA Max (Vcc = 5.5V)
  Read: 0.8 mA Max (Vcc = 5.5V)
- Operating voltage range: Read: 1.8 to 5.5V (at -40 to +85°C)
  Write: 2.7 to 5.5V (at -40 to +85°C)
- Operating frequency: 400 kHz (Vcc=5 V±10 %, at -40 to +85°C)
- Write disable function when power supply voltage is low
- Endurance: 100,000,000 cycles/word (at +25°C) write capable
  10,000,000 cycles/word (at +85°C)
  3 x 1,000,000 cycles/word (at +105°C)

RoHS Compliant

S-93CXX SERIES: 3-WIRE BUS SERIAL EEPROMS

The Seiko S-93Cxx Series are high speed, low power EEPROMs with a wide operating voltage range. Each is capable of sequential read, at which time addresses are automatically incremented in 16-bit blocks. The instruction code is compatible with the NM93CS46/56/66 Series.

Specifications:
- Low current consumption: Standby: 1.5 uA Max (Vcc = 5.5V)
  Operating: 0.8 mA Max (Vcc = 5.5V)
  0.4 mA Max (Vcc = 2.5V)
- Operating voltage range: Read: 1.8 to 5.5V (at -40 to +85°C)
  Write: 2.7 to 5.5V (at -40 to +85°C)
- Write disable function when power supply voltage is low
- Function to protect against write due to erroneous instruction recognition
- Endurance: 10,000,000 cycles/word (at +85°C)
  3 x 1,000,000 cycles/word (at +105°C)
  100,000,000 cycles/word (at +25°C)
- Data retention: 10 years (after 10,000,000 cycles/word at +85°C)

RoHS Compliant

REAL TIME CLOCKS (RTC), SURFACE MOUNT

The S-35190A and S-35390A are low-current-consumption CMOS real-time clock ICs that feature a wide operating voltage range (1.3 V to 5.5 V) and can be driven on a variety of supply voltages, from a main supply to a backup supply. The time keeping current consumption of 0.25 µA and minimum time keeping operation voltage of 1.1 V enable greatly increased battery duration.

Specifications:
- Low current consumption: Standby: 1.5 uA Max (Vcc = 5.5V)
- Wide operating range: 1.3 to 5.5V
- Minimum time keeping operation voltage: 1.1 V
- Built-in clock adjustment function
- Built-in free user register
- Built-in alarm interrupter
- Built-in flag generator at power down or power on
- Auto calendar up to the year 2099, automatic leap year calculation function
- Built-in constant voltage circuit
- Built-in 32 kHz crystal oscillator (Cd built in, Cg external)

RoHS Compliant

For quantities of 2000 and up, call for quote.

SINGLE GATE MINI-LOGIC, SURFACE MOUNT

S-75V Series (High Speed)

The S-75V series is a single gate fabricated by utilizing advanced silicon-gate CMOS technology which provides the inherent benefit of CMOS low power consumption to achieve ultra high speed operation correspond to LSTTL IC' s. Input voltage is allowed to be applied even if power voltage is not supplied because no diode is inserted between an input pin and VCC. This allows for interfaces between power supplies of different voltage, output level conversion from 5 V to 3 V and battery backup applications.

Specifications:
- Supply voltage: 2.0 to 5.5V
- Operating temperature: -40°C to +85°C
- Output current: +/- 25mA
- Propagation delay time: 3.5ns @ 5V

Applications:
- Personal computers, peripherals
- Cell phones
- Cameras
- Games

RoHS Compliant

For quantities of 2000 and up, call for quote.

S-75L Series (Low Voltage)

The S-75L series is a single gate fabricated by utilizing advanced silicon-gate CMOS technology which provides the inherent benefit of CMOS low power consumption to achieve operation by only a couple of batteries (1 to 3V). Input voltage is allowed to be applied even if power voltage is not supplied because no diode is inserted between an input pin and VCC. This allows for interfaces between power supplies of different voltage, output level conversion from 3V to 1V and battery backup applications.

Specifications:
- Supply voltage: 1.0 to 3.6V
- Operating temperature: -40°C to +85°C
- Output current: +/- 12.5mA
- Propagation delay time: 7ns @ 3V

Applications:
- Personal computers, peripherals
- Cell phones
- Cameras
- Games

RoHS Compliant

For quantities of 2000 and up, call for quote.

SST 25 SERIES SERIAL FLASH

The 25 Series Serial Flash family features a four-wire, SPI-compatible interface that allows for a low pin-count package which occupies less board space and ultimately lowers total system costs. They are manufactured with SST's proprietary, high-performance CMOS SuperFlash® technology. The split-gate cell design and thick-oxide tunneling injector attain better reliability and manufacturability compared with alternate approaches. The SST25VF040B devices significantly improve performance and reliability, while lowering power consumption. The devices write (Program or Erase) with a single power supply of 2.7-3.6V (SST25VF series) or 3.0-3.6V (SST25LF series). The total energy consumed is a function of the applied voltage, current, and time of application. Since for any given voltage range, the SuperFlash technology uses less current to program and has a shorter erase time, the total energy consumed during any Erase or Program operation is less than alternative flash memory technologies.

Features (SST27 Series):
- 5.0V Read, 12.0V Program and Erase
- Same package and pin assignements as EPROM/OTP (except SST27SF512 follows flash memory pin assignements for 32-lead TSOP packages)

Features (SST37 Series):
- 2.7-3.6V Read, 12.0V Program and Erase
- Same package and pin assignments as standard flash

RoHS Compliant

SST 27 & 37 SERIES MTP (MANY-TIME PROGRAMMABLE) PARALLEL FLASH

The 27 & 37 Series of Many-Time Programmable (MTP) low cost flash, manufactured with SST's proprietary, high performance SuperFlash® technology. The split-gate cell design and thick oxide tunneling injector attain better reliability and manufacturability compared with alternate approaches. These MTP devices can be electrically erased and programmed at least 1000 times using an external programmer with a 12V power supply. They have to be erased prior to programming. These devices conform to JEDEC standard pinouts for byte-wide memories. Designed, manufactured, and tested for a wide spectrum of applications, these devices are offered with an endurance of at least 1000 cycles. Data retention is rated at greater than 100 years. They are suited for applications that require infrequent writes and low power nonvolatile storage. These devices will improve flexibility, efficiency, and performance while matching the low cost in nonvolatile applications that currently use UV-EPROMs, OTPs, and mask ROMs.

Features (SST27 Series):
- 5.0V Read, 12.0V Program and Erase
- Same package and pin assignements as EPROM/OTP (except SST27SF512 follows flash memory pin assignements for 32-lead TSOP packages)
- For use in cordless phones, VCD players, printers and fax machines where code is frozen and in-system programming is not required

Features (SST37 Series):
- 2.7-3.6V Read, 12.0V Program and Erase
- Same package and pin assignments as standard flash
- For use in cordless phones, VCD players, printers and fax machines where code is frozen and in-system programming is not required

RoHS Compliant

29 SERIES SSF (SMALL-SECTOR FLASH) PARALLEL FLASH

The 29 Series SSF (Small-Sector Flash) devices are suited for applications that require convenient and economical updating of program, configuration, or data memory. For all system applications, they significantly improve performance and reliability, while lowering power consumption. They inherently use less energy during Erase and Program than alternative flash technologies. The total energy consumed is a function of the applied voltage, current, and time of application. Since for any given voltage range, the SuperFlash technology uses less current to program and has a shorter erase time, the total energy consumed during any Erase or Program operation is less than alternative flash technologies. They also improve flexibility while lowering the cost for program, data, and configuration storage applications.

Features (SST29EE Series):

- 128 byte Sector-Erase
- Sector-by-sector Erase operations
- Byte-by-byte Program operations

Features (SST29SF/VF Series):

- 128 byte page size
- Page-by-page Write operations
- Page-Write operation includes an internal Erase transparent to the external system

RoHS Compliant

36 SERIES CSF (CONCURRENT SUPER FLASH) PARALLEL FLASH

The 36 Series CSF (Concurrent Super Flash) is a dual-bank flash memory device designed for wireless communication and consumer applications.
The dual-bank architecture supports the Concurrent Red-Write operation where the user may read from one bank while programming or erasing in the other bank.

Features:

- Dual-bank architecture for Concurrent Read-While-Write operations
- Operating voltage: 2.7-3.6V for Read and Write operations
- Hardware top or bottom sector protection
- Flexible Erase capability
- Factory and User programmable security ID
- Erase-Suspend/Erase Resume
- User selectable x8/x16 Data Bus through a BYTE# pin
- Hardware Write protection through WP# pin

RoHS Compliant

STEC Solid State Drives

NEW! TECHNOLOGY

STEC's Zeus Solid State Drives are rugged, high-capacity, and high-throughput memory and mass storage solutions for mission-critical systems in a variety of industries. Applications include data recorders, oil pipeline inspection guides, industrial automation robots and scientific equipment. Features include: Non-volatile memory and no moving parts Compact design - only 9.5mm in height Up to 64GB storage capacity Advanced purge features that comply with government security guidance and 5 year warranty.

For quantities 100 and up, call for quote.

Type I CompactFlash Cards - Industrial Grade

RoHS Compliant

One of the most popular flash memory products in the world. STEC CompactFlash offers reliable, high-capacity storage that is compatible with CF Type I and Type II devices. Engineered for performance and reliability, these small, high speed cards are ideal for industrial and handheld applications.

For quantities 100 and up, call for quote.

ATA PC Card - Industrial Grade

STEC ATA PC cards are ideal alternatives to hard disk drives due to their high reliability and low cost per usable megabyte. ATA PC Card solutions are designed specifically for equipment requiring modular, standard form factors and moderate capacities (up to 8GB), such as telecommunication equipment, data recorders and avionics systems. ATA PC Cards are ideal "building blocks" for high-density, high-performance mass storage subsystems.

For quantities 100 and up, call for quote.

FlashDisk Module - Industrial Grade

STEC Flash Disk Modules provide non-volatile, solid state data and program storage for embedded applications. Operating system, application software compatibility and portability are ensured by the Flash Disk Module's True IDE interface - There are no proprietary software drivers or connectors required. Because they have no moving parts, STEC Flash Disk Modules are inherently more rugged and reliable than rotation hard drives.

For quantities 100 and up, call for quote.

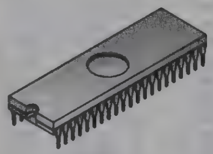
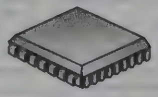
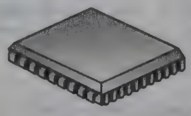
DIP-40



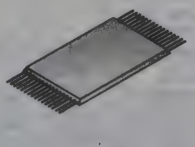
DIP-42



PLCC-32



PLCC-44



TSOP-32

STMicroelectronics offers a unique product portfolio of OTP and UV EPROM memories with densities from 256Kbit to 32Mbit, in standard and low voltage ranges. These technical features, together with an improved, very fast access time, make OTP and UV EPROM an innovative and high performance solution. They are ideal for Mask ROM replacement, bringing the advantage of flexibility for last minute programming of the latest software, without mask charge. UV EPROM and OTP ROMs are the ideal solutions for storage of system software and firmware for many applications including games, DVD players, printers and many others.

UV (ULTRA VIOLET ERASABLE) CMOS EPROMS

RoHS Compliant

STMICROELECTRONICS Serial EEPROMS

RoHS Compliant **This page of product is compliant.**

STMicroelectronics

ST Serial EEPROMs are the most flexible non-volatile memories for parameter storage because they can be written at byte level. ST offers the best portfolio in terms of densities, interfaces, low pin count and cost effective packages. Serial EEPROMs are available in various voltages and support I2C, SPI and Microwire buses. ST Quality, Manufacturing and Availability with a wide range of Serial Standard EEPROMs from1Kb up to 512Kb, 3 industry standard serial buses and 2.5V, 1.8V supply voltage ranges.

Many new applications require Serial EEPROM devices, especially in:

- Automotive (engine, dashboard, car radio, airbag and ABS)
- Communications (Corded and cordless phones, answering machines, fax, modem, networking)
- Consumer (TV, Set-Top Box, monitors, camcorder, audio MP3)
- Industrial (motor control, oscilloscope, Power/Gas meter, measuring instruments, home appliance) and Computer (printer, hard disk driver, mother board, CD-ROM, modem, keyboard).

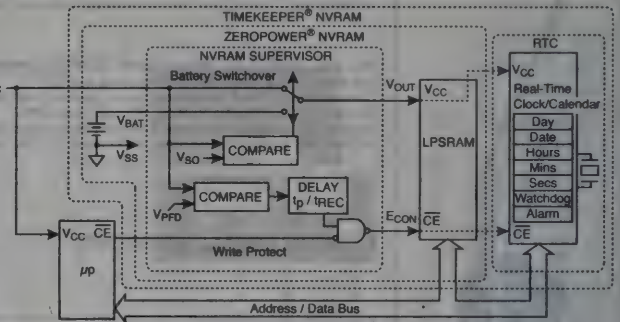
ZEROPOWER® NON-VOLATILE RAMS

ZEROPOWER® NVRAMs combine Low Power SRAMs and Automatic Battery Switchover and Write Protect circuits to implement Non-Volatile RAMs. They can be used just like standard SRAMs, but retain their contents when power is removed. Densities range from 16Mbits down to 16Kbits.

ZEROPOWER® NVRAMs retain their data, even when there is "ZERO" power present. Two key components comprise a ZEROPOWER® NVRAM: a Low-Power SRAM and an NVRAM Supervisor. The LPSRAM typically draws less than 1 micro-amp when powered by a battery and can retain its data for years when powered by only a small, lithium cell. The Battery Switchover Circuit switches the LPSRAM from system power (Vcc) to the battery (Vbat). It monitors Vcc and when it begins to fall, the battery is connected to the LPSRAM. When Vcc begins to fall, a microprocessor can behave erratically. It could inadvertently overwrite and corrupt the LPSRAM's contents. The Write Protect Circuit cuts off access to the LPSRAM to prevent this. All of ST's ZEROPOWER® NVRAMs include these features. No other special circuits are required. At densities of 256K-bits and below, the NVRAM Supervisor is integrated into the silicon with the LPSRAM. For higher densities, the two are separate ICs.



For quantities of 250 and up, call for quote.

TIMEKEEPER® NON-VOLATILE RAMS

TIMEKEEPER® NVRAMs build on ST's ZEROPOWER® NVRAMs by adding non-volatile Real-Time Clocks. The Automatic Battery Switchover and Write Protect circuits are extended to the RTC section where counter-registers keep track of year, month, day, date, hours, minutes, and seconds. A low-power 32KHz oscillator provides the timing. It is optimized to draw only a tiny amount of current - as low as 40nA - so it adds only a small additional load to the battery. The RTC registers are mapped into the LPSRAM. Eight to 16 bytes of the LPSRAM are replaced by the RTC registers. The day, date, and time are read and written just like RAM locations.

For quantities of 250 and up, call for quote.

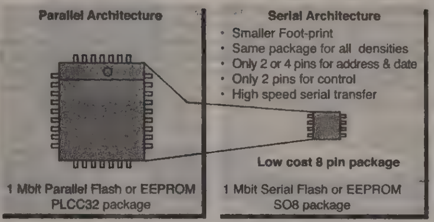
STMICROELECTRONICS SINGLE VOLTAGE (3V) FLASH MEMORY, SERIAL

If you are looking for a fast, high density Serial NVM, the M25P series at 40/50MHz, are significantly faster than competitive flash-based serial access solutions. With their fast system speed, sequential read capability, low power consumption, small package and low cost, ST's Serial Flash family offers added value to both high and low end applications. ST's family of high-speed low-voltage Serial Flash memory includes devices from 512Kb to 64Mb. They feature a four-wire SPI-compatible interface with guaranteed compatibility to future higher and lower densities. Reduced power consumption is enabled by a single supply voltage of 2.7V to 3.6V plus a deep power-down mode that typically draws 1μA.

Features:

- Best in class frequency performance: 40MHz from 512Kb to 8Mbit and 50MHz from 16Mb to 64Mbit!
- Largest portfolio: From 512Kb to 64Mb and above
- Deep Power Down Mode (1μA typical)
- Single 2.7 to 3.6V Supply Voltage
- Smallest packages: S0-8 Narrow from 512Kbit to 4Mbit, S0-8 wide for the 8Mbit, S0-16 wide for the 16Mbit, 32Mbit and the 64Mbit, 512Kbit in TSSOP-8



Parallel Architecture

1 Mbit Parallel Flash or EEPROM PLCC32 package

Serial Architecture

- Smaller Foot-print
- Same package for all densities
- Only 2 or 4 pins for address & date
- Only 2 pins for control
- High speed serial transfer

Low cost 8 pin package

1 Mbit Serial Flash or EEPROM SO8 package

For quantities of 250 and up, call for quote.

STMICROELECTRONICS SINGLE VOLTAGE (3V) FLASH MEMORY, PAGE ERASABLE SERIAL

- Sequential Read
- 1MB: Full memory READ in 42ms @ 2.7V
- From 1 up to 256 byte programming in one shot (1ms)
- Erasable by page (256 Byte) or by sector
- Write feature offering Byte granularity
- 25MHz and above Clock Rate
- Single 2.7 to 3.6V Supply Voltage
- SPI Bus Compatible Serial Interface

For quantities of 250 and up, call for quote.

ACTEL FPGAs

STARTER KITS

Demo and Evaluation Boards

Low-cost starter kits are a quick and cost-effective way to assess an FPGA technology, without the expense and time needed to design a specialized evaluation board. Unlike a specific technology demonstrator board, which would only be applicable to one application area, a starter kit provides you with design and programming software and device programmers. For an Actel flash-based device, the kit contains a board with an FPGA, a programming interface and associated programmer, and programming and design oftware. Actel offers Igloo, Fusion, ProASIC3/E, ProASIC Plus and Axcelerator Starter Kits.

FLASH FPGAs

ProASIC3 Series

The Lowest Cost FPGA Solution

ProASIC3/E devices, the third generation of Actel's nonvolatile flash FPGAs, offer a breakthrough in price, performance, density and features for today's most demanding high-volume, value-based applications, including automotive and consumer. The single-chip, reprogrammable, low-power ProASIC3/E devices support 30 k to 3 M gates and up to 616 high-performance I/Os.

RoHS Compliant

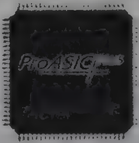
ProASIC Plus Series

The Capabilities of ASICs with the Flexibility of FPGAs

Actel's second generation of flash-based FPGA solutions, ProASIC Plus devices with FlashLock® expand on all the features and benefits offered by Actel's flash technology. The secure, live at power-up, low power ProASIC Plus devices offer the unique combination of reprogrammability and ASIC design flow in a nonvolatile programmable logic product.

Features:

- 2.5V and 3.5V CMOS Drive
- 3.3V PCI I/O
- Slew rate control
- JTAG
- 33MHz PCI
- PLL
- 4 routed clocks



RoHS Compliant

ACTEL FPGAs

ANTIFUSE FPGAs

MX Series FPGAs

The low-power MX FPGAs offer designers a reliable, single-chip ASIC alternative. Providing an efficient, flexible 5V architecture, MX is an ideal platform for integrating legacy PLDs into a single, low cost device. MX is a high-volume platform that enables solutions without compromising on cost and time.

Features:
- 3.3 and 5.0V CMOS Drive
- 5.0V Tolerant Inputs
- Price and performance leader at 5.0V

RoHS Compliant

SX-A Series FPGAs

Matching the speed and performance of an ASIC, SX-A devices can be used to generate system-wide savings by integrating multiple functions into a low cost, single-chip solution. The SX-A family decreases the premium for performance while providing a low-power, high-performance solution secure from reverse engineering.

RoHS Compliant

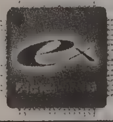
eX Series FPGAs



With a focused combination of features, eX can meet the power, speed, package and price requirements of wired and mobile e-appliances. eX enables designers to use a single-chip FPGA for their traditional low-density ASIC requirements without the long lead times and costly NREs. They are low-cost, low-power ASIC alternative for e-appliance/consumer and communications infrastructure applications.

RoHS Compliant

PROGRAMMING

FlashPro3 and FlashPro Lite are compact and cost-effective ways to program Actel flash devices. They eliminate incompatibility problems and expensive redesign costs, and offer faster time to market with their ISP capability. All programmers can be controlled by the same easy to use GUI and connect to a PC through a USB port for FlashPro3 and a parallel port for FlashPro Lite. FlashPro3 supports Fusion, IGLOO, ProASIC3 and ProASIC3E devices and is powered from the USB port. FlashPro Lite supports ProASIC Plus devices only and is powered from the target board.

MOUSER STOCK NO.	Actel Part No.	Fig.	Description	Price Each
892-FLASHPROLITE	FLASHPRO LITE	A	Supports ProASIC Plus devices and in-system programming	156.25
892-FLASHPRO3	FLASHPRO 3	B	Supports Fusion and ProASIC 3 devices	130.00

Lattice Semiconductor Corporation

LATTICE FIELD PROGRAMMABLE GATE ARRAYS (FPGAs)

LEAD-FREE

Lattice brings you a new generation of optimized low-cost FPGAs. For maximum performance and value, the LatticeECP™ (EConomy Plus) FPGA concept combines an efficient FPGA fabric with high-speed dedicated functions. Lattice's first family to implement this approach is the LatticeECP-DSP (EConomy Plus DSP) family, providing dedicated high-performance DSP blocks on-chip. The LatticeEC™ (EConomy) family supports all the general-purpose features of LatticeECP devices without dedicated function blocks to achieve even lower cost solutions.

LatticeEC (EConomy) FPGAs

LatticeEC (EConomy) FPGA devices optimize features, performance, and cost:
pre-engineered 400 Mbps DDR memory interfaces, low-cost SPI Flash FPGA configuration, mainstream LUT-4 based FPGA fabric.

For quantities of 100 and up, call for quote.

LatticeECP2 FPGAs

NEW FROM SUPPLIER

LatticeECP2 FPGA devices combine a low cost FPGA fabric with advanced features such as pre-engineered source synchronous support (including 400Mbps DDR2), high-performance embedded DSP blocks that provide up to 33GMACs of DSP bandwidth and enhanced configuration including bitstream encryption ("S-Series" Only), dual boot and TransFR I/O.

* Available in Industrial Grade

LATTICE FPGAs

RoHS Compliant This page of product is compliant.

Lattice Semiconductor Corporation

LATTICE FIELD PROGRAMMABLE GATE ARRAYS (FPGAs)

LatticeECP2M FPGAs

LatticeECP2M FPGA devices provide the same feature set as the LatticeECP2 family but have embedded 3.125Gbps SERDES and increase memory capacity to 5.3Mbits and DSP capability to 63GMACs.

LATTICE Programmable Logic

Products may be RoHS compliant.
Check mouser.com for RoHS status.

MACHXO CROSSOVER PROGRAMMABLE LOGIC DEVICE

Lattice's MachXO family provides a non-volatile, low cost, low-density, instant-on high-performance logic solution for applications that traditionally used CPLDs. This family has a high pin to logic ratio that is ideal for glue logic, bus bridging, and bus interfacing, power-up control and control logic.

For quantities of 100 and up, call for quote.

LATTICEXP NON-VOLATILE INFINITELY RECONFIGURABLE FPGA DEVICE

LatticeXP (eXpanded Programmability) FPGA devices combine the LatticeEC FPGA fabric with low-cost 130nm Flash FPGA technology in a single chip: instant-on (< 1mS configuration), non-volatile memory (on-chip Flash, no external boot prom), high security (no external configuration bitstream), and infinitely reconfigurable (SRAM FPGA fabric).

For quantities of 100 and up, call for quote.

MACHXO / LATTICEXP EVALUATION BOARDS & SOFTWARE

- ispLEVER, Base Version optional. Only required when needed to take advantage of advance functions of the MachXO/LatticeXP evaluation boards.
- ispVM required to communicate with MachXO/LatticeXP evaluations boards. Can be obtained at http://www.latticesemi.com/software
- Evaluation Boards packaged with 25 pin parallel cable.

For quantities of 100 and up, call for quote.

MATHSTAR Field Programmable Object Array™ (FPOA) MATHSTAR™

Products may be RoHS compliant.
Check mouser.com for RoHS status.

MathStar has several Field Programmable Object Array™ (FPOA) products that can help you realize your design. These high-performance semiconductors are supported by a wide range of development tools, IP libraries and supporting documentation at many different levels of detail.

Our flagship product is the MathStar™ Arrix™ FPOA. This powerful device can operate at speeds up to 1 GHz and can be programmed to serve a number of useful functions. The Arrix Family supports 400 programmable objects, 64 bits of high-speed LVDS I/O, 96 general purpose I/O and two independent external memory interfaces. The Arrix Family offers 2.5 times more internal memory and twice the high speed I/O of previous generations of FPOA products.

ITAR - International Trade in Arms Regulations and Export Administration Regulated.
An Export License will be required on this product for any exports from the U.S. and an Export End-User Statement will be required for sales within the U.S.

Arrix Family Silicon Object and I/O Specifications

Resources	Number	Operating Speed	Size Each	Total Capability
ALU	256 objects	Up to 1 GHz	16 bits + control logic	One operation per clock
RF	80 objects	Up to 1 GHz	128 Byte + 80 tag bits	One operation per clock
MAC	64 objects	Up to 1 GHz	16x16 bit multiplier	One operation per clock
Internal RAM	12 banks	Up to 700 MHz	2K x 76 bits	84 GBytes/sec total
External RAM	2 interfaces	Up to 266 MHz DDR	36 bit RLDRAM II	4.8 GBytes/sec total
GPIO	2 banks	Up to 100 MHz	48 pins per bank	96 pins
High Speed I/O Transmit	2 ports	18-500 MHz DDR	16 + 1 bit LVDS	32 Gbps
High Speed I/O Receive	2 ports	250-500 MHz DDR	16 + 1 bit LVDS	32 Gbps

SILICON PRODUCTS

Features:
- Arrix Field Programmable Object Arrays provides hundreds of Silicon Objects in the form of Arithmetic Logic Units (ALU), Register Files (RF), and Multiply Accumulators (MAC).

FPOA SOFTWARE PRODUCTS

MathStar's FPOA design tools enable designers to create, verify, program and debug their algorithms on FPOA devices. Designs are entered and behaviorally simulated using Summit Visual Elite™. Then they are compiled into an intermediate language representation and mapped into the hardware resources of the FPOA using the MathStar COAST tool for floorplanning and placement. The Object Compiler generates an object code stream that designers can load onto the array via a PROM or through the FPOA's JTAG interface. The FPOA Debugger tool allows designers to analyze their designs once they are loaded into the FPOA. The FPOA Design Flow allows designers to take advantage of the FPOA's deterministic timing. Designs implemented in FPOAs are timed only on cycle boundaries of the object and internal clock with no need for gate-level timing closure. This simplified design process improves productivity and development predictability.

Features:
- Supports graphical and System C language-based design
- Provides streamlined design process compared to FPGAs, improving productivity and development predictability
- Enables deterministic design approach, avoiding prolonged design iterations to achieve gate-level timing closure
- Includes cycle-accurate C models for fast and accurate hardware simulation
- Incorporates intuitive floorplanning, compilation, and debugging tools

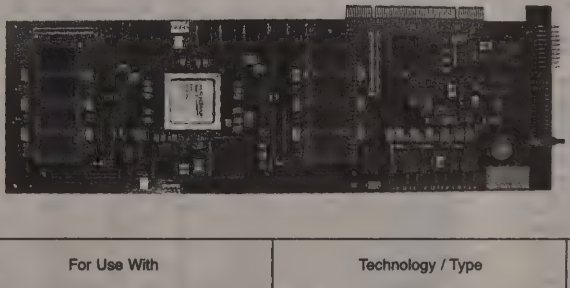
FPOA EVALUATION BOARD

MathStar offers their high-performance FPOA product on an evaluation board that is designed to speed agorithm and system development. Applications or algorithms can be designed in the FPOA tool suite well in advance of designing specific hard-ware platforms. This speeds time-to-market and decreases risk. Evaluation board ordering information is available below.



Features:
- ArrixTM Development System, includes MP2400D PCI board with MOA2400D-10 FPOA, pre-installed in PC chassis with software drivers.

STMICROELECTRONICS Programmable System Devices

**Products may be RoHS compliant.
Check mouser.com for RoHS status.**

STMICROELECTRONICS DIGITAL SIGNAL PROCESSOR (DSP) MEMORY FOR ADSP-218X FAMILY

These system memory devices are for use with Digital Signal Processors (DSP) from the popular Analog Devices ADSP-218X Family. DSM means Digital signal processor System Memory. A DSM device brings in-system programmable flash memory, programmable logic, and additional I/O to DSP systems. The result is a simple and flexible two-chip solution for DSP designs. DSM devices provide the flexibility of flash memory and smart JTAG programming techniques for both manufacturing and the field. On-chip integrated memory, decode logic and memory paging logic make it easy to add large amounts of external flash memory to the ADSP-218X family for bootloading upon power-up and/or overlay memory. The DSP accesses this flash memory using either its byte DMA (BDMA) interface or as an external data overlay memory (no DMA setup overhead).

For quantities of 250 and up, call for quote.

STMICROELECTRONICS MICRO PROGRAMMABLE SYSTEM DEVICES (μPSD)

The μPSD product family features an 8032-microcontroller core surrounded by dual banks of Flash memory, SRAM, programmable logic, I/O, and a wide variety of peripherals. With Flash and SRAM densities up to 288 Kbytes and 8 Kbytes respectively, the μPSD3200 family of devices offers the largest Flash and SRAM densities available today in an 8032-class microcontroller, and the only one to include on-chip programmable logic.

For quantities of 250 and up, call for quote.

STMICROELECTRONICS MICRO PROGRAMMABLE SYSTEM DEVICES (μPSD) 3300 SERIES

The Turbo uPSD33xx Series combines a powerful 8051-based microcontroller with a flexible memory structure, programmable logic, and a rich peripheral mix to form an ideal embedded controller. At its core is a fast 4-cycle 8032 MCU with a 6-byte instruction prefetch queue (PFQ) and a 4-entry fully associative branching cache (BC) to maximize MCU performance, enabling loops of code in smaller localities to execute extremely fast.

For quantities of 250 and up, call for quote.

74AC ADVANCED HIGH SPEED CMOS

- Supply voltage: 2.0 to 6.0V
- Propagation delay time: 4ns (Typ)
- Operating temperature: -40°C to +85°C
- Output current: 24mA (min.)

For quantities of 250 and up, call for quote.

ADVANCED
LINEAR
DEVICES, INC.

EPAD® ENERGY HARVESTING™ MODULES

Advanced Linear Devices' EPAD® ENERGY HARVESTINGTM Modules can accept energy from many types of electrical energy sources and store this energy to power conventional 3.3V and 5.0V electrical circuits and systems. They are completely self-powered and always in the active mode and are intended for low power intermittent duty cycle sampled data or condition-based monitoring/extreme lifespan applications.

NEW! TECHNOLOGY

ULTRA LOW INPUT OFFSET VOLTAGE EPAD® DUAL CMOS ANALOG VOLTAGE COMPARATORS

◆ Surface Mount

- Instrument Grade
- Patented EPAD® Technology
- Ultra Low Input Signal Power
- Ultra Low Input Currents
- Ultra Low Input Offset Voltages
- Separate and Low Outputs
- Temperature Range: 0 to 70°C

For quantities of 250 and up, call for quote.

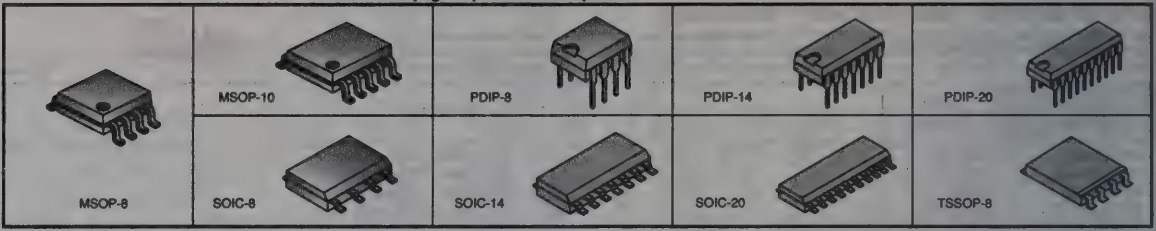
CATALYST Digitally Programmable Potentiometers

CATALYST SEMICONDUCTOR, INC.

RoHS Compliant This page of product is compliant.

DPP Advantages:
- Easy, fast adjustment
  - -With digital control, NO screwdrivers!
  - -During Assemble
  - -For field maintenance and calibration
  - -Without "opening" the box or access holes
- In-system calibration
  - -NO access holes needed
  - -Maintain EMI specs
- Non-volatile wiper position
- Multiple POTs per IC package
  - -Small PCB footprint



CATALYST 32 AND 100 TAP CONFIGURED DIGITALLY PROGRAMMABLE POTENTIOMETERS (DPP™)

◆ Surface Mount Device

Features:
- 32 position linear taper
- Nonvolatile wiper position storage
- Low power CMOS technology
- Single supply operation: 2.5V to 6.0V
- Increment up/down control
- Buffered output, CAT5111 & CAT5112
- Resistor values: 10kΩ, 50kΩ and 100kΩ

RoHS Compliant

For quantities of 500 and up, call for quote.
